RE: DME license question

To: Cc:

Dear Mr Jain,

Thank you for the clarification.

Based on what you have told me, I do not think you fall under the jurisdiction of the Colorado DME statute and therefor do not require a license through the Secretary of State.

You may want to check with other local regulating agencies to determine if they might require a license. For example, you may choose to contact the Colorado Department of Regulatory Agencies (DORA) or the Colorado Department of Health Care Policy and Financing (HCPF). I have included contact information for both, below.

DORA

HCPF

You may also want to consider any Federal Laws or requirements under which your practice may be subject.

Please feel free to contact us with any additional questions or concerns.

Yours Truly,

Kathleen Wallace

Hi Olivia,

All of our machines have the name, phone number and website where we can be contacted in case of emergency for repairs and servicing. Our user friendly website has the physical address of our storefront as well as contact information. All customers needing service on a machine for any reason are directed to us and we facilitate the maintenance and repairs. We also have a welcome call where one of our customer service personnel go over the machine with the end user and answer any and all questions that may arise. We encourage patients to reach out at any time with questions.

Our administrator application is in the process of being filled out to be returned with the assumption that we meet the requirements provided in NAC 639.6954.

If this is not correct, please provide me with the documentation that formally requires a person of contact in the state of NV.

Thanks,

Tyler Brus| tbrus@amsrco.com

(a) Cleaning of the equipment;

(b) Potential hazards and warning signs of malfunctioning or inadequately functioning equipment;

(c) Maintenance procedures for the equipment;

(d) The telephone number, contact name, and contact address for emergency servicing or repair of the equipment, and for routine servicing or repair of the equipment; and

KNOW ALL PERSONS BY THESE PRESENTS, that subject to the terms, conditions and limitations of this bond, Rehabpulse Inc., as Principal, and Hudson Insurance Company, a corporation organized and existing under the laws of Delaware, as Surety, are held and firmly bound unto the Centers for Medicare & Medicaid Services ("CMS"), an agency of the United States Department of Health and Human Services, as Obligee, in the Penal Sum of Fifty Thousand Dollars ($50,000.00) for the payment of which Principal and Surety bind themselves, their heirs, executors, administrators and assigns, jointly and severally, by these presents.

WHEREAS, Principal is enrolled in or is seeking to be enrolled in the Medicare program as a supplier of durable medical equipment, prosthetics, orthotics and supplies ("DMEPOS"); and

WHEREAS, pursuant to Section 4312(a) of the Balanced Budget Act of 1997 (Pub. L. 105-33) and 42 CFR § 424.57, the Principal is required to provide a surety bond as a condition of participation in the Medicare program, and this bond is provided in compliance with the supplier's obligations as set forth in those authorities.

NOW THEREFORE, the condition of this Bond is that if the Principal shall pay the Obligee any unpaid claims, civil money penalties and assessments (as such terms are defined by 42 CFR § 424.57(a)) then this Bond shall be null and void, otherwise to remain in full force and effect, subject, however, to the following:

1. Principal and Surety are liable under this Bond for only the amount of any unpaid claim, civil money penalty or assessment imposed by CMS or the Office of Inspector General, plus accrued interest, for which the Principal is responsible and for which, subject to Paragraph 7, the Obligee first demands payment from the Surety during the term of this Bond; provided, however, that any claim under this Bond must be related to overpayments or other events that occurred on or after March 3, 2009.

2. Surety agrees to pay a claim within 30 days of receiving written notice of the claim and sufficient evidence (as such term is defined by 42 CFR § 424.57(a)) to establish Surety's liability under this Bond.

3. CMS is the sole Obligee of this Bond, and no action may be brought on it by, or for the use or benefit of, any person or entity other than CMS or its contractors.

4. Regardless of the number of years this Bond is in effect, the number of premiums paid, or the number of claims made, the Surety's aggregate liability shall not be more than the penal sum of this Bond.

5. Subject to Paragraph 7, the Surety's liability under this Bond shall terminate and the Surety shall have no further liability upon the effective date of cancellation or expiration of this Bond by the Surety or Principal in accordance with Paragraph 6 of this Bond.

6. The Surety or Principal may cancel this Bond by providing written notice of such cancellation to the Obligee. Cancellation or expiration shall be effective 30 days after notice of cancellation or expiration is sent to the Obligee's contractor, the National Supplier Clearinghouse, provided such notice is actually received.

7. In the event this Bond is cancelled or expires, and the Principal fails to submit a new bond to the Obligee, the Surety remains liable for unpaid claims, civil money penalties or assessments that were imposed or assessed by CMS or the Office of Inspector General during the 2 years following the effective date of cancellation or expiration of this Bond.

In witness whereof, the undersigned Principal and Surety have set their hands and seals on this 7th day of April, 2021.

Subject: Letter Stating No License Required

Hi Laura,

Thank you for your time this morning to confirm that the MO Board of Pharmacy (BOP) does not generally regulate facilities that manufacture/distribute medical devices. As we register this facility in other states, some have requested the license from the facility's resident state BOP or an original letter from the 'state agency that licenses drug outlets' stating we do not need a license. Will you please send me a letter to this effect for the following facility:

A-dec, Inc.
1601 Manufacturers Drive
Fenton, MO 63026

This facility manufactures and distributes dental air compressors and dental vacuum systems, which do the following:

- A dental air compressor is intended to provide air pressure to dental devices for use during diagnostic and therapeutic treatment by licensed health care professionals.
- A dental vacuum system is intended to provide suction to dental devices for use during diagnostic and therapeutic treatment by licensed health care professionals.

Please do not hesitate to let me know if you need any further information to process this request.

Best regards,

Hi Maria,

I have confirmed with our legal department that since we submitted our application, certain transfers of shares have occurred among our family owners, thereby changing our shareholder table from what we originally submitted. I am including below a snapshot of our current shareholder base as of 12/25/21. This snapshot also clearly identifies who the trustees are for each trust.

To fulfill your request to provide personal history forms for the trustees of any trust shareholders, I believe we only need to provide the personal history form for G. Ken Austin III and Loni Parrish, each of whom are trustees of a shareholder trust as reflected below in the highlighted lines. Neither Scott Parrish nor Celia Austin are current trustees of any shareholder trust. The line you highlighted in the attached reflects the name of the trust, but as you can see below Ashley Parrish and Jessica Wolfer are trustees of the Scott and Loni Parrish Family Perpetual Trust (not Scott and Loni Parrish).

Matthew D. Austin, Grant K. Austin and Todd D. Austin, Trustees of the Kenneth and Celia Austin Family Perpetual Trust	Shareholder
Ashley N. Parrish and Jessica D. Wolfer, Trustees of the Scott and Loni Parrish Family Perpetual	Shareholder
G. Kenneth Austin III, Trustee of the G. Kenneth Austin III trust u/a dated 10/21/14	Shareholder
Loni L. Parrish, Trustee of the Loni L. Parrish Trust u/a dated 01/02/13	Shareholder
Matthew D. Austin	Shareholder
Ashley N. Parrish	Shareholder
Jessica D. Wolfer	Shareholder
	Total

As a reminder, we already provided personal history forms for each of the other individuals who either hold shares in their individual capacity or are a trustee of a shareholder trust:

- Ashley Parrish

Hi Mark,

Thank you for your call this morning. Here is the additional information I sent to Maria last week. Please review and let me know if there is anything further you need from A-dec to process our applications. As we discussed, I would like confirmation that our application is complete and we are on the agenda for the next board meeting in March.

Thanks again,

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hi Mark,

Here is a summary of the case:

> Brett Baker, a former employee (President) of the Austin-Parrish family office, filed a lawsuit in September 2019 against plaintiffs asserting voting control of A-dec, Inc. Baker shortly thereafter filed a motion for a preliminary injunction and a hearing was held in November 2019. No decision was issued and the preliminary injunction was not granted at the November hearing. A-dec, Inc. was added to the lawsuit subsequent to the initial filing as a nominal defendant. The parties reached a confidential settlement agreement, and the lawsuit was dismissed.

Please let me know if there is anything further you need to support our applications.

Thank you,
Kendra Rathkey

Subject: Letter Stating No License Required

Hi Laura,

Thank you for your time this morning to confirm that the MO Board of Pharmacy (BOP) does not generally regulate facilities that manufacture/distribute medical devices. As we register this facility in other states, some have requested the license from the facility's resident state BOP or an original letter from the 'state agency that licenses drug outlets' stating we do not need a license. Will you please send me a letter to this effect for the following facility:

A-dec, Inc.
1601 Manufacturers Drive
Fenton, MO 63026

This facility manufactures and distributes dental air compressors and dental vacuum systems, which do the following:

- A dental air compressor is intended to provide air pressure to dental devices for use during diagnostic and therapeutic treatment by licensed health care professionals.
- A dental vacuum system is intended to provide suction to dental devices for use during diagnostic and therapeutic treatment by licensed health care professionals.

Please do not hesitate to let me know if you need any further information to process this request.

Best regards,

Subject: RE: Nevada Out-Of-State Wholesaler Application- A-dec, Inc.

Hi Maria,

I have confirmed with our legal department that since we submitted our application, certain transfers of shares have occurred among our family owners, thereby changing our shareholder table from what we originally submitted. I am including below a snapshot of our current shareholder base as of 12/25/21. This snapshot also clearly identifies who the trustees are for each trust.

To fulfill your request to provide personal history forms for the trustees of any trust shareholders, I believe we only need to provide the personal history form for G. Ken Austin III and Loni Parrish, each of whom are trustees of a shareholder trust as reflected below in the highlighted lines. Neither Scott Parrish nor Celia Austin are current trustees of any shareholder trust. The line you highlighted in the attached reflects the name of the trust, but as you can see below Ashley Parrish and Jessica Wolfer are trustees of the Scott and Loni Parrish Family Perpetual Trust (not Scott and Loni Parrish).

Matthew D. Austin, Grant K. Austin and Todd D. Austin, Trustees of the Kenneth and Celia Austin Family Perpetual Trust	Shareholder
Ashley N. Parrish and Jessica D. Wolfer, Trustees of the Scott and Loni Parrish Family Perpetual	Shareholder
G. Kenneth Austin III, Trustee of the G. Kenneth Austin III trust u/a dated 10/21/14	Shareholder
Loni L. Parrish, Trustee of the Loni L. Parrish Trust u/a dated 01/02/13	Shareholder
Matthew D. Austin	Shareholder
Ashley N. Parrish	Shareholder
Jessica D. Wolfer	Shareholder
	Total

As a reminder, we already provided personal history forms for each of the other individuals who either hold shares in their individual capacity or are a trustee of a shareholder trust:

- Ashley Parrish

Hi Mark,

Thank you for your call this morning. Here is the additional information I sent to Maria last week. Please review and let me know if there is anything further you need from A-dec to process our applications. As we discussed, I would like confirmation that our application is complete and we are on the agenda for the next board meeting in March.

Thanks again,

Kendra Rathkey

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hi Mark,

Here is a summary of the case:

> Brett Baker, a former employee (President) of the Austin-Parrish family office, filed a lawsuit in September 2019 against plaintiffs asserting voting control of A-dec, Inc. Baker shortly thereafter filed a motion for a preliminary injunction and a hearing was held in November 2019. No decision was issued and the preliminary injunction was not granted at the November hearing. A-dec, Inc. was added to the lawsuit subsequent to the initial filing as a nominal defendant. The parties reached a confidential settlement agreement, and the lawsuit was dismissed.

Please let me know if there is anything further you need to support our applications.

Thank you,
Kendra Rathkey

Gilead Sciences, LLC
Shareholders and Percent Ownership

Gilead Holdings, LLC ("GHL") is the 100% owner of Gilead Sciences, LLC ("GSL").

GSL does not include a personal history form as its owner is a corporation and not a natural person

CONFIDENTIAL & PROPRIETARY - NOT SUBJECT TO THE FREEDOM OF INFORMATION ACT (FOIA) OR NEVADA PUBLIC RECORDS LAW

Explanation Regarding Section 2 Question 3 ("Has the corporation, any owner(s), shareholder(s) or partner(s) with at least 10% interest or partners with any interest, ever been subject of an administrative action or proceeding relating to the pharmaceutical industry?"):

In updating the license for Gilead Sciences, LLC ("GSL") in California, we learned that the original application contained an error in the ownership of the entity, which resulted in a delay in timely submitting an application for updating the license. The California Board of Pharmacy issued GSL a citation for not timely submitting a change in the beneficial ownership interest of the license (with a $1,000 fine) and a citation for not timely renewing the license (without a fine). GSL paid the $1,000 fine, which represented satisfactory resolution of the matter. Despite this administrative action, the California Board of Pharmacy issued GSL a wholesaler license, on May 29, 2019, which is valid and in use today.

Attachment A

Statement of Explanation

Question #2: Has the corporation, any owner(s), shareholder(s) or partner(s) with at least 10% interest or partners with any interest, ever been denied a license, permit or certificate of registration?

In November 2010, the Florida Department of Business and Professional Regulation denied the renewal of a wholesale drug distributor license for Becton, Dickinson and Company's (BD) Redlands, CA facility. The renewal was denied because the facility was no longer engaged in wholesale drug distribution in the state. Enclosed is a copy of the denial letter.

Question #3: Has the corporation, any owner(s), shareholder(s) or partner(s) with at least 10% interest or partners with any interest, ever been subject of an administrative action or proceeding relating to the pharmaceutical industry?

In September 2019, BD received a Notice of Violation from the Florida Department of Business and Professional Regulation (Department) alleging that the corporate headquarters in Franklin Lakes, NJ required a permit in addition to the distribution centers. BD entered into a settlement agreement with the Department and paid a non-disciplinary fine of $7,000. The Franklin Lakes, NJ facility currently holds an active Florida license and is in good standing with the Department. Enclosed is a copy of the settlement agreement.

In June 2021, the Alaska Board of Pharmacy (Board) opened an official investigation alleging BD's Four Oaks, NC facility failed to submit a completed application to process a change in facility manager within the required 30 days. BD submitted notification of the change via e-mail within the 30 day period. A completed application, including fingerprints, was submitted after the 30 day period and was delayed due to Covid-19 restrictions. In July 2021, the Board completed its investigation and issued a non-disciplinary letter of advisement. The investigation is now closed and no additional action will be taken. The Four Oaks, NC facility's Alaska license is in good standing with the Board. Enclosed is a copy of the letter of advisement.

In September 2021, BD's Four Oaks, NC facility agreed to a Stipulation and Final Agency Order with the Colorado Department of Regulatory Agencies (Department) related to failure to submit a completed application to process a change in designated representative within the required 30 day timeframe. BD submitted notification of the change via e-mail within the 30 day period however full submission of required documents were delayed due to Covid-19 restrictions. BD paid a fine of $1,150. The Four Oaks, NC facility currently holds an active Colorado license and is in good standing with the Department.

RE: Out of State Prescription Drug Wholesale Distributor Permit Application
Permit 23: 2195
Notice of Intent to Deny Application

Dear Mr. Forlenza:

The Florida Department of Health, by and through its Drugs, Devices and Cosmetics Program (the "department") received the first portions of a renewal application (the "application") for an Out of State Prescription Drug Wholesale Distributor permit (the "permit") on approximately April 29, 2010. After careful review, the department intends to deny the application based upon the following facts, grounds and considerations:

Section 499.067(1)(a), Florida Statutes (F.S.), authorizes the department to deny an application for permit if there has been a substantial failure to comply with Sections 499.001 — 499.081, F.S., or the rules adopted thereunder. The failure to meet the criteria for obtaining a permit is a substantial failure to comply with the provisions of Sections 499.001 — 499.081, F.S. Section 499.067(1)(b), F.S., further authorizes the department to deny an application for a permit if the department finds that it would be a danger or would not be in the best interest of the public health, safety, and welfare if the applicant were issued a permit or certification; if the applicant has not met the requirements for the permit or certification; or, if the applicant demonstrates any of the conditions enumerated in Section 499.012, F.S.

Facts

1. On or about April 29, 2010, the Applicant submitted a renewal permit application for an Out of State Prescription Drug Wholesale Distributor establishment permit at 2200 West San Bernardino Avenue, Redlands, California 92374.

2. As part of the application process the Applicant did not provide the department with 12 sales invoices for the wholesale distribution of prescription drugs by the establishment dated within the previous year, including at least three of which must be dated in the previous six months.

3. As stated in the application the Applicant did not engage in 12 wholesale distributions of prescription drugs within the year previous to filing the application; and

2010 NOV 16 AM 11:10
BOP/DDC
RECEIVED

a. In response to a request for verification of this requirement, Applicant stated that no sales [into Florida] were made from the Redlands, California facility.

4. The Applicant did not provide the name and certification number of a designated (certified under chapter 499 part I F.S.) representative as part of the required complete application, nor did the Applicant provide the required documents evidencing wholesale distributions of prescription drugs from the establishment as described in paragraph 2 above and also required to be provided in the application form. The application is not complete.

Conclusions of Law

1. Section 499.012(10)(o), F.S. authorizes the department to deny an application for a permit or refuse to renew a permit for an out of state prescription drug wholesale distributor, if the department finds that the applicant has not actively engaged in the wholesale distribution of prescription drugs, as demonstrated by the regular and systematic distribution of prescription drugs throughout the year as evidenced by not fewer than 12 wholesale distributions in the previous year and not fewer than three wholesale distributions in the previous 6 months. The permit is denied pursuant to Section 499.012 (10) (o) F.S. The permit is also denied pursuant to Section 499.067 (1) (b) 4. F.S. because the Applicant has demonstrated any of the conditions enumerated in Section 499.012 F.S.

2. The Applicant failed to provide documentation that it engaged in the minimum number of wholesale distributions in the designated time frame, as described above and as required by the application. Thus, the Applicant did not complete the application as required by Section 499.012 (3) F.S. and Section 64F-12.015 (11) (c), Florida Administrative Code (F.A.C.). The permit is denied pursuant to Section 499.067 (1) (b) 2; 499.012 (1)(a) F.S. because the Applicant has not met the minimum permit requirements.

3. Section 499.012 (3) F.S. provides that a written application for permit or to renew a permit must be filed with the Department on forms furnished by the Department, and that the Department shall establish the form and content of the application by rule. Further, the Applicant in this proceeding was required to furnish the name of a certified designated representative by section 499.012 (16) (l) F.S. Denial of the permit is authorized under Section 499.067 (1) (b) 2. F.S., if the applicant has not met the requirements for the permit. The permit application form for renewal of this permit is adopted by rule at Section 64F-12.015 (7) F.A.C. The permit is denied pursuant to Section 499.067 (1) (b) 2.; 499.012(10) (a) F.S. because the Applicant has failed to meet the permit requirements by identifying a currently certified person on the application to function as the Applicant's certified designated representative, as required under Section 499.012 (16) F.S. and as required on the application form and at Section 499.012 (8) (l) F.S.

Having considered the above factors, the department hereby intends to deny the application of **BD Distribution Center** for an Out of State Prescription drug wholesale distributor establishment permit.

Re: State of Alaska Board of Pharmacy- Case No.: 2021-000469

NON-DISCIPLINARY LETTER OF ADVISEMENT

Dear Andrew Stellon,

This letter is to advise you the State of Alaska, Division of Corporations, Business and Professional Licensing (Division) and Alaska Board of Pharmacy (Board) have completed the investigation of the licensing allegations filed against BD Distribution Center.

After a thorough review by a licensed board member, it was determined that due to the Change of Facility Manager Form not being used in the initial notification of the changes to facility mangers and not completing the new application process for the new facility manager within the required 30 days, BD Distribution Center was in violation of the following Alaska regulations:

12 AAC 52.610. WHOLESALE DRUG DISTRIBUTOR LICENSE. (d) Within 30 days after a change in location, ownership, or facility manager, the new facility manager must (1) submit the completed change of facility manager form provided by the department;

12 AAC 52.610. WHOLESALE DRUG DISTRIBUTOR LICENSE. (d) Within 30 days after a change in location, ownership, or facility manager, the new facility manager must (3) meet the requirements of (b)(4) and (6) of this section.

The board member determined violation(s) were present, however, it was their opinion that your actions did not rise to the level requiring formal disciplinary action against your license, and the appropriate disposition for this matter is to issue you this **Non-Disciplinary Letter of Advisement.**

This letter advises BD Distribution Center to ensure all notification and document requirements outlined in 12 AAC 52.610 are completed within the 30-day timeline moving forward.

This letter will be retained in our files and is evidence of the Board's concern and the fact you have been notified of the requirement under Alaska Statute 08.80 and Regulation 12 AAC 52 to abide by all laws governing your license.

This investigation is now closed and no further action will be taken. This letter is non-disciplinary and, therefore, cannot be appealed. This document will not be posted on the public website; however, it is a public document and may be released to an inquirer through an Alaska Public Records Request. Because you were under official investigation, you, the Board, or the Division may be required to report that information on future license applications, including your Alaska renewal.

Thank you for your cooperation in this matter. Please feel free to contact me directly via email michael.bowles@alaska.gov.

Case No. 2021-4562

STIPULATION AND FINAL AGENCY ORDER

IN THE MATTER OF DISCIPLINARY PROCEEDINGS REGARDING THE *NON-RESIDENT* WHOLESALER REGISTRATION IN THE STATE OF COLORADO OF **BECTON, DICKINSON AND COMPANY**, REGISTRATION NO. WHO 7853,

Respondent Outlet.

IT IS HEREBY STIPULATED AND AGREED by and between the Colorado State Board of Pharmacy ("Board") and Becton, Dickinson and Company ("Respondent Outlet") to resolve all matters pertaining to Board Case Number 2021-4562, as follows:

FINDINGS AND CONCLUSIONS

1. The Board has jurisdiction over Respondent Outlet, its registration as a non-resident wholesaler, and the subject matter of this Stipulation and Final Agency Order ("Final Agency Order") pursuant to the Pharmacists, Pharmacy Businesses, and Pharmaceuticals Act at Title 12, Article 280, C.R.S. (2019).

2. Respondent Outlet was originally registered in the State of Colorado on or about November 14, 2011, being issued registration #WHO 7853, and has been so registered at all times relevant to this disciplinary action.

3. Respondent Outlet's address of record with the Board and current location is 130 Four Oaks Parkway, Four Oaks, NC 27524.

4. Respondent Outlet admits these findings and hereby waives any further proof in this proceeding before the Board regarding the following facts.

5. Respondent Outlet failed to timely submit an application to the Board detailing a change in designated representative and fee. In this case, 85 days transpired between February 25, 2021, the date the previous designated representative ceased the position, and May 21, 2021, the date the application and fee were received.

6. On or about July 22, 2021, the Board initiated a complaint against Respondent Outlet because of the delay of 85 days in submitting an application detailing a change in designated representative and fee.

7. Respondent Outlet's conduct, as set forth above, constitutes violations of the following sections of the Colorado Revised Statutes and Board Regulations:

Colorado Revised Statutes

12-280-126. Unprofessional conduct - grounds for discipline. (1) The board may take disciplinary or other action as authorized in section 12-20-404, after a hearing held in accordance with the provisions of sections 12-20-403 and 12-280-127, upon proof that the licensee or registrant:

(c) Has violated:

(I) Any of the provisions of this article 280, including commission of an act declared unlawful in section 12-280-129, or an applicable provision of article 20 or 30 of this title 12;

(II) The lawful rules of the board; or

(III) Any state or federal law pertaining to drugs.

Pharmacy Board Rules and Regulations

15.01.14 Change of name, location, or ownership, or designated representative.

c. Any change in the designated representative of a wholesaler shall be reported to the Board on a form supplied by the Board within thirty calendar days of such change. The incoming designated representative must undergo the required background check.

8. The Board finds and concludes, and Respondent Outlet agrees, that based upon Respondent Outlet's above-described violations of the Pharmaceuticals and Pharmacists Act and relevant rules and regulations, the following discipline is just and appropriate under the circumstances.

Policy Number: 30-19 Prescription Drug Outlet, In-State, Nonresident, and Other Pharmacist Manager Changes and Consultant Pharmacist

Should ESP fail to obtain a settlement in the matter, the matter shall be referred to the Office of the Attorney General ("OAG") with the same settlement guidance.
G) This policy is intended as settlement guidance only and is not intended to deprive the Board of its authority to exercise discretion in seeking a penalty within the range of reasonable alternatives in the event a case does not settle under the above terms and proceeds to a hearing.

TERMS OF DISCIPLINE

9. **Fine with Surcharge.** Pursuant to section 12-280-127(5)(a), C.R.S., Respondent Outlet shall pay a fine of One Thousand Dollars and No Cents ($1,000.00). Respondent Outlet shall therefore pay a total amount of One Thousand One Hundred and Fifty Dollars and No Cents ($1,150.00). The total amount shall be payable to the State of Colorado and shall be remitted in one lump sum to be included when Respondent Outlet submits this signed Final Agency Order to the Board.

10. **Compliance.** Respondent Outlet shall submit all future applications and appropriate fees to the Board detailing changes in its designated representative within the required time frame specified by Board rule or statute in effect at the time of such designated representative change.

The pendency of any suspension or disciplinary action arising out of an alleged violation of this Final Agency Order shall not affect the obligation of Respondent Outlet to comply with all terms and conditions of this Final Agency Order.

15. Integration and Severability. Upon execution by all parties, this Final Agency Order shall represent the entire and final agreement of and between the parties.

In the event any provision of this Final Agency Order is deemed invalid or unenforceable by a court of law, it shall be severed and the remaining provisions of this Final Agency Order shall be given full force and effect.

Becton, Dickinson and Company (also referred to herein as "BD") was incorporated under the laws of the State of New Jersey in November 1906, as successor to a New York business started in 1897. BD's executive offices are located at 1 Becton Drive, Franklin Lakes, New Jersey 07417-1880, and its telephone number is (201) 847-6800. Divestiture

Advanced Bioprocessing

In October 2018, BD completed the sale of its Life Sciences segment's Advanced Bioprocessing business pursuant to a definitive agreement that was signed in September 2018.

Additional information regarding this divestiture is contained in Note 10 to the consolidated financial statements contained in Item 8. Financial Statements and Supplementary Data, which is incorporated herein by reference.

International Operations

BD's products are manufactured and sold worldwide. For reporting purposes, we organize our operations outside the United States as follows: EMEA (which includes Europe, the Middle East and Africa); Greater Asia (which includes countries in Greater China, Japan, South Asia, Southeast Asia, Korea, and Australia and New Zealand); Latin America (which includes Mexico, Central America, the Caribbean and South America); and Canada. BD has manufacturing operations outside the United States in Bosnia and Herzegovina, Brazil, Canada, China, Dominican Republic, France, Germany, Hungary, India, Ireland, Israel, Italy, Japan, Malaysia, Mexico, the Netherlands, Singapore, Spain, and the United Kingdom. Geographic information with respect to BD's operations is included under the heading "Geographic Information" in Note 7 to the consolidated financial statements included in Item 8. Financial Statements and Supplementary Data.

Foreign economic conditions and exchange rate fluctuations have caused the profitability related to foreign revenues to fluctuate more than the profitability related to domestic revenues. BD believes its activities in some countries outside the United States involve greater risk than its domestic business due to the factors cited herein, as well as the economic environment, local commercial and economic policies and political uncertainties. See further discussion of these risks in Item 1A. Risk Factors.

Distribution

BD's products are marketed and distributed in the United States and internationally through independent distribution channels, and directly to hospitals and other healthcare institutions by BD and independent sales representatives. BD uses acute care, non-acute care, laboratory and drug wholesaler distributors to broadly support our overall disposable product demand from our end user customers in the United States. In international markets, products are distributed either directly or through distributors, with the practice varying by country. Order backlog is not material to BD's business inasmuch as orders for BD products generally are received and filled on a current basis. BD's worldwide sales are not generally seasonal, with the exception of certain medical devices in the Medication Delivery Solutions business unit, and flu diagnostic products in the Integrated Diagnostic Systems business unit, both of which relate to seasonal diseases such as influenza. In order to service its customers, optimize logistics, lower facilities costs and reduce finished goods inventory levels, BD operates consolidated distribution facilities globally.

Raw Materials and Components

BD purchases many different types of raw materials and components, including plastics, glass, metals, textiles, paper products, agricultural products, electronic and mechanical sub-assemblies and various biological, chemical and petrochemical products. BD seeks to ensure continuity of supply by securing multiple options for sourcing. However, there are situations where raw materials and components are only available from one supplier, which are referred to as sole sourced. The use of sole sourced materials and components may be due to sourcing of proprietary and/or patented technology and processes that are intended to provide a unique market differentiation to our product. In other cases, while a raw material or component can be sourced from multiple manufacturers, only one supplier is qualified due to quality assurance, cost or other considerations. In order to provide alternate sources, BD must complete a rigorous qualification process, which most often includes completion of regulatory registration and approval. If clinical trials are not required, this qualification process

can take 3-18 months depending on the criticality of the change. When clinical trials are required, this process may lengthen the qualification phase from one to three years. BD continuously assesses its sole sourced raw materials and components, and maintains business continuity plans with its suppliers. BD's continuity plans may include securing secondary supply with alternate suppliers, qualification of alternate manufacturing facilities, maintaining contingency stock, internal development of supply and establishment of technology escrow accounts. While BD works closely with its suppliers, no assurance can be given that these efforts will be successful, and there may be events that cause supply interruption, reduction or termination that adversely impacts BD's ability to manufacture and sell certain products. See further discussion of the risks related to the supply chain and raw materials in Item 1A. Risk Factors.

Research and Development

BD conducts its research and development ("R&D") activities at its operating units and across global enterprise centers of excellence located in the United States, India, China, Singapore, and Ireland. The majority of BD's R&D activities are conducted in North America. Outside North America, BD has a significant R&D presence in Greater Asia and Europe. BD also collaborates with certain universities, medical centers and other entities on R&D programs and retains individual consultants and partners to support its efforts in specialized fields.

Intellectual Property and Licenses

BD owns significant intellectual property, including patents, patent applications, technology, trade secrets, know-how, copyrights and trademarks in the United States and other countries. BD is also licensed under domestic and foreign patents, patent applications, technology, trade secrets, know-how, copyrights and trademarks owned by others. In the aggregate, these intellectual property assets and licenses are of material importance to BD's business. BD believes, however, that no single patent, technology, trademark, intellectual property asset or license is material in relation to BD's business as a whole, or to any business segment.

Competition

BD operates in the increasingly complex and challenging medical technology marketplace. Technological advances and scientific discoveries have accelerated the pace of change in medical technology, the regulatory environment of medical products is becoming more complex and vigorous, and economic conditions have resulted in a challenging market. Companies of varying sizes compete in the global medical technology field. Some are more specialized than BD with respect to particular markets, and some have greater financial resources than BD. New companies have entered the field, particularly in the areas of molecular diagnostics, safety-engineered devices and in the life sciences, and established companies have diversified their business activities into the medical technology area. Other firms engaged in the distribution of medical technology products have become manufacturers of medical devices and instruments as well. Acquisitions and collaborations by and among companies seeking a competitive advantage also affect the competitive environment. In addition, the entry into the market of low-cost manufacturers has created increased pricing pressures. BD competes in this evolving marketplace on the basis of many factors, including price, quality, innovation, service, reputation, distribution and promotion. The impact of these factors on BD's competitive position varies among BD's various product offerings. In order to remain competitive in the industries in which it operates, BD continues to make investments in R&D, quality management, quality improvement, product innovation and productivity improvement in support of its core strategies. See further discussion of the risks relating to competition in the medical technology industry in Item 1A. Risk Factors.

Third-Party Reimbursement

Reimbursement is an important strategic consideration in the development and marketing of medical technology. Obtaining coverage, coding and payment is critical to the commercial success of a new product or procedure. Difficulty in achieving market access can lead to slow adoption in the marketplace and inadequate payment levels that can continue for months or even years.

A majority of BD's customers rely on third-party payers, including government programs and private health insurance plans, to reimburse some or all of the cost of the procedures, products and services they provide. Vertical integration has created a very concentrated market among commercial third-party payers in the U.S. Global payers are increasingly focused on strategies to control spending on healthcare and reward improvements in quality and patient outcomes.

BD is actively engaged in identifying and communicating value propositions of its products for payer, provider, and patient stakeholders, and it employs various efforts and resources to attempt to positively impact coverage, coding and payment pathways. However, BD has no direct control over payer decision-making with respect to coverage and payment levels for BD products. The manner and level of reimbursement in any given case may depend on the site of care, the procedure(s) performed, the final patient diagnosis, the device(s) and/or drug(s) utilized, the available budget, or a combination of these factors, and coverage and payment levels are determined at each payer's discretion. As BD's product offerings are diverse across a variety of healthcare settings, they are affected to varying degrees by the many payment pathways that impact the decisions of healthcare providers regarding which medical products they purchase and the prices they are willing to pay for those products. Therefore, changes in reimbursement levels or methods may either positively or negatively impact sales of BD products in any given country for any given product.

As government programs expand healthcare coverage for their citizens, they have at the same time sought to control costs by limiting the amount of reimbursement they will pay for particular procedures, products or services. In addition, most payers are seeking price predictability in order to mitigate future exposure to manufacturer price increases. This is coupled with an increase in high deductible private insurance plans, which transfer more pricing exposure and burden directly to the patient.

Many payers both in the U.S. and globally have developed specific payment and delivery mechanisms to support these cost control efforts and to focus on paying for value. These mechanisms include payment reductions, pay for performance measures, quality-based performance payments, restrictive coverage policies, bidding and tender mechanics, studies to compare the effectiveness of therapies and use of technology assessments. These changes, whether the result of legislation, new strategic alliances or market consolidations, have created an increased emphasis on the delivery of more cost-effective and quality-driven healthcare.

For example, as a result of the Patient Protection and Affordable Care Act ("PPACA"), the U.S. has implemented value-based payment methodologies and has created alternative payment models such as bundled payments to continue to drive improved value. We see other governments around the world considering similar bundling reform measures, with the utilization of the Diagnosis Related Group ("DRG") as a payment mechanism to drive toward quality and resource based reimbursement becoming more common in regions outside the U.S.

Regulation

General

BD's operations are global and are affected by complex state, federal and international laws relating to healthcare, environmental protection, antitrust, anti-corruption, marketing, fraud and abuse (including anti-kickback and false claims laws), export control, product safety and efficacy, employment, privacy and other areas.

BD's medical technology products and operations are subject to regulation by the U.S. Food and Drug Administration ("FDA") and various other federal and state agencies, as well as by foreign governmental agencies. These agencies enforce laws and regulations that govern the development, testing, manufacturing, labeling, advertising, marketing and distribution, and market surveillance of BD's medical products. The scope of the activities of these agencies, particularly in the Europe, Japan, and Asia Pacific regions in which BD operates, has been increasing.

BD actively maintains FDA/ISO Quality Systems that establish standards for its product design, manufacturing, and distribution processes. Prior to marketing or selling most of its products, BD must secure approval from the FDA and counterpart non-U.S. regulatory agencies. Following the introduction of a product,

these agencies engage in periodic reviews and inspections of BD's quality systems, as well as product performance and advertising and promotional materials. These regulatory controls, as well as any changes in agency policies, can affect the time and cost associated with the development, introduction and continued availability of new and existing products. Where possible, BD anticipates these factors in its product development and planning processes. These agencies possess the authority to take various administrative and legal actions against BD, such as product recalls, product seizures and other civil and criminal sanctions. BD also undertakes voluntary compliance actions, such as voluntary recalls.

BD also is subject to various federal and state laws, and laws outside the United States, concerning healthcare fraud and abuse (including false claims laws and anti-kickback laws), global anti-corruption, transportation, safety and health, and customs and exports. Many of the agencies enforcing these laws have increased their enforcement activities with respect to medical device manufacturers in recent years. This is part of a general trend toward increased regulation and enforcement activity within and outside the United States.

In addition, as part of PPACA, the federal government has enacted the Sunshine Act provisions requiring BD to publicly report gifts and payments made to physicians and teaching hospitals. Countries outside the United States have enacted similar local laws requiring medical device companies to report transfers of value to health care providers licensed in those countries. Failure to comply with these laws could result in a range of fines, penalties and/or other sanctions.

Consent Decree with FDA

Our infusion pump organizational unit is operating under an amended consent decree entered into by CareFusion with the FDA in 2007. CareFusion's consent decree with the FDA is related to its Alaris™ SE infusion pumps. In February 2009, CareFusion and the FDA amended the consent decree to include all infusion pumps manufactured by or for CareFusion 303, Inc., the organizational unit that manufactures and sells BD Alaris™ infusion pumps in the United States. The amended consent decree does not apply to intravenous administration sets and accessories.

While this BD organizational unit remains subject to the amended consent decree, which includes the requirements of the original consent decree, it has made substantial progress in its compliance efforts. However, we cannot predict the outcome of this matter, and the amended consent decree authorizes the FDA, in the event of any violations in the future, to order us to cease manufacturing and distributing infusion pumps, recall products and take other actions. We may be required to pay damages of $15,000 per day per violation if we fail to comply with any provision of the amended consent decree, up to $15 million per year.

We also cannot currently predict whether additional monetary investment will be incurred to resolve this matter or the matter's ultimate impact on our business. We may be obligated to pay more costs in the future because, among other things, the FDA may determine that we are not fully compliant with the amended consent decree and therefore impose penalties under the amended consent decree, and/or we may be subject to future proceedings and litigation relating to the matters addressed in the amended consent decree, including, but not limited to, fines, penalties, other monetary remedies, and expansion of the terms of the amended consent decree. As of September 30, 2021, we do not believe that a loss is probable in connection with the amended consent decree, and accordingly, we have no accruals associated with compliance with the amended consent decree.

We are undertaking certain remediation of our BD Alaris System, and are currently shipping the product in the U.S., only in cases of medical necessity and to remediate recalled software versions. We will not be able to fully resume commercial operations for the BD Alaris System in the U.S. until a 510(k) submission relating to the product has been cleared by the FDA. No assurances can be given as to when or if clearance will be obtained from the FDA.

Following an inspection that began in March 2020 of our Medication Management Systems facility (CareFusion 303, Inc.) in San Diego, California, the FDA issued to BD a Form 483 Notice that contains a number of observations of non-conformance. BD has provided the FDA with its response to the Form 483 and has begun to implement certain corrective actions to address the observations. However, the FDA's review of the items raised in the Form 483 remains ongoing and no assurances can be given regarding further action by

the FDA as a result of the observations, including but not limited to action pursuant to the amended consent decree.

FDA Warning Letter

On January 11, 2018, BD received a Warning Letter from the FDA with respect to our former BD Preanalytical Systems ("PAS") unit, citing certain alleged violations of quality system regulations and of law. The Warning Letter states that, until BD resolves the outstanding issues covered by the Warning Letter, the FDA will not clear or approve any premarket submissions for Class III devices to which the non-conformances are reasonably related or grant requests for certificates to foreign governments. BD has worked closely with the FDA and implemented corrective actions to address the quality management system concerns identified in the warning letter. In March 2020, the FDA conducted a subsequent inspection of PAS, which it classified as Voluntary Action Indicated, which means the FDA will not take or recommend any administrative or regulatory action as a result of the unit's response to the observations associated with the quality management concerns in the inspection. BD continues to work with the FDA to generate additional clinical evidence and file 510(k)s as remaining commitments associated with the Warning Letter. The FDA review of these remaining commitments is ongoing and no assurances can be given regarding further action by the FDA as a result of these commitments, including but not limited to action pursuant to the Warning Letter.

Consent Order - Covington, Georgia, USA

On October 28, 2019, BD entered into a consent order with the Environmental Protection Division of the Georgia Department of Natural Resources (the "EPD"), following the filing of a complaint and motion for temporary restraining order by the EPD seeking to enjoin BD from continuing sterilization operations at its Covington, Georgia facility. Under the terms of the consent order, which has been amended two times upon mutual agreement of BD and EPD, BD voluntarily agreed to a number of operational changes at its Covington and Madison, Georgia facilities, as well as at its distribution center in Covington, designed to further reduce ethylene oxide emissions, including but not limited to operating at a reduced capacity. BD does not believe that the consent order will have a material impact on its operations. Violation of the consent order, though, could subject us to additional restrictions on the sterilization operations at our Covington and Madison facilities. BD has business continuity plans in place to mitigate the impact of any additional restrictions on our operations at these facilities, although it is possible that these plans will not be able to fully offset such impact, especially considering the reduced capacity of third-party sterilization service providers and the regulatory timelines associated with transferring sterilization operations for regulated products.

At a broader level, several states have increased the regulatory requirements associated with the use and emission of ethylene oxide, the most frequently used sterilant for medical devices and health care products in the U.S. This increased regulation could require BD or sterilization service providers, including providers used by BD, to temporarily suspend operations to install additional air quality controls, limit the use of ethylene oxide or take other actions, which would further reduce the available capacity of third-party providers to sterilize medical devices and health care products. A few states have filed lawsuits to require additional air quality controls and expand limitations on the use of ethylene oxide at sterilization facilities. In December 2020, the State of New Mexico filed a lawsuit seeking a temporary restraining order and a preliminary and permanent injunction against a major medical device sterilizer, which sterilizes certain of our surgery products, to reduce ethylene oxide emissions associated with their sterilization process. On the federal level, in late 2019, the U.S. Environmental Protection Agency provided notice that it would be conducting rulemaking to reconsider federal regulations applicable to the use and emission of ethylene oxide. If any such proceedings or rulemaking result in the suspension of sterilization operations at BD or at medical device sterilizers used by BD, or otherwise limit the availability of third-party sterilization capacity, this could interrupt or otherwise adversely impact production of certain of our products. BD has business continuity plans in place to mitigate the impact of any such disruptions, although these plans may not be able to fully offset such impact, for the reasons noted above.

For further discussion of risks relating to the regulations to which we are subject, see Item 1A. Risk Factors.

Human Capital Management

At BD, our associates are guided by our Purpose, *advancing the world of health* and The BD WAY, our culture and values. Each empowers our associates to contribute individuality, unique ideas, and experiences to fuel innovation and better patient outcomes. As of September 30, 2021, BD is comprised of approximately 75,000 associates located in over 62 countries. Attracting, developing and retaining talented people in technical, marketing, sales, research and other positions is crucial to executing our strategy and our ability to compete effectively in a highly competitive medical technology industry. Our ability to recruit and retain such talent depends on several factors, including compensation and benefits, talent development and career opportunities, and our unique culture. To that end, we continually invest in our associates in order to be an employer of choice.

Inclusion, Diversity & Equity

We continually engage a workforce that reflects the communities we live and work in and the customers and patients we serve, and that possesses a broad range of thought and experiences which have helped BD achieve our leadership position in the medical technology industry and the global marketplace. A key component of our journey to continually build a better BD is our commitment to global inclusion, diversity and equity ("ID&E"). We believe this commitment allows us to better our understanding of patient and customer needs and develop technologies to meet those needs. Our ID&E efforts have garnered recognitions, including Best Places to Work for Disability and LGBTQ Inclusion, Bloomberg's Gender Equality Index, and Diversity Inc.'s Noteworthy Companies.

While we continue to demonstrate progress in the diverse representation of our workforce, we seek to continuously improve in this area. Each year, we establish annual corporate ID&E goals to improve hiring, development, advancement, and retention of diverse talent, and to advance our culture of inclusion. In addition, our executive leaders serve as sponsors of our nine associate-led resource groups ("ARGs") who are empowered to set strategic goals that drive belonging, allyship, community service and professional development.

Externally, we are building on our existing momentum and remain involved in industry ID&E efforts with the Advanced Medical Technology Association (AdvaMed) to improve diversity in the medical technology industry. We remain committed to support and partner with the United Nation's Open for Business, United Negro College Fund, the Equal Justice Initiative ("EJI") and our BD Helping Build Healthy Communities initiative. Through the BD Helping Build Healthy Communities™ initiative, we committed $22.6 million to support Direct Relief and the National Association of Community Health Centers in expanding the innovative practices of U.S. community health centers, which collectively serve more than 30 million U.S. patients, the majority of which are in underserved communities. We also built upon our support for the EJI, taking the opportunity to engage our associates in a 21-Day Racial Equity and Social Justice Challenge to bring further awareness and understanding of social and racial justice issues. For each associate that engaged with the challenge, we committed an additional monetary donation to the EJI.

Good Afternoon Maria,

Below is the explanation regarding the Indiana Home State License:

Ind. Code Ann. § 25-26-14-14.2 requires licensure for third-party logistics providers handling legend drugs. Ind. Code Ann. § 25-26-14-7 defines "legend drug" and specifically states that the term does not include a device or device component, part, or accessory.
As our IN facility distributes only prescription devices, and does not distribute legend drugs, the IN license is not applicable.

In addition, attached is a current Certificate of Good Standing.

Please let me know if you require additional information.

Thank you,

COMPLIANCE HISTORY

AmerisourceBergen Corporation ("AmerisourceBergen"), has had the following compliance issues relating to the licensure of its subsidiaries to engage in pharmaceutical distribution:

Integrated Commercialization Solutions, LLC ("ICS") provides distribution and third-party logistics services to pharmaceutical manufacturers, including the shipment of pharmaceutical products to customers in the State of Florida, out of a distribution center in Brooks, Kentucky. ICS operates its wholesale distribution business out of Suite 400 at the distribution center, which it operates jointly with its parent corporation, ASD Specialty Healthcare, LLC ("ASD"). At all relevant times, ASD held an Out-State Rx Drug Wholesaler permit issued by the Florida Department of Health for this facility. In addition, ICS held its own non-resident prescription drug manufacturer permit issued by the Florida Department of Health at an adjacent facility located at Suite 100 in the same building.

In August 2006, the Florida Department of Health informed ICS that it should obtain its own Out-State Rx Drug Wholesaler permit, in addition to ASD's Out-State Rx Drug Wholesaler permit, for Suite 400. ICS immediately filed an application for that permit, and now holds its own Out-State Rx Drug Wholesaler permit issued by the Florida Department of Health. In July 2007, ICS entered into an agreement with the Florida Department of Health, without admitting wrongdoing in any way, and paid a fine in full settlement of any claims with respect to the status of ICS's Florida permits prior to August 2006.

In April 2007, the Drug Enforcement Agency ("DEA") suspended registration of the Orlando distribution center of AmerisourceBergen Drug Corporation ("ABDC") for allegedly failing to maintain effective controls against diversion, as required by 21 U.S.C. §§ 823 (b)(1) and (e)(1). On August 25, 2007, the suspension of the Orlando division's DEA registration was lifted in accordance with a June 2007 settlement between ABDC and DEA in which ABDC expressly denied the DEA's allegations but agreed to implement an industry-leading order monitoring program to manage the distribution of controlled substances.

In May 2007, the Nevada State Board of Pharmacy conditionally suspended out-of-state wholesaler's license of ABDC's Orlando's division, based on the April 2007 DEA registration suspension discussed above. The Board reinstated the license following DEA's lifting of the Orlando division's DEA registration discussed above.

In October 2007, AmerisourceBergen acquired Bellco Drug Corp. ("Bellco"). Prior to the acquisition, in May 2007, the DEA suspended registration of Bellco's New York distribution center for allegedly failing to maintain effective controls against diversion as required by 21 U.S.C. §§ 823(b)(1) and (e)(1). In June 2007, Bellco entered into a Consent Judgment with DEA in which Bellco expressly denied the DEA allegations, but agreed to voluntarily surrender its DEA registration with leave to apply for a new registration as of October 2007, and paid a fine. Bellco received its new registration in February 2008. In connection with the application for a new registration, Bellco Drug was required to provide evidence of an effective order monitoring program to manage the distribution of controlled substances.

Prior to the Bellco acquisition, in May 2007, the DEA issued an Order to Show Cause against Bellco's subsidiary, American Medical Distributors, Inc. ("AMD"), for allegedly failing to maintain effective controls against diversion as required by 21 U.S.C. §§ 823(b)(1) and (e)(1). In June 2007, AMD entered into a settlement with DEA, in which, as part of the renewal of its registration, AMD was required to provide evidence of an effective program designed to detect and prevent diversion of controlled substances. The DEA subsequently renewed AMD's registration and withdrew its Order to Show Cause.

Chapin Drug Company ("Chapin") previously operated a distribution center located in Anaheim, California. In accordance with Florida law, Chapin had previously appointed its President, Mr. Mark Johnson, as its "designated representative" for Florida pedigree purposes. On December 31, 2007, Mr. Johnson left Chapin's employ. Within ten days thereafter, Chapin notified the Florida Department of Health of his departure and submitted a Notification of Designated Representative and Application for Certification as a Designated Representative for appointment of a new representative. Chapin also ceased all drug shipments into Florida until that the Department approved the new appointment. On February 15, 2008, the Florida Department of Health notified Chapin of its intent to suspend Chapin's Out-State Rx Drug Wholesaler permit pending approval of the new designated representative. On March 6, 2008, Chapin reiterated and confirmed to the Department that Chapin would not be shipping any drugs into Florida until Chapin's Florida permit is reinstated and renewed. The Department subsequently approved a new designated representative and, in July 2008, reinstated Chapin's permit.

In January 2008, the California Board of Pharmacy cited ABDC's Sacramento division for allegedly failing to establish procedures to ensure that dangerous drugs are delivered only to authorized premises and received and signed for by a pharmacist. After an office hearing, in April 2008, the California Board of Pharmacy issued a modified citation in which no fine was assessed, and no proof of abatement was ordered.

In January 2008, the Arkansas Board of Pharmacy cited AMD for applying late for a change in ownership of its non-resident wholesale distributor license after being acquired by AmerisourceBergen in October 2007. In February 2008, AMD entered into a Consent Order with the Arkansas Board of Pharmacy and paid a fine.

Another individual had been appointed as the designated representative at each location, but ICS had not timely notified the Board of the appointment. ICS entered into two Stipulations with the Colorado Board of Pharmacy resolving the matters and paid two fines.

In February 2011, the California Board of Pharmacy cited ABDC's Valencia division for allowing dangerous drugs to be received and signed for by non-pharmacists. After an office hearing, in May 2011, ABDC entered into a Stipulation and paid a fine.

In February 2012, the California Board of Pharmacy cited Burt's Pharmacy, Inc. ("BPI"), a former subsidiary, for non-compliant sales to a wholesaler. BPI resolved the matter without admitting any violation and paid a fine.

J.M Blanco submitted corrective actions and paid a small fine.

AcelRx Pharmaceuticals Reports Second Quarter 2021 Financial Results

$55.3 million of cash and short-term investments as of June 30, 2021

Q2 2021 DSUVIA sales of $0.4M, a 117% increase compared to Q1 2021

516 formulary approvals as of July 31, 2021

HAYWARD, Calif., August 16, 2021 – AcelRx Pharmaceuticals, Inc. (Nasdaq: ACRX), (AcelRx), a specialty pharmaceutical company focused on the development and commercialization of innovative therapies for use in medically supervised settings, today reported its second quarter 2021 financial results.

"We continued to gain solid sales momentum with DSUVIA® as the recent real-world data became more widely disseminated to healthcare providers, and elective surgery restrictions at ambulatory surgery centers and hospitals eased during the second quarter," said Vince Angotti, Chief Executive Officer of AcelRx. "Our continued commitment to supporting investigator-initiated trials to generate additional DSUVIA real-world data should further add to healthcare provider awareness of the advantages of DSUVIA. Finally, business development remains a key priority and completing the DZUVEO® agreement with an exceptional partner in Europe and expanding our portfolio in the U.S. with two complementary innovative product candidates should drive incremental value to AcelRx."

Second Quarter and Recent Highlights

- In July 2021, AcelRx entered into agreements with Laboratoire Aguettant (Aguettant) providing Aguettant with a license to commercialize DZUVEO in Europe, allowing AcelRx to receive up to approximately $55 million in combined up-front and sales-based milestone payments, and providing AcelRx with two innovative pre-filled syringe product candidates for the U.S. The expected market opportunity for these two product candidates exceeds $100 million, and AcelRx currently plans to file New Drug Applications for them within 12 months.

- In June 2021, the U.S. Army Medical Materiel Development Activity (USAMMDA) publicly communicated their support of DSUVIA for battlefield pain management. USAMMDA stated concerns with the standard intramuscular morphine autoinjectors and emphasized that another commonly used battlefield analgesic, oral transmucosal fentanyl citrate, is licensed only for use in chronic pain syndromes found in cancer patients and it is specifically labeled not to be used for acute pain management.

- In June 2021, AcelRx announced it had reached agreement with the U.S. Food and Drug Administration (FDA) with regards to finalizing corrective actions the company had taken or plans to take in response to the previously announced FDA warning letter, dated February 11, 2021, regarding certain DSUVIA promotional materials.

- In June 2021, AcelRx announced important findings from a podium presentation on DSUVIA during the *Best Papers of the Regional Societies* session at the California Society of Plastic Surgeons 71st Annual Meeting. Following long-duration procedures, which often included multiple cosmetic procedures combined (averaging approximately 3 hours), 89% of the patients were opioid-free in the PACU, recovery time averaged 1 hour and the only adverse event was 1 patient that had nausea. *See Additional Study Information section below.*

- In May 2021, AcelRx announced an investigator-initiated study to be conducted at Tampa General Hospital to evaluate the use of DSUVIA for patients with sickle cell disease presenting to the emergency department with painful vaso-occlusive crisis.

- In May 2021, AcelRx announced a poster presentation at the 46th Annual American Society of Regional Anesthesia (ASRA) Meeting reviewing the results of a study on the intraoperative administration of DSUVIA for the management of acute pain in an ambulatory surgery center. Among other results, the study showed orthopedic surgery patients in the DSUVIA group required 50% less opioids in the PACU (p=0.018), with significantly more of them opioid-free (36% vs 8%; p=0.037) compared to the control group. Furthermore, DSUVIA-treated patients had improved overall benefit of analgesia scores (OBAS) compared to the control group (p=0.006). *See Additional Study Information section below.*

- In May 2021, the fully automated packaging equipment was installed at our contract manufacturer in the U.S. with final site acceptance testing in the process of being finalized and first commercial batches on target for Q3 2022, subject to regulatory approvals.

- In May 2021, AcelRx announced an investigator-initiated study to be conducted at The CORE Institute Specialty Hospital in Phoenix, Arizona by the Musculoskeletal Orthopedic Research and Education (MORE) Foundation evaluating the perioperative use of DSUVIA for patients undergoing hip or knee replacement as a same-day surgical procedure.

- In April 2021, AcelRx announced an investigator-initiated study at Montefiore Medical Center evaluating the perioperative use of DSUVIA for same-day surgical procedures in patients on buprenorphine therapy for opioid-use disorder or for chronic pain management.

- Through July 31, 2021, AcelRx has achieved 516 formulary approvals, and is on track to exceed its guidance of 615 approvals by year end 2021.

Financial Information

- Cash, cash equivalents and short-term investments balance of $55.3 million as of June 30, 2021;

- Second quarter 2021 net revenues were $0.4 million and first half 2021 net revenues were $1.0 million;

- Combined R&D and SG&A expenses for the second quarter of 2021 totaled $9.4 million compared to $8.4 million for the second quarter of 2020. Excluding stock-based compensation expense, these amounts were $8.3 million for the second quarter of 2021 compared to $7.3 million for the second quarter of 2020. R&D and SG&A expenses for the first half of 2021 totaled $18.0 million compared to $23.1 million in the first half of 2020. Excluding stock-based compensation expense, these figures were $15.8 million for the first half of 2021 compared to $20.9 million for the first half of 2020. The decrease in combined R&D and SG&A expenses in the first half 2021 was primarily due to reductions in personnel-related costs, including travel expense, and DSUVIA-related commercialization expenses.

- For the second quarter of 2021, net loss was $9.9 million, or $0.08 per basic and diluted share, compared to $6.6 million, or $0.08 per basic and diluted share, for the second quarter of 2020. Net loss for the first half of 2021 was $18.8 million, or $0.16 basic and diluted net loss per share, compared to $22.5 million, or $0.28 basic and diluted net loss per share, for the prior year period.

About DSUVIA (sufentanil sublingual tablet), 30 mcg

DSUVIA®, known as DZUVEO® in Europe, is indicated for use in adults in certified medically supervised healthcare settings, such as hospitals, surgical centers, and emergency departments, for the management of acute pain severe enough to require an opioid analgesic, and for which alternative treatments are inadequate. DSUVIA was designed to provide rapid analgesia via a non-invasive route and to eliminate dosing errors associated with intravenous (IV) administration. DSUVIA is a single-strength solid dosage form administered sublingually via a single-dose applicator (SDA) by healthcare professionals. Sufentanil is an opioid analgesic previously only marketed for IV and epidural anesthesia and analgesia. The sufentanil pharmacokinetic profile when delivered sublingually avoids the high peak plasma levels and short duration of action observed with IV administration. The European Commission approved DZUVEO for marketing in Europe and AcelRx has entered into a licensing agreement with Laboratoire Aguettant to commercialize DZUVEO in Europe.

This release is intended for investors only. For more information, including important safety information and black box warning for DSUVIA, please visit www.DSUVIA.com.

About AcelRx Pharmaceuticals, Inc.

AcelRx Pharmaceuticals, Inc. is a specialty pharmaceutical company focused on the development and commercialization of innovative therapies for use in medically supervised settings. AcelRx's proprietary, non-invasive sublingual formulation technology delivers sufentanil with consistent pharmacokinetic profiles. AcelRx has one approved product in the U.S., DSUVIA® (sufentanil sublingual tablet, 30 mcg), known as DZUVEO® in Europe, indicated for the management of acute pain severe enough to require an opioid analgesic for adult patients in certified medically supervised healthcare settings, and one product candidate, Zalviso® (sufentanil sublingual tablet system, SST system, 15 mcg), an investigational product in the U.S., is being developed as an innovatively designed patient-controlled analgesia (PCA) system for reduction of moderate-to-severe acute pain in medically supervised settings. AcelRx has obtained the rights to file New Drug Applications (NDAs) and, subject to U.S. Food and Drug Administration (FDA) approval, commercialize in the U.S. two of Laboratoire Aguettant's innovative, EU-approved, pre-filled syringe products – ready-to-use ephedrine and phenylephrine. DZUVEO and Zalviso are both approved products in Europe.

Non-GAAP Financial Measures

To supplement AcelRx's financial results and guidance presented in accordance with U.S. generally accepted accounting principles (GAAP), AcelRx uses certain non-GAAP financial measures in this press release, in particular, excluding stock-based compensation expense from its operating expenses. AcelRx believes that these non-GAAP financial measures provide useful supplementary information to, and facilitate additional analysis by, investors and analysts. In particular, AcelRx believes that these non-GAAP financial measures, when considered together with AcelRx's financial information prepared in accordance with GAAP, can enhance investors' and analysts' ability to meaningfully compare AcelRx's results from period to period and to its forward-looking guidance. In addition, these types of non-GAAP financial measures are regularly used by investors and analysts to model and track AcelRx's financial performance. AcelRx's management also regularly uses these non-GAAP financial measures internally to understand, manage and evaluate AcelRx's business and to make operating decisions. Non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures and should be read in conjunction with AcelRx's consolidated financial statements prepared in accordance with GAAP. The non-GAAP financial measures in this press release and the accompanying tables have limits in their usefulness to investors and may be calculated differently from, and therefore may not be directly comparable to, similarly titled measures used by other companies.

Additional Study Information

Podium Presentation. The presentation was presented by Hisham Seify, MD, PhD, FACS and reported on data collected from a total of 76 patients during both short and long-duration general anesthesia plastic surgery cases as well as "awake" cosmetic procedures. Procedures were performed utilizing a single DSUVIA tablet in combination with general anesthesia. Patients undergoing short (< 1 hour) procedures required no opioids in the postanesthesia care unit (PACU) and had an average recovery time of 33 minutes with no adverse events reported. Dr. Seify also presented his protocol for using DSUVIA during "awake" surgery cases and reported that to date they had seen no adverse events or vital sign instability in these patients. The data presented at the meeting are from an investigator-initiated trial supported by AcelRx. Dr. Seify is a paid consultant for AcelRx.

Poster Presentation. The primary objective of this study was to determine if DSUVIA given prior to emergence from anesthesia was efficacious in reducing initial post anesthesia care unit (PACU) pain scores compared to a control group which received no intervention. Secondary outcomes included opioid use and percentage of patients opioid free in PACU, and time until ready to discharge. The study was a prospective, randomized, controlled trial conducted at an ambulatory surgery center with patients aged 18-80 undergoing orthopedic surgery under general anesthesia. A total of 50 patients were included in the final analysis. There were no significant differences in baseline characteristics or duration of surgery between the two groups. The pain score on arrival to PACU was not significantly different between either group. However, patients in the DSUVIA group required 50% less opioids in the PACU (p=0.018), with significantly more of them opioid-free (36% vs 8%; p=0.037). Furthermore, DSUVIA-treated patients had improved overall benefit of analgesia scores (OBAS) compared to the control group (p=0.006). OBAS is a validated 7-item tool that assesses pain intensity, adverse effects and patients' satisfaction with analgesia. Limitations of the study include that the DSUVIA was not compared to an active comparator, in that it did not allow for preemptive opioid analgesia in the control group. Also, as the data collection ended at discharge, the authors were unable to assess any additional analgesic benefit of DSUVIA beyond the immediate postoperative period. One of the investigators of the study is a paid consultant for AcelRx but was not compensated for this study.

As a result, any or all of our forward-looking statements in this annual report may turn out to be inaccurate. Factors that may cause actual results to differ materially from current expectations include, among other things, those listed under the section of this annual report titled "Item 3.D—Key Information —Risk Factors" and elsewhere in this annual report. You are urged to consider these factors carefully in evaluating the forward-looking statements. These forward-looking statements speak only as of the date of this annual report. You should read this annual report and the documents that we reference in this annual report and have filed as exhibits to this annual report completely and with the understanding that our actual future results may be materially different from what we expect. You should also review the factors and risks we describe in the reports we will file or submit from time to time with the SEC after the date of this annual report. We qualify all of our forward-looking statements by these cautionary statements.

Summary of Material Risks Associated with Our Business

The principal risks and uncertainties affecting our business include the following:

- The global pandemic caused by COVID-19 could materially adversely impact our business, including our clinical trials, supply chain operation, regulatory timelines and commercial activities.
- We have a limited operating history, no products approved for commercial sale and we may incur significant losses in the future, which makes it difficult to assess our future viability.
- We may require substantial additional financing to achieve our goals, and a failure to obtain this necessary capital when needed on acceptable terms, or at all, could force us to delay, limit, scale back or cease our product development or any other or all operations.
- We are substantially dependent on the success of our product candidates, which may not be successful in nonclinical studies or clinical trials, receive regulatory approval or be successfully commercialized.
- Clinical drug development involves a lengthy and expensive process with uncertain outcomes, and we may encounter substantial delays in our clinical studies. Furthermore, results of earlier studies and trials may not be predictive of results of future trials.

- Interim, "topline" and preliminary data from our clinical trials that we announce or publish from time to time may change as more patient data become available and are subject to audit and verification procedures that could result in material changes in the final data.
- We have limited direct sales and distribution capabilities and no sales experience with any of our own product candidates and we may not be able to successfully commercialize any of our product candidates.
- Competition in the biotechnology and pharmaceutical industries is intense and our competitors may discover, develop or commercialize products faster or more successfully than us. If we are unable to compete effectively our business, results of operations and prospects will suffer.
- We rely on third parties to manufacture our preclinical and clinical drug supplies, and we intend to rely on third parties to produce commercial supplies of any approved product candidate and device.
- Our operating results may vary significantly from period to period and these variations may be difficult to predict.
- The parent drug, drug substance, drug product and other components of our product candidates are currently acquired from single-source suppliers. The loss of these suppliers, or their failure to supply could materially and adversely affect our business.
- The regulatory approval processes of the U.S. Food and Drug Administration, the European Medicines Agency and comparable authorities are lengthy, time consuming, and inherently unpredictable. If we are ultimately unable to obtain regulatory approval for our product candidates, our business will be substantially harmed.
- If we are sued for infringing intellectual property rights of third parties, it will be costly and time consuming, and an unfavorable outcome in that litigation could harm our business.

The summary risk factors described above should be read together with the text of the full risk factors below in the section entitled "Risk Factors" and the other information set forth in this Annual Report on Form 20-F, including our consolidated financial statements and the related notes, as well as in other documents that we file with the U.S. Securities and Exchange Commission. The risks summarized above or described in full below are not the only risks that we face. Additional risks and uncertainties not precisely known to us or that we currently deem to be immaterial may also materially adversely affect our business, financial condition, results of operations, and future growth prospects.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q and Johnson & Johnson's other publicly available documents contain "forward-looking statements" within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. Management and representatives of Johnson & Johnson and its subsidiaries (the Company) also may from time to time make forward-looking statements. Forward-looking statements do not relate strictly to historical or current facts and reflect management's assumptions, views, plans, objectives and projections about the future. Forward-looking statements may be identified by the use of words such as "plans," "expects," "will," "anticipates," "estimates," and other words of similar meaning in conjunction with, among other things: discussions of future operations, expected operating results, financial performance; impact of planned acquisitions and dispositions; impact and timing of restructuring initiatives including associated cost savings and other benefits; the Company's strategy for growth; product development activities; regulatory approvals; market position and expenditures.

Because forward-looking statements are based on current beliefs, expectations and assumptions regarding future events, they are subject to uncertainties, risks and changes that are difficult to predict and many of which are outside of the Company's control. Investors should realize that if underlying assumptions prove inaccurate, or known or unknown risks or uncertainties materialize, the Company's actual results and financial condition could vary materially from expectations and projections expressed or implied in its forward-looking statements. Investors are therefore cautioned not to rely on these forward-looking statements. Risks and uncertainties include, but are not limited to:

Risks Related to Product Development, Market Success and Competition

- Challenges and uncertainties inherent in innovation and development of new and improved products and technologies on which the Company's continued growth and success depend, including uncertainty of clinical outcomes, additional analysis of existing clinical data, obtaining regulatory approvals, health plan coverage and customer access, and initial and continued commercial success;
- Challenges to the Company's ability to obtain and protect adequate patent and other intellectual property rights for new and existing products and technologies in the United States and other important markets;
- The impact of patent expirations, typically followed by the introduction of competing biosimilars and generics and resulting revenue and market share losses;
- Increasingly aggressive and frequent challenges to the Company's patents by competitors and others seeking to launch competing generic, biosimilar or other products and increased receptivity of courts, the United States Patent and Trademark Office and other decision makers to such challenges, potentially resulting in loss of market exclusivity and rapid decline in sales for the relevant product sooner than expected;
- Competition in research and development of new and improved products, processes and technologies, which can result in product and process obsolescence;
- Competition to reach agreement with third parties for collaboration, licensing, development and marketing agreements for products and technologies;
- Competition based on cost-effectiveness, product performance, technological advances and patents attained by competitors; and
- Allegations that the Company's products infringe the patents and other intellectual property rights of third parties, which could adversely affect the Company's ability to sell the products in question and require the payment of money damages and future royalties.

Risks Related to Product Liability, Litigation and Regulatory Activity

- Failure to meet compliance obligations in compliance agreements with governments or government agencies, which could result in significant sanctions;
- Potential changes to applicable laws and regulations affecting United States and international operations, including relating to: approval of new products; licensing and patent rights; sales and promotion of health care products; access to, and reimbursement and pricing for, health care products and services; environmental protection and sourcing of raw materials;

- Changes in domestic and international tax laws and regulations, including changes related to the Tax Cuts and Jobs Act in the United States, increasing audit scrutiny by tax authorities around the world and exposures to additional tax liabilities potentially in excess of existing reserves; and
- Issuance of new or revised accounting standards by the Financial Accounting Standards Board and regulations by the Securities and Exchange Commission.

Risks Related to the Company's Strategic Initiatives and Healthcare Market Trends

- Pricing pressures resulting from trends toward health care cost containment, including the continued consolidation among health care providers and other market participants, trends toward managed care, the shift toward governments increasingly becoming the primary payers of health care expenses, significant new entrants to the health care markets seeking to reduce costs and government pressure on companies to voluntarily reduce costs and price increases;
- Restricted spending patterns of individual, institutional and governmental purchasers of health care products and services due to economic hardship and budgetary constraints;
- Challenges to the Company's ability to realize its strategy for growth including through externally sourced innovations, such as development collaborations, strategic acquisitions, licensing and marketing agreements, and the potential heightened costs of any such external arrangements due to competitive pressures;
- The potential that the expected strategic benefits and opportunities from any planned or completed acquisition or divestiture by the Company may not be realized or may take longer to realize than expected; and
- The potential that the expected benefits and opportunities related to past and ongoing restructuring actions may not be realized or may take longer to realize than expected.

- The impact of armed conflicts and terrorist attacks in the United States and other parts of the world including social and economic disruptions and instability of financial and other markets.

Risks Related to Supply Chain and Operations

- Difficulties and delays in manufacturing, internally, through third party providers or otherwise within the supply chain, that may lead to voluntary or involuntary business interruptions or shutdowns, product shortages, withdrawals or suspensions of products from the market, and potential regulatory action;
- Interruptions and breaches of the Company's information technology systems or those of the Company's vendors, which could result in reputational, competitive, operational or other business harm as well as financial costs and regulatory action;
- Reliance on global supply chains and production and distribution processes that are complex and subject to increasing regulatory requirements that may adversely affect supply, sourcing and pricing of materials used in the Company's products; and
- The potential that the expected benefits and opportunities related to restructuring actions contemplated for the global supply chain may not be realized or may take longer to realize than expected, including due to any required approvals from applicable regulatory authorities.
