This Membership Interest Purchase Agreement ("Agreement") dated as of June 18, 2021, is between Tod J. Robinson, as Trustee of the Tod J. Robinson Separate Property Trust dated December 17, 2017, ("Purchaser") and Hans Hanson ("Seller") as it relates to certain membership interest in Appy Medical, LLC ("Company"), with reference to the following facts.

RECITALS

A. Purchaser wishes to acquire from Seller and Seller wishes to sell to Purchaser certain interests of the Company, and

B. Purchaser and Seller are entering into this Agreement to provide for such acquisition and issuance and to establish certain rights and obligations in connection therewith.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration, the parties hereby agree as follows:

1. **PURCHASE AND SALE OF SHARES.**

1.1 Purchase and Sale of Shares. Effective Upon signing of this agreement, and subject to the terms and conditions of this Agreement, Purchaser hereby purchases from the Seller, and the Seller hereby sells to the Purchaser, his entire fifty percent membership interest of the Company (the "Membership Interest"), for a purchase price of One Thousand Dollars and Zero Cents ($1,000.00) (the "Purchase Price").

1.2 Deliveries by Purchaser. Purchaser hereby delivers to the Seller:

a. The full Purchase Price by check or other method acceptable to the Seller; and

b. Any and all other documents reasonably requested by Seller.

2. **SELLER'S REPRESENTATIONS AND WARRANTIES.** The Seller represents and warrants to Purchaser as follows:

2.1 Authorization, Execution, and Delivery of Agreement.

a. The execution and delivery of this Agreement, the sale of the Membership Interest to Purchaser, and the consummation of the transactions contemplated hereby (i) are within power and authority of the Seller, and (ii) do not require the approval or consent of any other person or entity. This Agreement has been duly executed and delivered by the Seller, and this Agreement constitutes the legal, valid, binding, and enforceable obligation of the Seller, subject to

applicable bankruptcy, insolvency, and similar laws affecting creditors' rights generally and subject to general principles of equity (regardless of whether enforcement is sought in a proceeding in equity or at law).

b. The Membership Interest has been duly authorized by all necessary company action on the part of the Seller and was validly issued, fully paid, and nonassessable, and the Purchaser will acquire valid title to the Membership Interest, free and clear of any encumbrances.

2.2 **No Misrepresentation.** This Agreement contains no untrue statements of a material fact or omits to state a material fact necessary to make the statements contained therein not misleading.

3. PURCHASER'S REPRESENTATIONS AND WARRANTIES. Purchaser represents and warrants to the Seller as follows:

3.1 **Execution and Delivery of the Agreement.** This Agreement has been duly executed and delivered by Purchaser and constitutes the legal, valid, binding, and enforceable obligation of Purchaser, subject to applicable bankruptcy, insolvency, and similar laws affecting creditors' rights generally and subject to general principles of equity (regardless of whether enforcement is sought in a proceeding in equity or at law).

3.2 **No Brokers.** No broker, finder, or investment banker is entitled to any brokerage, finder's, or other fee or commission in connection with the transactions contemplated hereby based on arrangements made by or on Purchaser's behalf.

3.3 **Purchase Entirely for Own Account.** This Agreement is made with Purchaser on Purchaser's representation to Seller, which Purchaser confirms by execution of this Agreement, that Purchaser is acquiring the Shares for Purchaser's own account, not as a nominee or agent, and not with a view to the resale or distribution of any part thereof, other than as permitted by applicable federal and state securities law. By executing this Agreement, Purchaser further represents Purchaser does not have any contact, undertaking, agreement, or arrangement with any person to sell, transfer, or grant participation to such person or to any third person with respect to any of the Shares.

3.4 **Power To Execute Agreement.** Purchaser represents Purchaser has full power and authority to enter into this Agreement.

3.5 **Access to Information About Seller.** Purchaser has had the opportunity to discuss the Seller's business and affairs with such officers or other Seller officials as Purchaser deems necessary or appropriate, and Purchaser believes he has received

all the information Purchaser considers necessary or appropriate for deciding whether to purchase the Membership Interest.

3.6 **Investment Experience.** Purchaser acknowledges he is able to fend for himself, can bear the economic risk of this investment, and has such knowledge and experience in financial or business matters that he is capable of evaluating the merits and risks of the investment in the Shares.

3.7 **Restricted Securities.** Purchaser understands the Shares he is purchasing are characterized as restricted securities under the federal securities laws because they were acquired from Seller in a transaction not involving a public offering and under such laws and applicable regulations the securities may be resold without registration only in certain limited circumstances.

4. GENERAL PROVISIONS.

4.1 **Survival of Representations, Warranties, and Covenants.** Notwithstanding any investigation conducted or notice or knowledge obtained by or on behalf of any party hereto, the representations, warranties, and covenants in this Agreement will survive the sale of the Membership Interest under this Agreement.

4.2 **Expenses.** Each party will pay its, his, or her own expenses incidental to the preparation of this Agreement, the carrying out of the provisions hereof, and the consummation of the transaction contemplated hereby.

4.3 **Utah Corporate Securities Law.** THE SALE OF THE SECURITIES THAT ARE THE SUBJECT OF THIS AGREEMENT HAVE NOT BEEN QUALIFIED WITH THE DIVISION OF CORPORATE FINANCE OF THE STATE OF UTAH; THE ISSUANCE OF SUCH SECURITIES AND THE PAYMENT OR RECEIPT OF ANY PART OF THE CONSIDERATION FOR SUCH SECURITIES BEFORE UTAH QUALIFICATION IS UNLAWFUL UNLESS THE SALE OF SECURITIES IS EXEMPT FROM QUALIFICATION BY SECTIONS 61-1-14 OF THE UTAH UNIFORM SECURITIES ACT. THE RIGHTS OF ALL PARTIES TO THIS AGREEMENT ARE EXPRESSLY CONDITIONED ON SUCH QUALIFICATION BEING OBTAINED, UNLESS THE SALE IS SO EXEMPT.

4.4 **Governing Law.** This Agreement will be governed by, and construed in accordance with, the laws of the State of Utah, excluding those laws that direct the application of the laws of another jurisdiction.

4.5 **Headings.** The headings of the sections of this Agreement are for convenience and will not be considered in construing or determining the interpretation of this Agreement.

Regarding the Disciplinary Actions

While the applicant's facility located in Concord, CA has not been subject to any discipline, as previously reported to your office, Avanos Medical Sales, LLC (Avanos) located at 6620 South Memorial Place, Suite 100 in Tucson, Arizona, was subject to a disciplinary proceeding in February 2020, in the state of Colorado. The charges in dispute were failure to notify the Board in a timely manner in connection with a name change. Avanos paid a $1,150.00 fine and resolved the matter and is currently in good standing with the Colorado State Board of Pharmacy. The delay in notification was inadvertent and procedures have been put in place to ensure that a similar delay does not occur. Enclosed is a copy of the Colorado Stipulation and Final Agency Order.

In addition, as previously reported, in July 2020, Avanos received an administrative complaint from Florida alleging that 1) the company failed to notify the Florida Department of Business and Professional Regulation (Department) within 10 days of a change in Designated Representative; 2) Avanos operated as an out-of-state prescription drug wholesale distributor without a valid permit; and 3) Avanos failed to maintain business records with required elements. Avanos paid a $12,400 fine to resolve the matter and is working towards resolving the issues noted by the Department. Enclosed is a copy of the final Florida Settlement Agreement.

Lastly, in September 2021, Avanos received an administrative complaint from Maine alleging that the company failed to notify the Maine Board of Pharmacy (Board) of the Colorado and Florida disciplinary actions within 10 days as required under Maine law. Avanos paid a $500 fine to resolve the matter. Enclosed is a copy of the final Maine Consent Agreement.

Case No. 2021-PHA-17386	)

PARTIES

This document is a Consent Agreement regarding the pending application of Avanos Medical Sales, LLC, for the renewal of its prescription drug wholesaler license. The parties to this Consent Agreement are: Avanos Medical Sales, LLC ("Avanos"), the Maine Board of Pharmacy ("the Board"), and the Office of the Maine Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

STATEMENT OF FACTS

1. Since November 28, 2016, Avanos has been licensed in Maine as a prescription drug wholesaler with a registered location of 6620 South Memorial Place, Suite 100, Tucson, Arizona (license number **WH70002353**).

2. On February 24, 2020, the Colorado State Board of Pharmacy imposed discipline against Avanos's Colorado registration as a non-resident wholesaler (Registration # WHO 7416) in Case No. 2019-2025.

3. Avanos then failed to report the Colorado disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

4. On August 11, 2020, the State of Florida, Department of Business & Professional Regulation, Division of Drugs, Devices, and Cosmetics, imposed discipline against Avanos's Florida license in Case Number 2019-055427.

5. Avanos then failed to report the Florida disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

6. On September 25, 2020, Avanos reported to the Board for the first time that it had been disciplined by the Colorado State Board of Pharmacy and the State of Florida, Department of Business & Professional Regulation, Division of Drugs, Devices, and Cosmetics.

7. Pursuant to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C), the Board may deny, refuse to renew, suspend, or revoke a license and impose other discipline for failing to report a license disciplinary action to the Board within 10 days of that action.

8. At its meeting on August 5, 2021, the Board reviewed the above information and voted to preliminarily deny Avanos's application for renewal of its license to be a prescription drug wholesaler. In lieu of the denial, the Board also voted to offer Avanos this Consent Agreement. Unless Avanos either requests, in writing, a hearing regarding the appeal of the preliminary denial within thirty (30) days of receipt of the Notice of Preliminary Denial, or accepts this Consent Agreement by signing and dating it and returning it to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, by **September 11, 2021**, the preliminary denial of Avanos's application for licensure as a prescription drug wholesaler will become final.

COVENANTS

9. Avanos admits to the facts above and admits that such conduct constitutes grounds for denial of or refusal to renew its license and for the imposition of discipline pursuant

to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C) for failing to report disciplinary action taken in another jurisdiction against a professional license no later than 10 days after the action was taken.

10. As discipline for the violation admitted to in paragraph 9 above, Avanos agrees to accept the following DISCIPLINARY ACTION:

a) A REPRIMAND; and

b) A CIVIL PENALTY in the amount of five hundred dollars ($500.00) payment of which shall be made payable to the "Treasurer, State of Maine" and delivered to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement.

11. Upon receipt of the signed Consent Agreement with the enclosed payment of the civil penalty from Avanos, the Board will renew Avanos's license contingent upon it meeting all other eligibility criteria.

12. Violation of any of the terms or conditions of this Consent Agreement by Avanos shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

13. The Board and Avanos agree that no further agency action will be initiated against its license by the Board based upon the specific violations admitted to herein, except or unless Avanos fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct if other allegations are brought against Avanos, and this Consent Agreement will be admitted into evidence in any future adjudicatory hearing involving Avanos. The Board may also

consider the fact that discipline was imposed by this Consent Agreement in determining appropriate discipline in any further complaints against Avanos.

14. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

15. The Board and the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

16. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

17. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

18. Avanos acknowledges by its duly authorized representative's signature hereto that it has had an opportunity to consult with an attorney before executing this Consent Agreement, that it executes this Consent Agreement voluntarily, and that it agrees to abide by all terms and conditions set forth herein.

Medline Industries, Inc
Disciplinary History

Attachment 4

Date	Facility	Description of State Action	Corrective Actions
8/3/2005	1401 N. Universal Ave, Kansas City, MO 64120	**FILE CLOSED 2010** Medline Industries' Kansas City, MO license (#2003031660) was disciplined for failure to renew on-time and for insufficient temperature control procedures. Medline was placed on probation for 5 years. Throughout the probationary period, the state conducted multiple inspections of the facility and found Medline to be in compliance with all requirements. The probationary period closed in August 2010.	Medline's Regulatory Affairs Department was significantly expanded to include a team of 7 Licensing Specialist that monitor and ensure each of our 200+ licenses are renewed on-time. A temperature control room was also constructed at the facility to ensure product is stored at the appropriate temperature and humidity levels. These control rooms are now a standard feature at our distribution centers, and we have worked closely with VAWD throughout our distribution network to ensure that our temperature control facilities and procedures align with industry best practices.
12/7/2006	9101 Riverside Parkway, Lithia Springs, GA 30122	**FILE CLOSED 2008** Medline's Florida Certified Designated Representative at our Georgia facility resigned unexpectedly. The state of Florida suspended Medline's Florida Out of State Rx Drug Wholesale Distributor Permit (#23:1470) until a new licensed Designated Representative was hired at the facility.	To prevent a situation like this from occurring in the future, every Medline facility licensed in FL has multiple Florida Certified Designated Representatives on staff.
11/16/2007	10601 Southport Drive, Orlando, FL 32824 401 Commerce Blvd., Oldsmar, FL 34677 4750 118th Ave N Clearwater, FL 33762	**FILE CLOSED 2008** Medline Industries was cited for several violations including: failure to pass and maintain a pedigree that met Florida's specific requirements; having the wrong type of permit for activities being performed (in addition to the manufacturing permit that we had, Florida required that we also have a repacker permit); distribution of saline to an unauthorized recipient; and an Rx drug item was found at an unlicensed raw materials storage facility. Several of the violations were challenged and reduced substantially or removed during the settlement process. Medline was assessed and paid a fine for these violations. All issues were addressed and resolved to the satisfaction of the FL DOH. After duly notifying state authorities, as required, we were fined by New York (Cal. No. 27278) for out-of-state professional misconduct. In 2010, Medline made an unrelated business decision to close the Oldsmar and Clearwater facilities.	To address the pedigree issues, Medline instituted a Florida specific pedigree system to ensure that any pedigree shipments within our distribution network with potential to end up in Florida have the required Florida specific documentation. (Note - these requirements have since been preempted by federal law). To address the issue of having the wrong permit type, Medline secured a repackaging permit, in addition to the manufacturing permit the facility already had. To address the sale of saline to an unauthorized person, Medline instituted a new procedure for obtaining and maintaining customer licenses for all Rx drug purchases; this procedure generates an automatic block of any Rx drug orders by an unlicensed customer in our SAP system. The Rx drug item unintentionally stored at our raw materials facility was properly disposed of, and our waste disposal procedures were updated to ensure that this mistake would not recur.
11/26/2007	2708 NE Waldo Rd., Gainesville, FL	**FILE CLOSED 2008** Medline Industries' FL license (# 22:1022) was suspended for violations identified during a Florida BOP facility inspection. Medline, through Counsel, addressed the issues raised in the inspection and established that the suspension was unjustified. The suspension was lifted 3 days later on January 22, 2008 (Case # 2007-37412). In 2010, Medline made an unrelated business decision to close this facility.	After this inspection, Medline conducted a thorough review of its policies and procedures. Additionally, an internal auditing program was implemented to ensure that each distribution center is in compliance with internal policies and procedures, as well as state and federal regulations.
3/5/2008	149 New Camellia Blvd., Covington, LA 70433	**FILE CLOSED 2008** Medline Industries' license #4318 was cited for failure to properly maintain copies of current customer licenses on site (Louisiana Administrative Docket #2008006). Medline was assessed and paid a fine. After duly notifying state authorities, as required, we were fined by New York (Cal. No. 27278) for out-of-state professional misconduct.	In addition to storing copies of our customers' licenses at headquarters, we now store these licenses digitally so they can be accessed by our distribution centers.
5/9/2008	5450 W. Stewart Ave., Wausau, WI	**FILE CLOSED 2009** Medline Industries' license (# 1116-045) was cited and fined by the Wisconsin Department of Regulation & Licensing during an inspection. Medline managed a portion of a Wisconsin hospital's warehouse. The inspector cited Medline for failure to have a dividing fence between the Medline managed portion of the facility and the hospital portion of the facility - even though all of the products were owned by the hospital. Medline was also cited for failure to access several policies and procedures during the inspection. Corrections were made and the facility was re-inspected, to the satisfaction of the state (Case #08 PHM 037). After duly notifying state authorities, as required, we were fined by the states of Hawaii (Case #PHA 2009-7-L) and New York (Cal. No. 27278) out-of-state professional misconduct. In 2010, Medline made an unrelated business decision to close this facility.	Immediately after the inspection, Medline and the owner of the facility erected a locked fence to divide the faculty. Medline also reviewed all of its other facilities to make sure no similar situations existed. In addition, training on where and how to access current policies and procedures was increased for distribution center personnel. This training is in addition to the training they receive on the policies and procedures themselves.
8/21/2008	94-1420 Moaniani St., Waipahu, Hawaii	**FILE CLOSED 2013** Medline Industries' license (PWD 115) was fined $5000 and placed on probation for 5 years for failure to report the Florida and Missouri disciplinary actions within 30 days. While Medline filed the required reports, the 30 day deadline was missed. Probationary period ended August 2013. (Case # PHA 2008-17-L)	Medline takes this oversight very seriously and we have implemented a new process to notify the required boards of any future disciplinary actions within 10 days of a final action.
3/19/2010	1401 N. Universal Ave, Kansas City, MO 64120	**FILE CLOSED 2010** Medline applied for a Colorado Out of State Wholesaler license for the Missouri distribution center and was issued a conditional license by the CO Board of Pharmacy until the facility's MO probation period ended (approximately 5 months). The CO BOP was informed when the MO probationary period was completed, and subsequently removed the encumbered status of this facility's CO license.	See above for corrective actions related to the underlying sanction.
1/6/2021	1501 Harris Rd, Libertyville, IL 60048	**FILE CLOSED 2021** Medline Industries, Inc. License #01-1985050 received a fined $250 by the Ohio Board of Pharmacy for the sale of dangerous drugs to an unlicensed entity. Medline maintained a current and valid DEA license on file for the physician rather than the TDDD license for the facility. The facility's TDDD license at the time of the sale had expired, unbeknownst to Medline. Case No. A-2020-0054 I-2019-0972-B. The fine was paid on January 21, 2021 and the case was closed.	Medline takes this oversight very seriously. We reviewed our processes and updated our guidelines for the type of license required for business in Ohio to ensure proper type of licenses applied to the customer are valid and current. The TDDD Ohio licenses are reviewed on an annual basis to ensure compliance.

with Mr. Bray, "Plaintiffs"), who is a 30% stockholder, have joined together to bring this lawsuit challenging the UpHealth board's decisions to (1) reduce the quorum for the annual meeting of stockholders to one-third as permitted by section 216 of the Delaware General Corporation Law; and (2) to refuse, consistent with UpHealth's bylaws, to hold a special meeting of stockholders so that Mr. Bray, with his irrevocable proxy from Dr. Kathuria and other insiders, could amend UpHealth's bylaws to permit nominations for directors on only five business days' notice.

Plaintiffs seek an expedited trial in advance of the June 28, 2022 annual meeting of stockholders even though UpHealth publicly announced the date of the annual meeting of stockholders on April 15, 2022 and Plaintiffs made no attempt to comply with the Company's advance notice bylaws or do anything at all until May 27, 2022. Mr. Bray asked to nominate unnamed directors at the annual meeting a month away, and more than a month after the deadline for advance notice of nominations.

While some expedition may be warranted, expediting discovery and a full trial in advance of the June 28, 2022 annual meeting is not warranted. Not only are Plaintiffs' guilty of laches and such a short schedule would make adequate discovery impossible, most importantly, there is no irreparable harm because, even if Plaintiffs were to succeed on their claims, as observed by this Court in *Oliver Press*: "an adequate remedy could be fashioned after the fact."

STATEMENT OF FACTS

1. UpHealth the Board, and Mr. Bray

UpHealth resulted from the merger of Uphealth Holdings, Inc. ("Old UpHealth") and Cloudbreak Health, LLC ("Cloudbreak"). GigCapital2, Inc. ("GigCapital2") merged with Old Uphealth and Cloudbreak on June 9, 2021. (Compl. ¶4.) Old UpHealth was comprised of six companies brought together in connection with the merger with GigCapital2. There are nine members of the UpHealth board of directors: Plaintiff Dr. Chirinjeev Kathuria, Defendants Dr. Avi Katz, Dr. Raluca Dinu, Neil Miotto, Nathan Locke, Agnès Rey-Giraud, and Moshe Bar-Simon-Tov, and non-parties Jerome Ringo and Dr. Mariya Pylypiv. (Compl. ¶¶17-18.)

Uphealth has a classified board, with three Class I directors whose terms expire on the date of the 2022 annual meeting (Mr. Miotto, Mr. Bar-Simon-Tov, and Mr. Ringo), three Class II directors whose terms expire on the date of the 2023 annual meeting (Dr. Dinu, Dr. Pylypiv, and Mr. Locke), and three Class III directors whose terms expire on the date of the 2024 annual meeting (Ms. Rey-Giraud, Dr. Avi Katz, and Dr. Chirinjeev Kathuria). (Compl. ¶¶17-18, 22; Ex. 1 at 4.)

The Verified Complaint (the "Complaint") alleges that "[a]s agreed in the Business Combination Agreement entered into in contemplation of the de-SPAC merger, Plaintiff Chirinjeev Kathuria was added to the Board as of the closing of the

Business Combination Agreement, and both Plaintiff Chirinjeev Kathuria and Defendant Avi Katz were given the title Co-Chairman of the Board." (Compl. ¶11.)

Dr. Kathuria owns 43,158,752 or approximately 30% of the 143,840,305 outstanding shares of common stock of the Company. (Compl. ¶3.) Non-party Dr. Mariya Pylypiv owns 7,543,457 shares or approximately 5% of the common stock in the Company. (Compl. Ex. C.) Plaintiff Jeffrey Bray is the record owner of 4,088,170 shares of common stock of the Company, and he and his family are beneficial owners of 13,397,483 shares of the Company's common stock. (Compl. ¶2, Ex. C.) Mr. Bray holds an irrevocable proxy to vote certain shares of stock totaling slightly over 50% of the outstanding shares of stock of the Company, including Dr. Kathuria's and Dr. Pylypiv's. (Compl. ¶2-3.) Dr. Pylypiv is an employee of the finance department of the Company. Mr. Bray is the Company's Chief Legislative Affairs Officer.

2. The Annual Meeting

On April 15, 2022, UpHealth publicly announced that the Company's 2022 annual meeting of stockholders was scheduled for June 28, 2022. (Compl. ¶30.) Under UpHealth's bylaws, the deadline for stockholders to have given notice of a nomination for the board of directors was April 25, 2022, ten days after the announcement of the date of the 2022 annual meeting. (*Id.*) Neither Plaintiff, nor

any other stockholder gave, or attempted to give, notice of a nomination of proposed directors by that date.

On May 10, 2022, the board of directors met and resolved to nominate and reclassify certain directors. (Compl. ¶22.) During that meeting, the UpHealth board considered the nomination for election of directors for election to Class I members. After discussion, with Dr. Kathuria leaving during the discussion (Compl. ¶21), the Board resolved that Mr. Miotto be renominated to the Board, but that Messrs. Bar-Simon-Tov and Ringo, not be renominated to the Board. (Compl. ¶¶19-22.) To fill the vacancies created by these two members of Class I not being renominated, the board resolved that Dr. Dinu be nominated to serve as a Class I director, which would result in there being a vacancy in Class II. And while the board hoped that its incoming CEO could be nominated as the final Class I director, if that were not possible, the board resolved that Ms. Rey-Giraud be nominated to serve as a Class I director instead with the new CEO being appointed to the vacancy in Class III. The board voted by seven to zero to approve the resolutions. The board, by a 5 to 2 vote, approved the minutes of the May 10, 2022, meeting on May 31, 2022. (Compl. ¶43.)

On May 26, 2022, the independent directors of the UpHealth board held a meeting to comply with the requirement of the NYSE that the independent members of the board meet at least annually without members of management of the Company or the non-independent members of the board. (Compl. ¶24; NYSE 303A.03.)

ACERA SURGICAL, INC., RETECTIX, LLC, AND WASHINGTON UNIVERSITY, Plaintiffs, v. NANOFIBER SOLUTIONS, LLC, PARAGEN TECHNOLOGIES LLC, ATREON ORTHOPEDICS LLC, AND RENOVODERM LLC, Defendants.

United States District Court, D. Delaware.

July 28, 2021.

REPORT AND RECOMMENDATION

JENNIFER L. HALL, *Magistrate Judge.*

Presently pending before the Court are Defendants' Motions to Dismiss for Failure to State a Claim. (D.I. 17; D.I. 35.) As announced at the hearing on July 16, 2021, I recommend that the motions be DENIED. My Report and Recommendation was announced from the bench at the conclusion of the hearing as follows:

> This is the Court's Report and Recommendation on Defendants' motions to dismiss for failure to state a claim. (D.I. 17; D.I. 35.) I will not be issuing a separate opinion, but we will put on the docket a written version that incorporates by reference a transcript of my oral ruling today. I want to emphasize before I start that, while I'm not issuing a separate opinion, we have followed a full process for making the decision that I'm about to state. There was full briefing on these motions, and those papers and the arguments today have been carefully considered.
>
> For the reasons I will discuss, I recommend that Defendants' motions to dismiss be DENIED.
>
> Plaintiffs Acera Surgical, Inc., Washington University, and Retectix, LLC (collectively, Plaintiffs) filed this patent infringement action against Defendants Atreon Orthopedics LLC, Nanofiber Solutions, LLC, Paragen Technologies LLC and Renovoderm LLC (collectively, Defendants) on July 23, 2020. (D.I. 1.)
>
> Defendants moved to dismiss the original complaint for failure to state a claim on September 11, 2020. (D.I. 11.) Plaintiffs filed a first amended complaint on October 2, 2020. (D.I. 16.)
>
> The FAC contained four counts, alleging infringement of four patents. In particular, it alleged that Defendants directly infringe U.S. Patent Nos. 10,617,512 (the '512 patent), 10,080,687 (the '687 patent), 10,682,444 (the '444 patent), and 10,632,228 (the '228 patent) through their manufacture, use, offering for sale, selling and/or importation of two accused products: the Phoenix Wound Matrix and the Rotium Bioresorbable Wick. (D.I. 16.) On October 23, 2020, Defendants moved to dismiss the first amended complaint for failure to state a claim. That motion was fully briefed and remains pending before the Court. (D.I. 17; D.I. 18; D.I. 20; D.I. 22.)

On February 26, 2021, the parties filed a stipulation allowing Plaintiffs to file a second amended complaint to include allegations of direct infringement of a newly issued patent, U.S. Patent No. 10,888,409 (the '409 patent). (D.I. 30.) Plaintiffs filed the SAC on March 3, 2021. (D.I. 32.) Counts One through Four of the SAC are essentially unchanged from the FAC. Count Five alleges that Defendants directly infringe the '409 patent through their manufacture, use, offering for sale, selling, and importation of the Phoenix Wound Matrix product.

The parties agreed that, because Counts One through Four of the SAC were substantially identical to the FAC, the previously-filed motion to dismiss would not be re-briefed. Defendants filed another motion to dismiss on March 23, 2021, arguing that Count Five should also be dismissed, and that motion has also been fully briefed. (D.I. 35; D.I. 36; D.I. 39; D.I. 40; D.I. 41)

On April 26, 2021, the pending motions were referred to me for a Report and Recommendation. Argument was held on both motions to dismiss today, and this is my Report and Recommendation on those motions.

The patents-in-suit relate to polymeric fiber matrices for assisting wound healing. According to the SAC, Plaintiff Washington University is the owner by assignment of the '512, '409, '687, and '444 patents, and Plaintiffs Retectix and Acera are exclusive licensees. The SAC further alleges that Acera is the assignee of all rights related to the enforcement of the '228 patent. (D.I. 32 ¶¶ 22-26.)

The SAC alleges that all four Defendants directly infringe the patents-in-suit through their manufacture, use, sale, and importation of the Phoenix Wound Matrix and Rotium Bioresorbable Wick products. (D.I. 32 ¶¶ 6, 15, 19, 27-28.)

I am not going to read into the record my understanding of the legal standard that applies to a motion to dismiss under Federal Rule of Civil Procedure 12(b)(6), or how that rule has been applied in the context of pleading direct infringement. I set forth those standards in my Report and Recommendation in Boston Fog v. Ryobi. And I incorporate those standards by reference here.1

Here, assuming the facts in the SAC to be true, I believe that Plaintiffs have met the threshold for alleging direct infringement by Defendants.

I will start with Count One, which alleges that Defendants' Phoenix Wound Matrix and Rotium Bioresorbable Wick infringe at least claim 1 of the '512 patent. (D.I. 32 ¶ 32.) I'm not going to read claim 1 into the record,2 but it covers a nanofiber scaffold for use in repairing tissue. The claim requires, among other things, first and second layers of polymeric fibers, first and second portions of the scaffold having different tensile strengths, and it requires that the scaffold be configured to be applied to tissue containing the defect, that it be flexible, and that it be configured to degrade via hydrolysis.3

In support of the assertion that the Phoenix Wound Matrix includes a nanofiber scaffold for use in repairing a tissue defect, the SAC points to documents that describe the Phoenix Wound Matrix as a conformable three-dimensional matrix made from two types of polymer fibers. (See, e.g., D.I. 32 ¶¶ 28, 34-35, Exs. 5-7.) The SAC also points out that Defendants' own publications contain SEM micrographs that illustrate the nanofiber scaffold. (See, e.g., id. ¶ 35, Ex. 7.) The SAC further alleges that the Phoenix Wound Matrix is advertised as being bioabsorbed after 14 to 21 days after degrading via hydrolysis. (Id. ¶¶ 28, 36, Exs. 5, 7.)

In addition, the SAC walks through every element of claim 1 and alleges that each claim element is met by the Phoenix Wound Matrix; many of those allegations parrot the language of the elements of claim 1 and state that the element is met on information and belief.4 (Id. ¶ 36.)

As for the Rotium Bioresorbable Wick, the SAC alleges that it has substantially the same structure as the Phoenix Wound Matrix. (Id. ¶ 37.) The SAC also refers to a SEM micrograph that depicts the nanofibers of the Rotium product and points to exhibits that describe the product for use in healing rotator cuff injuries. (Id. ¶ 37, Exs. 8-10.) The SAC also alleges that the Rotium Bioresorbable Wick, as its name suggests, is advertised as being able to be absorbed by the body (i.e., that it degrades) over 3 to 4 months. (Id. ¶ 38, Ex. 10.)

The SAC also walks through every element of claim 1 and alleges that each claim element is met by the Rotium Bioresorbable Wick; many of those allegations parrot the language of the elements of claim 1 and state that the element is met on information and belief.5 (Id. ¶ 38.)

Determining whether a complaint is plausible is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.6 I conclude that the allegations set forth in count 1 of the SAC are sufficient to put Defendants on notice of the infringing activity. The SAC specifically identifies two accused products, and it alleges that those products contain every limitation of at least claim 1 of the '512 patent. It also points to promotional materials and other exhibits that demonstrate Plaintiff's view as to how at least some of claim elements of a representative claim are met by the accused products. Under these circumstances, I conclude that the claim is plausible.7

Defendants argue that the allegations are insufficient because the SAC falls to plead specific facts . . . connecting the features of the Accused Products to . . . any claim limitations. I reject that argument. For one thing, as I just explained, the SAC does plead some facts that plausibly suggest that the accused products have some of the claim limitations. For example, the SAC expressly refers to attached exhibits that plausibly support its allegations that the accused products are used for repairing a defect in a tissue substrate, that they contain a nanofiber scaffold, and that they degrade via hydrolysis after a certain period of time. And there is no requirement that the plaintiff plead facts establishing that each element of an asserted claim is met.8

Defendants take issue with Plaintiff's allegations on information and bellef with respect to the remaining claim elements. But pleading upon information and belief is permissible where the requisite facts are particularly within the defendant's knowledge and control.9

Here, Plaintiffs contend—and Defendants don't seriously dispute—that given the nature of the technology, it is difficult to determine from a finished product whether the internal structure of the accused products meets certain claim limitations, for example, the requirement that the claimed nanofiber scaffold have a first layer and a second layer. (D.I. 20 at 19.)

Plaintiffs also contend—and Defendants don't seriously dispute—that Defendants, at least at the time of briefing, had declined to provide discovery that would demonstrate whether the accused products have more than one layer. I'm not saying that Defendants' refusal to provide discovery was inappropriate, but it is a fact. Plaintiffs argue that it is unclear from publicly available information whether the accused products have more than one layer (D.I. 20 at 20; D.I. 39 at 11), and Defendants appear to have taken the position that samples of the accused products are not available to the public or competitors for testing or reverse engineering (D.I. 40, Ex. 1). Under these circumstances, I find that Plaintiffs' allegations on information and belief are appropriate. I do not recommend dismissal of Count One on that basis.

Defendants also point out that Count Four of the SAC alleges that the accused products infringe the '228 patent, which requires a single layer. According to Defendants, the accused products cannot both infringe the two-layer claims in the '512 patent (Count One) and the single layer claims of the '228 patent (Count Four). And that, according to Defendants, makes both counts implausible. I disagree. It is permissible to plead in the alternative.10 Moreover, whether the accused products have one layer or multiple layers is a fact that Plaintiffs say they don't have access to and Defendants do. And there are also potential issues with respect to claim construction that are implicated. So, I do not recommend dismissal on that basis.

Defendants' arguments for dismissal of Counts Two through Five mirror Defendants' arguments for dismissal of Count One. I reject Defendants' arguments for the same reasons. Of course, Counts Two through Five pertain to different patents, each of which have different claims with different elements.11 Counts Three and Five refer only to the Phoenix Wound Matrix product. But the allegations set forth in Counts Two through Five are in substantially the same format as those in Count One. And they state plausible claims for the same reasons that Count One states a plausible claim. In sum, I conclude that Counts One through Five state plausible claims.

I also note that the parties have already negotiated, and the Court has entered, a Protective Order, which means that the discovery that Plaintiffs say they need should be able to be produced if it hasn't already. (D.I. 38.) I also note that the parties have agreed upon the form of a scheduling order that requires the Plaintiffs to provide infringement contentions 30 days after receiving core technical documents and the Plaintiffs have represented at the hearing today that they could provide contentions within approximately 30 days once the scheduling order is entered. (D.I. 26.) Thus, Defendants will soon have more clarity as to what the allegations are. If Plaintiffs press an unsupportable claim of infringement, the Court will deal with that scenario in the appropriate manner at the appropriate time.

Defendants next argue that Counts One through Five should be dismissed as to Defendants Atreon and Paragen on the basis that [the SAC] fails to provide sufficient notice [to those defendants] of the allegedly infringing conduct. (D.I. 18 at 11.)

I disagree. Essentially, the SAC alleges that each Defendant did everything. Defendants Paragen, RenovoDerm and Atreon are alleged to be subsidiaries of Nanofiber, with the same leadership team. (D.I. 32 ¶¶ 10-11.) The SAC alleges that all Defendants jointly control and direct the manufacture and sale of the accused products (id. ¶ 15), and that they are engaged in the business of manufacturing, selling, offering for sale, and/or importing the Phoenix Wound Matrix and the Rotium Bioresorbable Wick, among other nanofiber scaffold products. (Id. ¶¶ 19, 27, 28, 30.) At this stage, those allegations must be taken as true.12

Moreover, regarding Paragen specifically, it is alleged to have been involved in funding the development and commercialization of the Phoenix Wound Matrix. (Id. ¶¶ 11-12.) The SAC also contends that Paragen's website refers to nanofiber scaffolds as our technology. (Id. ¶ 7.)

Regarding Atreon specifically, the SAC alleges that its website advertises the Rotium Bioresorbable Wick and that it contains a SEM image illustrating the nanofiber scaffold of that product. (Id. ¶¶ 30, 37.) Further, Exhibit 10 is a brochure for the Rotium Bioresorbable Wick and it has Atreon's name on it. It appears to have been put out by Atreon. (Id., Ex. 10.)

That is enough to move forward against all the Defendants at this stage.

For the foregoing reasons, I recommend that the Court deny the motions to dismiss.

This Report and Recommendation is filed pursuant to 28 U.S.C. § 636(b)(1)(B),(C), Federal Rule of Civil Procedure 72(b)(1), and District of Delaware Local Rule 72.1.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to `state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009) (quoting *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570 (2007)). A claim is plausible on its face when the complaint contains "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (citing *Twombly*, 550 U.S. at 556). A possibility of relief is not enough. *Id.* "Where a complaint pleads facts that are `merely consistent with' a defendant's liability, it `stops short of the line between possibility and plausibility of entitlement to relief.'" *Id.* (quoting *Twombly*, 550 U.S. at 557).

In determining the sufficiency of the complaint under the plausibility standard, all "well-pleaded facts" are assumed to be true, but legal conclusions are not. *Id.* at 679. "[W]hen the allegations in a complaint, however true, could not raise a claim of entitlement to relief, this basic deficiency should be exposed at the point of minimum expenditure of time and money by the parties and the court." *Twombly*, 550 U.S. at 558 (internal marks omitted).

A complaint sufficiently pleads direct patent infringement when it puts the defendant "on notice of what activity . . . is being accused of infringement." *Nalco Co. v. The Federal Circuit has further directed that, at this stage of the litigation, the plaintiff is "entitled to all inferences in its favor on its theory [of infringement]." *Id.* at 1349. And district courts have been cautioned against resolving claim construction disputes at this stage. *Id.* (reversing the district court's dismissal because "Defendants' arguments boil down to objections to [Plaintiff's] proposed claim construction . . ., a dispute not suitable for resolution on a motion to dismiss").

2. Claim 1 of the '512 patent recites:

1. A multi-laminar electrospun nanofiber scaffold for use in repairing a defect in a tissue substrate, the multi-laminar electrospun nanofiber scaffold comprising:

a first layer formed by a first plurality of deposited electrospun polymeric fibers; and

a second layer formed by a second plurality of deposited electrospun polymeric fibers, wherein the second layer is combined with the first layer,

wherein at least a first portion of the multi-laminar electrospun nanofiber scaffold comprises a higher density of fibers than a second portion of the multi-laminar electrospun nanofiber scaffold, wherein the first portion comprises a higher tensile strength than the second portion,

wherein the multi-laminar electrospun nanofiber scaffold is configured to degrade via hydrolysis after at least one of a predetermined time or an

wherein the multi-laminar electrospun nanofiber scaffold is configured to be applied to the tissue substrate containing the defect,

wherein the multi-laminar electrospun nanofiber scaffold comprises varying density to be sufficiently flexible to facilitate application of the multi-laminar electrospun nanofiber scaffold to uneven surfaces of the tissue substrate, and

wherein the multi-laminar electrospun nanofiber scaffold comprises varying density to be sufficiently flexible to enable movement of the multi-laminar electrospun nanofiber scaffold by the tissue substrate.

The multi-laminar electrospun nanofiber scaffold includes multiple layers of fibers including a first layer formed by a first plurality of deposited electrospun polymeric fibers; and a second layer formed by a second plurality of deposited electrospun polymeric fibers, wherein the second layer is combined with the first layer. On information and belief, the multi-laminar electrospun nanofiber scaffold further includes at least a first portion of a higher density than a second portion of the multi-laminar electrospun nanofiber scaffold. On information and belief, the first portion also has a higher tensile strength than the second portion. The Phoenix Wound Matrix is also advertised as being configured to degrade via hydrolysis after 14-21 days, which is at least one of a predetermined time or an environmental condition. The Phoenix Wound Matrix is and configured to be applied to the tissue substrate containing the defect. Finally, the multi-laminar electrospun nanofiber scaffold making of the Phoenix Wound Matrix includes varying density to be sufficiently flexible to facilitate application of the multi-laminar electrospun nanofiber scaffold to uneven surfaces of the tissue substrate and to enable movement of the multi-laminar electrospun nanofiber scaffold by the tissue substrate. These acts by Defendants constitute infringement of the '512 patent in violation of 35 U.S.C. § 271(a).

5. Paragraph 38 states in its entirety:

On information and belief, the multi-laminar electrospun nanofiber scaffold further includes at least a first portion of a higher density than a second portion of the multi-laminar electrospun nanofiber scaffold. On information and belief, the first portion also has a higher tensile strength than the second portion. The Rotium Bioresorbable Wick is designed to be fully absorbed by 3-4 months, which is at least one of a predetermined time or an environmental condition. The Rotium Bioresorbable Wick is configured to be applied to the tissue substrate containing the defect. Finally, the multi-laminar electrospun nanofiber scaffold making of the Rotium Bioresorbable Wick includes varying density to be sufficiently flexible to facilitate application of the multi-laminar electrospun nanofiber scaffold to uneven surfaces of the tissue substrate and to enable movement of the multi-laminar electrospun nanofiber scaffold by the tissue substrate. PARTIES

This document is a Consent Agreement regarding the pending application of Avanos Medical Sales, LLC, for the renewal of its prescription drug wholesaler license. The parties to this Consent Agreement are: Avanos Medical Sales, LLC ("Avanos"), the Maine Board of Pharmacy ("the Board"), and the Office of the Maine Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

STATEMENT OF FACTS

1. Since November 28, 2016, Avanos has been licensed in Maine as a prescription drug wholesaler with a registered location of 6620 South Memorial Place, Suite 100, Tucson, Arizona (license number **WH70002353**).

2. On February 24, 2020, the Colorado State Board of Pharmacy imposed discipline against Avanos's Colorado registration as a non-resident wholesaler (Registration # WHO 7416) in Case No. 2019-2025.

3. Avanos then failed to report the Colorado disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

4. On August 11, 2020, the State of Florida, Department of Business & Professional Regulation, Division of Drugs, Devices, and Cosmetics, imposed discipline against Avanos's Florida license in Case Number 2019-055427.

5. Avanos then failed to report the Florida disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

6. On September 25, 2020, Avanos reported to the Board for the first time that it had been disciplined by the Colorado State Board of Pharmacy and the State of Florida, Department of Business & Professional Regulation, Division of Drugs, Devices, and Cosmetics.

7. Pursuant to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C), the Board may deny, refuse to renew, suspend, or revoke a license and impose other discipline for failing to report a license disciplinary action to the Board within 10 days of that action.

8. At its meeting on August 5, 2021, the Board reviewed the above information and voted to preliminarily deny Avanos's application for renewal of its license to be a prescription drug wholesaler. In lieu of the denial, the Board also voted to offer Avanos this Consent Agreement. Unless Avanos either requests, in writing, a hearing regarding the appeal of the preliminary denial within thirty (30) days of receipt of the Notice of Preliminary Denial, or accepts this Consent Agreement by signing and dating it and returning it to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, by **September 11, 2021,** the preliminary denial of Avanos's application for licensure as a prescription drug wholesaler will become final.

COVENANTS

9. Avanos admits to the facts above and admits that such conduct constitutes grounds for denial of or refusal to renew its license and for the imposition of discipline pursuant

to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C) for failing to report disciplinary action taken in another jurisdiction against a professional license no later than 10 days after the action was taken.

10. As discipline for the violation admitted to in paragraph 9 above, Avanos agrees to accept the following DISCIPLINARY ACTION:

a) A REPRIMAND; and

b) A CIVIL PENALTY in the amount of five hundred dollars ($500.00) payment of which shall be made payable to the "Treasurer, State of Maine" and delivered to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement.

11. Upon receipt of the signed Consent Agreement with the enclosed payment of the civil penalty from Avanos, the Board will renew Avanos's license contingent upon it meeting all other eligibility criteria.

12. Violation of any of the terms or conditions of this Consent Agreement by Avanos shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

13. The Board and Avanos agree that no further agency action will be initiated against its license by the Board based upon the specific violations admitted to herein, except or unless Avanos fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct if other allegations are brought against Avanos, and this Consent Agreement will be admitted into evidence in any future adjudicatory hearing involving Avanos. The Board may also

consider the fact that discipline was imposed by this Consent Agreement in determining appropriate discipline in any further complaints against Avanos.

14. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

15. The Board and the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

16. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

17. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

18. Avanos acknowledges by its duly authorized representative's signature hereto that it has had an opportunity to consult with an attorney before executing this Consent Agreement, that it executes this Consent Agreement voluntarily, and that it agrees to abide by all terms and conditions set forth herein.

The charges in dispute were failure to notify the Board in a timely manner in connection with a name change. Avanos paid a $1,150.00 fine to resolve the matter and is currently in good standing with the Colorado State Board of Pharmacy. The delay in notification was inadvertent and procedures have been put in place to ensure that a similar delay does not occur. Enclosed is a copy of the Colorado Stipulation and Final Agency Order.

In addition, as previously reported to your office, in July 2020, Avanos received an administrative complaint from Florida alleging that 1) the company failed to notify the Florida Department of Business and Professional Regulation (Department) within 10 days of a change in Designated Representative; 2) Avanos operated as an out-of-state prescription drug wholesale distributor without a valid permit; and 3) Avanos failed to maintain business records with required elements. Avanos paid a $12,400 fine to resolve the matter and is working towards resolving the issues noted by the Department. Enclosed is a copy of the final Florida Settlement Agreement.

As previously reported, in September 2021, Avanos received an administrative complaint from Maine alleging that the company failed to notify the Maine Board of Pharmacy (Board) of the Colorado and Florida disciplinary actions within 10 days as required under Maine law. Avanos paid a $500 fine to resolve the matter. Enclosed is a copy of the final Maine Consent Agreement.

Please note that a disciplinary action is currently pending in Illinois for the Tucson, AZ facility. Additional details may be provided once finalized.

FINDINGS AND CONCLUSIONS

1. The Board has jurisdiction over Respondent Outlet, its registration as a non-resident wholesaler outlet, and the subject matter of this Stipulation and Final Agency Order ("Final Agency Order") pursuant to the Pharmacists, Pharmacy Businesses, and Pharmaceuticals Act at Title 12, Article 42.5, C.R.S. DISPOSITION

7. Letter of Admonition. This Final Agency Order shall constitute a Letter of Admonition as set forth in section 12-42.5-124(6)(b) and (c), C.R.S. The Board hereby admonishes Respondent Outlet for the acts and omissions described in paragraphs 5-6 above.

8. Waiver of Right to Contest. By entering into this Final Agency Order, Respondent Outlet agrees to waive the right provided by section 12-42.5-124(6)(b) and (c), C.R.S., to contest this Letter of Admonition.

9. Fine with Surcharge. Pursuant to section 12-42.5-124(5)(a)(I), C.R.S., Respondent Outlet shall pay a fine of One Thousand Dollars and No Cents ($1,000.00). Respondent Outlet understands and acknowledges that, pursuant to section 24-34-108, C.R.S., the Executive Director of the Department of Regulatory Agencies shall impose an additional surcharge of 15% of this fine. Respondent Outlet shall therefore pay a total amount of One Thousand One Hundred Fifty Dollars and No Cents **($1,150.00)**. The pendency of any suspension or disciplinary action arising out of an alleged violation of this Final Agency Order shall not affect the obligation of Respondent Outlet to comply with all terms and conditions of this Final Agency Order.

12. Advisements and Waivers. Through its undersigned Authorized Representative, Respondent Outlet enters into this Final Agency Order freely and voluntarily, after having the opportunity to consult with legal counsel and/or choosing not to do so. b. To respond to said formal notice of charges;

c. to have a formal disciplinary hearing pursuant to sections 12-42.5-123 and 12-42.5-124, C.R.S.; and

Respondent Outlet freely waives these rights, and acknowledges that such waiver is made voluntarily in consideration for the Board's limiting the action taken against it to the sanctions imposed herein.

13. Acknowledgments. The undersigned Authorized Representative of Respondent Outlet has read this Final Agency Order in its entirety and acknowledges, after having the opportunity to consult with legal counsel and/or choosing not to do so, that Respondent Outlet understands the legal consequences and agrees that none

of the terms or conditions herein is unconscionable. Respondent Outlet is not relying on any statements, promises or representations from the Board other than as may be contained in this Final Agency Order. Respondent Outlet further acknowledges that it is not entering into this Final Agency Order under any duress.

14. Integration and Severability. Upon execution by all parties, this Final Agency Order shall represent the entire and final agreement of and between the parties in this case. In the event any provision of this Final Agency Order is deemed invalid or unenforceable by a court of law, it shall be severed and the remaining provisions of this Final Agency Order shall be given full force and effect.

15. Public Record. Upon execution by all parties, this Final Agency Order shall be a public record, maintained in the custody of the Board.

16. Board Order. This Final Agency Order shall become an order of the Board when it is accepted and signed by the Program Director or authorized Board representative.

17. Effective Date. PARTIES

This document is a Consent Agreement regarding the pending application of Avanos Medical Sales, LLC, for the renewal of its prescription drug wholesaler license. The parties to this Consent Agreement are: Avanos Medical Sales, LLC ("Avanos"), the Maine Board of Pharmacy ("the Board"), and the Office of the Maine Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

STATEMENT OF FACTS

1. Since November 28, 2016, Avanos has been licensed in Maine as a prescription drug wholesaler with a registered location of 6620 South Memorial Place, Suite 100, Tucson, Arizona (license number **WH70002353**).

2. On February 24, 2020, the Colorado State Board of Pharmacy imposed discipline against Avanos's Colorado registration as a non-resident wholesaler (Registration # WHO 7416) in Case No. 2019-2025.

3. Avanos then failed to report the Colorado disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

4. On August 11, 2020, the State of Florida, Department of Business & Professional Regulation, Division of Drugs, Devices, and Cosmetics, imposed discipline against Avanos's Florida license in Case Number 2019-055427.

5. Avanos then failed to report the Florida disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

6. On September 25, 2020, Avanos reported to the Board for the first time that it had been disciplined by the Colorado State Board of Pharmacy and the State of Florida, Department of Business & Professional Regulation, Division of Drugs, Devices, and Cosmetics.

7. Pursuant to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C), the Board may deny, refuse to renew, suspend, or revoke a license and impose other discipline for failing to report a license disciplinary action to the Board within 10 days of that action.

8. At its meeting on August 5, 2021, the Board reviewed the above information and voted to preliminarily deny Avanos's application for renewal of its license to be a prescription drug wholesaler. In lieu of the denial, the Board also voted to offer Avanos this Consent Agreement. Unless Avanos either requests, in writing, a hearing regarding the appeal of the preliminary denial within thirty (30) days of receipt of the Notice of Preliminary Denial, or accepts this Consent Agreement by signing and dating it and returning it to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, by **September 11, 2021,** the preliminary denial of Avanos's application for licensure as a prescription drug wholesaler will become final.

COVENANTS

9. Avanos admits to the facts above and admits that such conduct constitutes grounds for denial of or refusal to renew its license and for the imposition of discipline pursuant

to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C) for failing to report disciplinary action taken in another jurisdiction against a professional license no later than 10 days after the action was taken.

10. As discipline for the violation admitted to in paragraph 9 above, Avanos agrees to accept the following DISCIPLINARY ACTION:

a) A REPRIMAND; and

b) A CIVIL PENALTY in the amount of five hundred dollars ($500.00) payment of which shall be made payable to the "Treasurer, State of Maine" and delivered to Maine Board of Pharmacy, Compliance Division, Office of Professional and Occupational Regulation, 35 State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement.

11. Upon receipt of the signed Consent Agreement with the enclosed payment of the civil penalty from Avanos, the Board will renew Avanos's license contingent upon it meeting all other eligibility criteria.

12. Violation of any of the terms or conditions of this Consent Agreement by Avanos shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

13. The Board and Avanos agree that no further agency action will be initiated against its license by the Board based upon the specific violations admitted to herein, except or unless Avanos fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct if other allegations are brought against Avanos, and this Consent Agreement will be admitted into evidence in any future adjudicatory hearing involving Avanos. The Board may also

consider the fact that discipline was imposed by this Consent Agreement in determining appropriate discipline in any further complaints against Avanos.

14. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

15. The Board and the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

16. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

17. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

18. Avanos acknowledges by its duly authorized representative's signature hereto that it has had an opportunity to consult with an attorney before executing this Consent Agreement, that it executes this Consent Agreement voluntarily, and that it agrees to abide by all terms and conditions set forth herein.

Re: **Department of Business & Professional Regulation v. Catalent Pharma Solutions, LLC, Case Number 2014-008409**

Dear Sir/Madam:

On or about March 17, 2014 through March 19, 2014, the Department of Business & Business Professional Regulation, Drugs, Devices, and Cosmetics Division (hereafter "Department"), conducted an on-site inspection of Catalent Pharma Solutions, LLC (hereafter "Catalent") located 2725 Scherer Drive, St. Petersburg, Florida 33716. Catalent is permitted by the Department to operate as a prescription drug manufacturer, permit number 20:117; over the counter drug manufacturer, permit number 20:118; product registrant, permit number 08:1723, all of which expire on November 30, 2014, and as a diethyl ether purchaser, permit number 10:1300003, which expires on September 30, 2014.

During the on-site inspection, the Department determined that Catalent is a contract manufacturer for Boehringer Ingelheim, Binger Strabe 173, 55216 Ingelheim am, Rhein Germany (hereafter "BI-Germany"). Catalent received prescription drugs from BI-Germany for the manufacturing of finished dosage forms of the prescription drugs, BI-Germany is not permitted by the Department, and does not qualify for an exemption from licensure.

The Department determined that Catalent, received, shipped, manufactured and/or distributed prescription drug active pharmaceutical ingredient (API) from an

unauthorized source and failed to register and report the distribution of controlled substances.

The Department is authorized by Rule 61N-1.024(8), Florida Administrative Code, to issue a Notice of Violation for any alleged violations of Chapter 499, Florida Statutes, in order to facilitate the uncontested settlement of all issues related to a complaint or investigation. The Notice of Violation is to be done at the completion of the investigation and prior to filing of any Administrative Complaint. The Notice of Violation will advise the alleged violator of the statutory violation and provide a proposed penalty for settlement of the disciplinary matter related to a complaint.

The Department believes Catalent committed the following violations of Chapter 499, Florida Statutes and the administrative Rules promulgated pursuant thereto:

1. Section 499.005(14), Florida Statutes (2013); provides that the purchase or receipt of a prescription drug from a person that is not authorized under this chapter to distribute prescription drugs to that purchaser or recipient is unlawful.

During the on-site inspection, the Department obtained purchasing and receiving specification sheets for prescription drugs, and/or active pharmaceutical ingredients (API); Catalent received that identify the distributor as BI-Germany. Records show Catalent was in receipt of four shipments from BI-Germany as follows:

1. Item number OET 00308819-Tipranavir-BI, dated 11/1/13; lot number 7648849, supplier/manufacturer lot number 1044065, 200kg.

2. Item number OET 00309819-Tipranavir-BI, dated 11/1/13; lot number 7648845, supplier/manufacturer lot number 1043891, 20kg.

3. Item number OET 00309819-Tipranavir-BI, dated 11/1/13; lot number 7646848, supplier/manufacturer lot number 1043888, 60kg.

4. Item number OET 00308819-Tipranavir-BI, dated 9/12/13; lot number 7490105, supplier/manufacturer lot number 1043891, 280kg.

Because BI-Germany manufactured the prescription drug API Tipranavir, in Germany, and distributed it to Catalent, located in Florida, without having a permit to do so, Catalent received prescription drugs from an unauthorized source in violation of Section 499.005(14), Florida Statutes (2013).

Range of Penalty per violation: An Administrative Complaint with a fine ranging from $1000 to $3000 per violation and up to permanent suspension or revocation of permit(s).

Fine assessed by the Department: $6,000

2. Section 499.006(10), Florida Statutes, (2013), provides that a drug is adulterated that has been purchased, held, sold, or distributed at any time by a person not authorized under federal or state law to do so. Section 499.005(1), Florida Statute (2013), provides that the manufacture, repackaging, sale, delivery or holding or offering for sale of any drug that is adulterated or misbranded is unlawful.

Catalent informed the Department it receives the prescription drug API, Tipranavir, manufacturered by the unauthorized source BI-Germany. Catalent manufacturss the commercial prescription drug into a finished dosage form and ships it to Roxane Laboratories, Inc., located at 1809 Wilson Road, Columbus, Ohio 43228. Because BI-Germany, located in Germany, is not authorized to distribute prescription drugs into Florida, and Catalent manufacturered the unauthorized prescription drugs, Catalent caused them to become adulterated.

Catalent violated Section 499.005(1), Florida Statutes (2013), by manufacturing the adulterated prescription drug Tipranavir, on at least four occasions, received from BI-Germany, within the meaning of Section 499.006(10), Florida Statutes (2013).

Range of Penalty per violation: An Administrative Complaint with a fine ranging from $1,000 to $3,000 per violation and up to permanent suspension or revocation of permits.

Fine assessed by the Department: $3,000

3. Section 499.006(10), Florida Statutes (2013), provides that a drug is adulterated that has been purchased, held, sold, or distributed at any time by a person not authorized under federal or state law to do so. Section 499.005(4), Florida Statutes (2013), provides that the sale, distribution, purchase, trade, holding, or offering of any drug is unlawful.

Catalent distributed the adulterated prescription drug API Tipranavir, on at least four occasions, to Roxane Laboratories, in violation of Section 499.005(4), Florida Statutes (2013), within the meaning of Section 499.006(10), Florida Statutes (2013.

Range of Penalty per violation: An Administrative Complaint with a fine ranging from $1000 to $3000 per violation and up to permanent suspension or revocation of permit(s).

Fine assessed by the Department: $3,000

4. Section 499.0121(14), Florida Statutes (2013), provides:

(14) **DISTRIBUTION REPORTING.**—Each prescription drug wholesale distributor, out-of-state prescription drug wholesale distributor, retail pharmacy

drug wholesale distributor, manufacturer, or repackager that engages in the wholesale distribution of controlled substances as defined in s. 893.02 shall submit a report to the department of its receipts and distributions of controlled substances listed in Schedule II, Schedule III, Schedule IV, or Schedule V as provided in s. 893.03. Wholesale distributor facilities located within this state shall report all transactions involving controlled substances, and wholesale distributor facilities located outside this state shall report all distributions to entities located in this state. If the prescription drug wholesale distributor, out-of-state prescription drug wholesale distributor, retail pharmacy drug wholesale distributor, manufacturer, or repackager does not have any controlled substance distributions for the month, a report shall be sent indicating that no distributions occurred in the period. The report shall be submitted monthly by the 20th of the next month, in the electronic format used for controlled substance reporting to the Automation of Reports and Consolidated Orders System division of the federal Drug Enforcement Administration. Submission of electronic data must be made in a secured Internet environment that allows for manual or automated transmission. Upon successful transmission, an acknowledgment page must be displayed to confirm receipt. The report must contain the following information:

(a) The federal Drug Enforcement Administration registration number of the wholesale distributing location.
(b) The federal Drug Enforcement Administration registration number of the entity to which the drugs are distributed or from which the drugs are received.
(c) The transaction code that indicates the type of transaction.
(d) The National Drug Code identifier of the product and the quantity distributed or received.
(e) The Drug Enforcement Administration Form 222 number or Controlled Substance Ordering System identifier on all Schedule II transactions.
(f) The date of the transaction.

The department must share the reported data with the Department of Law Enforcement and local law enforcement agencies upon request and must monitor purchasing to identify purchasing levels that are inconsistent with the purchasing entity's clinical needs. The Department of Law Enforcement shall investigate purchases at levels that are inconsistent with the purchasing entity's clinical needs to determine whether violations of chapter 893 have occurred.

Catalent advised the Department they had registered to report controlled substances but failed to report in a timely matter since August of 2012.

Catalent violated Section 499.0121(14), Florida Statutes (2013), by failing to register and report the distribution of control substances monthly to the Department as required, from August 2012 through July 2013.

Range of Penalty per violation: An Administrative Complaint with a fine ranging from $1000 to $3000 per violation and up to permanent suspension or revocation of permits.

Fine assessed by the Department: $3,000

5. Section 499.0121, Florida Statutes (2013), provides:

(4) EXAMINATION OF MATERIALS AND RECORDS.—The department shall adopt rules that require keeping such records of prescription drugs as are necessary for the protection of the public health.

(c) The recordkeeping requirements in subsection (6) must be followed for all incoming and outgoing prescription drugs.

(6) RECORDKEEPING.—The department shall adopt rules that require keeping such records of prescription drugs as are necessary for the protection of the public health.

(a) Wholesale distributors must establish and maintain inventories and records of all transactions regarding the receipt and distribution or other disposition of prescription drugs. These records must provide a complete audit trail from receipt to sale or other disposition, be readily retrievable for inspection, and include, at a minimum, the following information:

2. The name, principal address, and state license, permit or registration number of the person authorized to purchase prescription drugs; [Emphasis supplied].

Rule 61N-1.012 provides:

(1)(a) Records to document the movement of drugs, devices or cosmetics must provide a complete audit trail from a person's receipt or acquisition to sale or other disposition of the product or component. A complete audit trail includes records which document each transaction or step in the receipt, manufacture, shipping, transfer, or other steps in the channel of trade of that person, whether or not physical possession or handling of the product or component occurs. At a minimum, records shall consist of invoices from the supplier or source which document acquisition of each product by the person and invoices of sale or other transfer by the person to the recipient. Retail sales transactions to the consumer of over-the-counter drugs, non-restricted devices, or cosmetics are exempt from the requirements of this rule. Additional recordkeeping is required for persons permitted by the department as further stated in this rule.

(b) A person engaged in the distribution of drugs, devices, or cosmetics is not required to maintain documentation from a common carrier that the designated recipient received the product shipped; however, the person must obtain such documentation from the common

carrier and make it available to the department upon specific request of the department.

(2) Any person engaged in the manufacture of prescription drugs, the wholesale distribution of prescription drugs, or otherwise receiving or distributing prescription drugs must maintain records as follows:

(a) For each step in the channel of trade, records containing the information required by Section 499.0121(6)(a), F.S., and the Florida permit or license number which authorizes the source to possess and transfer prescription drugs in or into Florida must appear on one document. If delivery of prescription drugs is made to a person other than the purchaser, the name, address or location where the prescription drugs are delivered, and the state license, permit or registration number for that location must be included also. [Emphasis supplied].

Invoices and packlists for the prescription drug API Tipranavir provided to Catalent from BI-Germany failed to contain Catalent's Florida permit number, in violation of Section 499.0121(4)(c), Florida Statutes (2013), within the meaning of Section 499.0121(6)(a)2., Florida Statutes (2013), and Rule 61N-1.012, Florida Administrative Code.

Range of Penalty per violation: An Administrative Complaint with a fine ranging from $1,000 to $3,000 per violation and up to permanent suspension or revocation of permits.

Fine assessed by the Department: $1,000

SOUTH CAROLINA DEPARTMENT OF LABOR, LICENSING AND REGULATION
BEFORE THE STATE BOARD OF PHARMACY

In the Matter of: **Catalent Pharma Solutions, LLC,** **Applicant.**	**ORDER**

This matter first came before the Nonresident Permit Subcommittee ("Committee"), appointed by the State Board of Pharmacy ("Board"), on April 25, 2017, for a hearing on the application of the above-named applicant ("Applicant") for a nonresident wholesaler/distributor/manufacturer permit. The Applicant appeared before the Committee through its designated representative, Terry Jackson, as well as its Associate General Counsel for Regulatory Matters, Robert Ciolek, Esquire. Applicant was represented by Jon Wallace, Esquire. At its June 14, 2017, meeting with a quorum present, the Board considered the Committee's recommendation and the transcript of the Committee's hearing. The Board adopted the Committee's recommendation that the application be approved, and the permit shall issued subject to the prior payment of a civil penalty in the amount of Five Thousand and 00/100 ($5,000.00) Dollars for shipping into South Carolina without a permit. Since the hearing, Applicant has tendered the fine to the Board.

Applications of this type are governed by S.C. Code §§ 40-43-83, 40-43-86, 40-43-89 (2011, as amended), and/or Reg. 99-43, as amended.

FINDINGS OF FACT

1. Applicant applied for a permit for its facility located in Philadelphia, PA.

2. Applicant manufactures clinical supply materials.

3. Applicant's representative admitted that Applicant has previously shipped prescription drugs to South Carolina without first obtaining a permit from this Board.

4. Applicant otherwise meets the requirements for the Permit for which it applied.

CONCLUSIONS OF LAW

In an application hearing, "(t)he applicant shall demonstrate to the satisfaction of the board that the applicant meets all requirements for the issuance of a license." S.C. Code Ann. § 40-1-130 (2011, as amended). Thus, the burden of proof in an application for licensure or certification is on the Applicant to provide full, complete, and accurate responses to all questions on the application

and to demonstrate that it is qualified for the license sought.

S.C. Code Ann. §40-43-83(I)(2011) requires a permit for the sale or distribution of legend (prescription) drugs in this state, and expressly includes manufacturers within or without the state. S.C. Code Ann. § 40-43-89 (2011) requires a facility located outside of this State that distributes prescription drugs or devices in this State to have a permit issued by the Board prior to distribution. S.C. Code Ann. § 40-43-140(A)(3) states that facilities requiring permits may not operate unless a permit has been issued by the board. Pursuant to S.C. Code Ann. § 40-43-140(A)(1)(2011), the Board may suspend, revoke, deny, or refuse to renew the permit or impose disciplinary action authorized for violations of the Pharmacy Act. Pursuant to S.C. Code Ann. §§ 40-43-140(A)(2), a person who distributes or delivers drugs or devices in this State without a required permit is subject to a fine imposed by the Board not to exceed one thousand dollars for each offense, in addition to such other disciplinary action the Board may take.

Applicant has met the qualifications for the permit, but violated the Pharmacy Practice Act by regularly distributing prescription drugs or devices into this State without a permit. Therefore, the Board concludes that it is appropriate to issue the permit subject to the prior payment of a civil penalty in the amount of Five Thousand and 00/100 ($5,000.00) Dollars.

NOW, THEREFORE, IT IS ORDERED THAT:

The Application is approved, and the permit shall be issued subject to the payment of a civil penalty in the amount of Five Thousand and 00/100 ($5,000.00) Dollars, receipt of which is hereby acknowledged by the Board.

AND IT IS SO ORDERED.

Re: AuroMedics Pharma LLC State Licensing

Dear Sir or Madam:

On January 9, 2018, AuroMedics Pharma, LLC ("AuroMedics") received the enclosed "Notice of Emergency Suspension" from the Alabama Board of Pharmacy. The matter is currently scheduled for a hearing on August 14, 2018.

AuroMedics takes its commitment to quality seriously. We are eager to address the Alabama Board of Pharmacy's concerns at the upcoming hearing. We understand that these concerns relate to three (3) voluntary recalls which AuroMedics took in December 2017 and January 2018 out of an abundance of caution. Neither the FDA nor any other State Board of Pharmacy has taken enforcement action against AuroMedics.

Please feel free to contact us should you have any further questions or concerns.

Sincerely,

Mark Fedele

PERMIT NO. D06266	*	

* * * * * * * * * * * *

CONSENT ORDER

Background

The Maryland Board of Pharmacy (the "Board") received credible information indicating that Pierre Fabre Pharmaceuticals (the "Distributor"), a wholesale drug distributor licensed in Maryland under Permit No. D06266, had been disciplined by the Alabama Board of Pharmacy on December 6, 2017, for distributing drug products into Alabama without a current or valid permit. Subsequently, the Board received further information evidencing that the Distributor shipped prescription drugs into Maryland prior to obtaining a Maryland permit.

In lieu of instituting formal proceedings against Pierre Fabre Pharmaceuticals, in accordance with the Maryland Pharmacy Act, Md. Code Ann., Health Occ. § 12-101 *et seq.*, the Board and Pierre Fabre Pharmaceuticals have agreed to resolve this matter as set forth in this Consent Order.

FINDINGS OF FACT

1. At all times relevant, the Distributor was a wholesale distributor located in Persippany, New Jersey.
2. On or about December 6, 2017, the Board issued a wholesale distributor's permit to Pierre Fabre Pharmaceuticals. The Distributor's permit is active and expires on

May 31, 2019.

3. On or about February 8, 2018, the Board received a self-report from the Distributor disclosing that it had been disciplined by the Alabama Board of Pharmacy on December 6, 2017, for distributing drug products into Alabama without a current or valid permit to do.
4. Subsequently, the Board obtained shipping records from the Distributor which revealed that the Distributor shipped approximately 103 prescription drug products, none of which were controlled dangerous substances, into Maryland prior to obtaining a wholesale distributor's permit from the Board.
5. The Distributor has since conducted a gap analysis of its operations and have engaged consultant services to appropriately manage its licensing processes.

CONCLUSIONS OF LAW

Based on the foregoing Findings of Fact, the Board concludes that Pierre Fabre Pharmaceuticals, is subject to discipline in accordance with Md. Code Ann., Health Occ. §§ 12-6C-03 and 12-6C-11 and COMAR 10.34.22.05A(4).

ORDER

Based upon an affirmative vote of a majority of the Board under the authority of Md. Code Ann., Health Occ. § 12-6C-11 and COMAR 10.34.22.05, it this 17th day of September, 2018, hereby,

ORDERED that Pierre Fabre Pharmaceuticals, Permit No. D06266, shall pay a FINE in the amount of FIVE THOUSAND DOLLARS ($5,000.00), payable to the Maryland Board of Pharmacy within thirty (30) days of the date of this Order, and sent to:

; and be it further,

ORDERED that Pierre Fabre Pharmaceuticals shall comply with all laws and regulations governing the wholesale distribution of prescription drugs and devices into, out of, and within the State of Maryland; and be it further,

ORDERED that in the event that Pierre Fabre Pharmaceuticals violates any of the terms above, the Board, after notice and an opportunity for a hearing, and a determination of a violation, may impose any disciplinary sanction it deems appropriate, including suspension, revocation, and fines, said violation being proven by a preponderance of the evidence; and be it further,

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Maria,

I would like clarification of your requested items.

- Copy of the Home State License or letter/email exemption from your Home state licensing department The State of Ohio requires person or companies licensed by the State of Ohio Board of Pharmacy that engages in the sale, delivery, installation, maintenance, replacement, or demonstration of home medical equipment as defined in section 4752 of the Ohio Revised Code. STERIS does not sell drugs or home medical equipment. I called the State of Ohio Board of Pharmacy today and they tell me that they do not give exemption letters as this implies we should have a license but they are giving us an exemption to the requirement. The only thing the State of Ohio provides is a certificate of good standing. This is why I provided you the email form the U.S. Food and Drug Administration confirming our medical device registration for 2023.
- Full list of employees pursuant to **NRS 639.500 (2)** Are you asking for employees in Nevada?
- Copy of a bond in an amount of $25,000 made payable to the state of Nevada Can you point out where this is required since we have provided proof of insurance for $1M.
- Please fill out the attached page for it was left blank on the MDEG Administrator Application See attached document.

Thank you for your assistance.

COMMENTS OR RECOMMENDATIONS

This facility is under the ownership of Alora Pharmaceuticals. This facility will serve as a "virtual manufacture".

Drugs (see attached list) will be manufactured by a variety of facilities registered by FDA (see attached). These manufactured drugs would then be sent to R&S Solutions LLC, (3PL located in TN; license number 4892) who will then ship drugs to Vertical Pharmaceutical customers. Drugs would be sent to this location from end users for complaint samples. These samples will be utilized for complaint investigations (inspections). Once samples complete investigative inspections, they would be disposed of through a reverse distributor. Samples may be shipped to the manufacture from this facility for chemical analysis if needed. Additionally a second 3PL (Direct Customer Solutions LLC) under common ownership with R&S will be utilized (TN license number 7658). Applicant to update application with corrected zip code (30005).

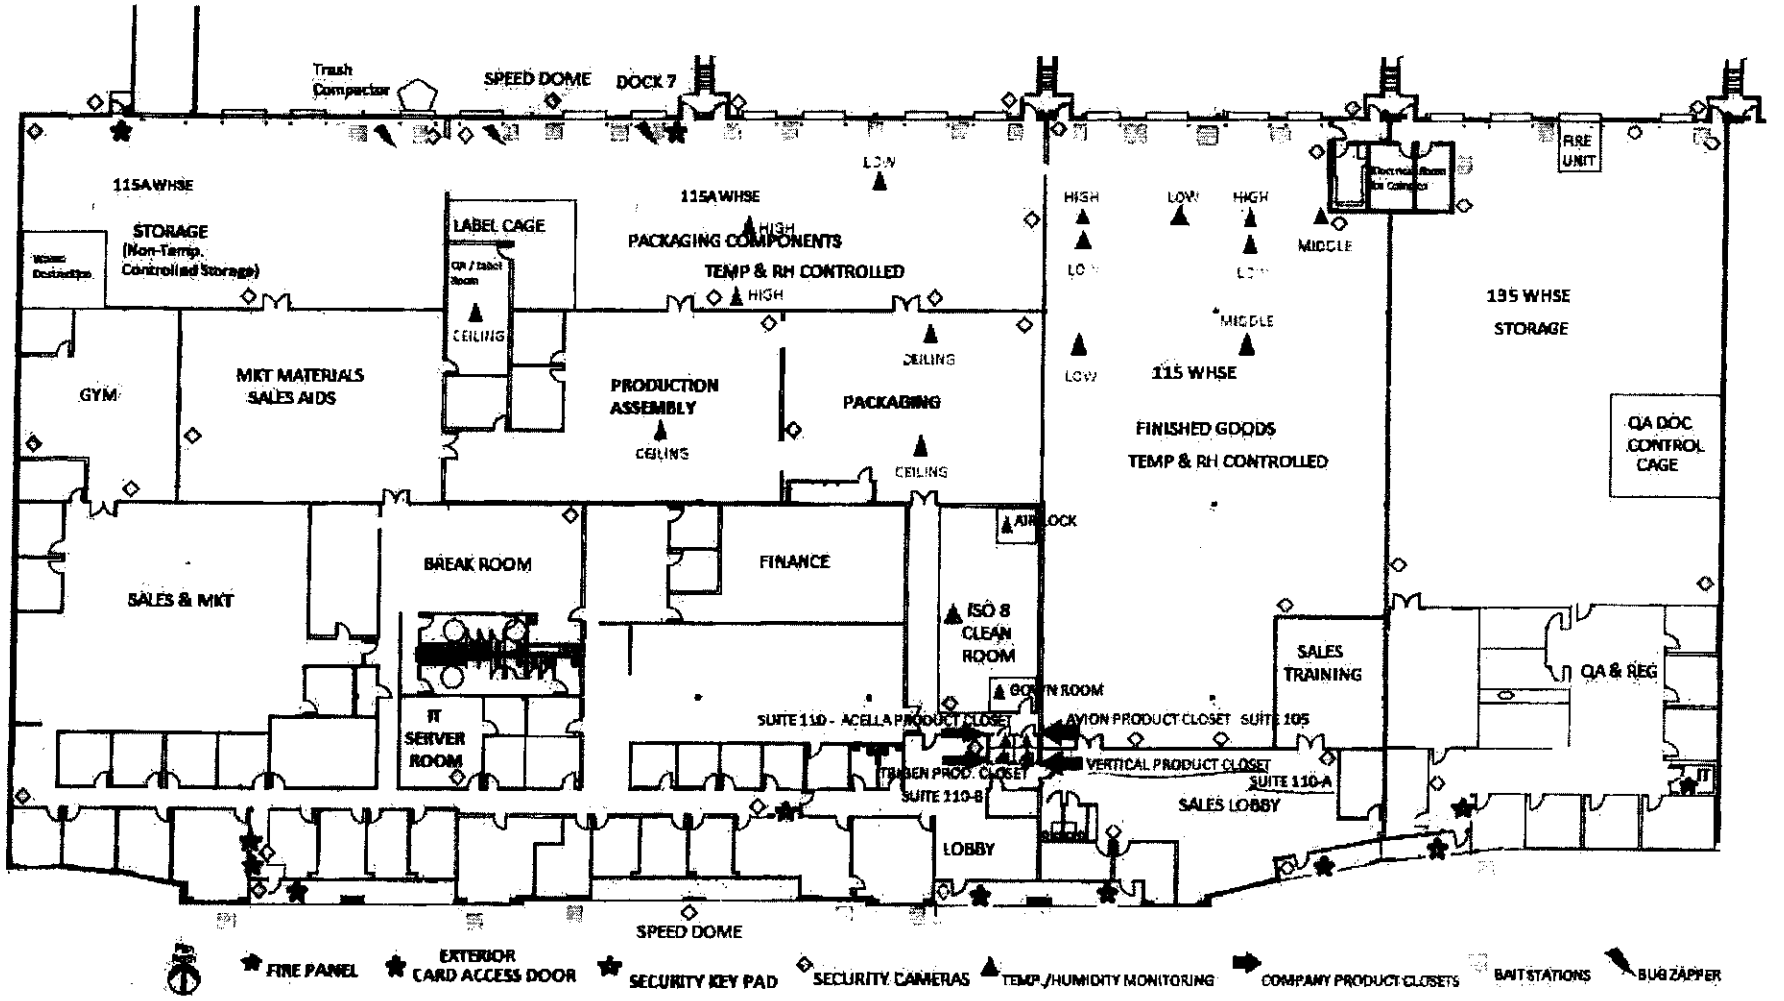
Avion PHARMACEUTICALS | Acella PHARMACEUTICALS | TRIGEN LABORATORIES | VERTICAL PHARMACEUTICALS, LLC

Description of Virtual Manufacturer Operations

Virtual manufacturer means a person/business who engages in the manufacture of drugs, devices or cosmetics for which such person/business: (A) Owns the new drug application or abbreviated new drug application number, if a prescription drug; (B) owns the unique device identification number, as available, for a prescription device; (C) contracts with a contract manufacturing organization (CMO) for the physical manufacture of the drugs, devices or cosmetics; (D) is not involved in the physical manufacture of the drugs, devices or cosmetics; and (E) at no time takes physical possession of or stores the drugs, devices or cosmetics.

Acella Pharmaceuticals, LLC and Avion Pharmaceuticals, LLC are currently virtual manufacturers at the 1880 McFarland Parkway, Alpharetta, GA 30005 location. Trigen Laboratories, LLC and Vertical Pharmaceuticals, LLC, after granting of Georgia Board of Pharmacy licensure, are intended to operate as Virtual Manufacturers out of the 1880 McFarland Parkway, Alpharetta, GA 30005 location. *The Georgia requirement for Virtual Manufacturers, based on our understanding from the GDNA during previous audits/communications, is to have separate and distinct storage closets for each business entity*, in the case of solicited and unsolicited returned goods to the physical business address. The suite numbers for each of the listed business entities is as follows:



- Acella Pharmaceuticals, LLC – Suite 110
- Avion Pharmaceuticals, LLC – Suite 105
- Trigen Laboratories, LLC – Suite 110-B
- Vertical Pharmaceuticals, LLC – Suite 110-A

Reason for Georgia Licensure

Per Clint Joyner, Legal Services at Georgia Board of Pharmacy, on Friday, September 2, 2022, under GA law , if a company is not handling the product, then they need to be registered as a Wholesaler. Under statute OCGA 26-4-5, the definition of Wholesaler also includes "Manufacturers."

In addition, Virtual Manufacturers are required to be licensed by multiple states – a listing of required states as of 10/1/2022 is found in the table below. A business is required to provide their in-state Board of Pharmacy licensure (or equivalent), and in some cases, audit reports, in order to obtain licensure in a state that the business is not domiciled. Therefore, the above business entities need to be licensed in the state of Georgia to become licensed, as required, by other states as a Virtual manufacturer.

On March 3, 2022, The Idaho Board of Pharmacy issued an Order and Stipulation for violations stemming from an expired non-resident PIC registration. The registration has since been approved by the Board. Baxter has signed the Stipulation and paid the required fine.

Alabama, Permit #194460, 2022

On May 3, 2022, The Alabama Board of Pharmacy issued a citation for failure to notify the Board of the change in designated representative at the Baxter – Hayward (W. Winton location). Baxter resolved the matter and paid the required fine.

Georgia, Wholesaler Pharmacy License # PHWH001754, 2017

In January 2017, Baxter Healthcare Corporation (Baxter) agreed to resolve claims with the U.S. Department of Justice related to quality and manufacturing practices at Baxter's manufacturing facility in Marion, North Carolina in 2011-2012. Specifically, the government charged that between July 2011 and November 2012, Baxter did not follow cGMP requirements under the Federal Food, Drug, and Cosmetic Act (FDCA) when manufacturing certain large volume intravenous (IV) solutions. Briefly, a Baxter employee reported to plant personnel the presence of mold on HEPA filters installed in the ceiling, and Baxter continued to manufacture IV solutions while those filters remained in place. There was no evidence of any impact on the IV solutions. Copies of the settlement documents, which include a deferred prosecution agreement to resolve a single misdemeanor count of noncompliance with the FDCA, are available on the U.S. Department of Justice's website at https://www.justice.gov/opa/pr/baxter-healthcare-

corporation-pay-more-18-million-resolve-criminal-and-civil-liability. The deferred prosecution agreement expired in July 2019, and the misdemeanor charge was dismissed with prejudice. This issue is unrelated to Baxter's pharmacy or wholesale activities.

Baxter disclosed this issue on a renewal application for a Georgia wholesale license for its Marion, NC facility, and in October 2017, the state of Georgia issued a disciplinary order against that license (PHWH001754) based on the disclosure.

Please note that this issue is unrelated to Baxter's pharmacy or wholesale activities.

Iowa, Nonresident Pharmacy License # 4127, 2014

The Iowa Board of Pharmacy (the "Iowa Board") issued a Stipulation for Baxter's Omaha, Nebraska pharmacy due to improperly delegating final verification of prescriptions for peritoneal dialysis solutions to a pharmacy technician. The Omaha facility is licensed in Nebraska under a Delegated Dispensing Permit, and utilized multiple quality checks, including retrospective pharmacist review, to ensure proper dispensing of peritoneal dialysis products to patients. Upon request by the Iowa Board, Baxter promptly modified its operations to ensure pharmacist verification of all orders. Baxter has signed the Stipulation and paid the required fine.

Montana, License #2152, 2010

The Montana Board of Pharmacy (the "Montana Board") issued a Stipulation for violations stemming from the failure of Baxter to notify the Montana Board in the requisite time frame of a change in the designated Person-in-Charge for the Waukegan, IL facility. Baxter has signed the Stipulation and paid the required fine.

Alabama, License #191639, 2009

The Alabama Board of Pharmacy found the Buford, GA facility was in violation of Code of Alabama (1975) Section 34-23-32. The facility continued distribution operations during the time between the valid license expired and when the expired license was renewed. Baxter Healthcare renewed the license, signed a Consent Order and paid the applicable fine.

Florida, Non-Resident Drug Manufacturer Permit No.: 26:4672, 2009

The Florida Department of Health (the "Florida Department") alleged that Baxter (Memphis, TN) sold prescription drugs to an unpermitted facility in Florida in violation of Section 499.005(15), F.S. Specifically, the Florida Department alleged that Baxter sold prescription drugs to Invivo at an unpermitted location. Baxter entered into a settlement agreement, whereby it neither admitted nor denied the allegations, and paid a fine.

Louisiana, License #3691, 2008

Louisiana Board of Wholesale Drug Distributors conducted a routine inspection of the facility operated by Baxter's third party logistics provider. Inspectors concluded Baxter (Round Lake, IL) violated Louisiana Administrative Code 46:XCI.311.D, which requires a licensee to maintain copies of current licenses for its customers who are authorized to

obtain and possess legend drugs and devices. Baxter obtained customer licenses, signed a Consent Order, and paid the applicable fine.

Missouri, License #2005002668, 2005

The Missouri Board of Pharmacy (the "Missouri Board") issued a restricted drug distributor license to the facility located in Memphis, TN. The Missouri Board determined the facility violated Section 338.333.1 and 338.337.1 RSMo because the facility shipped legend drugs and/or medical devices into the state without being properly licensed. The proper license was obtained. The probationary period was successfully completed on October 21, 2007 and the restriction on the license was removed.

Pending Disciplinary Action

Utah, License # 12435996-1710

On February 17, 2023, The Utah Board of Pharmacy issued a citation for failure to timely notify the Board of the change in designated representative at the Baxter Byhalia, MS location. Pending matter, waiting on the order and to pay the fine.

State Non-Disciplinary Settlements for Memphis Facility

Florida, License #s 26:506 (Memphis, TN) and 26:384 (Marion, NC), 2015

In June 2015, the Florida Department of Business and Professional Regulation (the "Department") sent Notices of Violation to Baxter alleging the shipment of prescription drugs to a Baptist Health South Florida, Inc. ("Baptist"), prior to Baptist receiving its permit to operate as a restricted prescription drug distributor – health care entity. Baxter had shipped products to the Baptist address under the valid medical license of the Medical Director, in reliance on a document evidencing the Medical Director's intent that he serve as the purchaser of the product. In August 2015, Baxter and the Department resolved this matter via a non-disciplinary settlement.

Other Actions: Dismissed Charge of Drug Law Violation

In January 2017, Baxter Healthcare Corporation (Baxter) agreed to resolve claims with the U.S. Department of Justice related to quality and manufacturing practices at Baxter's manufacturing facility in Marion, North Carolina in 2011-2012. Specifically, the government charged that between July 2011 and November 2012, Baxter did not follow cGMP requirements under the Federal Food, Drug, and Cosmetic Act (FDCA) when manufacturing certain large volume intravenous (IV) solutions. Briefly, a Baxter employee reported to plant personnel the presence of mold on HEPA filters installed in the ceiling, and Baxter continued to manufacture IV solutions while those filters remained in place. There was no evidence of any impact on the IV solutions. The deferred

prosecution agreement expired in July 2019, and the misdemeanor charge was dismissed with prejudice.

Please note that this issue is unrelated to Baxter's pharmacy or wholesale activities, or the facility that is the subject of this application.

Utah, Pharmacy Class C License # 9451291-1710, 2022

On May 31, 2022, The Utah Department of Commerce issued a Citation and Order due to a failure to file a timely notification of the change in the designated representative at the Baxter - Hayward (W. Winton) location. Baxter resolved the matter and paid a reduced fine.

Idaho, Out of State Mail Service Pharmacy License # 36855MS, 2022

On March 3, 2022, The Idaho Board of Pharmacy issued an Order and Stipulation for violations stemming from an expired non-resident PIC registration. The registration has since been approved by the Board. Baxter has signed the Stipulation and paid the required fine.

Alabama, Permit #194460, 2022

On May 3, 2022, The Alabama Board of Pharmacy issued a citation for failure to notify the Board of the change in designated representative at the Baxter – Hayward (W. Winton location). Baxter resolved the matter and paid the required fine.

Georgia, Wholesaler Pharmacy License # PHWH001754, 2017

In January 2017, Baxter Healthcare Corporation (Baxter) agreed to resolve claims with the U.S. Department of Justice related to quality and manufacturing practices at Baxter's manufacturing facility in Marion, North Carolina in 2011-2012. Specifically, the government charged that between July 2011 and November 2012, Baxter did not follow cGMP requirements under the Federal Food, Drug, and Cosmetic Act (FDCA) when manufacturing certain large volume intravenous (IV) solutions. Briefly, a Baxter employee reported to plant personnel the presence of mold on HEPA filters installed in the ceiling, and Baxter continued to manufacture IV solutions while those filters remained in place. There was no evidence of any impact on the IV solutions. Copies of the settlement documents, which include a deferred prosecution agreement to resolve a single misdemeanor count of noncompliance with the FDCA, are available on the U.S. Department of Justice's website at https://www.justice.gov/opa/pr/baxter-healthcare-

corporation-pay-more-18-million-resolve-criminal-and-civil-liability. The deferred prosecution agreement expired in July 2019, and the misdemeanor charge was dismissed with prejudice. This issue is unrelated to Baxter's pharmacy or wholesale activities.

Baxter disclosed this issue on a renewal application for a Georgia wholesale license for its Marion, NC facility, and in October 2017, the state of Georgia issued a disciplinary order against that license (PHWH001754) based on the disclosure.

Please note that this issue is unrelated to Baxter's pharmacy or wholesale activities.

Iowa, Nonresident Pharmacy License # 4127, 2014

The Iowa Board of Pharmacy (the "Iowa Board") issued a Stipulation for Baxter's Omaha, Nebraska pharmacy due to improperly delegating final verification of prescriptions for peritoneal dialysis solutions to a pharmacy technician. The Omaha facility is licensed in Nebraska under a Delegated Dispensing Permit, and utilized multiple quality checks, including retrospective pharmacist review, to ensure proper dispensing of peritoneal dialysis products to patients. Upon request by the Iowa Board, Baxter promptly modified its operations to ensure pharmacist verification of all orders. Baxter has signed the Stipulation and paid the required fine.

Montana, License #2152, 2010

The Montana Board of Pharmacy (the "Montana Board") issued a Stipulation for violations stemming from the failure of Baxter to notify the Montana Board in the requisite time frame of a change in the designated Person-in-Charge for the Waukegan, IL facility. Baxter has signed the Stipulation and paid the required fine.

Alabama, License #191639, 2009

The Alabama Board of Pharmacy found the Buford, GA facility was in violation of Code of Alabama (1975) Section 34-23-32. The facility continued distribution operations during the time between the valid license expired and when the expired license was renewed. Baxter Healthcare renewed the license, signed a Consent Order and paid the applicable fine.

Florida, Non-Resident Drug Manufacturer Permit No.: 26:4672, 2009

The Florida Department of Health (the "Florida Department") alleged that Baxter (Memphis, TN) sold prescription drugs to an unpermitted facility in Florida in violation of Section 499.005(15), F.S. Specifically, the Florida Department alleged that Baxter sold prescription drugs to Invivo at an unpermitted location. Baxter entered into a settlement agreement, whereby it neither admitted nor denied the allegations, and paid a fine.

Louisiana, License #3691, 2008

Louisiana Board of Wholesale Drug Distributors conducted a routine inspection of the facility operated by Baxter's third party logistics provider. Inspectors concluded Baxter (Round Lake, IL) violated Louisiana Administrative Code 46:XCI.311.D, which requires a licensee to maintain copies of current licenses for its customers who are authorized to

obtain and possess legend drugs and devices. Baxter obtained customer licenses, signed a Consent Order, and paid the applicable fine.

Missouri, License #2005002668, 2005

The Missouri Board of Pharmacy (the "Missouri Board") issued a restricted drug distributor license to the facility located in Memphis, TN. The Missouri Board determined the facility violated Section 338.333.1 and 338.337.1 RSMo because the facility shipped legend drugs and/or medical devices into the state without being properly licensed. The proper license was obtained. The probationary period was successfully completed on October 21, 2007 and the restriction on the license was removed.

Pending Disciplinary Action

Utah, License # 12435996-1710

On February 17, 2023, The Utah Board of Pharmacy issued a citation for failure to timely notify the Board of the change in designated representative at the Baxter Byhalia, MS location. Pending matter, waiting on the order and to pay the fine.

State Non-Disciplinary Settlements for Memphis Facility

Florida, License #s 26:506 (Memphis, TN) and 26:384 (Marion, NC), 2015

In June 2015, the Florida Department of Business and Professional Regulation (the "Department") sent Notices of Violation to Baxter alleging the shipment of prescription drugs to a Baptist Health South Florida, Inc. ("Baptist"), prior to Baptist receiving its permit to operate as a restricted prescription drug distributor – health care entity. Baxter had shipped products to the Baptist address under the valid medical license of the Medical Director, in reliance on a document evidencing the Medical Director's intent that he serve as the purchaser of the product. In August 2015, Baxter and the Department resolved this matter via a non-disciplinary settlement.

Other Actions: Dismissed Charge of Drug Law Violation

In January 2017, Baxter Healthcare Corporation (Baxter) agreed to resolve claims with the U.S. Department of Justice related to quality and manufacturing practices at Baxter's manufacturing facility in Marion, North Carolina in 2011-2012. Specifically, the government charged that between July 2011 and November 2012, Baxter did not follow cGMP requirements under the Federal Food, Drug, and Cosmetic Act (FDCA) when manufacturing certain large volume intravenous (IV) solutions. The deferred

prosecution agreement expired in July 2019, and the misdemeanor charge was dismissed with prejudice.

Please note that this issue is unrelated to Baxter's pharmacy or wholesale activities, or the facility that is the subject of this application.

PART I

Item 1. *Business.*

Company Overview

Baxter International Inc., through its subsidiaries, provides a broad portfolio of essential healthcare products, including acute and chronic dialysis therapies; sterile intravenous (IV) solutions; infusion systems and devices; parenteral nutrition therapies; inhaled anesthetics; generic injectable pharmaceuticals; surgical hemostat and sealant products, advanced surgical equipment; smart bed systems; patient monitoring and diagnostic technologies; and respiratory health devices. These products are used by hospitals, kidney dialysis centers, nursing homes, rehabilitation centers, doctors' offices and by patients at home under physician supervision. Our global footprint and the critical nature of our products and services play a key role in expanding access to healthcare in emerging and developed countries. As of December 31, 2022, we manufactured products in over 20 countries and sold them in over 100 countries.

Baxter International Inc. was incorporated under Delaware law in 1931. As used in this report, "Baxter International" means Baxter International Inc. and "we", "our" or "us" means Baxter International and its consolidated subsidiaries, unless the context otherwise requires.

Recently Announced Strategic Actions

In January 2023, we announced the following planned strategic actions that are intended to enhance our operational effectiveness, accelerate innovation and drive additional stockholder value: (a) a proposed spinoff of our Renal Care and Acute Therapies product categories into an independent publicly traded company, (b) our development of a new operating model to simplify our operations and (c) our pursuit of strategic alternatives (including a potential sale) for our BioPharma Solutions (BPS) product category.

This proposed spinoff of our Renal Care and Acute Therapies product categories (the proposed spinoff) is currently expected to be completed during the first half of 2024, approximately 12 to 18 months from the date of the related announcement. In 2022 we generated $4.4 billion of combined net sales from our Renal Care and Acute Therapies product categories, representing approximately 29% of our consolidated net sales. We intend for the proposed spinoff to qualify as tax-free to Baxter and our shareholders for U.S. federal income tax purposes. The proposed spinoff is subject to the satisfaction of customary conditions, including final approval from our Board of Directors, the filing and effectiveness of a registration statement on Form 10, receipt of an Internal Revenue Service (IRS) ruling or related tax opinions from counsel, satisfactory completion of financing arrangements, consultations with works councils and other employee representative bodies and any necessary regulatory approvals.

To strengthen our ability to deliver on our vision to transform healthcare, we are designing a new operating model intended to simplify and streamline our operations. Once the simplified model is implemented, we expect to be a more integrated and nimble organization that can respond more effectively to changes in the macroeconomic environment, while enhancing our ability to drive innovation in our product portfolio. As part of these actions, we are working to create a more resilient supply chain and better align our manufacturing footprint and supply chain to our commercial activities. Under the new model, our business will be managed across four global business units consisting of: (1) Medical Products and Therapies, which will include our Medication Delivery, Advanced Surgery and Clinical Nutrition product categories, (2) Healthcare Systems and Technologies, which will include the Patient Support Systems, Front Line Care and Global Surgical Solutions product categories obtained in the Hillrom acquisition, (3) Pharmaceuticals, which will include our BPS product category, for which we are exploring strategic alternatives, and our Pharmaceuticals product category and (4) Kidney Care, which will include our Renal Care and Acute Therapies product categories that we are proposing to spinoff into an independent publicly traded company.
We expect to have our new organizational designs substantially finalized in the second quarter of 2023. The new operating model will have significant impacts on our systems and processes across our entire company and we expect to have those broader operational changes, including our updated management reporting framework for the new operating model, fully implemented during the second half of 2023. At that time, we expect that our reportable segments will be changed to align with the new operating model.

We are pursuing strategic alternatives (including a potential sale) for our BPS product category, which includes contract manufacturing services provided to pharmaceutical and biopharmaceutical companies. In 2022 we generated $644 million of net sales from that product category, representing approximately 4% of our consolidated net sales. A potential sale of, or other strategic transaction involving, BPS would help us further narrow our strategic focus as a company while providing an opportunity for capital deployment, including debt repayment.

Following these planned strategic actions (including completion of the proposed spinoff), we intend to emerge as a stronger hospital solutions and connected care company. As a more focused business, we expect to be better positioned to make strategic investments to accelerate our vision and to deliver differentiated value to our stakeholders with our unique combination of products, therapies and connected care platforms.

There can be no guarantees that the proposed spinoff, the simplified operating model or the sale of, or other strategic transaction involving, our BPS product category will be completed in the manner or over the timeframes described above, or at all.

Acquisition of Hillrom

On December 13, 2021, we completed our acquisition of all outstanding equity interests of Hill-Rom Holdings, Inc. (Hillrom) for a purchase price of $10.5 billion. Including the assumption of Hillrom's outstanding debt obligations, the enterprise value of the transaction was approximately $12.8 billion. Hillrom was a global medical technology leader and its products and services help enable earlier diagnosis and treatment, optimize surgical efficiency, and accelerate patient recovery while simplifying clinical communication and shifting care closer to home. Hillrom made those outcomes possible through digital and connected care solutions and collaboration tools, including smart bed systems, patient monitoring and diagnostic technologies, respiratory health devices, advanced equipment for the surgical space and more, delivering actionable, real-time insights at the point of care. In 2022 the Patient Support Systems, Front Line Care and Global Surgical Solutions product categories of our Hillrom segment collectively generated net sales of $2.9 billion. During 2022, we also recognized $2.8 billion of goodwill impairments and $332 million of indefinite-lived intangible asset impairments related to goodwill and trade name intangible assets that arose from the Hillrom acquisition. See Notes 2, 4, 5 and 17 in Item 8 of this Annual Report on Form 10-K for additional information about the Hillrom acquisition, goodwill and intangible asset impairments, Hillrom acquisition financing arrangements and Hillrom segment results, respectively.

Business Segments and Products

We currently manage our global operations based on four segments, consisting of the following geographic segments related to our legacy Baxter business: Americas (North and South America), EMEA (Europe, Middle East and Africa) and APAC (Asia-Pacific), and a global segment for our recently acquired Hillrom business. As discussed above under "Recently Announced Strategic Actions," we are designing a new operating model intended to simplify and streamline our operations and we expect that our reportable segments will be changed to align with that new operating model when it is fully implemented.

The Americas, EMEA and APAC segments provide a broad portfolio of essential healthcare products, including acute and chronic dialysis therapies; sterile IV solutions; infusion systems and devices; parenteral nutrition therapies; inhaled anesthetics; generic injectable pharmaceuticals; and surgical hemostat and sealant products. As discussed above under "Recently Announced Strategic Actions," we are pursuing the proposed spinoff of our Renal Care and Acute Therapies product categories and strategic alternatives for our BPS product category. The Hillrom segment provides digital and connected care solutions and collaboration tools, including smart bed systems, patient monitoring and diagnostic technologies, respiratory health devices and advanced equipment for the surgical space.

For financial information about our segments, see Note 17 in Item 8 of this Annual Report on Form 10-K.

Business Strategy

Our business strategy is focused on driving sustainable growth and innovation aligned with our mission to save and sustain lives and our vision to transform healthcare with a customer focus to improve patient outcomes, enhance workflow efficiency, and enable cost-effective care. Our diversified and broad portfolio of medical products that treat life-threatening acute or chronic conditions and our global presence are core components of our strategy as we

work to achieve these objectives. We are focused on four strategic pillars as part of our pursuit of industry leading performance: innovation; market expansion; operational efficiency; and capital allocation.

Innovation

Our innovation strategy is focused on connected care and core therapies offerings. Connected care offerings include devices or software that can connect, communicate and/or analyze data to help transform healthcare and improve patient outcomes. Our acquisition of Hillrom has been a key driver in developing our connected care offerings, as its product portfolio includes digital and connected care solutions and collaboration tools such as smart bed systems, patient monitoring and diagnostic technologies, respiratory health devices, advanced equipment for the surgical space and more, delivering actionable, real-time insights at the point of care. Our core therapies product offerings include medical devices and consumable medical products designed to address essential patient and provider needs across the continuum of care.

As part of this strategy and consistent with our recently announced strategic initiatives, we are shifting our investments to drive innovation in product areas where we have compelling opportunities to serve patients and healthcare professionals while advancing our business. We are accelerating the pace in which we bring these advances to market to support our future growth. We are in the midst of launching several new products, geographic expansions and line extensions including in such areas as chronic and acute renal care, smart pump technology, hospital pharmaceuticals and nutritionals, surgical sealants, smart beds, respiratory vests and more. These comprise a mix of entirely new offerings, improvements on existing technologies and the expansion of current products into new geographies.

Market Expansion

The market expansion component of our strategy includes capturing revenue synergies through the integration of Hillrom, expanding our portfolio geographically, broadening our portfolio through channel expansion and increasing utilization of our products and therapies through market development activities. These initiatives include using Baxter's geographic footprint to introduce the Hillrom product portfolio into new markets, as well as expanding value-added services, increasing adoption of underpenetrated therapies and providing education and advocacy to improve access to our products.

Operational Excellence

As discussed above under "Recently Announced Strategic Actions," we are designing a new operating model intended to simplify and streamline our operations. Once the simplified model is implemented, we expect to be a more integrated and nimble organization that can respond more effectively to changes in the macroeconomic environment, while enhancing our ability to drive innovation in our product portfolio. As part of these actions, we are working to create a more resilient supply chain and better align our manufacturing footprint and supply chain to our commercial activities. We also continue to focus on increasing efficiencies through automation and digitization and we remain committed to deliver on the targeted cost synergies expected to be achieved from our acquisition of Hillrom. We intend to continue to actively manage our cost structure to help ensure that we are committing resources to the highest value uses. Such high value activities include supporting innovation, building out the portfolio, expanding patient access and accelerating growth for our stockholders.

Maintaining Disciplined and Balanced Capital Allocation

Subject to market conditions and our investment grade targets, our capital allocation strategies include the following:

- debt repayments to support our deleveraging commitments;
- active portfolio management through the identification of attractive acquisition and divestiture transactions, including our recent acquisition of Hillrom, the proposed spinoff and our pursuit of strategic alternatives (including a potential sale) for our BPS product category; and
- return capital to stockholders through dividends. We also intend to reinstate share repurchases over the longer term.

We paid down approximately $900 million of debt during 2022 and we continue to be committed to an investment grade rating, including taking actions toward achieving our 2.75x net leverage commitment. We currently expect to apply proceeds from the proposed spinoff and potential BPS divestiture toward reducing indebtedness and addressing near-term debt maturities. During this deleveraging period, we currently intend to maintain our dividend, not make any share repurchases and be highly selective with respect to any potential acquisitions.

Sales and Distribution

We have our own direct sales force and also make sales to and through independent distributors, drug wholesalers acting as sales agents and specialty pharmacy or other alternate site providers. In the United States, third parties, such as Cardinal Health, Inc., warehouse and ship a significant portion of our products through their distribution centers. These centers are generally stocked with adequate inventories to facilitate prompt customer service. Sales and distribution methods include frequent contact by sales and customer service representatives, automated communications via various electronic purchasing systems, circulation of catalogs and merchandising bulletins, direct-mail campaigns, trade publication presence and advertising.

Sales are made and products are distributed on a direct basis or through independent distributors or sales agents in more than 100 countries as of December 31, 2022.

International Operations

The majority of our revenues are generated outside of the United States and geographic expansion remains a component of our strategy (including with respect to the Hillrom business). Our international presence includes operations in Europe, the Middle East, Africa, Asia-Pacific, Latin America and Canada. We are subject to certain risks inherent in conducting business outside the United States. For more information on these risks, see the information under the captions "Risks Related to Baxter's Business —We are subject to risks associated with doing business globally" and "—Changes in foreign currency exchange rates and interest rates could have a material adverse effect on our operating results and liquidity" in Item 1A of this Annual Report on Form 10-K.

For financial information about our foreign and domestic revenues and segment information, see Notes 10 and 17, respectively, in Item 8 of this Annual Report on Form 10-K. For more information regarding foreign currency exchange risk, refer to the discussion under the caption entitled "Financial Instrument Market Risk" in Item 7 of this Annual Report on Form 10-K.

Contractual Arrangements

Our products are sold through contracts with customers, both within and outside the United States. Some of these contracts have terms of more than one year and place limits on our ability to increase prices. In the case of hospitals, governments and other facilities, these contracts may specify minimum quantities of a particular product or categories of products to be purchased by the customer.

In keeping with the increased emphasis on cost-effectiveness in healthcare delivery, many hospitals and other customers of medical products in the United States have joined group purchasing organizations (GPOs), or formed integrated delivery networks (IDNs), to enhance purchasing power. GPOs and IDNs negotiate pricing arrangements with manufacturers and distributors and the negotiated prices are made available to members. We have purchasing agreements with several of the major GPOs in the United States. GPOs may have agreements with more than one supplier for certain products. Accordingly, in these cases, we face competition from other suppliers even where a customer is a member of a GPO under contract with us. Purchasing power is similarly consolidated in many other countries. For example, public contracting authorities often act as the purchasing entities for the hospitals and other customers of medical products in their region and many hospitals and other customers have joined joint procurement entities and buying consortia. The result is that demand for healthcare products is increasingly concentrated across our markets globally. Additionally, our contractual pricing arrangements with GPOs, IDNs and public contracting authorities limit our ability to increase prices in order to offset raw materials or component price increases or otherwise.

Raw Materials and Component Parts

Raw materials and component parts essential to our business are purchased from numerous suppliers worldwide in the ordinary course of business. While many of these materials are generally available, we have experienced and may in the future experience shortages of supply. Additionally, certain of these materials are secured from single

source suppliers or on a spot basis and not pursuant to a contractual arrangement. In recent periods, we have experienced increased costs and shortages of raw materials and component parts (including resins and electromechanical devices), which has had a negative impact on our profit margins, due to the increased costs, and on our sales for certain product categories, due to our inability to fully satisfy demand.

In an effort to manage risk associated with raw materials and component supply, we work closely with our suppliers to help ensure availability and continuity of supply while maintaining high quality and reliability. We also seek to develop new and alternative sources of supply where beneficial to our overall raw materials procurement strategy. Refer to Item 1A. Risk Factors of this Annual Report on Form 10-K for further information regarding risks related to the supply chain, raw materials and component parts.

We are not always able to recover cost increases for raw materials and component parts through customer pricing due to contractual limits, where applicable, and market forces. This circumstance occurred during 2022 and our profit margins were adversely impacted because we were unable to fully offset all such cost increases through customer pricing adjustments or other pricing actions. We seek to utilize long-term supply contracts with some suppliers to help maintain continuity of supply and manage the risk of price increases. Our ability to do so in the face of limited supply of certain raw materials and component parts and inflationary environment may be limited.

Competition and Healthcare Cost Containment

Our businesses benefit from a number of competitive advantages, including the breadth and depth of our product offerings and our strong relationships with customers, including hospitals and clinics, GPOs, IDNs, physicians and patients, many of whom self-administer home-based therapies that we supply. We also benefit from efficiencies and cost advantages resulting from shared manufacturing facilities and the technological advantages of our products.

Although no single company competes with us in all of our businesses, we face substantial competition in each of our segments from international and domestic healthcare, medical products and pharmaceutical companies and providers of all sizes, and these competitors often differ across our businesses. In addition, global and regional competitors continue to expand their manufacturing capacity and sales and marketing channels. We believe customer purchasing decisions are primarily focused on cost-effectiveness, price, service, product performance and technological innovation. There has been increasing consolidation in our customer base and by our competitors, which continues to result in pricing and market pressures.

Global efforts toward healthcare cost containment continue to exert pressure on product pricing. Governments around the world use various mechanisms to control healthcare expenditures, such as price controls, the formation of public contracting authorities, product formularies (lists of recommended or approved products), and competitive tenders which require the submission of a bid to sell products. Sales of our products are dependent, in part, on the availability of reimbursement by government agencies and healthcare programs, as well as insurance companies and other private payers. In the United States, the federal and many state governments have adopted or proposed initiatives relating to Medicaid and other health programs that may limit reimbursement or increase rebates that we and other providers are required to pay to the state. In addition to government regulation, managed care organizations in the United States, which include medical insurance companies, medical plan administrators, health-maintenance organizations, hospital and physician alliances and pharmacy benefit managers, continue to put pressure on the price and usage of healthcare products. Managed care organizations seek to contain healthcare expenditures, and their purchasing strength has been increasing due to their consolidation into fewer, larger organizations and a growing number of enrolled patients. We face similar issues outside of the United States. In Europe and Latin America, for example, the government provides healthcare at low cost to patients, and controls its expenditures by purchasing products through public tenders, collective purchasing, regulating prices, setting reference prices in public tenders or limiting reimbursement or patient access to certain products. For further discussion, refer to Item 1A of this Annual Report on Form 10-K.

Intellectual Property

Patents and other proprietary rights are essential to our business. We rely on patents, trademarks, copyrights, trade secrets, know-how and confidentiality agreements to develop, maintain and strengthen our competitive position. We own a number of patents and trademarks throughout the world and have entered into license arrangements relating to various third-party patents and technologies. Products manufactured by us are sold primarily under our own trademarks and trade names. Some products distributed by us are sold under our trade names, while others are sold under trade names owned by our suppliers or partners. Trade secret protection of unpatented confidential and proprietary information is also important to us. We maintain certain details about our processes, products and

technology as trade secrets and generally require employees, consultants, and business partners to enter into confidentiality agreements. These agreements may be breached and we may not have adequate remedies for any breach. In addition, our trade secrets may otherwise become known or be independently discovered by competitors. To the extent that our employees, consultants, and business partners use intellectual property owned by others in their work for us, disputes may arise as to the rights in related or resulting know-how and inventions.

Our policy is to protect our products and technology through patents and trademarks on a worldwide basis. This protection is sought in a manner that balances the cost of such protection against obtaining the greatest value for us. We also recognize the need to promote the enforcement of our patents and trademarks and take commercially reasonable steps to enforce our patents and trademarks around the world against potential infringers, including judicial or administrative action where appropriate.

We operate in an industry susceptible to significant patent litigation. At any given time, we are involved as either a plaintiff or defendant in a number of patent infringement and other intellectual property-related actions. Such litigation can result in significant royalty or other payments or result in injunctions that can prevent the sale of products. For more information on patent and other litigation, see Note 7 in Item 8 of this Annual Report on Form 10-K.

Research and Development

Our investment in research and development (R&D), consistent with our portfolio optimization and capital allocation strategies, helps fuel our future growth and our ability to remain competitive in each of our product categories. Accordingly, we continue to focus our investment on select R&D programs to enhance future growth through clinical differentiation. Expenditures for our R&D activities were $605 million in 2022, $534 million in 2021, and $521 million in 2020. These expenditures include costs associated with R&D activities performed at our R&D centers located around the world, which include facilities in Belgium, Sweden, India, Italy, Germany, China, Japan and the United States, as well as in-licensing, milestone and reimbursement payments made to partners for R&D work performed at non-Baxter locations. As discussed above in under "Recently Announced Strategic Actions," we are designing a new operating model intended to simplify and streamline our operations. We are also working to create a more resilient supply chain and better align our manufacturing footprint and supply chain to our commercial activities. These activities may result in the consolidation of one or more R&D facilities.

For more information on our R&D activities, refer to the discussion under the caption entitled "Strategic Objectives" in Item 7 of this Annual Report on Form 10-K.

Quality Management

Our continued success depends upon the quality of our products. Quality management plays an essential role in determining and meeting customer requirements, helping to prevent defects, facilitating continuing improvement of our processes, products and services, and helping to assure the safety and efficacy of our products. Our quality system enables the design, development, manufacturing, packaging, sterilization, handling, distribution and labeling of our products to ensure that they conform to customer requirements. In order to consistently improve the effectiveness and efficiency of our quality system, various measurement, monitoring and analysis methods, such as management reviews and internal, external and vendor audits, are employed at local and central levels.

Each product that we market is required to meet specific quality standards, both in packaging and in product integrity and quality. If any of those is determined to be compromised at any time, we endeavor to take corrective and preventive actions designed to ensure compliance with regulatory requirements and to meet customer expectations. For more information on corrective actions taken by us, refer to the discussion under the caption entitled "Certain Regulatory Matters" in Item 7 of this Annual Report on Form 10-K.

Corporate Responsibility

Driven by our mission to save and sustain lives, Baxter's corporate responsibility strategy focuses on addressing the environmental, social and governance (ESG) issues that affect our patients, customers, employees, communities and other stakeholders worldwide. Our corporate responsibility approach supports our business priorities to achieve top quartile results relative to industry peers and other comparators across four dimensions: patient safety and quality, growth through innovation, best place to work and industry-leading performance. Advancing our corporate responsibility goals contributes to business, social and economic value, including attraction and retention, enhanced operational efficiency and implementation of enterprise risk management strategies, among others.

In 2021, we launched our 2030 Corporate Responsibility Commitment featuring ten strategic goals for focused action. Our Commitment is anchored by three pillars - Empower Our Patients, Protect Our Planet and Champion Our People and Communities - and bolstered by our approach to the foundational principles of Ethics and Compliance, Human Rights, Diversity, Equity and Inclusion and Privacy and Data Protection. The 2030 Corporate Responsibility Commitment and Goals highlight Baxter's corporate responsibility focus and help to further advance our ESG performance. Our progress against these goals is published annually in our Corporate Responsibility Report which is available on our website under "Our Story-Corporate Responsibility." The Corporate Responsibility Report is not incorporated by reference into this Annual Report on Form 10-K or any other document filed with the SEC.

Government Regulation

Our operations and many of the products manufactured or sold by us are subject to extensive regulation by numerous government agencies, both within and outside the United States. The Food and Drug Administration (FDA) in the United States, the European Medicines Agency (EMA) in Europe, the China Food and Drug Administration (CFDA) in China and other government agencies, inside and outside of the United States, administer requirements covering the testing, safety, effectiveness, manufacturing, labeling, promotion and advertising, distribution and post-market surveillance of our products. We must obtain specific approval from FDA and non-U.S. regulatory authorities before we can market and sell most of our products in a particular country. Even after we obtain regulatory approval to market a product, the product and our manufacturing processes and quality systems are subject to continued review by FDA and other regulatory authorities globally, including additional 510(k) and other regulatory submissions, and approvals or the time needed to secure approvals are not certain. State agencies in the United States also regulate our facilities, operations, employees, products and services within their respective states. We, along with our facilities, are subject to periodic inspections and possible administrative and legal actions by FDA and other regulatory agencies inside and outside the United States. Such actions may include warning letters, product recalls or seizures, monetary sanctions, injunctions to halt the manufacture and distribution of products, civil or criminal sanctions, refusal of a government to grant approvals or licenses, restrictions on operations or withdrawal of existing approvals and licenses. As situations require, we take steps to ensure safety and efficacy of our products, such as removing products found not to meet applicable requirements from the market and improving the effectiveness of quality systems. For more information on compliance actions taken by us, refer to the discussion under the caption entitled "Certain Regulatory Matters" in Item 7 of this Annual Report on Form 10-K.

We are also subject to various laws inside and outside the United States concerning our relationships with healthcare professionals and government officials, price reporting and regulation, the promotion, sales and marketing of our products and services, the importation and exportation of products, the operation of our facilities and distribution of products. In the United States, we are subject to the oversight of FDA, Office of the Inspector General within the Department of Health and Human Services (OIG), the Center for Medicare/Medicaid Services (CMS), the Department of Justice (DOJ), Environmental Protection Agency, Department of Defense and Customs and Border Protection in addition to others. We supply products and services to healthcare providers that are reimbursed by federally funded programs such as Medicare. As a result, our activities are subject to regulation by CMS and enforcement by OIG and DOJ. In each jurisdiction outside the United States, our activities are subject to regulation by government agencies including the EMA in Europe, CFDA in China and other agencies in other jurisdictions. Many of the agencies enforcing these laws have increased their enforcement activities with respect to healthcare companies in recent years. These actions appear to be part of a general trend toward increased enforcement activity globally.

Our operations involve the use of substances regulated under environmental laws, primarily in manufacturing and sterilization processes. Our environmental policies require compliance with all applicable environmental regulations and contemplate, among other things, appropriate capital expenditures for environmental protection. For example, we made $6 million, $33 million and $10 million of capital expenditures in 2022, 2021 and 2020, respectively, related to a new ethylene oxide emissions control system at our Mountain Home, Arkansas facility that was substantially completed in 2022.

Human Capital Management

As of December 31, 2022, we employed approximately 60,000 people globally, with approximately 19,000 employees in the United States and approximately 41,000 employees outside of the United States. Our employees are our most important assets and set the foundation for our ability to achieve our strategic objectives. They contribute to our success and are instrumental in driving operational execution and our ability to deliver strong

financial performance, advancing innovation and maintaining a strong quality and compliance program across our organization.

The success and growth of our business depends in large part on our ability to attract, retain and develop a diverse population of talented and high-performing employees at all levels of our organization, including the individuals who comprise our global workforce as well as executive officers and other key personnel. To succeed in a competitive labor market, we have developed recruitment and retention strategies, objectives and measures that we focus on as part of the overall management of our business. These strategies, objectives and measures form our human capital management framework and are advanced through the following programs, policies and initiatives:

- Competitive Pay and Benefits. Our compensation programs are designed to align the compensation of our employees with our performance and to provide the proper incentives to attract, retain and motivate employees to achieve superior results. The structure of our compensation programs balances incentive earnings for both short-term and long-term performance.
- Activating Change Today. Building on the success of our nine business resource groups (BRGs), one such BRG, Baxter's Black Alliance, joined forces with colleagues across the company to introduce Activating Change Today (ACT), a multidimensional program to advance inclusion and racial justice. ACT began as an initiative in 2020 that was initially U.S. focused following the events surrounding the death of George Floyd, but has since garnered relevance internationally as well. ACT is focused on driving results across four key areas – Workforce, Workplace, Community and Marketplace – encompassing employees, external stakeholders and the markets and communities we serve.
- Health and Safety. Health and safety are firmly rooted across our global footprint. Most of our employees outside of our manufacturing facilities worked remotely during the initial stages of the COVID-19 pandemic (beginning in March 2020). We subsequently implemented our flexible work policy, which we refer to as BaxFlex, which establishes the expectation that employees are in the office two to three days a week. Our production and field service employees have been working at our facilities throughout the pandemic in the interest of providing vital services to our customers.
- Recruitment, Training and Development. We use recruitment vehicles to attract diverse talent to our organization and we prioritize learning opportunities that foster a growth mindset. Our formal offerings include a tuition reimbursement program, an e-learning platform known as BaxU and virtual workshops that support our culture, strategy and the development of crucial skills. To assess the impact of the investments we make in our people, and to help us consistently improve our human resources programs, we regularly conduct anonymous surveys of our global workforce to seek feedback on a variety of topics including confidence in our leadership, competitiveness of our compensation and benefits packages, career growth opportunities and improvements on how we can make our company an employer of choice. Administered and analyzed by an independent third-party, the survey results are reviewed by our senior leaders, which include our executive officers. The results of this engagement survey are also shared with individual managers, who are then tasked with taking action based on their employees' anonymous feedback. By paying close attention to the results both at an aggregate enterprise level as well as at a department/business/work group level, we have been able to enhance our culture of speed, simplicity, courage and collaboration, help educate employees more effectively about our benefits offerings as well as our learning and development opportunities and further improve our communications content, mechanisms and frequency.

Strategic Risks

The proposed spinoff of our Renal Care and Acute Therapies product categories may not be completed on the terms or timeline currently contemplated, if at all.

We recently announced a series of strategic actions, including the proposed spinoff of our Renal Care and Acute Therapies product categories, a review of strategic alternatives for our BPS product category and plans to implement a simplified operating model and manufacturing footprint. We may encounter challenges to executing the proposed spinoff of our Renal Care and Acute Therapies product categories on the terms and within the timeframe we announced, or at all. The spinoff will be subject to the satisfaction of a number of customary conditions, including final approval from the Baxter Board of Directors, the filing and effectiveness of a registration statement on Form 10, receipt of a favorable Internal Revenue Service ruling or tax opinion from counsel with respect to the tax-free nature of the spin, satisfactory completion of financing arrangements and receipt of any necessary regulatory approvals. The failure to satisfy any of the required conditions could delay the completion of the proposed spinoff for a significant period of time or prevent it from occurring at all. Additionally, it is complex in nature, and unanticipated developments or changes, including disruptions in general market conditions, changes in law or challenges in executing the separation of the two businesses, may affect our ability to complete the spinoff on the terms or on the timeline we announced, or at all. The terms and conditions of the required regulatory authorizations and consents that are granted, if any, may also impose requirements, limitations or costs, or place restrictions on the conduct of the independent companies or impact our ability to complete the spinoff on the terms or timeline we announced, or at all.

Although we intend for the proposed spinoff to be tax-free to the company's stockholders for U.S. federal income tax purposes, we expect to incur non-U.S. cash taxes on the preparatory restructuring and may also incur non-cash tax expense including potential impairments of deferred tax assets. Moreover, there can be no assurance that the proposed spinoff will qualify as tax-free for U.S. federal income tax purposes. The IRS ruling or opinion from counsel

mentioned above will be based upon various factual representations and assumptions, as well as certain undertakings made by the Company and the new independent company. If any of these factual representations or assumptions are, or become, untrue or incomplete in any material respect, an undertaking is not complied with, or the facts upon which the opinion or ruling are based are materially different from the actual facts relating to the spinoff, reliance on the opinion or ruling may be jeopardized. If the spinoff were ultimately determined to be taxable for U.S. federal income tax purposes, we would incur a significant tax liability, while the distributions to the company's stockholders would become taxable and the new independent company could incur income tax liabilities as well.

We will be exposed to new risks as a result of the proposed spinoff and other strategic actions we are undertaking. Our strategic actions may not achieve their anticipated benefits, or our costs may exceed our estimates.

Our businesses will face material challenges in connection with the proposed spinoff and the other strategic actions we are undertaking (including a review of strategic alternatives for our BPS product category and plans to implement a simplified operating model and manufacturing footprint). These challenges include, without limitation, the diversion of management's attention from ongoing business concerns; appropriately allocating assets and liabilities among the companies to be separated in the proposed spinoff, particularly given the complex nature of the spinoff; attracting, retaining and motivating key management and other employees; retaining existing, or attracting new, business and operational relationships, including with customers, suppliers, employees and other counterparties; maintaining our relationships with regulators; assigning customer contracts and intellectual property to each of the businesses; and potential negative reactions from the financial markets. In particular, in the last few years, the company has undertaken other strategic and business transformation actions (including the acquisition of Hillrom and cost reduction initiatives) that have entailed changes across our organizational structure, senior leadership, culture, functional alignment, outsourcing and other areas. This poses risks in the form of personnel capacity constraints and institutional knowledge loss that has led to and could in the future lead to missed performance or financial targets and harm to our reputation, and these risks are heightened with the additional interdependent actions that will be needed to complete the proposed spinoff and other strategic actions we are pursuing.

We have begun and will continue to incur significant expenses in connection with the proposed spinoff and other strategic actions we have announced. These expenses may be higher than currently anticipated or may not yield a discernible benefit if the actions are not completed on schedule or at all. In addition, the anticipated benefits of these actions are based on a number of assumptions, some of which may prove incorrect, and we cannot predict with certainty when the expected benefits will occur, or the extent to which they will be achieved. As a result, even if the proposed spinoff or other strategic actions are completed, they may not achieve some or all of the anticipated strategic, financial, operational or other benefits in the expected timeframe, or at all, which could adversely impact our business, results of operations or financial condition.

Further, even if the proposed spinoff is completed, we cannot assure you that each separate company will be successful. Completion of the spinoff will result in independent public companies that are smaller, less diversified companies, with more limited businesses concentrated in their respective industries than Baxter is today. As a result, each company will be more vulnerable to changing market conditions, which could have a material adverse effect on its business, financial condition and results of operations. In addition, the diversification of revenues, costs and cash flows will diminish, such that each company's results of operations, cash flows, working capital, effective tax rate and financing requirements may be subject to increased volatility, and each company's ability to fund capital expenditures and investments, pay dividends and meet debt obligations and other liabilities may be diminished. Each company will also incur one-time and ongoing costs, including costs of operating as independent companies, that the separated businesses will no longer be able to share. In addition, until the market has fully analyzed the values of the separate companies, the price of our common stock and common stock of the new company may experience volatility. Our common stock or the common stock of the new company may not match some holders' investment strategies or meet minimum criteria for inclusion in stock market indices or portfolios, which could cause certain investors to sell their shares, which could in turn lead to declines in the trading price of such stock. As a result of any of the foregoing or other risks, the combined value of the common stock of the two publicly traded companies may be less than what the value of our common stock would have been absent the spinoff.

We may fail to realize the anticipated benefits of the Hillrom acquisition.

During 2021, we completed the acquisition of Hillrom. The success of this acquisition depends on, among other things, our ability to integrate Hillrom in a manner that facilitates growth opportunities, realizes anticipated cost and revenue synergies (some of which are still being identified) and achieves certain previously communicated net

leverage targets without adversely affecting current revenues and investments in future growth. If we are not able to successfully achieve these objectives, the anticipated benefits of the Hillrom acquisition may not be realized fully or at all or may take longer to realize than expected.

There is a significant degree of difficulty and management distraction inherent in the process of integrating an acquisition. These difficulties include challenges consolidating certain operations and functions (including regulatory and other corporate functions), integrating technologies (including differing IT systems and processes), organizations, procedures, policies and operations, addressing differences in the business cultures of the two companies and retaining key personnel. The integration is complex and time consuming and aspects of it may be delayed, or additional and unforeseen expenses may result, in light of our recently announced strategic initiatives. The integration process and other disruptions resulting from the Hillrom acquisition may also disrupt our ongoing businesses or cause inconsistencies in standards, controls, procedures and policies that adversely affect our relationships with market participants, employees, regulators and others with whom we have business or other dealings. Any failure to successfully or cost-effectively integrate Hillrom could have a material adverse effect on our business and cause reputational harm. Challenges associated with our integration efforts are heightened due to the other strategic actions we are pursuing.

If our business strategy and development activities are unsuccessful, our business, financial condition and results of operations could be adversely affected.

While we remain committed to deleveraging, we expect to engage in significant business development activities over the longer term (once we have satisfied our net leverage targets), including evaluating acquisitions, joint development opportunities, technology licensing arrangements and other opportunities. These activities may result in substantial investment of our resources (including resources currently focused on the recently announced strategic initiatives discussed above). Our success developing products or expanding into new markets from such activities will depend on a number of factors, including our ability to find suitable opportunities for acquisition, investment or alliance; competition from other companies in the industries in which we operate that are seeking similar opportunities; whether we are able to complete an acquisition, investment or alliance on terms that are satisfactory to us; the strength of the other company's underlying technology, products and ability to execute its business strategies; any intellectual property and litigation related to the other company's products or technology; and our ability to successfully integrate the acquired company, business, product, technology or research into our existing operations, including the ability to adequately fund acquired in-process R&D projects and to maintain adequate controls over the combined operations. Certain of these activities are subject to antitrust and competition laws, which laws could impact our ability to pursue strategic transactions and could result in mandated divestitures in the context of proposed acquisitions. If we are unsuccessful in our business development activities, we may not realize the intended benefits of such activities, including that acquisition and integration costs may be greater than expected or the possibility that expected return on investment, synergies and accretion will not be realized or will not be realized within the expected timeframes. For more information, see Note 2 in Item 8 of this Annual Report.

Risks Related to Our Financial Performance and Our Common Stock

Global economic conditions, including inflation and supply chain disruptions, have adversely affected, and could continue to adversely affect, our operations.

General global economic downturns and macroeconomic trends, including heightened inflation, capital markets volatility, interest rate and currency rate fluctuations, and economic slowdown or recession, have resulted and may continue to result in unfavorable conditions that negatively affect demand for our products and exacerbate some of the other risks that affect our business, financial condition and results of operations. Both domestic and international markets experienced significant inflationary pressures in fiscal year 2022 and inflation rates in the U.S., as well as in other countries in which we operate, are currently expected to continue at elevated levels for the near-term. In addition, the Federal Reserve in the U.S. and other central banks in various countries have raised, and may again raise, interest rates in response to concerns about inflation, which, coupled with reduced government spending and volatility in financial markets, has had and may continue to have the effect of further increasing economic uncertainty and heightening these risks. Interest rate increases or other government actions taken to reduce inflation have resulted in recessionary pressures in many parts of the world. Furthermore, currency exchange rates have been especially volatile in the recent past, and these currency fluctuations have affected, and may continue to affect, the reported value of our assets and liabilities, as well as our cash flows.

We have experienced significant challenges to our global supply chain in recent periods, including production delays and interruptions, increased costs and shortages of raw materials and component parts (including resins and electromechanical devices) and higher transportation and labor costs, resulting from COVID-19 and other

exogenous factors including significant weather events, elevated inflation levels, disruptions to certain ports of call around the world, the war in Ukraine and other geopolitical events. Due to the nature of our products, which include dense consumable medical products such as IV fluids, and the geographic locations of our manufacturing facilities, which often require us to transport our products long distances, we may be more susceptible to increases in freight costs and other supply chain challenges than certain of our industry peers. We expect to experience some of these and other challenges related to our supply chain in future periods. These challenges, including the unavailability of certain raw materials and component parts, have also had a negative impact on our sales for certain product categories due to our inability to fully satisfy demand and may continue to have a negative impact on our sales in the future. They have also made it increasingly difficult to model accurately our short-term and long-term financial objectives and may continue to do so in the future

Our ability to generate cash flows from operations has been affected, and could continue to be affected, if there is a material decline in the demand for our products or, in the solvency or planned capital expenditures of our customers or suppliers, or if there is deterioration in our key financial ratios or credit ratings. Current or worsening economic conditions may impact the ability of our customers (including governments) to pay for our products and services and the amount spent on healthcare generally, which could result in decreased demand for our products and services, declining cash flows, longer sales cycles, increased inventory levels, slower adoption of new technologies and increased price competition. These conditions may also adversely affect certain of our suppliers, which could disrupt our ability to produce products. We continue to do business with foreign governments in certain countries, including Greece and Italy, which have experienced deterioration in credit and economic conditions. While global economic conditions have not significantly impacted our ability to collect receivables, liquidity issues in certain countries have resulted, and may continue to result, in delays in the collection of receivables and credit losses, and may also impact the stability of the U.S. dollar, Euro or Yuan.

Our operating results and financial condition may fluctuate.

Our operating results and financial condition may fluctuate from quarter to quarter and year to year for a number of reasons. Events, such as changes to our expectations, strategy or forecasts (including as a result of evolving global macroeconomic conditions and updated expectations regarding the timing of new regulatory approvals) or even a relatively small revenue shortfall or increase in supply chain or other costs which we are unable to offset may cause financial results for a period to be below our expectations or projections. As a result, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful, nor should they be relied upon as an indication of future performance. Our operating results and financial condition are also subject to fluctuation from all of the risks described throughout this section. These fluctuations may adversely affect our results of operations and financial condition and our stock price.

We may not achieve our financial goals.

We continue to evaluate and refine both our short-term and long-term financial objectives, including our stated commitment to achieve certain net leverage targets. Our ability to achieve these targets depends, in part, on our ability to realize the anticipated benefits of the acquisition (and related cost and revenue synergy targets) while working to execute on our stated portfolio management and other recently announced strategic initiatives. We may fail to achieve our targeted financial results if we are unsuccessful in implementing our strategies, our estimates or assumptions change or for any other reason. Our failure to achieve our financial goals could have a material adverse effect on our business, financial condition and results of operations.

We have incurred a substantial amount of debt in connection with the Hillrom acquisition, which could adversely affect our business, financial condition or results of operations.

We incurred acquisition-related debt financing of approximately $11.8 billion to fund the cash consideration for the Hillrom acquisition, refinance certain indebtedness of Hillrom and pay related fees and expenses. Our substantially increased indebtedness and higher debt-to-equity ratio following the acquisition has the effect, among other things, of reducing our flexibility to respond to changing business and economic conditions and has increased our borrowing costs (including as a result of the downgrade in our senior debt credit ratings in 2021). The increased levels of indebtedness and our recent projected financial performance could also reduce funds available (under our credit facilities or otherwise) for investments in product development, capital expenditures, dividend payments, acquisitions, share repurchases and other activities and may create competitive disadvantages for us relative to other companies with lower debt levels. In addition, until we achieve our commitment to reduce our indebtedness following the Hillrom acquisition, our capital allocation activities and operational flexibility is limited. There can be no assurance that we will be successful in doing so on a timely basis or at all.

Changes in foreign currency exchange rates and interest rates could have a material adverse effect on our operating results and liquidity.

We generate the majority of our revenue and profit outside the United States. As a result, our financial results have been and may in the future be adversely affected by fluctuations in foreign currency exchange rates. We cannot predict with any certainty changes in foreign currency exchange rates or our ability to mitigate these risks. We have experienced, and may continue to experience, additional volatility as a result of inflation and other macroeconomic factors, including in emerging market countries. We are also exposed to changes in interest rates, and our ability to access the money markets and capital markets on terms that are favorable to us, or at all, could be impeded if market conditions are not favorable. For more information see "Financial Instrument Market Risk" in Item 7 of this Annual Report.

Our common stock price has fluctuated significantly and may continue to do so in the future.

The price of our common stock has fluctuated significantly and may continue to do so in the future for a number of reasons, including, but not limited to:

- market perceptions of any strategic actions or other developments related to our business we announce, including, for example, our announcement regarding the proposed spinoff of our Renal Care and Acute Therapies product categories;
- variations in our net sales, earnings or other financial results from investors' expectations or our previously issued guidance;
- departure of key personnel;
- fluctuations in the results of our operations and general conditions in the economy, our market, and the markets served by our customers; and
- the operating and stock performance of comparable companies or related industries.

In addition, prices in the stock market have generally been volatile over the past few years. In certain cases, the fluctuations have been unrelated to the operating performance of the affected companies. As a result, the price of our common stock could also fluctuate in the future without regard to our operating performance.

Future material impairments in the value of our long-lived assets, including goodwill, could negatively affect our operating results.

We regularly review our long-lived assets, including identifiable intangible assets, goodwill (which results from our acquisition activity) and property, plant and equipment, for impairment. Goodwill and acquired indefinite life intangible assets are subject to impairment review on an annual basis and whenever potential impairment indicators are present. Other long-lived assets are reviewed when there is an indication that impairment may have occurred. Changes in market conditions or other changes in the future outlook of value may lead to impairment charges in the future. In addition, we may from time to time sell assets that we determine are not critical to our strategy, including in connection with strategic exits. Future events or decisions may lead to asset impairments and/or related charges. Certain non-cash impairments may result from a change in our strategic goals, business direction or other factors relating to the overall business environment. Material impairment charges could negatively affect our results of operations.

For example, in the third quarter of 2022, we recorded a $2.8 billion goodwill impairment relating to our three Hillrom reporting units due to macroeconomic conditions, including the rising interest rate environment and broad declines in equity valuations, and reduced earnings forecasts for these units, driven primarily by shortages of certain component parts used in our products, raw materials inflation and increased supply chain costs. Further adverse changes to macroeconomic conditions or our earnings forecasts could lead to additional goodwill or intangible asset impairment charges in future periods and such charges could be material to our results of operations. For more information on the valuation of goodwill and intangible assets, see "Critical Accounting Policies" in Item 7 of this Annual Report.

Other Risks Relating to Our Business

The effects of the COVID-19 pandemic have had, and we expect will continue to have, a material adverse effect on our business. The nature and extent of future impacts are uncertain and unpredictable.

Our global operations expose us to risks associated with public health crises, including epidemics and pandemics, such as the COVID-19 pandemic. COVID-19 has had, and we expect will continue to have, an adverse impact on

our operations, supply chains and distribution systems and has increased and will continue to increase our expenses, including due to preventive and precautionary measures that we, other businesses and governments have taken and may continue to take.

COVID-19 has adversely affected and many continue to adversely affect our business in many ways, including, but not limited to, the following:

- We have experienced, and expect to continue to experience, significant and unpredictable reductions or increases in demand for certain of our products as healthcare customers re-prioritize the treatment of patients. Some of our products are particularly sensitive to reductions in elective medical procedures. For example, due to the spread of the Omicron variant in 2022, many elective procedures were suspended or postponed in our principal markets as hospital systems prioritized treatment of COVID-19 patients again or otherwise comply with changing government guidelines. Further delays or cancellations may occur in the future. While we have started to see a resurgence in the scheduling of elective procedures in at least some of the markets in which we operate, if patients and hospital systems de-prioritize, delay or cancel elective procedures in the future, our business, financial condition and results of operations may be negatively affected. Additionally, through the pandemic, certain portions of our patient populations (including End Stage Renal Disease patients) have experienced heightened mortality levels. Demand for related products and services may not rebound to pre-pandemic levels in light of these increased mortality rates.
- A significant number of our suppliers, manufacturers, distributors and vendors have been adversely affected by the COVID-19 pandemic, including obstacles relating to their ability to maintain the continuity of their on-site operations. These impacts have caused interruptions and delays in our supply chain, and may continue to do so, resulting in more expensive alternative sources of labor and materials and heightened supply chain costs. Any delay or shortage in the supply of components or materials or other operational or logistical challenges impacts our ability to satisfy consumer demand for our products in a timely manner or at all, which could harm our reputation, future sales and profitability. For example, we have experienced supply constraints for amino acid raw materials used in our parenteral nutrition products, as such materials are being used to produce COVID-19 vaccines. These constraints have resulted in certain product backorders and may do so in the future.
- We could experience a loss of sales and profitability due to delayed payments, reduced demand or capital constraints of healthcare professionals, hospitals and other customers (including potential insolvency) and suppliers and vendors facing liquidity or other financial issues. These liquidity or other financial issues could be exacerbated if prolonged high levels of unemployment or loss of insurance coverage impact patients' ability to access treatments that use our products and services.
- COVID-19 has adversely impacted the continued service and availability of skilled personnel necessary to run our operations. For example, we have faced increased absenteeism in connection with the rise of various COVID-19 variants. Although we have sought to mitigate these staffing challenges through overtime and enlisting contingent labor, staffing shortages have strained our operations and increased our expenses.
- We face increased operational challenges as we continue to take measures to support and protect employee health and safety, including through work from home policies. While many of our employees have returned to work, remote or hybrid working arrangements heighten our risks associated with information technology systems and networks, including cyber-attacks, computer viruses, malicious software, security breaches, and telecommunication failures, both for systems and networks we control directly and for those that employees and third-party developers rely on to work remotely. Any failure to prevent or mitigate security breaches or cyber risks or detect, or respond adequately to, a security breach or cyber risk, or any other disruptions to our information technology systems and networks (as a result of remote working arrangements or otherwise), can have adverse effects on our business and cause reputational and financial harm.

Any of these and other impacts of the pandemic could have a material adverse effect on our business, financial condition and results of operations.

In addition, the scope and duration of any future public health crisis will depend on a number of factors, including the potential emergence of new variants, the pace at which government restrictions are imposed and lifted and the extent of such restrictions, the scope of additional actions taken to mitigate the spread of disease, the availability, effectiveness and acceptance of vaccines and the speed and extent to which global markets and utilization rates for our products fully recover from the disruptions caused by such a public health crisis. The impact of these and other factors on our business, financial condition and results of operations will depend on future developments that are highly uncertain and cannot be predicted with confidence. Finally, to the extent COVID-19 or any future public health

RE: Explanation of Disciplinary History
Channahon, IL

Dear Mr. Wuest:

This letter is provided in conjunction with our affirmative response to Question 3 on our application for our Out-of-State Wholesale Distributor License. We have a few matters to disclose based on our parent company, Cardinal Health, Inc. Please note that the facility that is the subject of this application does not have any disciplinary history to disclose.

On September 24, 2020, Cardinal Health finalized a settlement agreement with the Colorado Board of Pharmacy and paid a fine of $1,150. This settlement was regarding the failure of our Denver, Colorado distribution center to timely notify the Board of a change in that distribution center's designated representative.

Cardinal Health's pharmaceutical distribution center in Valencia, California entered into a settlement agreement with the California Board of Pharmacy in April 2019. As a condition of that settlement, the California Wholesale license for our Valencia distribution center was on probation from April 3, 2019, through April 2, 2021. This agreement resulted from the Valencia distribution center making sales to a customer between 2012 and 2014 and the failure to receive a pharmacist's signature on several deliveries in that same time frame.

Additionally, on March 11, 2019, Cardinal Health's Wheeling, West Virginia, distribution center entered into a settlement agreement with the Ohio Board of Pharmacy regarding the security and storage of drugs while those drugs were being distributed to the customer. This issue involved Ohio Board of Pharmacy inspectors manipulating our totes in such a way as to be able to retrieve a bottle out of a strapped/sealed tote. This occurred on several occasions all while the totes were in the custody of our delivery drivers or pharmacies. An inspector also witnessed a delivery vehicle door that was not locked and secured appropriately. Cardinal Health agreed to pay a monetary penalty of $5,000.

As previously reported, on May 15, 2012, Cardinal Health entered into a settlement agreement with the U.S. Drug Enforcement Administration ("DEA") regarding Cardinal Health's registration to distribute controlled substances from our Lakeland, Florida facility. On February 3, 2012, DEA served an Order to Show Cause and Immediate Suspension of Registration (the "Order") on Cardinal Health's Lakeland, Florida distribution center. In the Order, DEA alleged that the Lakeland facility "failed to maintain effective controls against the diversion of controlled substances" and "failed to detect and report suspicious orders of oxycodone by its pharmacy customers." In particular, DEA identified four retail pharmacies located in Florida that were serviced by the Lakeland facility and alleged that "[n]otwithstanding the large quantities of controlled substances ordered by Cardinal's top retail pharmacy customers Cardinal failed to conduct meaningful due diligence to ensure that the controlled substances were not diverted...." Importantly, these allegations did not involve any diversion of controlled substances from Cardinal's facility.

Under the settlement agreement, the Lakeland facility's DEA registration was suspended for two years from the date of the settlement agreement. On May 21, 2014, the suspension was lifted and the DEA reinstated Lakeland's registration. On December 23, 2016, Cardinal Health reached a nationwide settlement with the federal government, resolving the outstanding civil penalty portion of this May 15, 2012, administrative settlement with the DEA. Under this civil settlement, Cardinal Health has agreed to pay $44 million to the Department of Justice (DOJ) to resolve this matter. The DOJ, including the DEA and the United States Attorneys' Offices for the Middle District of Florida, the Southern District of New York, the District of Maryland, and the Western District of Washington and all other districts across the country have also agreed to take no further administrative or civil action on these and related matters. In addition, Cardinal Health has reached an agreement with the State of West Virginia regarding the company's distribution of controlled substances in that state between 2007 and 2012. While Cardinal Health denies the allegations, it agreed to pay West Virginia $20 million to resolve issues and release the company from further actions.

In 2014, the Boards of Pharmacy in both California and Georgia took derivative action based upon the DEA settlement. The Georgia Board fined the Lakeland facility $500 in administrative fees, and the California Board fined the facility $1,505 in investigative fees. Both fees were paid to the respective Boards.

In September 2013, Cardinal Health's distribution center located in Ontario, California, received a citation involving prescription device deliveries being made to an unauthorized customer; the facility paid the fine of $5,000.00 and the matter was closed. In July 2014, the State of Michigan Department of Licensing and Regulatory Affairs (LARA) took derivative action against the Ontario, CA, facility based upon the action described above. LARA issued a Consent Order and fined the Ontario facility $500. Cardinal Health paid the fine to LARA on July 9, 2014.

Non-GAAP Financial Measures

In this report, including in the "Fiscal 2022 Overview" section of Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), we use financial measures that are derived from consolidated financial data but are not presented in our financial statements that are prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). These measures are considered "non-GAAP financial measures" under the Securities and Exchange Commission ("SEC") rules. The reasons we use these non-GAAP financial measures and the reconciliations to their most directly comparable GAAP financial measures are included in the "Explanation and Reconciliation of Non-GAAP Financial Measures" section following MD&A in this report.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Our MD&A within this Form 10-K generally discusses fiscal 2022 and fiscal 2021 items and year-to-year comparisons between fiscal 2022 and fiscal 2021. Fiscal 2020 items and discussions of year-to-year comparisons between fiscal 2021 and fiscal 2020 that are not included in this Form 10-K can be found in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the fiscal year ended June 30, 2021 (the "Fiscal 2021 Form 10-K").

Important Information Regarding Forward-Looking Statements

This report (including information incorporated by reference) includes forward-looking statements addressing expectations, prospects, estimates and other matters that are dependent upon future events or developments. Many forward-looking statements appear in MD&A and Risk Factors, but there are others throughout this report, which may be identified by words such as "expect," "anticipate," "intend," "plan," "believe," "will," "should," "could," "would," "project," "continue," "likely," and similar expressions, and include statements reflecting future results or guidance, statements of outlook and expense accruals. These matters are subject to risks and uncertainties that could cause actual results to differ materially from those projected, anticipated or implied. The most significant of these risks and uncertainties are described in "Risk Factors" in this report and in Exhibit 99.1 to the Form 10-K included in this report. Forward-looking statements in this report speak only as of the date of this document. Except to the extent required by applicable law, we undertake no obligation to update or revise any forward-looking statement.

Consolidated Results

Fiscal 2022 Overview

Revenue

Revenue for fiscal 2022 was $181.4 billion, a 12 percent increase from the prior year, primarily due to sales growth from pharmaceutical distribution and specialty pharmaceutical customers, which largely consisted of branded pharmaceutical sales to existing and net new customers.

GAAP and Non-GAAP Operating Earnings/(Loss)

(in millions)	2022	2021	Change
GAAP operating earnings/(loss)	**$ (596)**	**$ 472**	**N.M.**
Surgical gown recall costs/(income)	1	(28)	
State opioid assessment related to prior fiscal years	—	38	
Restructuring and employee severance	101	114	
Amortization and other acquisition-related costs	324	451	
Impairments and (gain)/loss on disposal of assets	2,050	79	
Litigation (recoveries)/charges, net	109	1,129	
Non-GAAP operating earnings	**$ 1,990**	**$ 2,255**	**(12)%**

The sum of the components and certain computations may reflect rounding adjustments.

We had a GAAP operating loss of $596 million during fiscal 2022 due to $2.1 billion pre-tax non-cash goodwill impairment charges related to the Medical segment. See "Critical Accounting Policies and Sensitive Accounting Estimates" section of this MD&A and Note 4 of the "Notes to Consolidated Financial Statements" for additional detail. During fiscal 2021, we recognized pre-tax charges of $1.17 billion for the estimated liability associated with lawsuits and claims brought against us by states and political subdivisions relating to the distribution of prescription opioid pain medications. See further description of opioid lawsuits in the Significant Developments in Fiscal 2022 and Trends section in this MD&A and Note 7 of the "Notes to Consolidated Financial Statements."

Non-GAAP operating earnings during fiscal 2022 decreased 12 percent primarily due to the decrease in Medical segment profit, largely resulting from net inflationary impacts (which primarily related to increased transportation and commodities costs, partially offset by certain price increases) and the adverse impact of global supply chain constraints.

GAAP and Non-GAAP Diluted EPS

($ per share)	2022 [2][3]	2021 [2]	Change
GAAP diluted EPS [1]	**$ (3.35)**	**$ 2.08**	**N.M.**

State opioid assessment related to prior fiscal years	—	0.10	
Restructuring and employee severance	0.27	0.29

Loss on early extinguishment of debt	0.03	0.04	
(Gain)/loss on sale of equity interest in naviHealth	—	0.01	
Non-GAAP diluted EPS [1]	**$ 5.06**	**$ 5.57**	**(9)%**

The sum of the components and certain computations may reflect rounding adjustments.

(1) Diluted earnings/(loss) per share attributable to Cardinal Health, Inc. ("diluted EPS" or "diluted loss per share").

(2) The reconciling items are presented within this table net of tax. See quantification of tax effect of each reconciling item in our GAAP to Non-GAAP Reconciliations in the section titled "Explanation and Reconciliation of Non-GAAP Financial Measures."

(3) For fiscal 2022, GAAP diluted loss per share attributable to Cardinal Health, Inc. and the EPS impact from the GAAP to non-GAAP per share reconciling items are calculated using a weighted average of 279 million common shares, which excludes potentially dilutive securities from the denominator due to their anti-dilutive effects resulting from our GAAP net loss for the period. Fiscal 2022 non-GAAP diluted EPS is calculated using a weighted average of 280 million common shares, which includes potentially dilutive shares.

(4) Impairments and (gain)/loss on disposals of assets, net includes pre-tax goodwill impairment charges of $2.1 billion related to the Medical segment recorded during fiscal 2022. The net tax benefit related to these charges was $150 million.

(5) Litigation (recoveries)/charges, net, includes a tax benefit recorded during fiscal 2021 related to a net operating loss carryback. Our wholly-owned insurance subsidiary recorded a self-insurance pre-tax loss in its fiscal 2020 statutory financial statements primarily related to opioid litigation. This self-insurance pre-tax loss, which did not impact our pre-tax consolidated results, was deducted on our fiscal 2020 consolidated federal income tax return and contributed to a significant net operating loss for tax purposes. The net operating loss was carried back and adjusted our taxable income for fiscal 2015, 2016, 2017 and 2018 as permitted under the Coronavirus Aid, Relief and Economic Security ("CARES") Act. The total benefit from the net operating loss carryback was $424 million; however, for purposes of Non-GAAP financial measures, we allocated $389 million of the benefit to litigation (recoveries)/charges, net, which is excluded from non-GAAP measures, based on the relative amount of the self-insurance pre-tax loss related to opioid litigation claims versus separate tax adjustments. The tax benefit allocated to the separate tax adjustments of $35 million is included in non-GAAP measures.

During fiscal 2022, GAAP diluted EPS was adversely impacted by the goodwill impairment charges related to the Medical segment, which had a $(6.94) per share after-tax impact. See "Critical Accounting Policies and Sensitive Accounting Estimates" section of this MD&A, and Note 4 and Note 8 of the "Notes to Consolidated Financial Statements" for additional detail.

During fiscal 2021, GAAP diluted EPS was positively impacted by $1.44 per share due to a tax benefit from the net operating loss carryback primarily related to a self-insurance pre-tax loss, as further described in Note 8 of the "Notes to Consolidated Financial Statements." The charges we recognized in fiscal 2021 for the estimated liability associated with lawsuits and claims brought against us by states and political subdivisions relating to the distribution of prescription opioid pain medications had a $(3.21) per share after-tax impact on GAAP diluted EPS.

During fiscal 2022, non-GAAP diluted EPS decreased 9 percent to $5.06 due to factors impacting non-GAAP operating earnings, partially offset by a lower share count as a result of share repurchases.

Cash and Equivalents

Our cash and equivalents balance was $4.7 billion at June 30, 2022 compared to $3.4 billion at June 30, 2021. The increase in cash during fiscal 2022 was due to net cash provided by operating activities of $3.1 billion. Net cash provided by operating activities includes a refund of $966 million for the tax benefit from the net operating loss carryback related to a self-insurance pre-tax loss, and reflects the impact of $417 million of payments related to the settlement agreement (the "Settlement Agreement") to settle the vast majority of the opioid lawsuits filed by states and local governmental entities, payments under the separate New York, Ohio and Rhode Island settlements, as well as certain payments under the Cherokee Nation settlement. Fiscal 2022 operating cash flow was also impacted by favorable timing of net working capital.

We also received proceeds of $923 million, net of cash transferred, from the divestiture of the Cordis business, and we deployed $1.0 billion for share repurchases, $885 million for debt repayments, $559 million for dividends and $387 million for capital expenditures.

Significant Developments in Fiscal 2022 and Trends

Opioid Lawsuits Developments

National Settlement

Beginning in fiscal year 2017, state attorneys general, counties and municipalities began filing lawsuits related to the distribution of prescription opioid pain medications against pharmaceutical wholesalers, including us, and other participants in the pharmaceutical supply chain. By fiscal year 2022, Cardinal Health was a defendant in approximately 2,775 lawsuits brought by state attorneys general and counties, municipalities and other political subdivisions. In July 2021, we and two other national distributors (collectively, the "Distributors") announced a proposed settlement with a group of state attorneys general intended to resolve the vast majority of these lawsuits (the "National Settlement") as well as a proposed settlement agreement (the "Settlement Agreement") containing, among other things, a sign-on process to allow states and political subdivisions to participate in the National Settlement.

In February 2022, the Distributors announced that each company had determined that a sufficient number of states and political subdivisions had agreed to participate in the National Settlement to proceed to effectiveness of that settlement. The Settlement Agreement became effective on April 2, 2022.

Parties to the National Settlement include 46 out of 49 eligible states as well as the District of Columbia and all eligible territories. As of August 9, 2022, over 99 percent of eligible political subdivisions (as calculated by population under the Settlement Agreement) that had brought opioid-related suits against the companies have joined the settlement or otherwise had their claims addressed by state legislation.

The Settlement Agreement includes a cash component, pursuant to which we will pay up to approximately $6.0 billion, the majority of which is expected to be paid over 18 years. The exact payment amount will depend on several factors, including the extent to which states take action to foreclose opioid lawsuits by political subdivisions (e.g., by passing laws barring or limiting opioid lawsuits by political subdivisions) and the extent to which additional political subdivisions in participating states file opioid lawsuits against us.

The Settlement Agreement also includes injunctive relief terms related to distributors' controlled substance anti-diversion programs, including with respect to: (1) governance; (2) independence and training of the personnel operating controlled substances monitoring programs; (3) due diligence for new and existing customers; (4) ordering limits for certain products; and (5) suspicious order monitoring. A monitor will oversee compliance with these provisions for a period of five years. In addition, the Distributors will engage a third-party vendor to act as a clearinghouse for data aggregation and reporting, which the Distributors will fund for ten years.

During fiscal 2022, we made our first annual payment under the Settlement Agreement. Prior to the effective date of the Settlement Agreement, the Distributors had entered into separate settlement agreements with each of the states of Florida, New York, Ohio and Rhode Island. When the Settlement Agreement became effective, each of these states and their participating subdivisions became a part of the National Settlement; however, the New York, Ohio and Rhode Island agreements required us to make certain payments separately from those required by the Settlement Agreement. Accordingly, during fiscal 2022, we made payments under the separate New York, Ohio and Rhode Island settlements, as well as certain payments under the Cherokee Nation settlement. In total, we paid $417 million in connection with these matters during fiscal 2022. We have $6.36 billion accrued at June 30, 2022, of which $532 million is included in other accrued liabilities, and the remainder is included in deferred income taxes and other liabilities in our consolidated balance sheets. In July 2022, we made our second annual payment of $374 million under the Settlement Agreement.

Other Settlements

West Virginia subdivisions and Native American tribes are not a part of the National Settlement and we had separate negotiations with these groups. A bench trial before a federal judge in West Virginia in a case brought by Cabell County and City of Huntington against the Distributors concluded in July 2021. In July 2022, a judgment in favor of the Distributors was entered. In July 2022, the Distributors reached an agreement to settle the opioid-related claims of the majority of the remaining West Virginia subdivisions. Under this agreement, Cardinal Health agreed to pay eligible West Virginia subdivisions up to approximately $124 million over an eleven-year period. This agreement is subject to certain contingencies related to subdivision participation. In September 2021, we announced that the Distributors had reached an agreement with the Cherokee Nation in connection with ongoing negotiations toward a broader agreement with Native American tribes. In January 2022, the Distributors executed a term sheet with the Native American tribes.

In May 2022, the Distributors reached an agreement with the Washington Attorney General, under which Cardinal Health will pay up to approximately $160 million to the State of Washington and its participating political subdivisions to resolve opioid-related claims. This amount is consistent with the amount that would have been allocated to Washington under the Settlement Agreement plus certain attorneys' fees and costs. The terms of this agreement are consistent with the Settlement Agreement. This agreement is subject to certain contingencies, including the rate of subdivision participation.

In June 2022, the Distributors reached an agreement with the State of Oklahoma to resolve the opioid-related claims of the state and its political subdivisions. Under this agreement, Cardinal Health agreed to pay up to approximately $95 million to the State and its participating

subdivisions. This amount is consistent with the amount that would have been allocated to Oklahoma under the Settlement Agreement. The terms of this agreement are consistent with the terms of the Settlement Agreement. This agreement is subject to certain contingencies, including the rate of subdivision participation. If this agreement and the Washington agreement are finalized, Oklahoma and Washington would be subject to the Settlement Agreement and 48 of 49 eligible states would then be subject to the Settlement Agreement.

In addition to the lawsuits and claims brought by states and governmental entities, described above, we are involved in other opioid-related litigation and investigations, which are described further in Note 7 of the "Notes to Consolidated Financial Statements."

Because loss contingencies are inherently unpredictable and unfavorable developments or resolutions can occur, the assessment is highly subjective and requires judgments about future events. We regularly review these opioid litigation matters to determine whether our accrual is adequate. The amount of ultimate loss may differ materially from this accrual. See Note 7 of the "Notes to Consolidated Financial Statements" for additional information.

Inflationary Impacts and Global Supply Chain Constraints

Medical segment profit was significantly negatively affected by inflationary impacts, primarily related to transportation (including ocean and domestic freight), commodities, labor, and global supply chain constraints in fiscal 2022.

We expect these inflationary impacts and global supply chain constraints to continue to adversely impact Medical segment profit in fiscal 2023 and beyond. In order to partially mitigate this impact, we have implemented initial phases of price increases and we intend to implement additional price increases. We are also evolving our commercial contracting processes to provide us with greater pricing flexibility and investing in additional supply chain capacity. These increased costs and global supply chain constraints are difficult to predict and may be greater than we expect or continue longer than our current expectations. In the event these costs decrease, the benefit to Medical segment profit will be delayed until the higher-cost inventory has moved through our supply chain. Our plans to increase prices and evolve our contracting strategies are subject to contingencies and uncertainties and it is possible that our results of operations will be adversely impacted to a greater extent than we currently anticipate.

To a lesser extent, inflationary impacts, primarily related to increased transportation and labor costs, also adversely impacted Pharmaceutical segment profit during fiscal 2022. We expect these inflationary costs to continue to adversely impact Pharmaceutical segment profit in fiscal 2023.

PPE Demand and Pricing

Personal protective equipment ("PPE") refers to protective clothing, medical and non-medical grade gloves, face shields, face masks and other equipment designed to protect the wearer from injury or the spread of infection or illness. Demand for PPE has fluctuated during fiscal 2022 and 2021, resulting in variability in sales volumes, inventory levels and costs to manufacture and source these products.

PPE adversely impacted Medical segment profit on a year-over-year basis during fiscal 2022 primarily due to declines in volume and the prior-year positive impact of the timing of PPE cost mitigation efforts (primarily pricing). The demand and pricing for PPE is subject to risks and uncertainties, which may impact Medical segment profit and consolidated operating earnings in fiscal 2023.

The year-over-year comparison was also impacted by an inventory reserve of $197 million, primarily related to certain categories of gloves, which adversely impacted Medical segment profit in fiscal 2021. See "Critical Accounting Policies and Sensitive Accounting Estimates" section of this MD&A for additional detail.

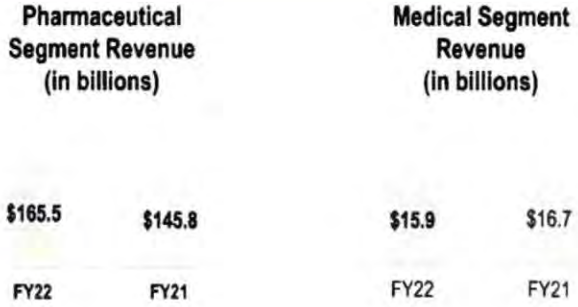
Medical Goodwill

Due to the adverse impact on our financial results from, the risks and uncertainties related to inflationary impacts, global supply chain constraints and PPE demand and pricing, and increases in the risk-free interest rate, we performed goodwill impairment testing for the Medical reporting unit within the Medical segment during fiscal 2022. This testing resulted in cumulative pre-tax charges of $2.1 billion, which are included in impairments and (gain)/loss on disposal of assets in our consolidated statements of earnings/(loss). See "Critical Accounting Policies and Sensitive Accounting Estimates" section of this MD&A and Note 4 of the "Notes to Consolidated Financial Statements" for additional detail.

Adverse changes in key assumptions or a significant change in industry or economic trends during fiscal 2023 could result in additional goodwill impairment.

Pharmaceutical Segment Generics Program

The performance of our Pharmaceutical segment generics program positively impacted the year-over-year comparison of Pharmaceutical segment profit in fiscal 2022, which includes improvement in volumes compared to the prior-year period. The Pharmaceutical segment generics program includes, among other things, the impact of generic pharmaceutical product launches, customer volumes, pricing changes and the Red Oak Sourcing, LLC venture ("Red Oak Sourcing") with CVS Health Corporation ("CVS Health"). The frequency, timing, magnitude and profit impact of generic pharmaceutical customer volumes, pricing changes, customer contract renewals, and branded and generic pharmaceutical manufacturer pricing changes all impact Pharmaceutical segment profit and are subject to risks and uncertainties. These risks and uncertainties may impact Pharmaceutical segment profit and consolidated operating earnings in fiscal 2023.



Cordis Divestiture

In August 2021, we sold the Cordis business to Hellman & Friedman for proceeds of $923 million, net of cash transferred, and we retained certain working capital accounts and certain liabilities. Cardinal Health will retain product liability associated with lawsuits and claims related to inferior vena cava ("IVC") filters in the U.S. and Canada, as well as authority for these matters discussed in Note 7 of the "Notes to Consolidated Financial Statements." In connection with the closing, we entered into a Transition Services Agreement ("TSA") with the buyer to provide support functions for a period of up to twenty-four months following the sale. See Note 2 of the "Notes to Consolidated Financial Statements" for additional information.

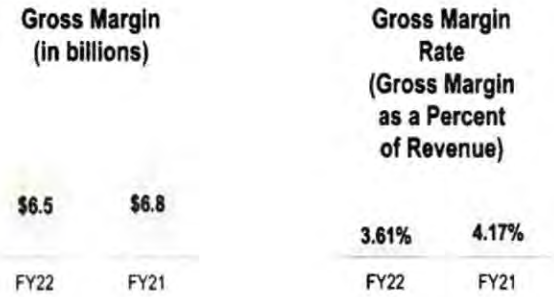
As anticipated, Medical segment revenue and Medical segment profit were adversely impacted by approximately $700 million and $70 million, respectively, in fiscal 2022 due to the divestiture of the Cordis business. The divestiture also resulted in a decrease in amortization of acquisition-related intangible assets during fiscal 2022. The divestiture of the Cordis business is subject to risks and uncertainties that may further adversely impact Medical segment profit. For example, the TSA period may be extended beyond our current expectations or could have unintended consequences, and the costs associated with the exit or disposal activities and stranded costs could be greater than anticipated.

Results of Operations

Revenue

(in millions)	Revenue 2022	2021	Change
Pharmaceutical	$ 165,491	$ 145,796	14 %
Medical	15,887	16,687	(5)%
Total segment revenue	181,378	162,483	12 %
Corporate	(14)	(16)	N.M.
Total revenue	$ 181,364	$ 162,467	12 %

Fiscal 2022 Compared to Fiscal 2021



Pharmaceutical Segment
Fiscal 2022 Pharmaceutical segment revenue grew by $19.6 billion primarily due to sales growth from pharmaceutical distribution and specialty pharmaceutical customers, which largely consisted of branded pharmaceutical sales to existing and net new customers.

Medical Segment
Fiscal 2022 Medical segment revenue decreased by $800 million, primarily due to the impact of the divestiture of the Cordis business. Medical segment revenue was also adversely impacted by lower volumes within products and distribution, which was partially offset by sales growth in at-Home Solutions.

Cost of Products Sold

Cost of products sold for fiscal 2022 increased $19.1 billion (12 percent) due to the factors affecting the changes in revenue and gross margin.

Gross Margin

	Consolidated Gross Margin		
(in millions)	2022	2021	Change
Gross margin	$ 6,545	$ 6,778	(3)%

Fiscal 2022 Compared to Fiscal 2021

Fiscal 2022 consolidated gross margin decreased primarily due to the divestiture of the Cordis business and increased costs in the Medical segment due to net inflationary impacts and the adverse impact of global supply chain constraints, partially offset by the performance of our Pharmaceutical segment generics program and an improvement in volumes, primarily in generic and branded pharmaceuticals, compared to the prior-year period. The year-over-year comparison was also favorably impacted by the prior-year inventory reserve recorded in the Medical segment to reduce the carrying value of certain PPE, primarily certain categories of gloves, to net realizable value.

Gross margin rate declined 56 basis points during fiscal 2022 mainly due to changes in overall product mix, primarily driven by increased pharmaceutical distribution branded sales, which have a dilutive impact on our overall gross margin rate. The performance of Medical segment products and distribution, which reflects the divestiture of the Cordis business and increased costs due to net inflationary impacts and the adverse impact of global supply chain constraints, also had an adverse impact on gross margin rate. The year-over-year comparison was favorably impacted by the prior-year inventory reserve recorded in the Medical segment to reduce the carrying value of certain PPE, primarily certain categories of gloves, to net realizable value.

Distribution, Selling, General and Administrative ("SG&A") Expenses

	SG&A Expenses		
(in millions)	2022	2021	Change
SG&A expenses	$ 4,557	$ 4,533	1 %

Fiscal 2022 Compared to Fiscal 2021

SG&A expenses increased slightly during fiscal 2022 largely due to inflationary impacts, primarily related to increased transportation and labor costs, increased costs related to investments in information technology infrastructure and higher costs to support sales growth, primarily offset by the impact of the divestiture of the Cordis business.

The year-over-year comparison was also favorably impacted by the prior-year $41 million accrual for our estimated portion of the assessment on prescription opioid medications that were sold or distributed in New York state in calendar year 2017 and 2018 which was recognized during fiscal 2021. See Note 7 of the "Notes to Consolidated Financial Statements" for additional information on the New York Opioid Stewardship Act.

Segment Profit

We evaluate segment performance based on segment profit, among other measures. See Note 13 of the "Notes to Consolidated Financial Statements" for additional information on segment profit.

(in millions)	Segment Profit and Operating Earnings 2022	2021	Change
Pharmaceutical	$ 1,770	$ 1,684	5 %
Medical	216	577	(63)%
Total segment profit	1,986	2,261	(12)%
Corporate	(2,582)	(1,789)	N.M.
Total consolidated operating earnings/(loss)	**$ (596)**	**$ 472**	**N.M.**

Fiscal 2022 Compared to Fiscal 2021

Pharmaceutical Segment Profit

Fiscal 2022 Pharmaceutical segment profit increased due to the performance of our generics program, partially offset by increased costs related to investments in information technology infrastructure and inflationary impacts, primarily related to increased transportation and labor costs. Pharmaceutical segment profit was also positively impacted by improvement in volumes, primarily in generic and branded pharmaceuticals, compared to the prior-year period.

Pharmaceutical segment profit includes opioid-related litigation defense and compliance costs, but does not include a one-time contingent attorneys' fee of $18 million recorded in fiscal 2022, which related to the finalization of the Settlement Agreement. Due to the unique nature and significance of the Settlement Agreement, and the one-time, contingent nature of the fee, this fee was included in litigation (recoveries)/charges, net in the consolidated statements of earnings/(loss).
