The research and development process from discovery through a new drug launch typically takes 8 to 12 years and can be even longer. The research and development of new pharmaceutical products has a significant amount of inherent uncertainty. There is no guarantee when, or if, a molecule will receive the regulatory approval required to launch a new drug or indication. In addition to the development of new products, delivery devices, and new formulations, research and development projects also may include Phase 4 trials, sometimes called post-marketing studies. For such projects, clinical trials are designed and conducted to collect additional data regarding, among other parameters, the benefits and risks of an approved drug. **Regulation—Discovery and Clinical Development *United States.*** Securing approval to market a new pharmaceutical product in the United States requires substantial effort and financial resources and takes several years to complete. The applicant must complete preclinical tests and submit protocols to the FDA before commencing clinical trials. Clinical trials are intended to establish the safety and efficacy of the pharmaceutical product and typically are conducted in sequential phases, although the phases may overlap or be combined. If the required clinical testing is successful, the results are submitted to the FDA in the form of an NDA or BLA requesting approval to market the product for one or more indications. The FDA reviews an NDA or BLA to determine whether a product is safe and effective for its intended use and whether its manufacturing is compliant with current Good Manufacturing Practices (cGMP). Compliance with regulatory requirements is assured through periodic, announced or unannounced inspections by the FDA and other regulatory authorities, and these inspections associated with clinical development may include the sponsor, investigator sites, laboratories, hospitals and manufacturing facilities of AbbVie's subcontractors or other third-party manufacturers. Failure to comply with applicable regulatory requirements can result in enforcement action by the FDA, including rejection of an NDA or BLA. Even if an NDA or a BLA receives approval, the applicant must comply with post-approval requirements. For example, holders of an approval must report adverse reactions, provide updated safety and efficacy information and comply with requirements concerning advertising and promotional materials and activities. Also, quality control and manufacturing procedures must continue to conform to cGMP after approval, and certain changes to the manufacturing procedures and finished product must be submitted and approved by the FDA prior to implementation. The FDA periodically inspects manufacturing facilities to assess compliance with cGMP, which imposes extensive procedural and record keeping requirements. In addition, as a condition of approval, the FDA may require post-marketing testing and surveillance to further assess and monitor the product's safety or efficacy after commercialization, which may require additional clinical trials, patient registries, observational data or additional work on chemistry, manufacturing and controls. Any post-approval regulatory obligations, and the cost of complying with such obligations, could expand in the future. Further, the FDA continues to regulate product labeling, and prohibits the promotion of products for unapproved or "off-label" uses along with other labeling restrictions. ***Outside the United States.*** AbbVie is subject to similar regulatory requirements outside the United States for approval and marketing of pharmaceutical products. AbbVie must obtain approval of a clinical trial application or product from applicable supervising regulatory authorities before it can commence clinical trials or marketing of the product in target markets. The approval requirements and process for each country can vary, and the time required to obtain approval may be longer or shorter than that required for FDA approval in the United States. For example, AbbVie may submit marketing authorizations in the European Union under either a centralized or decentralized procedure. The centralized procedure is mandatory for the approval of biotechnology products and many pharmaceutical products and provides for a single marketing authorization that is valid for all European Union member states. Under the centralized procedure, a single marketing authorization application is submitted to the European Medicines Agency. After the agency evaluates the application, it makes a recommendation to the European Commission, which then makes the final determination on whether to approve the application. The decentralized procedure provides for mutual recognition of individual national approval decisions and is available for products that are not subject to the centralized procedure. In Japan, applications for approval of a new product are made through the Pharmaceutical and Medical Devices Agency (PMDA). Japan-specific trials and/or bridging studies to demonstrate that the non-Japanese clinical data applies to Japanese patients may be required. After completing a comprehensive review, the PMDA reports to the Ministry of Health, Labour and Welfare, which then approves or denies the application. Similarly, applications for a new product in China are submitted to the Center for Drug Evaluation (CDE) of the National Medical Products Administration for technical review and approval of a product for marketing in China. Clinical data in Chinese subjects are usually required to support approval in China, requiring the inclusion of China in global pivotal studies, or a separate China/Asian clinical trial.

The regulatory process in many emerging markets continues to evolve. Many emerging markets, including those in Asia, generally require regulatory approval to have been obtained in a large developed market (such as the United States or Europe) before the country will begin or complete its regulatory review process. Similar to the requirements in Japan and China, certain countries (notably South Korea, Taiwan, India and Russia) also generally require that local clinical studies be conducted in order to support regulatory approval in the country. The requirements governing the conduct of clinical trials and product licensing also vary. In addition, post-approval regulatory obligations such as adverse event reporting and cGMP compliance generally apply and may vary by country. For example, after a marketing authorization has been granted in the European Union, periodic safety reports must be submitted and other pharmacovigilance measures may be required (such as Risk Management Plans). **Regulation—Commercialization, Distribution and Manufacturing** The manufacturing, marketing, sale, promotion and distribution of AbbVie's products are subject to comprehensive government regulation. Government regulation by various national, regional, federal, state and local agencies, both in the United States and other countries, addresses (among other matters) inspection of, and controls over, research and laboratory procedures, clinical investigations, product approvals and manufacturing, labeling, packaging, marketing and promotion, pricing and reimbursement, sampling, distribution, quality control, post-marketing surveillance, record keeping, storage and disposal practices. AbbVie's operations are also affected by trade regulations in many countries that limit the import of raw materials and finished products and by laws and regulations that seek to prevent corruption and bribery in the marketplace (including the United States Foreign Corrupt Practices Act and the United Kingdom Bribery Act, which provide guidance on corporate interactions with government officials) and require safeguards for the protection of personal data. In addition, AbbVie is subject to laws and regulations pertaining to health care fraud and abuse, including state and federal anti-kickback and false claims laws in the United States. Prescription drug manufacturers such as AbbVie are also subject to taxes, as well as application, product, user and other fees. Compliance with these laws and regulations is costly and materially affects AbbVie's business. Among other effects, health care regulations substantially increase the time, difficulty and costs incurred in obtaining and maintaining approval to market newly developed and existing products. AbbVie expects compliance with these regulations to continue to require significant technical expertise and capital investment to ensure compliance. Failure to comply can delay the release of a new product or result in regulatory and enforcement actions, the seizure or recall of a product, the suspension or revocation of the authority necessary for a product's production and sale and other civil or criminal sanctions, including fines and penalties. In addition to regulatory initiatives, AbbVie's business can be affected by ongoing studies of the utilization, safety, efficacy and outcomes of health care products and their components that are regularly conducted by industry participants, government agencies and others. These studies can lead to updates to the data regarding utilization, safety and efficacy of previously marketed products. In some cases, these studies have resulted, and may in the future result, in the discontinuance of, or limitations on, marketing of such products domestically or worldwide, and may give rise to claims for damages from persons who believe they have been injured as a result of their use. Access to human health care products continues to be a subject of oversight, investigation and action by governmental agencies, legislative bodies and private organizations in the United States and other countries. A major focus is cost containment. Efforts to reduce health care costs are also being made in the private sector, notably by health care payers and providers, which have instituted various cost reduction and containment measures. AbbVie expects insurers and providers to continue attempts to reduce the cost of health care products. Outside the United States, many countries control the price of health care products directly or indirectly, through reimbursement, payment, pricing, coverage limitations, or compulsory licensing. Political and budgetary pressures in the United States and in other countries may also heighten the scope and severity of pricing pressures on AbbVie's products for the foreseeable future. ***United States.*** Specifically, U.S. federal laws require pharmaceutical manufacturers to pay certain statutorily-prescribed rebates to state Medicaid programs on prescription drugs reimbursed under state Medicaid plans, and the efforts by states to seek additional rebates may affect AbbVie's business. Similarly, the Veterans Health Care Act of 1992, as a prerequisite to participation in Medicaid and other federal health care programs, requires that manufacturers extend additional discounts on pharmaceutical products to various federal agencies, including the United States Department of Veterans Affairs, Department of Defense and Public Health Service entities and institutions. In addition, recent legislative changes would require similarly discounted prices to be offered to TRICARE program beneficiaries. The Veterans Health Care Act of 1992 also established the 340B drug discount program, which requires pharmaceutical manufacturers to provide products at reduced prices to various designated health care entities and facilities. In the United States, most states also have generic substitution legislation requiring or permitting a dispensing pharmacist to substitute a different manufacturer's generic version of a pharmaceutical product for the one prescribed. In

addition, the federal government follows a diagnosis-related group (DRG) payment system for certain institutional services provided under Medicare or Medicaid and has implemented a prospective payment system (PPS) for services delivered in hospital outpatient, nursing home and home health settings. DRG and PPS entitle a health care facility to a fixed reimbursement based on the diagnosis and/or procedure rather than actual costs incurred in patient treatment, thereby increasing the incentive for the facility to limit or control expenditures for many health care products. Medicare reimburses Part B drugs based on average sales price plus a certain percentage to account for physician administration costs, which have been reduced in the hospital outpatient setting. Medicare enters into contracts with private plans to negotiate prices for most patient-administered medicine delivered under Part D. Under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (together, the Affordable Care Act), AbbVie pays a fee related to its pharmaceuticals sales to government programs. In addition, AbbVie provides a discount of 70% for branded prescription drugs sold to patients who fall into the Medicare Part D coverage gap, or "donut hole." The Affordable Care Act also includes provisions known as the Physician Payments Sunshine Act, which require manufacturers of drugs and biologics covered under Medicare and Medicaid to record any transfers of value to physicians and teaching hospitals and to report this data to the Centers for Medicare and Medicaid Services for subsequent public disclosure. Similar reporting requirements have also been enacted on the state level in the United States, and an increasing number of countries worldwide either have adopted or are considering similar laws requiring disclosure of interactions with health care professionals. Failure to report appropriate data may result in civil or criminal fines and/or penalties. AbbVie expects debate to continue during 2022 at all government levels worldwide over the marketing, availability, method of delivery and payment for health care products and services. AbbVie believes that future legislation and regulation in the markets it serves could affect access to health care products and services, increase rebates, reduce prices or the rate of price increases for health care products and services, change health care delivery systems, create new fees and obligations for the pharmaceuticals industry, or require additional reporting and disclosure. It is difficult to predict the extent to which AbbVie or the health care industry in general might be affected by the matters discussed above. ***European Union.*** The European Union has adopted directives and other legislation governing labeling, advertising, distribution, supply, pharmacovigilance and marketing of pharmaceutical products. Such legislation provides mandatory standards throughout the European Union and permits member states to supplement these standards with additional regulations. European governments also regulate pharmaceutical product prices through their control of national health care systems that fund a large part of the cost of such products to consumers. As a result, patients are unlikely to use a pharmaceutical product that is not reimbursed by the government. In many European countries, the government either regulates the pricing of a new product at launch or subsequent to launch through direct price controls or reference pricing. In recent years, many countries have also imposed new or additional cost containment measures on pharmaceutical products. Differences between national pricing regimes create price differentials within the European Union that can lead to significant parallel trade in pharmaceutical products. Most governments also promote generic substitution by mandating or permitting a pharmacist to substitute a different manufacturer's generic version of a pharmaceutical product for the one prescribed and by permitting or mandating that health care professionals prescribe generic versions in certain circumstances. Many governments are also following a similar path for biosimilar therapies. In addition, governments use reimbursement lists to limit the pharmaceutical products that are eligible for reimbursement by national health care systems. ***Japan.*** In Japan, the National Health Insurance system maintains a Drug Price List specifying which pharmaceutical products are eligible for reimbursement, and the Ministry of Health, Labour and Welfare sets the prices of the products on this list. The government generally introduces price cut rounds every other year and also mandates price decreases for specific products. New products judged innovative or useful, that are indicated for pediatric use, or that target orphan or small population diseases, however, may be eligible for a pricing premium. The government has also promoted the use of generics, where available. ***Emerging Markets.*** Many emerging markets take steps to reduce pharmaceutical product prices, in some cases through direct price controls and in others through the promotion of generic/biosimilar alternatives to branded pharmaceuticals. Since AbbVie markets its products worldwide, certain products of a local nature and variations of product lines must also meet other local regulatory requirements. Certain additional risks are inherent in conducting business outside the United States, including price and currency exchange controls, changes in currency exchange rates, limitations on participation in local enterprises, expropriation, nationalization and other governmental action.

Regulation – Medical Devices Medical devices are subject to regulation by the FDA, state agencies and foreign government health authorities. FDA regulations, as well as various U.S. federal and state laws, govern the development, clinical testing, manufacturing, labeling, record keeping and marketing of medical device products agencies in the United States. AbbVie's medical device product candidates, including AbbVie's breast implants, must undergo rigorous clinical testing and an extensive government regulatory clearance or approval process prior to sale in the United States and other countries. The lengthy process of clinical development and submissions for clearance or approval, and the continuing need for compliance with applicable laws and regulations, require the expenditure of substantial resources. Regulatory clearance or approval, when and if obtained, may be limited in scope, and may significantly limit the indicated uses for which a product may be marketed. Cleared or approved products and their manufacturers are subject to ongoing review, and discovery of previously unknown problems with products may result in restrictions on their manufacture, sale and/or use or require their withdrawal from the market. ***United States***. AbbVie's medical device products are subject to extensive regulation by the FDA in the United States. Unless an exemption applies, each medical device AbbVie markets in the United States must have a 510(k) clearance or a Premarket Approval Application (PMA) in accordance with the FFDCA and its implementing regulations. The FDA classifies medical devices into one of three classes, depending on the degree of risk associated with each medical device and the extent of controls that are needed to ensure safety and effectiveness. Devices deemed to pose a lower risk are placed in either Class I or Class II, and devices deemed by the FDA to pose the greatest risk, such as life-sustaining, life-supporting or implantable devices, or a device deemed to be not substantially equivalent to a previously cleared 510(k) device, are placed in Class III. In general, a Class III device cannot be marketed in the United States unless the FDA approves the device after submission of a PMA, and any changes to the device subsequent to initial FDA approval must also be reviewed and approved by the FDA. The majority of AbbVie's medical device products, including AbbVie's breast implants, are regulated as Class III medical devices. A Class III device may have significant additional obligations imposed in its conditions of approval, and the time in which it takes to obtain approval can be long. Compliance with regulatory requirements is assured through periodic, unannounced facility inspections by the FDA and other regulatory authorities, and these inspections may include the manufacturing facilities of AbbVie's subcontractors or other third-party manufacturers. Failure to comply with applicable regulatory requirements can result in enforcement action by the FDA, which may include any of the following sanctions: warning letters or untitled letters; fines, injunctions and civil penalties; recall or seizure of AbbVie' products; operating restrictions, partial suspension or total shutdown of production; refusing AbbVie' request for S10(k) clearance or PMA approval of new products; withdrawing S10(k) clearance or PMA approvals that are already granted; and criminal prosecution. A clinical trial is almost always required to support a PMA application and is sometimes required for a 510(k) premarket notification. Clinical trials generally require submission of an application for an investigational device exemption (IDE), which must be supported by appropriate data, such as animal and laboratory testing results, showing that it is safe to test the device in humans and that the testing protocol is scientifically sound. A study sponsor must obtain approval for its IDE from the FDA, and it must also obtain approval of its study from the Institutional Review Board overseeing the trial. The results of clinical testing may not be sufficient to obtain approval of the investigational device. Once a device is approved, the manufacture and distribution of the device remains subject to continuing regulation by the FDA, including Quality System Regulation requirements, which involve design, testing, control, documentation and other quality assurance procedures during the manufacturing process. Medical device manufacturers and their subcontractors are required to register their establishments and list their manufactured devices with the FDA and are subject to periodic unannounced inspections by the FDA and certain state agencies for compliance with regulatory requirements. Manufacturers must also report to the FDA if their devices may have caused or contributed to a death or serious injury or malfunctioned in a way that could likely cause or contribute to a death or serious injury, or if the manufacturer conducts a field correction or product recall or removal to reduce a risk to health posed by a device or to remedy a violation of the FFDCA that may present a health risk. Further, the FDA continues to regulate device labeling, and prohibits the promotion of products for unapproved or "off-label" uses along with other labeling restrictions. ***European Union.*** Medical device products that are marketed in the European Union must comply with the requirements of the Medical Device Regulation (the MDR), which came into effect in May 2021. The MDR provides for regulatory oversight with respect to the design, manufacture, clinical trials, labeling and adverse event reporting for medical devices to ensure that medical devices marketed in the European Union are safe and effective for their intended uses. Medical devices that comply with the MDR are entitled to bear a Conformité Européenne marking evidencing such compliance and may be marketed in the European Union. Failure to comply with these domestic and international regulatory requirements could affect AbbVie's ability to market and sell AbbVie's products in these countries.

Environmental Matters AbbVie believes that its operations comply in all material respects with applicable laws and regulations concerning environmental protection. Regulations under federal and state environmental laws impose stringent limitations on emissions and discharges to the environment from various manufacturing operations. AbbVie's capital expenditures for pollution control in 2021 were approximately $17 million and operating expenditures were approximately $33 million. In 2022, capital expenditures for pollution control are estimated to be approximately $14 million and operating expenditures are estimated to be approximately $34 million. Abbott was identified as one of many potentially responsible parties in investigations and/or remediations at several locations in the United States, including Puerto Rico, under the Comprehensive Environmental Response, Compensation and Liability Act, commonly known as Superfund. Some of these locations were transferred to AbbVie in connection with the separation and distribution, and AbbVie has become a party to these investigations and remediations. Abbott was also engaged in remediation at several other sites, some of which have been transferred to AbbVie in connection with the separation and distribution, in cooperation with the Environmental Protection Agency or similar agencies. While it is not feasible to predict with certainty the final costs related to those investigations and remediation activities, AbbVie believes that such costs, together with other expenditures to maintain compliance with applicable laws and regulations concerning environmental protection, should not have a material adverse effect on the company's financial position, cash flows, or results of operations. **Employees** AbbVie employed approximately 50,000 employees in over 70 countries as of January 31, 2022. Outside the United States, some of AbbVie's employees are represented by unions or works councils. AbbVie believes that it has good relations with its employees. **Human Capital Management** Attracting, retaining and providing meaningful growth and development opportunities to AbbVie's employees is critical to the company's success in making a remarkable impact on people's lives around the world. AbbVie leverages numerous resources to identify and enhance strategic and leadership capability, foster employee engagement and create a culture where diverse talent is productive and engaged. AbbVie invests in its employees through competitive compensation, benefits and employee support programs and offers best-in-class development and leadership opportunities. AbbVie has developed a deep talent base through ongoing investment in functional and leadership training and by sourcing world-class external talent, ensuring a sustainable talent pipeline. AbbVie continuously cultivates and enhances its working culture and embraces equality, diversity and inclusion as fundamental to the company's mission. ***Attracting and Developing Talent.*** Attracting and developing high-performing talent is essential to AbbVie's continued success. AbbVie implements detailed talent attraction strategies, with an emphasis on STEM skill sets, a diverse talent base and other critical skillsets, including drug discovery, clinical development, market access and business development. AbbVie also invests in competitive compensation and benefits programs. In addition to offering a comprehensive suite of benefits ranging from medical and dental coverage to retirement, disability and life insurance programs, AbbVie also provides health promotion programs, mental health awareness campaigns and employee assistance programs in several countries, financial wellness support, on-site health screenings and immunizations in several countries and on-site fitness and rehabilitation centers. In addition, the AbbVie Employee Assistance Fund (a part of the AbbVie Foundation) supports two programs for global employees: the AbbVie Possibilities Scholarship for children of employees, which is an annual merit-based scholarship for use at accredited colleges, universities or vocational-technical schools; and the Employee Relief Program, which is financial assistance to support short term needs of employees when faced with large-scale disasters (e.g. a hurricane), individual disasters (e.g. a home fire) or financial hardship (e.g. the death of a spouse). Finally, AbbVie empowers managers and their teams with tools, tips and guidelines on effectively managing workloads, managing teams from a distance and supporting flexible work practices. New AbbVie employees are given a tailored onboarding experience for faster integration and to support performance. AbbVie's mentorship program allows employees to self-nominate as mentors or mentees and facilitates meaningful relationships supporting employees' career and development goals. AbbVie also provides structured, broad-based development opportunities, focusing on high-performance skills and leadership training. AbbVie's talent philosophy holds leaders accountable for building a high-performing organization, and the company provides development opportunities to all levels of leadership. AbbVie's Learn, Develop, Perform program offers year-long, self-directed leadership education, supplemented with tools and resources, and leverages leaders as role models and teachers. In addition, the foundation to AbbVie's leadership pipeline is the company's Professional Development

Programs, which attract graduates, postgraduates and post-doctoral talent to participate in formal development programs lasting up to three years, with the objective of strengthening functional and leadership capabilities. ***Culture.*** AbbVie's shared values of transforming lives, acting with integrity, driving innovation, embracing diversity and inclusion and serving the community form the core of the company's culture. AbbVie articulates the behaviors associated with these values in the Ways We Work, a core set of working behaviors that emphasize how the company achieves results is equally as important as achieving them. The Ways We Work are designed to ensure that every AbbVie employee is aware of the company's cultural expectations. AbbVie integrates the Ways We Work into all talent processes, forming the basis for assessing performance, prioritizing development and ultimately rewarding employees. AbbVie believes its culture creates strong engagement, which is measured regularly through a confidential, third party all-employee survey, and this engagement supports AbbVie's mission of making a remarkable impact on people's lives. ***Equity, Equality, Diversity & Inclusion (EED&I).*** A cornerstone of AbbVie's human capital management approach is to prioritize fostering an inclusive and diverse workforce. In 2019, AbbVie adopted a five-year Equality, Diversity & Inclusion roadmap that defines key global focus areas, objectives and associated initiatives, and includes implementation plans organized by business function and geography. AbbVie's senior leaders have adopted formal goals aligned with executing this strategy. In recent years, AbbVie's board of directors has prioritized oversight of AbbVie's response to the U.S. racial justice movement, including overseeing internal programs designed to ensure that AbbVie is attracting, retaining and developing diverse talent. Through December 2021, women represented 51 percent of management positions globally and in the United States, 35 percent of AbbVie's workforce was comprised of members of historically underrepresented populations, an increase from 2020. Further, AbbVie is committed to pay equity and conducts pay equity analyses annually. A critical component of AbbVie's strategy is to instill an inclusive mindset in all AbbVie leaders and employees, so the company can realize the full value of a diverse workforce from recruitment through retirement. AbbVie recently launched a new resource for people who manage others to reinforce the importance of EED&I to the business, educate leaders on inclusive recruiting practices and modeling inclusive behavior, and encourage participation in the company's inclusive culture learning opportunities. AbbVie's Employee Resource Groups also help the company nurture an inclusive culture by building community, hosting awareness events and providing leadership and career opportunities. In 2021, AbbVie reiterated its commitment to racial equality and social justice by, among other things, expanding its employee matching program to $3-to-$1 for donations to civil rights nonprofits fostering racial equity and by reaffirming its commitment to clinical trial diversity. Additional information about AbbVie's efforts on racial equality and social justice is provided on the company's website at: https://abbvie.com/our-company/equality-inclusion-diversity/our-commitment-to-racial-justice.html. ***COVID-19 Health and Safety.*** AbbVie has effectively prioritized the health and safety of its employees during the COVID-19 pandemic, while continuing to drive strong business performance. AbbVie implemented, among other things, temporary office and facility closures and establishment of new safety and cleaning protocols and procedures; regular communication regarding the effect of the pandemic on AbbVie's business and employees; establishment of physical distancing procedures, modification of workspaces and provision of personal protective equipment and cleaning supplies for employees; provision of on-site vaccinations and temperature screenings; a variety of testing and vaccination resources including on-site vaccinations and on-site and at-home testing and COVID case management programs; and remote working accommodations and related services to support employees' needs for flexibility. In addition, COVID-19 is a covered event under the AbbVie Employee Assistance Fund's Employee Relief Program, entitling eligible AbbVie employees and their families to financial assistance to pay for mortgage/rent, utilities, food, childcare and medical expenses not covered by insurance. AbbVie also provided paid leave and other support and accommodations to the company's employees with relevant medical, pharmaceutical, research and development, science, public health and public safety skills, knowledge, training and experience who desired or were requested or mandated to serve as volunteers during the pandemic. Lastly, AbbVie's commitment to employees has been evidenced by no workforce reductions and no salary reductions associated with COVID-19.

ITEM 1A. RISK FACTORS

You should carefully consider the following risks and other information in this Form 10-K in evaluating AbbVie and AbbVie's common stock. Any of the following risks could materially and adversely affect AbbVie's results of operations, financial condition or cash flows. The risk factors generally have been separated into two groups: risks related to AbbVie's business and risks related to AbbVie's common stock. Based on the information currently known to it, AbbVie believes that the following information identifies the most significant risk factors affecting it in each of these categories of risks. However, the risks and uncertainties AbbVie faces are not limited to those set forth in the risk factors described below and may not be in order of importance or probability of occurrence. Additional risks and uncertainties not presently known to AbbVie or that AbbVie currently believes to be immaterial may also adversely affect its business. In addition, past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results or trends in future periods. If any of the following risks and uncertainties develops into actual events, these events could have a material adverse effect on AbbVie's business, results of operations, financial condition or cash flows. In such case, the trading price of AbbVie's common stock could decline. **Risks Related to AbbVie's Business** ***Public health outbreaks, epidemics or pandemics, such as the coronavirus (COVID-19), have had, and could in the future have, an adverse impact on AbbVie's operations and financial condition.*** Public health outbreaks, epidemics or pandemics have had, and could in the future have, an adverse impact on AbbVie's operations and financial condition. The continuing pandemic caused by the novel strain of coronavirus (COVID-19) has caused many countries, including the United States, to declare national emergencies and implement preventive measures such as travel bans and shelter in place or total lock-down orders, some of which have eased. The continuation or re-implementation of these bans and orders remains uncertain. The COVID-19 pandemic has caused AbbVie to modify its business practices (including instituting remote work for many of AbbVie's employees), and AbbVie may take further actions as may be required by government authorities or as AbbVie determines are in the best interests of AbbVie's employees, patients, customers and business partners. While the impact of COVID-19 on AbbVie's operations, including, among others, its manufacturing and supply chain, sales and marketing, commercial and clinical trial operations, to date has not been material, AbbVie has experienced lower new patient starts in certain products and markets. The impact of COVID-19 on AbbVie over the long-term is uncertain and cannot be predicted with confidence. The extent of the adverse impact of COVID-19 on AbbVie's operations will depend on the extent and severity of the continued spread of COVID-19 globally, the timing and nature of actions taken to respond to COVID-19 and the resulting economic consequences. Ultimately, efforts to mitigate the impact of COVID-19 may not completely prevent AbbVie's business from being adversely affected and future impacts remain uncertain. ***The expiration or loss of patent protection and licenses may adversely affect AbbVie's future revenues and operating earnings.*** AbbVie relies on patent, trademark and other intellectual property protection in the discovery, development, manufacturing and sale of its products. In particular, patent protection is, in the aggregate, important in AbbVie's marketing of pharmaceutical products in the United States and most major markets outside of the United States. Patents covering AbbVie products normally provide market exclusivity, which is important for the profitability of many of AbbVie's products. As patents for certain of its products expire, AbbVie will or could face competition from lower priced generic or biosimilar products. The expiration or loss of patent protection for a product typically is followed promptly by substitutes that may significantly reduce sales for that product in a short amount of time. If AbbVie's competitive position is compromised because of generics, biosimilars or otherwise, it could have a material adverse effect on AbbVie's business and results of operations. In addition, proposals emerge from time to time for legislation to further encourage the early and rapid approval of generic drugs or biosimilars. Any such proposals that are enacted into law could increase the impact of generic competition. AbbVie's principal patents and trademarks are described in greater detail in Item 1, "Business—Intellectual Property Protection and Regulatory Exclusivity" and Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations," and litigation regarding these patents is described in Item 3, "Legal Proceedings." The United States composition of matter patent for Humira, which is AbbVie's largest product and had worldwide net revenues of approximately $20.7 billion in 2021, expired in December 2016, and the equivalent European Union patent expired in the majority of European Union countries in October 2018.

AbbVie's major products could lose patent protection earlier than expected, which could adversely affect AbbVie's future revenues and operating earnings. Third parties or government authorities may challenge or seek to invalidate or circumvent AbbVie's patents and patent applications. For example, manufacturers of generic pharmaceutical products file, and may continue to file, Abbreviated New Drug Applications with the FDA seeking to market generic forms of AbbVie's products prior to the expiration of relevant patents owned or licensed by AbbVie by asserting that the patents are invalid, unenforceable and/or not infringed. In addition, petitioners have filed, and may continue to file, challenges to the validity of AbbVie patents under the 2011 Leahy-Smith America Invents Act, which created *inter partes* review and post grant review procedures for challenging patent validity in administrative proceedings at the United States Patent and Trademark Office. Although most of the challenges to AbbVie's intellectual property have come from other businesses, governments may also challenge intellectual property rights. For example, court decisions and potential legislation relating to patents, such as legislation regarding biosimilars, and other regulatory initiatives may result in further erosion of intellectual property protection. In addition, certain governments outside the United States have indicated that compulsory licenses to patents may be sought to further their domestic policies or on the basis of national emergencies, such as HIV/AIDS. If triggered, compulsory licenses could diminish or eliminate sales and profits from those jurisdictions and negatively affect AbbVie's results of operations. AbbVie normally responds to challenges by vigorously defending its patents, including by filing patent infringement lawsuits. Patent litigation, administrative proceedings and other challenges to AbbVie's patents are costly and unpredictable and may deprive AbbVie of market exclusivity for a patented product. To the extent AbbVie's intellectual property is successfully challenged, circumvented or weakened, or to the extent such intellectual property does not allow AbbVie to compete effectively, AbbVie's business will suffer. To the extent that countries do not enforce AbbVie's intellectual property rights or require compulsory licensing of AbbVie's intellectual property, AbbVie's future revenues and operating earnings will be reduced. ***A third party's intellectual property may prevent AbbVie from selling its products or have a material adverse effect on AbbVie's future profitability and financial condition.*** Third parties may claim that an AbbVie product infringes upon their intellectual property. Resolving an intellectual property infringement claim can be costly and time consuming and may require AbbVie to enter into license agreements. AbbVie cannot guarantee that it would be able to obtain license agreements on commercially reasonable terms. A successful claim of patent or other intellectual property infringement could subject AbbVie to significant damages or an injunction preventing the manufacture, sale, or use of the affected AbbVie product or products. Any of these events could have a material adverse effect on AbbVie's profitability and financial condition. ***Any significant event that adversely affects Humira revenues could have a material and negative impact on AbbVie's results of operations and cash flows.*** Humira accounted for approximately 37% of AbbVie's total net revenues in 2021. Any significant event that adversely affects Humira's revenues could have a material adverse impact on AbbVie's results of operations and cash flows. These events could include loss of patent protection for Humira (as described further in "*—The expiration or loss of patent protection and licenses may adversely affect AbbVie's future revenues and operating earnings*" above), the commercialization of biosimilars of Humira, the discovery of previously unknown side effects or impaired efficacy, increased competition from the introduction of new, more effective or less expensive treatments and discontinuation or removal from the market of Humira for any reason. ***AbbVie's research and development efforts may not succeed in developing and marketing commercially successful products and technologies, which may cause its revenues and profitability to decline.*** To remain competitive, AbbVie must continue to launch new products and new indications and/or brand extensions for existing products, and such launches must generate revenue sufficient both to cover its substantial research and development costs and to replace revenues of profitable products that are lost to or displaced by competing products or therapies. Failure to do so would have a material adverse effect on AbbVie's revenue and profitability. Accordingly, AbbVie commits substantial effort, funds, and other resources to research and development and must make ongoing substantial expenditures without any assurance that its efforts will be commercially successful. A high rate of failure in the biopharmaceutical industry is inherent in the research and development of new products, and failure can occur at any point in the research and development process, including after significant funds have been invested. Products that appear promising in development may fail to reach the market for numerous reasons, including failure to demonstrate effectiveness, safety concerns, superior safety or efficacy of competing therapies, failure to achieve positive clinical or pre-clinical outcomes beyond the current standards of care,

inability to obtain necessary regulatory approvals or delays in the approval of new products and new indications, limited scope of approved uses, excessive costs to manufacture, the failure to obtain or maintain intellectual property rights, or infringement of the intellectual property rights of others. Decisions about research studies made early in the development process of a pharmaceutical product candidate can affect the marketing strategy once such candidate receives approval. More detailed studies may demonstrate additional benefits that can help in the marketing, but they also consume time and resources and may delay submitting the pharmaceutical product candidate for approval. AbbVie cannot guarantee that a proper balance of speed and testing will be made with respect to each pharmaceutical product candidate or that decisions in this area would not adversely affect AbbVie's future results of operations. Even if AbbVie successfully develops and markets new products or enhancements to its existing products, they may be quickly rendered obsolete by changing clinical preferences, changing industry standards, or competitors' innovations. AbbVie's innovations may not be accepted quickly in the marketplace because of existing clinical practices or uncertainty over third-party reimbursement. AbbVie cannot state with certainty when or whether any of its products under development will be launched, whether it will be able to develop, license, or otherwise acquire compounds or products, or whether any products will be commercially successful. Failure to launch successful new products or new indications for existing products may cause AbbVie's products to become obsolete, causing AbbVie's revenues and operating results to suffer. ***A portion of AbbVie's near-term pharmaceutical pipeline relies on collaborations with third parties, which may adversely affect the development and sale of its products.*** AbbVie depends on alliances and joint ventures with pharmaceutical and biotechnology companies for a portion of the products in its near-term pharmaceutical pipeline. Failures by these parties to meet their contractual, regulatory, or other obligations to AbbVie, or any disruption in the relationships between AbbVie and these third parties, could have an adverse effect on AbbVie's pharmaceutical pipeline and business. In addition, AbbVie's collaborative relationships for research and development extend for many years and may give rise to disputes regarding the relative rights, obligations and revenues of AbbVie and its collaboration partners, including the ownership of intellectual property and associated rights and obligations. This could result in the loss of intellectual property rights or protection, delay the development and sale of potential pharmaceutical products and lead to lengthy and expensive litigation, administrative proceedings or arbitration. ***Biologics carry unique risks and uncertainties, which could have a negative impact on future results of operations.*** The successful discovery, development, manufacturing and sale of biologics is a long, expensive and uncertain process. There are unique risks and uncertainties with biologics. For example, access to and supply of necessary biological materials, such as cell lines, may be limited and governmental regulations restrict access to and regulate the transport and use of such materials. In addition, the development, manufacturing and sale of biologics is subject to regulations that are often more complex and extensive than the regulations applicable to other pharmaceutical products. Manufacturing biologics, especially in large quantities, is often complex and may require the use of innovative technologies. Such manufacturing also requires facilities specifically designed and validated for this purpose and sophisticated quality assurance and quality control procedures. Biologics are also frequently costly to manufacture because production inputs are derived from living animal or plant material, and some biologics cannot be made synthetically. Failure to successfully discover, develop, manufacture and sell biologics—including Humira—could adversely impact AbbVie's business and results of operations. ***AbbVie's biologic products are subject to competition from biosimilars.*** The Biologics Price Competition and Innovation Act creates a framework for the approval of biosimilars in the United States and could allow competitors to reference data from biologic products already approved. In Europe, the European Commission has granted marketing authorizations for several biosimilars pursuant to a set of general and product class-specific guidelines for biosimilar approvals issued over the past few years. In addition, companies are developing biosimilars in other countries that could and do compete with AbbVie's biologic products, including Humira. As competitors obtain marketing approval for biosimilars referencing AbbVie's biologic products, AbbVie's products may become subject to competition from such biosimilars, with the attendant competitive pressure and consequences. Expiration or successful challenge of AbbVie's applicable patent rights could also trigger competition from other products, assuming any relevant exclusivity period has expired. As a result, AbbVie could face more litigation and administrative proceedings with respect to the validity and/or scope of patents relating to its biologic products. ***New products and technological advances by AbbVie's competitors may negatively affect AbbVie's results of operations.*** AbbVie competes with other research-based pharmaceutical and biotechnology companies that discover, manufacture, market and sell proprietary pharmaceutical products and biologics. For example, Humira competes with anti-TNF products

and other competitive products intended to treat a number of disease states and Mavyret/Maviret competes with other available hepatitis C treatment options. In addition, in the past few years, a number of other companies have started to develop, have successfully developed and/or are currently marketing products that are being positioned as competitors to Botox. All of these competitors may introduce new products or develop technological advances that compete with AbbVie's products in therapeutic areas such as immunology, hematologic oncology, aesthetics, neuroscience, eye care and women's health. AbbVie cannot predict with certainty the timing or impact of the introduction by competitors of new products or technological advances. Such competing products may be safer, more effective, more effectively marketed or sold, or have lower prices or superior performance features than AbbVie's products, and this could negatively impact AbbVie's business and results of operations. ***The manufacture of many of AbbVie's products is a highly exacting and complex process, and if AbbVie or one of its suppliers encounters problems manufacturing AbbVie's products, AbbVie's business could suffer.*** The manufacture of many of AbbVie's products is a highly exacting and complex process, due in part to strict regulatory requirements. Problems may arise during manufacturing for a variety of reasons, including equipment malfunction, failure to follow specific protocols and procedures, problems with raw materials, delays related to the construction of new facilities or the expansion of existing facilities, including those intended to support future demand for AbbVie's products, changes in manufacturing production sites and limits to manufacturing capacity due to regulatory requirements, changes in the types of products produced, physical limitations that could inhibit continuous supply, man-made or natural disasters and environmental factors. If problems arise during the production of a batch of product, that batch of product may have to be discarded and AbbVie may experience product shortages or incur added expenses. This could, among other things, lead to increased costs, lost revenue, damage to customer relations, time and expense spent investigating the cause and, depending on the cause, similar losses with respect to other batches or products. If problems are not discovered before the product is released to the market, recall and product liability costs may also be incurred. ***AbbVie uses a number of products in its pharmaceutical and biologic manufacturing processes that are sourced from single suppliers, and an interruption in the supply of those products could adversely affect AbbVie's business and results of operations.*** AbbVie uses a number of products in its pharmaceutical and biologic manufacturing processes that are sourced from single suppliers. The failure of these single-source suppliers to fulfill their contractual obligations in a timely manner or as a result of regulatory noncompliance or physical disruption at a manufacturing site may impair AbbVie's ability to deliver its products to customers on a timely and competitive basis, which could adversely affect AbbVie's business and results of operations. Finding an alternative supplier could take a significant amount of time and involve significant expense due to the nature of the products and the need to obtain regulatory approvals. AbbVie cannot guarantee that it will be able to reach agreement with alternative providers or that regulatory authorities would approve AbbVie's use of such alternatives. AbbVie does, however, carry business interruption insurance, which provides a degree of protection in the case of a failure by a single-source supplier. ***Certain aspects of AbbVie's operations are highly dependent upon third party service providers.*** AbbVie relies on suppliers, vendors and other third party service providers to research, develop, manufacture, commercialize, promote and sell its products. Reliance on third party manufacturers reduces AbbVie's oversight and control of the manufacturing process. Some of these third party providers are subject to legal and regulatory requirements, privacy and security risks and market risks of their own. The failure of a critical third party service provider to meet its obligations could have a material adverse impact on AbbVie's operations and results. If any third party service providers have violated or are alleged to have violated any laws or regulations during the performance of their obligations to AbbVie, it is possible that AbbVie could suffer financial and reputational harm or other negative outcomes, including possible legal consequences. ***Significant safety or efficacy issues could arise for AbbVie's products, which could have a material adverse effect on AbbVie's revenues and financial condition.*** Pharmaceutical products receive regulatory approval based on data obtained in controlled clinical trials of limited duration. Following regulatory approval, these products will be used over longer periods of time in many patients. Investigators may also conduct additional, and perhaps more extensive, studies. If new safety or efficacy issues are reported or if new scientific information becomes available (including results of post-marketing Phase 4 trials), or if governments change standards regarding safety, efficacy or labeling, AbbVie may be required to amend the conditions of use for a product. For example, AbbVie may voluntarily provide or be required to provide updated information on a product's label or narrow its approved indication, either of which could reduce the product's market acceptance. If safety or efficacy issues with an AbbVie product arise, sales of the product could be halted by AbbVie or by regulatory authorities and regulatory action could be

taken by such regulatory authorities. Safety or efficacy issues affecting suppliers' or competitors' products also may reduce the market acceptance of AbbVie's products. New data about AbbVie's products, or products similar to its products, could negatively impact demand for AbbVie's products due to real or perceived safety issues or uncertainty regarding efficacy and, in some cases, could result in product withdrawal. Furthermore, new data and information, including information about product misuse, may lead government agencies, professional societies, practice management groups or organizations involved with various diseases to publish guidelines or recommendations related to the use of AbbVie's products or the use of related therapies or place restrictions on sales. Such guidelines or recommendations may lead to lower sales of AbbVie's products. ***AbbVie is subject to product liability claims and other lawsuits that may adversely affect its business and results of operations.*** In the ordinary course of business, AbbVie is the subject of product liability claims and lawsuits alleging that AbbVie's products or the products of other companies that it promotes have resulted or could result in an unsafe condition for or injury to patients. For example, lawsuits are pending against Allergan, AbbVie's recently acquired subsidiary, and certain of its current and former officers alleging they made misrepresentations and omissions regarding Allergan's textured breast implants. Product liability claims and lawsuits and safety alerts or product recalls, regardless of their ultimate outcome, may have a material adverse effect on AbbVie's business, results of operations and reputation and on its ability to attract and retain customers. Consequences may also include additional costs, a decrease in market share for the product in question, lower income and exposure to other claims. Product liability losses are self-insured. AbbVie is also the subject of other claims, legal proceedings and investigations in the ordinary course of business, which relate to the intellectual property, commercial, securities and other matters. Adverse outcomes in such claims, legal proceedings and investigations may also adversely affect AbbVie's business and results of operations. Additionally, Allergan has been named as a defendant in approximately 3,130 matters relating to the promotion and sale of prescription opioid pain relievers and additional suits may be filed. See Note 15, "Legal Proceedings and Contingencies" to the Consolidated Financial Statements included under Item 8, "Financial Statements and Supplementary Data." AbbVie cannot predict the outcome of these proceedings. ***AbbVie is subject to cost-containment efforts and pricing pressures that could cause a reduction in future revenues and operating earnings, and changes in the terms of rebate and chargeback programs, which are common in the pharmaceuticals industry, could have a material adverse effect on AbbVie's operations.*** Cost-containment efforts by governments and private organizations are described in greater detail in Item 1, "Business—Regulation—Commercialization, Distribution and Manufacturing." To the extent these cost containment efforts are not offset by greater demand, increased patient access to health care, or other factors, AbbVie's future revenues and operating earnings will be reduced. In the United States, the European Union and other countries, AbbVie's business has experienced downward pressure on product pricing, and this pressure could increase in the future. AbbVie is subject to increasing public and legislative pressure with respect to pharmaceutical pricing. In the United States, practices of managed care groups, and institutional and governmental purchasers, and United States federal laws and regulations related to Medicare and Medicaid, including the Medicare Prescription Drug Improvement and Modernization Act of 2003 and the Patient Protection and Affordable Care Act, contribute to pricing pressures. The potential for continuing changes to the health care system in the United States and the increased purchasing power of entities that negotiate on behalf of Medicare, Medicaid and private sector beneficiaries could result in additional pricing pressures. In numerous major markets worldwide, the government plays a significant role in funding health care services and determining the pricing and reimbursement of pharmaceutical products. Consequently, in those markets, AbbVie is subject to government decision-making and budgetary actions with respect to its products. In particular, many European countries have ongoing government-mandated price reductions for many pharmaceutical products, and AbbVie anticipates continuing pricing pressures in Europe. Differences between countries in pricing regulations could lead to third-party cross-border trading in AbbVie's products that results in a reduction in future revenues and operating earnings. Rebates related to government programs, such as fee-for-service Medicaid or Medicaid managed care programs, arise from laws and regulations. AbbVie cannot predict if additional government initiatives to contain health care costs or other factors could lead to new or modified regulatory requirements that include higher or incremental rebates or discounts. Other rebate and discount programs arise from contractual agreements with private payers. Various factors, including market factors and the ability of private payers to control patient access to products, may provide payers the leverage to negotiate higher or additional rebates or discounts that could have a material adverse effect on AbbVie's operations.

AbbVie is subject to numerous governmental regulations, and it can be costly to comply with these regulations and to develop compliant products and processes. AbbVie's products are subject to rigorous regulation by numerous international, supranational, federal and state authorities, as described in Item 1, "Business—Regulation—Discovery and Clinical Development," "Business—Regulation—Commercialization, Distribution and Manufacturing," and "Business—Regulation—Medical Devices." The process of obtaining regulatory approvals to market a pharmaceutical product can be costly and time consuming, and approvals might not be granted for future products, or additional indications or uses of existing products, on a timely basis, if at all. Delays in the receipt of, or failure to obtain approvals for, future products, or new indications and uses, could result in delayed realization of product revenues, reduction in revenues and substantial additional costs. In addition, AbbVie cannot guarantee that it will remain compliant with applicable regulatory requirements once approval has been obtained for a product. These requirements include, among other things, regulations regarding manufacturing practices, product labelling and advertising and post-marketing reporting, including adverse event reports and field alerts due to manufacturing quality concerns. AbbVie must incur expense and spend time and effort to ensure compliance with these complex regulations. Possible regulatory actions could result in substantial modifications to AbbVie's business practices and operations; refunds, recalls or seizures of AbbVie's products; a total or partial shutdown of production in one or more of AbbVie's or its suppliers' facilities while AbbVie or its supplier remedies the alleged violation; the inability to obtain future approvals; and withdrawals or suspensions of current products from the market. Any of these events could disrupt AbbVie's business and have a material adverse effect on its business and results of operations. ***Laws and regulations affecting government benefit programs could impose new obligations on AbbVie, require it to change its business practices, and restrict its operations in the future.*** The health care industry is subject to various federal, state and international laws and regulations pertaining to government benefit programs reimbursement, rebates, price reporting and regulation and health care fraud and abuse. In the United States, these laws include anti-kickback and false claims laws, the Medicaid Rebate Statute, the Veterans Health Care Act, the U.S. Physician Payments Sunshine Act, the TRICARE program, the government pricing rules applicable to the Medicaid, Medicare Part B, 340B Drug Pricing Program and individual state laws relating to pricing and sales and marketing practices. Violations of these laws may be punishable by criminal and/or civil sanctions, including, in some instances, substantial fines, imprisonment and exclusion from participation in federal and state health care programs, including Medicare, Medicaid and Veterans Administration health programs. These laws and regulations are broad in scope and they are subject to change and evolving interpretations, which could require AbbVie to incur substantial costs associated with compliance or to alter one or more of its sales or marketing practices. In addition, violations of these laws, or allegations of such violations, could disrupt AbbVie's business and result in a material adverse effect on its business and results of operations. ***The international nature of AbbVie's business subjects it to additional business risks that may cause its revenue and profitability to decline.*** AbbVie's business is subject to risks associated with doing business internationally, including in emerging markets. Net revenues outside of the United States made up approximately 23% of AbbVie's total net revenues in 2021. The risks associated with AbbVie's operations outside the United States include: • fluctuations in currency exchange rates; • changes in medical reimbursement policies and programs; • multiple legal and regulatory requirements that are subject to change and that could restrict AbbVie's ability to manufacture, market and sell its products; • differing local product preferences and product requirements; • trade protection measures and import or export licensing requirements; • international trade disruptions or disputes; • difficulty in establishing, staffing and managing operations; • differing labor regulations; • potentially negative consequences from changes in or interpretations of tax laws;

- political and economic instability, including as a result of the United Kingdom's exit from the European Union and the COVID-19 pandemic;
- sovereign debt issues;
- price and currency exchange controls, limitations on participation in local enterprises, expropriation, nationalization and other governmental action and regulation;
- inflation, recession and fluctuations in interest rates;
- restrictions on transfers of funds;
- potential deterioration in the economic position and credit quality of certain non-U.S. countries; and
- potential penalties or other adverse consequences for violations of anti-corruption, anti-bribery and other similar laws and regulations, including the United States Foreign Corrupt Practices Act and the United Kingdom Bribery Act.

Events contemplated by these risks may, individually or in the aggregate, have a material adverse effect on AbbVie's revenues and profitability. ***If AbbVie does not effectively and profitably commercialize its products, AbbVie's revenues and financial condition could be adversely affected.*** AbbVie must effectively and profitably commercialize its principal products by creating and meeting continued market demand; achieving market acceptance and generating product sales; ensuring that the active pharmaceutical ingredient(s) for a product and the finished product are manufactured in sufficient quantities and in compliance with requirements of the FDA and similar foreign regulatory agencies and with acceptable quality and pricing to meet commercial demand; and ensuring that the entire supply chain efficiently and consistently delivers AbbVie's products to its customers. The commercialization of AbbVie products may not be successful due to, among other things, unexpected challenges from competitors, new safety issues or concerns being reported that may impact or narrow approved indications, the relative price of AbbVie's product as compared to alternative treatment options and changes to a product's label that further restrict its marketing. If the commercialization of AbbVie's principal products is unsuccessful, AbbVie's ability to generate revenue from product sales will be adversely affected. ***AbbVie may acquire other businesses, license rights to technologies or products, form alliances, or dispose of assets, which could cause it to incur significant expenses and could negatively affect profitability.*** AbbVie may pursue acquisitions, technology licensing arrangements, joint ventures and strategic alliances, or dispose of some of its assets, as part of its business strategy. AbbVie may not complete these transactions in a timely manner, on a cost-effective basis, or at all, and may not realize the expected benefits. If AbbVie is successful in making an acquisition, the products and technologies that are acquired may not be successful or may require significantly greater resources and investments than originally anticipated. AbbVie may not be able to integrate acquisitions successfully into its existing business and could incur or assume significant debt and unknown or contingent liabilities. AbbVie could also experience negative effects on its reported results of operations from acquisition or disposition-related charges, amortization of expenses related to intangibles and charges for impairment of long-term assets. These effects could cause a deterioration of AbbVie's credit rating and result in increased borrowing costs and interest expense. Additionally, changes in AbbVie's structure, operations, revenues, costs, or efficiency resulting from major transactions such as acquisitions, divestitures, mergers, alliances, joint ventures, restructurings or other strategic initiatives, may result in greater than expected costs, may take longer than expected to complete or encounter other difficulties, including the need for regulatory approval where appropriate.

AbbVie is dependent on wholesale distributors for distribution of its products in the United States and, accordingly, its results of operations could be adversely affected if they encounter financial difficulties. In 2021, three wholesale distributors (McKesson Corporation, Cardinal Health, Inc. and AmerisourceBergen Corporation) accounted for substantially all of AbbVie's pharmaceutical product sales in the United States. If one of its significant wholesale distributors encounters financial or other difficulties, such distributor may decrease the amount of business that it does with AbbVie, and AbbVie may be unable to collect all the amounts that the distributor owes it on a timely basis or at all, which could negatively impact AbbVie's business and results of operations.

PART I

Item 1. Business

Overview

We are a clinical-stage biopharmaceutical company applying a precision medicine approach to acquiring, developing and commercializing life-changing medicines for underserved patient populations suffering from devastating rare diseases and cancer. We have a differentiated portfolio of small molecule targeted oncology product candidates and are advancing two potentially registrational clinical trials in rare tumor types, as well as several other programs addressing highly prevalent, genetically defined cancers. Our strategic approach and operational excellence across research, translational science, and clinical development have enabled us to rapidly advance our two lead product candidates into late-stage clinical trials while simultaneously entering into multiple shared-value partnerships with industry leaders to expand our portfolio. From this foundation, we are continuing to build a differentiated fully-integrated biopharmaceutical company intensely focused on understanding patients and their diseases in order to develop transformative targeted medicines.

Nirogacestat

Our most advanced product candidate, nirogacestat, is an oral, small molecule gamma secretase inhibitor, or GSI, in development as a monotherapy for the treatment of desmoid tumors, a rare and often debilitating and disfiguring soft tissue tumor for which there are currently no therapies approved by the U.S. Food and Drug Administration, or FDA. We believe nirogacestat may address the significant limitations associated with existing treatment options and has the potential to become the first therapy approved by the FDA for both newly diagnosed and previously treated desmoid tumors. Since we licensed nirogacestat from Pfizer Inc., or Pfizer, in August 2017, the FDA has granted us Orphan Drug Designation, Fast Track Designation and Breakthrough Therapy Designation for this indication, and the European Commission granted Orphan Drug Designation to nirogacestat for the treatment of soft tissue sarcoma. In May 2019, we announced the initiation of the DeFi trial, a potentially registrational Phase 3 clinical trial of nirogacestat for adult patients with desmoid tumors, and in July 2020, we announced full enrollment of the DeFi trial. We expect to trigger the topline analysis from this trial in the first quarter of 2022 and to report these data during the first half of the year. In addition to the ongoing DeFi trial, a Phase 2 clinical trial was initiated in collaboration with the Children's Oncology Group, or COG, in September 2020, to evaluate nirogacestat for the treatment of pediatric patients with desmoid tumors.

In addition to monotherapy development, we are developing novel combination regimens of nirogacestat alongside B-cell maturation antigen, or BCMA, directed therapies for the potential treatment of multiple myeloma. To date, we have announced collaborations with GlaxoSmithKline, or GSK, Janssen Biotech, Inc., or Janssen, Pfizer, Allogene Therapeutics, Inc., or Allogene, Precision BioSciences, Inc., or Precision Biosciences, Seagen Inc., or Seagen, and AbbVie, Inc., or AbbVie, with five of these seven collaborations representing ongoing clinical trials and two representing trials expected to begin dosing patients in the first half of 2022. In addition to our industry collaborations with leading BCMA-directed therapy developers, we are working with the Fred Hutchinson Cancer Research Center, or Fred Hutch, and Dana-Farber Cancer Institute, or Dana-Farber, to further explore nirogacestat's ability to potentiate BCMA-directed therapies as part of sponsored research agreements.

Mirdametinib

Our second product candidate is mirdametinib, an oral, small molecule MEK inhibitor initially in development for the treatment of neurofibromatosis type 1-associated plexiform neurofibromas, or NF1-PN, a rare tumor of the peripheral nerve sheath that causes significant pain and disfigurement, and that most often manifests in children. We believe that mirdametinib has the potential to offer a best-in-class profile in order to enable the long-term treatment required for this patient population, as compared to other MEK inhibitors. As with nirogacestat, we licensed mirdametinib from Pfizer in August 2017; since then, the FDA has granted mirdametinib both Orphan Drug Designation and Fast Track Designation for NF1-PN, and the European Commission has granted mirdametinib Orphan Drug Designation for NF1. In October 2019, we announced the initiation of the ReNeu trial, a potentially registrational Phase 2b clinical trial of mirdametinib for pediatric and adult patients with NF1-PN. In June 2021, interim clinical data from the first 20 adult patients enrolled in the Phase 2b ReNeu trial were presented at the Children's Tumor Foundation NF Conference. In November 2021, we announced full enrollment of the ReNeu trial.

We are also exploring the use of mirdametinib for the treatment of genetically defined metastatic solid tumors both as a monotherapy and with combination approaches targeting the mitogen activated protein kinase, or MAPK, pathway. In collaboration with BeiGene, Ltd., or BeiGene, we are evaluating the combination of mirdametinib with BeiGene's lifirafenib in RAS mutated and other MAPK aberrant cancers. In collaboration with Memorial Sloan Kettering Cancer Center, we are evaluating mirdametinib in combination with fulvestrant in patients with estrogen receptor-positive metastatic breast cancer that

harbor concurrent mutations in the MAPK pathway and as a monotherapy in patients with solid tumors harboring activating mutations in *MEK1* or *MEK2*. In collaboration with St Jude Children's Research Hospital, we are evaluating mirdametinib for the treatment of pediatric and young adult patients with low-grade gliomas.

In addition to our development efforts with nirogacestat and mirdametinib, we are advancing additional drug candidates for the treatment of genetically defined metastatic solid tumors. The first of these is BGB-3245, a clinical-stage RAF fusion and dimer inhibitor being evaluated for the treatment of patients with a distinct set of BRAF-mutated tumors via MapKure, LLC, or MapKure, an entity jointly owned by us and BeiGene. We are also advancing two preclinical-stage small molecule programs, both of which we in-licensed in 2021. The first is a TEA Domain, or TEAD, inhibitor program that we in-licensed from Katholieke Universiteit Leuven, or KU Leuven, and the Flanders Institute for Biotechnology, or VIB, and the second is a portfolio of epidermal growth factor receptor, or EGFR, inhibitors that we in-licensed from Dana-Farber, and which we are developing under a research collaboration with Stanford and Dana-Farber.

We intend to continue expanding our portfolio beyond our existing pipeline by licensing additional programs with strong biological rationales and validated mechanisms of action. We also plan to continue using shared-value partnerships to maximize the potential of our therapies to serve patients. We have invested in building leading preclinical, clinical, medical and commercial capabilities and have focused on structuring innovative partnerships that seek to align incentives and optimize business outcomes for each party involved. We believe that this approach will continue to allow us to expand our collaborative relationships with innovators, maximize the potential of our existing and future portfolio, and support the building of a scalable and sustainable business focused on the efficient advancement and commercialization of product candidates that hold the potential to transform the lives of oncology patients.

COVID-19 pandemic

In December 2019, a novel strain of coronavirus, severe acute respiratory syndrome coronavirus 2, or SARS-CoV-2, was identified in Wuhan, China. On March 11, 2020, the World Health Organization designated the outbreak of COVID-19, the disease associated with SARS-CoV-2, as a global pandemic. Governments and businesses around the world have taken unprecedented actions to mitigate the spread of COVID-19, including, but not limited to, shelter-in-place orders, quarantines, significant restrictions on travel, as well as restrictions that prohibit many employees from going to work. Since the onset of the COVID-19 pandemic, we have undertaken a number of business continuity measures to mitigate potential disruption to our operations and in order to preserve the integrity of our research and development programs. To date, we have not experienced any material disruptions to the execution of the research and development activities that we currently have underway; however, as a result of the pandemic, or any impacts of emerging variant strains of the COVID-19 virus, we may experience disruptions that could impact our research and development timelines and outcomes. We will continue to evaluate the impact of the ongoing COVID-19 pandemic, along with the impact of emerging variants, on our business. While the extent to which COVID-19 impacts our future results will depend on future developments, including the duration, spread and intensity of the pandemic (including any resurgences), the impact of emerging variant strains of the COVID-19 virus and the availability and adoption of effective COVID-19 vaccines and boosters, all of which remain uncertain and difficult to predict, it is possible that the global pandemic and its associated economic impacts could result in a material impact to our business, future financial condition, results of operations and cash flows.

Our strategy

Our goal is to continue building a differentiated, global biopharmaceutical company by acquiring, developing and commercializing transformative medicines for underserved patient populations. We aim to be an industry leader in rare diseases and targeted oncology.

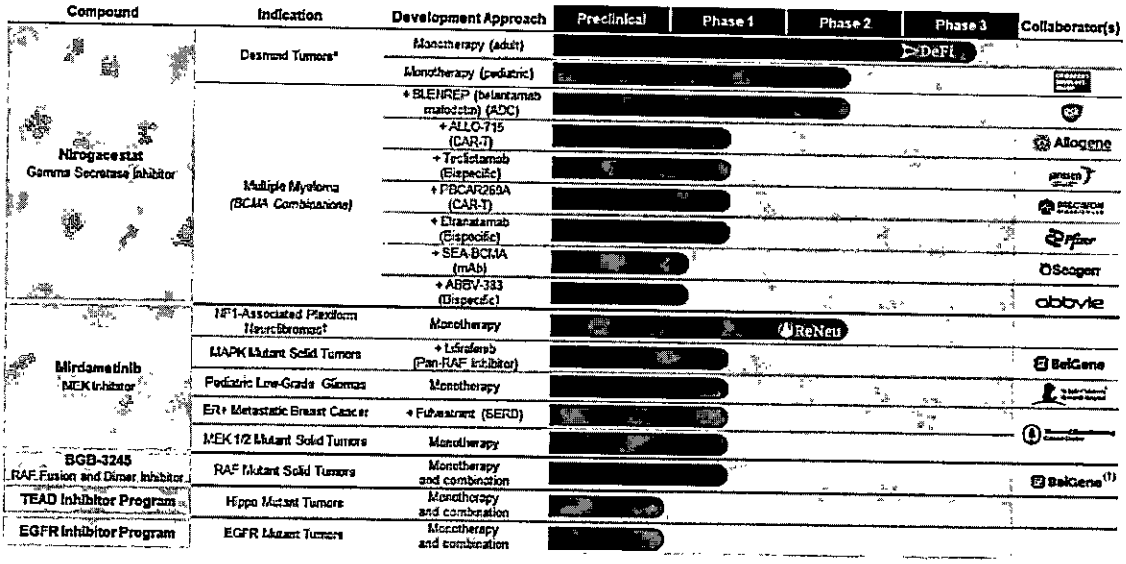
The key elements of our strategy include:

- **Efficiently advance our lead product candidates, nirogacestat and mirdametinib, towards marketing approval in the rare oncology indications in which they are currently being developed.** We believe that our leading drug development capabilities will enable us to continue efficiently advancing our product candidates towards marketing approval, and we will make use of accelerated regulatory pathways when possible. Since our inception in August 2017, we have made rapid progress advancing two product candidates towards marketing approval. Our first product candidate, nirogacestat, was granted Orphan Drug Designation, Fast Track Designation and Breakthrough Therapy Designation by the FDA for the treatment of desmoid tumors and Orphan Drug Designation by the European Commission for the treatment of soft tissue sarcoma. Nirogacestat is currently being evaluated in the potentially registrational DeFI trial; we expect to trigger the topline analysis from the Phase 3 DeFI trial in the first quarter of 2022 and to report these data during the first half of the year. Our second product candidate, mirdametinib, was granted Orphan Drug Designation by both the FDA and the European Commission for the treatment of NF1 and Fast Track Designation by the FDA for the treatment of NF1-PN. Mirdametinib is currently being evaluated in the potentially

registrational ReNeu trial; In June 2021, interim clinical data from the first 20 adult patients enrolled in the Phase 2b ReNeu trial were presented at the Children's Tumor Foundation NF Conference. In November 2021, we announced full enrollment of the ReNeu trial.

- **Establish nirogacestat as a cornerstone of BCMA-targeted therapy in multiple myeloma and deploy our precision oncology approach towards the treatment of biomarker defined subgroups of highly prevalent metastatic solid tumors.**

- **Maximize the potential of our portfolio through strategic partnerships and deploy our value-driven approach to identifying, acquiring and developing new medicines to further expand our portfolio.** We have entered into strategic partnerships to develop innovative combination therapies that leverage emerging insights into the fundamental mechanisms that drive cancer. Our strategy is to align incentives among parties by sharing development costs and downstream economics for selected partnered programs. By pursuing this strategy, we believe that we can access promising therapies being developed across the biopharmaceutical industry for which there is scientific and clinical rationale for combinations with our existing product candidates. We have announced collaborations with Allogene, BeiGene, GSK, Janssen, Pfizer, Precision Biosciences, Seagen and AbbVie, and we intend to execute additional strategic partnerships in the future.



- **Commercialize our product candidates, if approved, either alone or in partnership with others, to bring new medicines to underserved patient populations using a focused and efficient approach.** We intend to market and commercialize our product candidates, if approved, in the U.S. and select international markets, either alone or in partnership with others. We are in the process of building our medical affairs organization and commercial infrastructure using a focused and efficient approach, initially establishing market access, sales and marketing capabilities in a targeted manner that is appropriate for the relevant product opportunity. We believe that this approach will allow us to effectively reach the patients and physicians that our product candidates have been developed for and to maximize the commercial potential of our portfolio.

- **Continue to cultivate a tightly integrated network of patient advocacy groups, key opinion leaders, research institutions and healthcare providers to inform our approach to developing therapies that can transform the lives of patients and their families.** We believe that in order to develop our portfolio in an efficient and impactful manner, it is imperative to cultivate a network of key stakeholders. Integrating the experiences and insights from these stakeholders, which include the Desmoid Tumor Research Foundation, the Children's Tumor Foundation and leading academic physicians and researchers, continues to inform our approach to developing therapies that can transform the lives of patients and their families suffering from devastating rare diseases and cancer.

- **Attract, retain and support the best talent through our deep commitment to maintaining a culture of diversity, inclusion and professional excellence.**

Nirogacestat

Overview

Nirogacestat, our most advanced product candidate, is an oral, selective GSI that we are developing for the treatment of certain oncology indications. Gamma secretase is a protease complex that cleaves numerous transmembrane proteins, including amyloid precursor protein, or APP, Notch, HER4, E-cadherin, N-cadherin, BCMA and CD44. Cleavage of these transmembrane proteins by gamma secretase leads to a variety of signaling events that result from the untethering of the cytoplasmic domains of these proteins. Several of gamma secretase's substrates have been implicated in a variety of diseases, including APP in Alzheimer's disease and BCMA and Notch in cancer, forming the rationale for evaluating gamma secretase as a therapeutic target. We believe there is significant potential for nirogacestat to address both newly diagnosed and previously treated desmoid tumors. Nirogacestat also has the potential to be used more broadly in cancer, either alone or in combination with other therapies, and we are currently exploring the use of nirogacestat in combination with BCMA-directed therapies for the potential treatment of multiple myeloma.

Desmoid tumors are rare, non-metastatic soft tissue tumors that can occur in both children and adults. Depending on tumor size and location, desmoid tumors can cause severe morbidities such as pain, disfigurement, internal bleeding and incapacitating loss of range of motion. In June 2018, the FDA granted nirogacestat Orphan Drug Designation for the treatment of desmoid tumors and in November 2018, the FDA granted nirogacestat Fast Track Designation for the treatment of adult patients with progressive, unresectable, recurrent or refractory desmoid tumors or deep fibromatosis. In August 2019, the FDA granted nirogacestat Breakthrough Therapy Designation for the treatment of adult patients with progressive, unresectable, recurrent or refractory desmoid tumors or deep fibromatosis. In addition, in September 2019, the European Commission granted nirogacestat Orphan Drug Designation for the treatment of soft tissue sarcoma.

Based on encouraging results in desmoid tumor patients from Phase 1 and Phase 2 clinical trials, in May 2019, we announced the initiation of the DeFi trial, a potentially registrational Phase 3, double-blind, randomized, placebo-controlled clinical trial, and in July 2020, we announced full enrollment of the trial. We believe that we have designed the DeFi trial such that if nirogacestat demonstrates clinical activity consistent with that observed in desmoid tumor patients treated to date with

nirogacestat, the primary endpoint of this clinical trial, which is progression free survival, or PFS, should be met. If the results are favorable, we plan to apply for marketing approval for nirogacestat in the U.S. and select international markets, although specific countries have not yet been finally determined.

In addition to our development efforts in desmoid tumors, we are evaluating nirogacestat as a combination agent with BCMA-targeted therapies for the treatment of patients with multiple myeloma. GSIs have been shown to reduce cleavage of membrane-bound BCMA on multiple myeloma cells, thereby improving the activity of BCMA-targeted therapies. We are evaluating this novel combination therapy approach through clinical collaborations with several industry partners. We have entered into separate non-exclusive clinical collaborations with GSK, Allogene, Janssen, Precision Biosciences, Pfizer, Seagen and AbbVie, each of whom is developing one or more BCMA-targeted therapies. Each partner is responsible for the conduct and expenses of a clinical trial to evaluate the combination of nirogacestat with its respective BCMA agent in relapsed or refractory multiple myeloma, or RRMM. Clinical trials being conducted with each of GSK, Allogene, Janssen, Precision Biosciences and Pfizer are ongoing, and we expect to initiate clinical trials with Seagen and AbbVie in the first half of 2022.

Nirogacestat for treatment of desmoid tumors

Disease background

Desmoid tumors, also referred to as aggressive fibromatosis or desmoid-type fibromatosis, are rare and often debilitating and disfiguring soft tissue tumors characterized by a growth pattern that can invade surrounding healthy tissues, including joints, muscle and viscera. The morbidity of a desmoid tumor is driven by the location of the tumor and the aggressiveness of its growth pattern. Mesentery desmoid tumors, arising in the abdominal cavity, can cause potentially life-threatening abdominal vasculature and bowel obstructions. Similarly, if a desmoid tumor occurs in the head and neck region, it can result in potentially life-threatening impingement on vital structures. When desmoid tumors occur near joints, even small lesions can result in debilitating loss of range of motion, impaired mobility and severe pain. While variable in size, in rare cases, desmoid tumors have been documented to grow in excess of 30 centimeters in diameter. Patients can experience severe impacts on their quality of life, including long-term pain, disfigurement and range-of-motion impairment, as a result of their tumors. An epidemiology study of 179 desmoid tumors patients treated at two Danish sarcoma centers, Aarhus University Hospital and Copenhagen University Hospital, indicated that healthcare resource utilization by patients is significantly elevated for about 3 years following a desmoid tumor diagnosis in part due to increased inpatient and outpatient visits and days in the hospital, underscoring the significance of the morbidities that result from this disease.

Desmoid tumors typically occur in patients between the ages of 15 to 60 years and are more commonly diagnosed in the third and fourth decades of life, with a two-to-three times higher prevalence in females. The yearly incidence is estimated to be 1,000 to 1,500 new desmoid tumor patients diagnosed each year in the U.S. Most cases of desmoid tumor occur spontaneously and are associated with one of several mutations in the *CTNNB1* gene, which encodes for the β-catenin protein. There is also a subset of desmoid tumor patients whose tumors are attributable to germline mutations in the *APC* gene, which encodes for a protein involved in the degradation of β-catenin. These patients have a syndrome known as familial adenomatous polyposis, or FAP, and the incidence of desmoid tumors is 800 to 1,000 times higher in FAP patients as compared to the general population. When *APC* or *CTNNB1* mutations are present, tissue trauma, including surgery, pregnancy or soft tissue injury, can lead to the formation of desmoid tumors.

The clinical course of desmoid tumors varies across the patient population. Within any given patient, desmoid tumors can alternate between periods of rapid growth and stabilization, and spontaneous regressions have been reported in up to 20% of patients. Desmoid tumors can vary significantly in terms of their morphology and radiographic appearance but are generally routine to diagnose. Desmoid tumors are usually first noted upon physical examination or by using various imaging techniques, such as ultrasound, computed tomography, or CT, or magnetic resonance imaging, or MRI. Histologically, desmoid tumors appear with variable collagen deposition and are not clearly circumscribed. Definitive diagnosis relies upon immunohistochemical stains for nuclear localization of β-catenin. Diagnosis can also be confirmed by screening for mutations in the *CTNNB1* and *APC* genes.

Desmoid tumors, despite being highly morbid, typically have a limited impact on mortality. Due to this limited impact on overall lifespan and current poor treatment options, we believe that there is a sizable prevalent pool of desmoid tumor patients. Existing treatments for desmoid tumors often have low success rates. Up to 70% of patients undergoing surgery will relapse depending on patient age, tumor location and tumor size. Furthermore, based on feedback we have received from interviews and surveys of over 200 physicians, each of whom has treated at least five desmoid tumor patients over the preceding five years, we believe that approximately 50% of patients receiving a given systemic therapy, such as chemotherapy or a tyrosine kinase inhibitor, or a locoregional intervention such as surgery will not have a satisfactory treatment outcome and will require subsequent treatment for their desmoid tumors. Based on this market research, we believe that up to 90% or more of

patients will eventually receive an active intervention, and we estimate that, in any given year over the next decade, approximately 5,500 to 7,000 desmoid tumor patients will be actively receiving treatment in the U.S.

Current treatment landscape for desmoid tumors

There are currently no therapies approved by the FDA for the treatment of desmoid tumors. Historically, desmoid tumors were treated with surgical resection, but this approach has become less favored due to an emerging body of evidence showing a post-surgical tumor recurrence rate of up to 70%, which can potentially increase disease burden and require additional intervention. In addition to the high recurrence rates, surgery itself carries risk of complications and can also be highly morbid, occasionally requiring limb amputation. Given the potential morbidities of surgery and the uncertain magnitude and durability of its benefit, physicians now typically adopt a watchful waiting approach for patients who historically may have been candidates for surgery. Despite its limitations, surgery is still used when a desmoid tumor presents significant risk of morbidity or mortality, such as tumors arising in the head and neck. Radiation therapy may also be used alone or in conjunction with surgery but is generally not preferred given the reported risk of developing secondary neoplasms.

In addition to these local treatments, systemic therapies have been used off-label with varying degrees of activity and tolerability. These therapies include chemotherapeutic agents, such as liposomal doxorubicin and vinblastine/methotrexate, non-steroidal anti-inflammatory drugs, anti-hormonal therapies and tyrosine kinase inhibitors, such as sorafenib, imatinib and pazopanib. Of these agents, only sorafenib has been studied in a randomized, double-blind, placebo-controlled clinical trial in patients with desmoid tumors; this Phase 3 clinical trial was investigator-initiated and did not have a biopharmaceutical industry sponsor. Although sorafenib demonstrated a statistically significant improvement in PFS compared to placebo, tolerability was a substantial issue; 20% of treated patients discontinued due to adverse events and an additional 22% of treated patients withdrew consent. At a median follow-up time of 27 months, 61% of the patients receiving sorafenib had discontinued treatment. Overall, we believe that the available off-label systemic therapies are poorly suited for the treatment of desmoid tumors and have not demonstrated an acceptable balance of safety and activity in this population. Therefore, we believe a significant unmet medical need exists for the treatment of desmoid tumors.

Mechanism of action

Nirogacestat is an oral, potent, selective, reversible, noncompetitive small molecule inhibitor of gamma secretase, an integral protease complex that cleaves numerous functionally important transmembrane proteins, including Notch. Gamma secretase's cleavage of Notch causes the release of the Notch intracellular domain, or NICD, which shuttles into the nucleus and activates transcription of downstream target genes. Notch signaling is a regulator of cell proliferation and its dysregulation has been implicated in many forms of cancer. In desmoid tumor cell lines, nirogacestat has been observed to significantly decrease NICD release and reduce downstream activity of the Notch signaling pathway and decrease tumor cell migration, invasion and growth.

Clinical development of nirogacestat in desmoid tumors

Approximately 300 subjects have been exposed to nirogacestat across nine clinical trials, not including ongoing clinical trials such as our Phase 3 DeFi trial in desmoid tumor patients and combination trials with BCMA-targeted therapies. Nirogacestat's clinical activity was observed in two previous clinical trials that enrolled desmoid tumor patients. The first of these was a Phase 1 dose-escalation clinical trial conducted by Pfizer in patients with solid tumors, a subset of whom had a diagnosis of desmoid tumor. Given the activity of nirogacestat in the desmoid tumor patients treated in this Phase 1 clinical trial, the NCI conducted a Phase 2 clinical trial in desmoid tumor patients, which evaluated nirogacestat at 150 mg twice daily, or BID, the same dose being used in our DeFi trial. Nirogacestat was initially intended to be developed as a potential treatment for Alzheimer's disease, but early clinical trials evaluating its pharmacokinetics and biodistribution did not demonstrate adequate brain exposure to pursue this indication. Given Notch's role in cancer, nirogacestat was subsequently investigated as a potential antitumor agent. We believe that the peripherally restricted exposure of nirogacestat, as well as the safety and tolerability profile it has demonstrated across clinical trials to date, positions it as a potentially best-in-class GSI for oncology indications.

Nirogacestat was also investigated in three Phase 1 clinical trials conducted in healthy adult subjects to assess the pharmacokinetics and pharmacodynamics of single and multiple doses. Nirogacestat was further studied in clinical trials in patients with advanced cancers either as a monotherapy or in combination with other agents. Across all clinical trials completed to date, the dose range evaluated for nirogacestat was 1 mg once daily, or QD, to 330 mg BID.

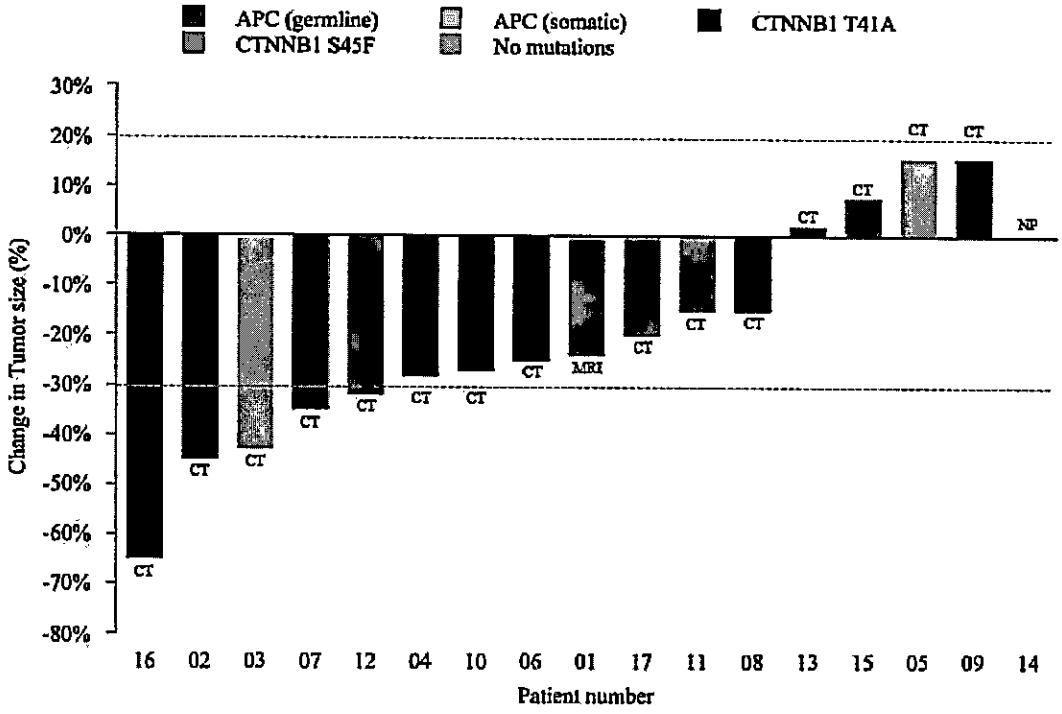
Phase 1 dose-escalation clinical trial

In June 2009, Pfizer commenced a Phase 1 dose-escalation clinical trial in patients with various solid tumors. This clinical trial was designed to determine the maximum tolerated dose, or MTD, ascertain the recommended Phase 2 dose and evaluate the

safety and tolerability of nirogacestat. Sixty-four patients with solid tumors received doses of nirogacestat and the MTD was determined to be 220 mg BID. The recommended Phase 2 dose was determined to be 150 mg BID, given its comparable pharmacodynamic activity but more tolerable profile as compared to 220 mg BID.

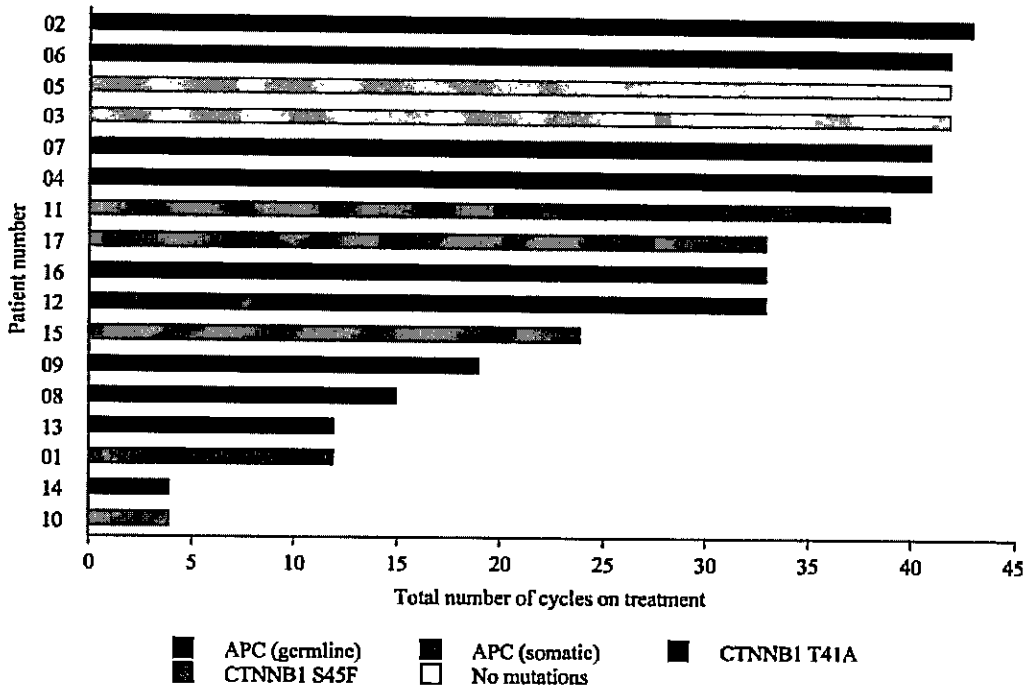
Of the 64 solid tumor patients enrolled, 46 were evaluable for response, seven of whom had desmoid tumors. Of these desmoid tumor patients, five experienced a PR (defined as at least a 30% reduction in the target lesion as measured by RECIST v1.0), yielding a 71% ORR. In the evaluable desmoid tumor patients, median PFS had not been reached at the time of publication owing to the lack of patients progressing on therapy. Patients whose desmoid tumors arose from either germline mutations in *APC* or spontaneous mutations were enrolled in this clinical trial. Patients with both of these tumor mutational characteristics experienced an objective response. Of the 39 evaluable non-desmoid tumor patients in this clinical trial, whose diagnoses included colon, breast, thyroid, non-small cell lung and pancreatic cancer, only one patient experienced an objective response. Several of these patients were refractory to a number of previous interventions. The mean treatment duration for these patients was greater than four years, suggesting favorable, long-term tolerability of nirogacestat. The results of this clinical trial were reported in peer-reviewed medical journals in 2014 and 2018.

The 64 patients enrolled in the Phase 1 clinical trial received nirogacestat doses ranging from 20 mg BID to 330 mg BID. The most common treatment-related adverse events (recorded in greater than 10% of patients) were diarrhea (55%), nausea (38%), fatigue (30%), hypophosphatemia (27%), vomiting (23%), rash (20%) and decreased appetite (17%). The majority of adverse events were Grade 1 through 3 and dose reductions due to treatment-related adverse events were infrequent. Treatment-related adverse events that led to temporary discontinuation or dose reduction included diarrhea, hypophosphatemia, rash, nausea, vomiting and fatigue, and most of these subsequently resolved. Seven patients (11%) permanently discontinued treatment due to adverse events. Of these, four patients (6%) discontinued due to a treatment-related adverse event (one for Grade 4 anaphylactic shock, one for Grade 1 visual impairment, one for a Grade 3 drug hypersensitivity reaction and one for Grade 3 rash). The Grade 4 anaphylactic shock adverse event was considered by the trial investigator to be related to intravenous treatment with morphine for pain control, as this adverse event started 25 minutes after morphine administration. However, treatment-related causality could not be excluded because the patient had received their first dose of nirogacestat before intravenous administration of morphine.



Long-term follow-up of the seven evaluable desmoid tumor patients in the Phase 1 clinical trial confirmed that all five patients who achieved a PR continued to maintain their responses between 48 and 73+ months. As of December 2016, four patients had stopped receiving nirogacestat but continued to be followed and remain free of progression between 11 and 53+ months after cessation of therapy. In all, the mean duration of clinical benefit observed was greater than 63 months. In addition, two patients continued to receive nirogacestat under a compassionate access protocol beyond the 2017 publication date, and through December 2020, one of these patients remained on treatment, having received nirogacestat for over eleven years. We believe the duration of clinical benefit and the tolerability profile observed in this Phase 1 clinical trial supported the rationale for the NCI's subsequent clinical investigation of nirogacestat in desmoid tumor patients.

Phase 2 clinical trial



The NCI commenced a Phase 2 clinical trial in desmoid tumor patients in November 2014. This clinical trial enrolled 17 desmoid tumor patients, who received nirogacestat every day in three-week cycles at the recommended Phase 2 dose of 150 mg BID. Patients were enrolled irrespective of their underlying mutation, which included germline and spontaneous *APC* mutations, as well as spontaneous *CTNNB1* mutations (T41A and S45F). These patients were heavily pre-treated, having failed a median of four prior treatments (with a range of one to nine), which included various systemic therapies and local interventions, including surgery.

Sixteen patients were evaluable for a response using RECIST v1.1. Five patients had a confirmed PR and eleven patients had SD, yielding a disease control rate of 100% among the evaluable patients. Four of the five patients with a confirmed PR on nirogacestat had previously been treated with tyrosine kinase inhibitors, including sorafenib and imatinib, without a reported response. Median PFS had not been reached at the time of publication owing to the lack of patients progressing on therapy. Clinical benefit was observed independent of underlying mutation, number of previous treatments and type of previous treatments. As of January 2022, four patients are continuing to receive nirogacestat, with treatment durations exceeding 6 years for each of these patients.

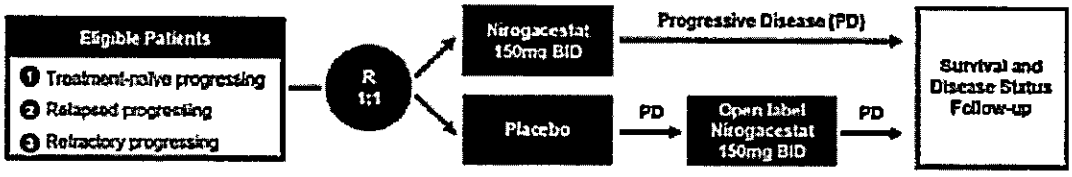
Best responses in the Phase 2 clinical trial, as measured by RECIST v1.1, are shown in the following chart. Dotted lines represent cutoffs for PR (defined as a 30% reduction from baseline) and for progressive disease (defined as a 20% increase from baseline). SD is reflected between the dotted lines. Patient #01 was missing a baseline CT measurement and therefore MRI was used. Patient #14 was not evaluable for response per protocol due to not returning to the clinical trial site for the patient's first restaging evaluation and subsequently being lost to follow-up.

The following chart depicts treatment duration, clinical response and mutational status of desmoid tumor patients in the Phase 2 clinical trial. Time of PR is denoted using black arrows, and the ten patients continuing on therapy at the time of publication are denoted using gray arrows.

All patients in the Phase 2 clinical trial experienced at least one Grade 1 or Grade 2 adverse event. The most commonly reported adverse events regardless of grade and occurring in at least 30% of patients included diarrhea (76%), hypophosphatemia (76%), maculopapular rash (71%), aspartate aminotransferase increase (59%), nausea (53%), lymphocyte count decrease (53%), dry mouth (41%), alanine aminotransferase increase (35%) and anemia (35%). With the exception of hypophosphatemia, these adverse events were all reported as Grade 1 or Grade 2. The only Grade 3 adverse event occurring in at least 20% of patients was hypophosphatemia (47%), which is a known class effect of GSIs and was reversible with oral phosphate replacement therapy in the trial. Four patients required a dose reduction and one patient discontinued therapy due to Grade 2 urticaria that was not responsive to dose reduction. There were no Grade 4 adverse events reported.

Expanded access program

In August 2020, investigators at the University of Minnesota and the Dana-Farber Cancer Institute published data where clinical benefit was observed in four pediatric and young adult desmoid tumor patients treated with nirogacestat under our Expanded Access Program. The clinical activity of nirogacestat in these four patients yielded one complete response, two partial responses and one stable disease, with no Grade 3 or Grade 4 adverse events reported. We are encouraged by the data in these four pediatric and young adult patients and this Phase 2 clinical trial will enable us to further evaluate the potential benefit of nirogacestat in younger desmoid tumor patients. In September 2020, a Phase 2 clinical trial was initiated in collaboration with COG to evaluate nirogacestat for the treatment of children and adolescents with progressive, surgically unresectable desmoid tumors.



DeFi trial and regulatory pathway for nirogacestat in desmoid tumors

Based upon the degree of clinical benefit for desmoid tumor patients observed in the Phase 1 and Phase 2 clinical trials, as well as our discussions with the FDA, in May 2019, we announced the initiation of our potentially registrational DeFi trial. The DeFi trial is being conducted under our open Investigational New Drug Application, or IND, for nirogacestat. As of July 2020, the trial was fully enrolled.

The DeFi trial is a Phase 3, double-blind, randomized, placebo-controlled clinical trial being conducted at clinical sites in North America and Europe. The DeFi trial is designed to evaluate the efficacy, safety and tolerability of nirogacestat compared to placebo in patients with progressing desmoid tumors. This clinical trial will consist of two phases: a double-blind phase and an optional open-label extension, or OLE, phase. This clinical trial is enrolling desmoid tumor patients whose tumors have grown by at least 20% in the last 12 months as measured by RECIST v1.1 and will include both treatment-naïve and relapsed and refractory patients. Given the treatment effect observed in previous clinical trials, patients are eligible for enrollment irrespective of the number and type of previous treatments or the specific underlying mutations in *APC* or *CTNNB1*.

Patients are being randomized in a 1:1 ratio to receive 150 mg BID of nirogacestat or placebo every day for 28 day cycles. Eligible patients with confirmed disease progression on trial may enter the optional OLE phase to receive 150 mg BID of nirogacestat. The trial was designed to enroll approximately 115 patients. The primary PFS endpoint is defined as the time from randomization until the date of assessment of progression as determined using RECIST v1.1, or death by any cause. The documented date of radiographic progression will be determined by blinded independent central review. The FDA has stated that a PFS primary endpoint may support registration in an adequately designed trial with sufficient follow-up. We initiated the DeFi trial in May 2019, achieved complete enrollment in July 2020 and we expect topline data to be available in the first half of 2022; however, as the DeFi trial is an event-driven trial that is designed to measure the difference in PFS between patients receiving nirogacestat versus those receiving a placebo, the exact timing of the trial's topline readout could fluctuate based upon the enrollment dynamics, the rate at which tumor progression events are occurring and site data entry and verification.

The design of the DeFi trial is summarized in the schematic below:

Key secondary endpoints of the DeFi trial include safety and tolerability, ORR, duration of response and change in tumor volume. Patient-reported outcomes will also be key secondary endpoints in the DeFi trial and will be evaluated using several outcome instruments, including the Memorial Sloan Kettering/Desmoid Tumor Research Foundation Desmoid Tumor Impact and Desmoid Tumor Symptom scales, the Patient-Reported Outcomes Measurement Information System Physical Function scale, the European Organization for Research and Treatment of Cancer Quality of Life Questionnaire-Core 30 and the Brief Pain Inventory. These instruments were selected to measure symptoms, impact of symptoms on daily living and outcomes that are most relevant to desmoid tumor patients.

Regulatory pathway

In June 2018, the FDA granted nirogacestat Orphan Drug Designation for the treatment of desmoid tumors and in November 2018, the FDA granted nirogacestat Fast Track Designation for the treatment of adult patients with progressive, unresectable, recurrent or refractory desmoid tumors or deep fibromatosis. In addition, in August 2019, the FDA granted nirogacestat Breakthrough Therapy Designation for the treatment of adult patients with progressive, unresectable, recurrent or refractory desmoid tumors or deep fibromatosis. In addition, in September 2019, the European Commission granted nirogacestat Orphan Drug Designation for the treatment of soft tissue sarcoma. If the results from the DeFi trial are favorable, we plan to file for marketing approval for nirogacestat in the U.S. and select international markets, although specific countries have not yet been finally determined.

Nirogacestat in combination with BCMA-targeted agents

BCMA is a cell surface protein universally expressed on multiple myeloma, or MM, cells, and the clinical activity of monotherapy BCMA-targeted agents have been demonstrated in this indication. GSIs have been shown to increase BCMA expression on MM cells. Activity of this combination mechanism had previously been observed in multiple preclinical models of MM using BCMA-directed therapies in combination with GSIs, and in December 2019, our collaborator GSK presented preclinical data at the American Society of Hematology Annual Meeting demonstrating the ability of nirogacestat to potentiate the efficacy of their BCMA-targeted ADC belantamab mafodotin (now approved by the FDA BLENREP) up to 3,000-fold in a panel of BCMA-expressing human cancer cell lines. We believe this combination, as compared to BCMA-directed therapies

alone, may provide a meaningful clinical benefit to MM patients by improving response rates, prolonging the duration of clinical benefit or reducing the side effect profile by enabling administration at a lower dose.

In June 2019, we entered a clinical collaboration with GSK to explore the combination of nirogacestat with their BCMA-targeted ADC, BLENREP (belantamab mafodotin-blmf), in patients with RRMM. BLENREP is the most clinically advanced BCMA-targeted ADC and is approved as a monotherapy in RRMM patients whose disease has progressed despite prior treatment with at least four prior therapies, including an immunomodulatory agent, proteasome inhibitor and anti-CD38 antibody. We believe that the clinical activity of BCMA-directed therapies, including belantamab mafodotin, may be enhanced with the addition of a GSI, like nirogacestat. In June 2020, we announced the dosing of the first patient in an adaptive Phase 1b clinical trial evaluating the combination. Initial clinical data from the trial are expected in mid-2022. In October 2021, we announced the initiation of an expanded Phase 2 cohort from the first combination dose level that evaluated 0.95 mg/kg dose of BLENREP every three weeks plus nirogacestat based on encouraging preliminary data observed in the Phase 1 cohort. We also announced the addition of two new sub-studies that will explore BLENREP plus nirogacestat in combination with pomalidomide and dexamethasone and in combination with lenalidomide plus dexamethasone in patients with RRMM. GSK is responsible for the conduct and expenses of the trial, which is governed by a joint development committee with equal representation from each party.

In January 2020, we entered our second collaboration evaluating nirogacestat with a BCMA-targeted agent, in this case with ALLO-715, an allogeneic BCMA-targeted chimeric antigen receptor T-cell, or CAR T-cell, therapy product candidate being advanced by Allogene. In December 2020, Allogene announced clearance from the FDA for its IND to study ALLO-715 in combination with nirogacestat. As part of their ongoing Phase 1 clinical trial for ALLO-715, Allogene initiated the cohort evaluating the combination in the first quarter of 2021. Allogene is responsible for the conduct and expenses of the trial, which is governed by a joint development committee with equal representation from each party.

In September 2020, we entered our third collaboration evaluating nirogacestat with a BCMA-targeted agent, in this case with teclistamab, a clinical-stage bispecific antibody that targets BCMA and CD3 being advanced by Janssen. Teclistamab has demonstrated monotherapy clinical activity in RRMM patients. Based on data published by Janssen demonstrating that the activity of teclistamab was improved when combined with a GSI in preclinical multiple myeloma models, we believe that the clinical activity of teclistamab may be enhanced with the addition of nirogacestat. Janssen initiated a Phase 1 clinical trial evaluating the combination in the first quarter of 2021. Janssen is responsible for the conduct and expenses of the trial, which is governed by a joint oversight committee with equal representation from each party.

In September 2020, we also entered our fourth collaboration evaluating nirogacestat with a BCMA-targeted agent, in this case with PBCAR269A, an allogeneic BCMA-targeted CAR T-cell therapy being advanced by Precision Biosciences. In June 2021, we and Precision Biosciences announced the dosing of the first patient in the nirogacestat combination arm of Precision Biosciences' ongoing Phase 1/2a clinical trial evaluating PBCAR269A. Precision Biosciences will be responsible for the conduct and expenses of the trial, which is governed by a joint steering committee with equal representation from each party.

In October 2020, we entered our fifth collaboration evaluating nirogacestat with a BCMA-targeted agent, in this case with elranatamab, a clinical-stage bispecific antibody that targets BCMA and CD3 being advanced by Pfizer. Elranatamab has demonstrated monotherapy clinical activity demonstrated in RRMM patients. Based on data presented by Pfizer demonstrating that the activity of elranatamab was improved when combined with a GSI in preclinical multiple myeloma models, we believe that the clinical activity of elranatamab may be enhanced with the addition of nirogacestat. In December 2021, we announced the dosing of the first patient in a Phase 1b/2 trial evaluating the combination. Pfizer is responsible for the conduct and expenses of the trial, which is governed by a joint development committee with equal representation from each party.

In June 2021, we entered our sixth collaboration evaluating nirogacestat with a BCMA-targeted agent, in this case with SEA-BCMA, a clinical-stage monoclonal antibody that targets BCMA being advanced by Seagen. SEA-BCMA has demonstrated monotherapy clinical activity in RRMM patients. Based on data presented by Seagen demonstrating that the activity of SEA-BCMA was improved when combined with a GSI in preclinical multiple myeloma models, we believe that the clinical activity of SEA-BCMA may be enhanced with the addition of nirogacestat. Seagen is expected to initiate a Phase 1 clinical trial evaluating the combination in the first half of 2022. Seagen will be responsible for the conduct and expenses of the trial, which is governed by a joint development committee with equal representation from each party.

In December 2021, we entered our seventh collaboration evaluating nirogacestat with a BCMA-targeted agent, ABBV-383, a clinical-stage bispecific antibody that targets BCMA and CD3 being advanced by AbbVie. ABBV-383 has demonstrated monotherapy clinical activity in RRMM patients. AbbVie is expected to initiate a Phase 1 clinical trial evaluating the combination in the first half of 2022. AbbVie is responsible for the conduct and expenses of the trial, which is governed by a joint steering committee with equal representation from each party.

In addition to our clinical collaborations, in September 2020, we entered into a sponsored research agreement with Fred Hutch to further explore the ability of nirogacestat to modulate BCMA and potentiate BCMA-targeting therapies in a variety of preclinical and patient-derived multiple myeloma models developed by researchers at Fred Hutch, and in August 2021, we entered into a sponsored research collaboration with Dana-Farber to further investigate nirogacestat with BCMA-targeting therapies in a variety of preclinical multiple myeloma models.

Disease background – multiple myeloma

MM is a plasma cell neoplasm with substantial morbidity and mortality and is the second most common hematologic malignancy in the U.S. accounting for approximately 10% of all hematologic cancers. The NCI surveillance, epidemiology and end results program estimated that in 2016 there were approximately 130,000 patients in the U.S. living with MM. Of these, approximately 30,000 have relapsed or are refractory to currently available therapies, representing a patient population with few therapeutic options and therefore a significant unmet medical need. It was estimated that approximately 13,000 individuals in the U.S. died from MM in 2020.

MM is characterized by the expansion and abnormal accumulation of malignant plasma cells in the bone marrow, which disrupts normal bone marrow function and over time can lead to anemia, hypercalcemia, thrombocytopenia, bone pain, fatigue and weight loss. As the disease progresses, it destroys the surrounding bone marrow and can lead to renal failure, increased susceptibility to infection, skeletal deterioration and neurologic disease.

Current treatment landscape for MM

Treatment of MM has advanced significantly in the past decade driven by a deeper understanding of disease processes and a sequenced or polypharmacy approach. Newly diagnosed patients with MM are treated with either stem cell transplants or multiple classes of therapeutic agents, either alone or in combination, to attempt to control their disease progression. These agents include proteasome inhibitors such as bortezomib, immunomodulatory drugs such as lenalidomide, monoclonal antibodies such as daratumumab, histone deacetylase inhibitors such as panobinostat, alkylating agents such as melphalan, anti-inflammatories such as dexamethasone and chemotherapeutic agents such as doxorubicin. Despite these current options, the durability of clinical response and benefit is often brief. As there are no therapies that currently are considered curative, nearly all patients who survive initial treatments are eventually deemed resistant or refractory to available therapies and their disease continues to progress. By the time these heavily pretreated patients reach this advanced state, they are often directed to clinical trials for treatment with experimental agents. Due to the advanced condition of these patients, the refractory nature of their disease and the toll prior treatments have taken on their health, responses to treatment are generally poor.

BCMA-directed agents have emerged as a potentially promising approach for the treatment of RRMM patients due to the restriction of BCMA's expression solely on the surface of plasmablasts and differentiated plasma cells. The first of these agents to receive regulatory approval was GSK's BLENREP (belantamab mafodotin-blmf), a BCMA-targeted ADC which was approved by the FDA in August 2020 as a monotherapy treatment for adults with RRMM who have received at least four prior therapies. In March 2021, Bristol-Myers Squibb Company's and bluebird bio, Inc.'s Abecma (idecabtagene vicleucel), a BCMA-directed autologous CAR T-cell therapy, was approved by the FDA for the treatment of adult patients with RRMM who have received four or more prior lines of therapy. We are aware of at least 20 other distinct programs in preclinical and clinical development that target BCMA; these programs represent a variety of therapeutics modalities, including ADCs, monoclonal antibodies, bispecific antibodies, autologous CAR T-cells and allogeneic CAR T-cells.

We are also aware of at least two efforts by others to combine a GSI and a BCMA-directed agent to treat RRMM. Juno Therapeutics, Inc., a subsidiary of Bristol-Myers Squibb Company, is currently evaluating an autologous BCMA-directed CAR T-cell therapy in combination with crenigacestat, a GSI licensed from Eli Lilly and Company in December 2017; this combination is currently in Phase 1/2 clinical testing. In December 2018, Novartis licensed the rights to another GSI, AL102, for use in combination with its bispecific antibody, WVT078, which targets BCMA and CD3; this combination is currently in Phase 1 clinical testing. Both crenigacestat and AL102 have been evaluated in Phase 1 clinical trials and a challenging tolerability profile was observed for both of these agents.

Combination of nirogacestat and BCMA-targeted therapies

We believe that BCMA-targeted therapies will play an important role in the future treatment paradigm of MM, with each of our collaboration partners possessing particular advantages among the modalities being investigated to therapeutically target BCMA. ADCs and bispecific antibodies possess several attractive features, including conventional infusion schedules and standard pharmaceutical manufacturing, storage and administration processes. In addition, dosing of ADCs and bispecific antibodies can be readily modified throughout the course of treatment. Allogeneic CAR T-cell therapies have the benefit of

THIS CAUSE came before the Alabama State Board of Pharmacy ("Board") on a complaint against Pharmerica ("Pharmerica") alleging violations of various provisions of the Alabama Pharmacy Practice Act. Prior to a hearing in this cause negotiations between counsel for the Board and counsel for Pharmerica resulted in an informal disposition and resolution of the matters at issue as authorized by Code of Alabama (1975) 41-22-12(f), the terms of which being set forth in this Consent Order as follows:

1. Counsel for the Board and counsel for Pharmerica stipulate that Pharmerica denies for all legal purposes other than this proceeding the allegations set forth in the Statement and for purposes of this proceeding does not contest the Board would introduce sufficient evidence to establish a *prima facie* case necessary to meet the legal burden of proof required of the Board in this proceeding. Therefore the Board finds that Pharmerica is guilty of violating the provisions of the Alabama Pharmacy Practice Act as set forth and based upon the conduct in Counts One and Two of the Statement.

REC'D DEC 23 2008

2. Pharmerica's permit to operate a pharmacy in the State of Alabama shall be placed on probation for a period of one year from the effective date of this order which is the date the same is executed on behalf of the Board. (a) The payment of an administrative fine in the amount of $13,000.00 within thirty (30) days from the effective date of this Order as set forth above. This obligation of payment to the Board shall not be dischargeable in bankruptcy and Pharmerica shall not attempt to discharge the same in any bankruptcy proceeding.

(b) Adherence to all provisions of the Alabama Pharmacy Practice Act, rules of the Board or any other law or regulations applicable to the practice of pharmacy.

3. Pharmerica expressly waives its rights pursuant to the Alabama Pharmacy Practice Act, the Alabama Administrative Procedures Act and the Alabama Uniform Controlled Substances Act, including but not limited to Code of Alabama (1975) 34-23-34 and 34-23-92 (12), Code of Alabama (1975) 41-22-12 and 41-22-20 and Code of Alabama (1975) 20-2-50, et seq., and including but not limited to the opportunity for a hearing before the Board in connection with any charges against it. Pharmerica further waives any objection to the attorney for the Board preparing, drafting or making this Order, including the waiver of any objection or right pursuant to Code of Alabama (1975) §41-22-18.

4. By execution of this Consent Order, Pharmerica hereby releases the

REC'D DEC 23 2008

Board, its members, agents, representatives, servants and employees from any and all liability, claims, damages, fees or expenses arising out of or made in connection with the matters relating to this Consent Order and Statement.

5. Pharmerica acknowledges and agrees that any future violation of the Alabama Pharmacy Practice Act, the rules and regulations of the Alabama State Board of Pharmacy or any other applicable laws may, upon proof and hearing thereof, result in disciplinary sanctions against its licenses or permits, including, but not limited to revocation.

Respondent Pharmacy.

IT IS HEREBY STIPULATED AND AGREED by and between the Colorado State Board of Pharmacy ("Board") and Pharmerica, ("Respondent Pharmacy") to resolve all matters pertaining to Board Case Number 2019-6134, as follows:

FINDINGS AND CONCLUSIONS

1. The Board has jurisdiction over Respondent Pharmacy, its registration as an in-state prescription drug outlet, and the subject matter of this Stipulation and Final Agency Order ("Final Agency Order") pursuant to provisions of the Pharmacists, Pharmacy Businesses, and Pharmaceuticals Act at Title 12, Article 280, C.R.S. (2019).

2. Respondent Pharmacy was originally registered in the State of Colorado on or about February 17, 1994, being issued registration #PDO-12-9, and has been so registered at all times relevant to this disciplinary action.

3. Respondent Pharmacy's address of record with the Board and current location is 557 Burbank St, Unit Q, Broomfield, CO 80020.

4. Respondent Pharmacy admits these findings and hereby waives any further proof in this or any other proceeding before the Board regarding the following facts.

5. In an inspection of Respondent Pharmacy on August 26, 2019, Board inspectors found four deficiencies, one of which was a repeated deficiency from inspections conducted on July 18, 2018, and August 23, 2017.

6. The deficiency involved records for compounded products.

7. Respondent Pharmacy admits that its conduct, as set forth above, constitutes violations of the following sections of the Colorado Revised Statutes and Board

Rules and provides grounds for disciplinary action against Respondent Pharmacy's Colorado registration as a prescription drug outlet:

Colorado Revised Statutes

(II) The lawful rules of the board.

12-280-127. Disciplinary actions. (1) The board may take disciplinary or other action as authorized in section 12-20-404 when the board determines that the applicant, licensee, or registrant has engaged in activities that are grounds for discipline under section 12-280-126.

* * *

8. The Board finds and concludes, and Respondent Pharmacy agrees, that based upon Respondent Pharmacy's above-described violations of the Pharmacists, Pharmacy Businesses, and Pharmaceuticals Act and relevant rules and regulations, the following discipline is just and appropriate under the circumstances.

DISPOSITION

9. Fine with Surcharge. Pursuant to section 12-280-127(5)(a), C.R.S., Respondent Pharmacy shall pay a fine of Five Hundred Dollars and No Cents ($500.00). Respondent Pharmacy understands and acknowledges that, pursuant to section 24-

Respondent Pharmacy acknowledges and agrees that any violation of this Final Agency Order shall constitute a willful violation of a lawful Board order, may be sanctioned as provided under section 12-280-127(4), C.R.S., and may be sufficient grounds for additional discipline, including but not limited to revocation of its registration. The pendency of any suspension or disciplinary action arising out of an alleged violation of this Final Agency Order shall not affect the obligation of Respondent Pharmacy to comply with all terms and conditions of this Final Agency Order.

12. Advisements and Waivers. Through its undersigned Authorized Representative, Respondent Pharmacy enters into this Final Agency Order freely and voluntarily, after having the opportunity to consult with legal counsel and/or choosing not to do so.     d. To appeal this Board order.

Respondent Pharmacy freely waives these rights, and acknowledges that such waiver is made voluntarily in consideration for Board's limiting the action taken against it to the sanctions imposed herein.

May 16, 2017

Notice: Section 409.913(16), Florida Statutes (F.S.), provides the authority for the Agency to impose the sanction of termination for cause if a provider voluntarily relinquishes its Medicaid provider number or an associated license, or allows the associated licensure to expire after receiving written notice that the Agency is conducting, or has conducted, an audit, survey, inspection, or investigation and that a sanction of suspension or termination will or would be imposed for noncompliance discovered as a result of the audit, survey, inspection, or investigation. In Reply Refer to
FINAL AUDIT REPORT
MPI Case No.: 2017-0007135

Dear Provider:

The Agency for Health Care Administration (Agency), through its Office of the Inspector General (OIG), Medicaid Program Integrity (MPI), has completed a review of claims for Medicaid reimbursement for dates of service during the period August 1, 2013, through July 31, 2014. A preliminary audit report dated April 20, 2017, was sent to you indicating that we had determined you were overpaid $2,216.72. Based upon a review of all documentation submitted, we have determined that you were overpaid $2,216.72 for services that in whole or in part are not covered by Medicaid. A fine of $443.34 has been applied. The cost assessed for this audit is $680.00. The total amount due is $3,340.06.

Be advised of the following:

(1) In accordance with Sections 409.913(15), (16) and (17), Florida Statutes (F.S.), and Rule 59G-9.070, Florida Administrative Code (F.A.C.), the Agency shall apply sanctions for violations of federal and state laws, including Medicaid policy. This letter shall serve as notice of the following sanction(s):

- A fine of $443.34 for violation(s) of Rule Section 59G-9.070(7) (e), F.A.C.

(2) Pursuant to Section 409.913(23) (a), F.S., the Agency is entitled to recover all investigative, legal, and expert witness costs.

BACKGROUND

The Agency is designated as the single state agency authorized to make payments for medical assistance and related services under Title XIX of the Social Security Act, otherwise known as the Medicaid program. Pursuant to Section 409.902, F.S., payments shall be made, subject to any limitations or directions provided for in the General Appropriations Act, only for services included in the program, shall be made only on behalf of eligible individuals, and shall be made only to qualified providers in accordance with federal requirements for Title XIX of the Social Security Act and the provisions of state law.

Reimbursement by the State for medical goods or services provided to persons eligible for Medicaid assistance is available when the services are provided in accordance with applicable Medicaid laws, regulations, and policies. Section 409.913, F.S., authorizes the Agency to operate a program to oversee the activities of Florida Medicaid recipients, and providers and their representatives. MPI is the state Medicaid oversight program responsible for conducting reviews, investigations, and/or audits to determine possible fraud, abuse, overpayment, or recipient neglect in the Medicaid program.

PURPOSE AND SCOPE

The purpose of this audit is to conduct a review of paid claims information and any Medicaid-related records maintained during the aforementioned audit period that you submitted to MPI in order to determine compliance with applicable Medicaid laws, regulations, and policy. The review and the determination of overpayment were made in accordance with the provisions of Section 409.913, F.S.

As a Medicaid provider, you are obligated to comply fully with all state and federal laws, rules, regulations, and statements of policy applicable to the Medicaid program, including the Medicaid Provider Handbooks issued by the Agency and all applicable federal, state, and local laws pertaining to licensure. Below is a discussion of the particular findings related to MPI's review of your claims and an explanation of why these claims do not meet Medicaid requirements. The audit work papers are attached, listing the claims that are affected by this determination.

FINDINGS

The audit also included the review of a judgmental sample of selected claims taken from the population of paid claims with dates of service during the audit period. The audit period for this review was from August 1, 2013, through July 31, 2014. This review identified an overpayment of $2,216.72. Enclosed for this review are the overpayment calculations, a summary of documented discrepancies, and an itemized listing of discrepancies noted in the review of the judgmental sample.

Our review has determined that you have failed to comply with one or more of the following Medicaid provisions.

- The *Florida Medicaid Provider General Handbook*, 2012
  - Record Keeping Requirements, pages 2-60, 2-61, and 2-62
  - Provider Abuse, page 5-3

NOTICE OF ADMINISTRATIVE HEARING AND MEDIATION RIGHTS

You have the right to request an administrative hearing pursuant to Sections 120.569 and 120.57, Florida Statutes. If you disagree with the facts stated in the foregoing Final Audit Report (hereinafter FAR), you may request a formal administrative hearing pursuant to Section 120.57(1), Florida Statutes. If you do not dispute the facts stated in the FAR, but believe there are additional reasons to grant the relief you seek, you may request an informal administrative hearing pursuant to Section 120.57(2), Florida Statutes. Additionally, pursuant to Section 120.573, Florida Statutes, mediation may be available if you have chosen a formal administrative hearing, as discussed more fully below.

The written request for an administrative hearing must conform to the requirements of either Rule 28-106.201(2) or Rule 28-106.301(2), Florida Administrative Code, and must be received by the Agency for Health Care Administration, by 5:00 P.M. no later than 21 days after you received the FAR. The address for filing the written request for an administrative hearing is:

Fax: (850) 921-0158
Phone: (850) 412-3630

8. A demand for relief.

A formal hearing will be held if there are disputed issues of material fact. Additionally, mediation may be available in conjunction with a formal hearing. Mediation is a way to use a neutral third party to assist the parties in a legal or administrative proceeding to reach a settlement of their case. If you and the Agency agree to mediation, it does not mean that you give up the right to a hearing. Rather, you and the Agency will try to settle your case first with mediation.

If you request mediation, and the Agency agrees to it, you will be contacted by the Agency to set up a time for the mediation and to enter into a mediation agreement. If a mediation agreement is not reached within 10 days following the request for mediation, the matter will proceed without mediation. The mediation must be concluded within 60 days of having entered into the agreement, unless you and the Agency agree to a different time period. The mediation agreement between you and the Agency will include provisions for selecting the mediator, the allocation of costs and fees associated with the mediation, and the confidentiality of discussions and documents involved in the mediation. Mediators charge hourly fees that must be shared equally by you and the Agency.

If a written request for an administrative hearing is not timely received you will have waived your right to have the intended action reviewed pursuant to Chapter 120, Florida Statutes, and the action set forth in the FAR shall be conclusive and final.

STIPULATION AND FINAL AGENCY ORDER

IT IS HEREBY STIPULATED AND AGREED by and between the Kansas Pharmacy Board (the "Board") and Pharmacy Corporation of America, d/b/a Pharmerica (the "Respondent") as follows:

1. The Board is represented herein by its attorney, Randall J. Forbes of Frieden, Unrein & Forbes, 1414 SW Ashworth Place, Suite 201, Topeka, Kansas 66604. The Respondent is represented herein by his attorney, PharMerica General Counsel.

2. The Board is the Kansas agency vested with the authority to carry out and enforce the provisions of the Kansas Pharmacy Law, K.S.A. 65-1626 *et seq.*, including conducting hearings and proceedings to revoke, suspend or otherwise discipline a Kansas registration to operate a pharmacy.

3. The Respondent is presently entitled to operate a pharmacy in the State of Kansas by reason of the Board having issued it Kansas registration number 2-09794. At all times relevant hereto, the Respondent has held a current registration to operate a pharmacy in the State of Kansas.

4. The Board has received certain information, has investigated and has determined that there are reasonable grounds to believe that the Respondent has operated in such a manner that violates the Kansas Pharmacy Act, K.S.A. 65-1626 *et seq.*

Respondent hereby agrees not to contest in this or any other proceeding before or initiated by the Board that, that it has allowed pharmacy technicians to work in the prescription area of its pharmacy at 8030 Reeder Road, Lenexa, Kansas when the ratio of pharmacy technicians to pharmacists exceeded that allowed by K.A.R. 68-05-16. Specifically, on April 28, 2014 a Board Inspector found on duty in the pharmacy area: three (3) pharmacists, three (3) certified pharmacy technicians and eight (8) pharmacy technicians that were not certified pharmacy technicians.

The Board finds and concludes that Respondent's conduct, as described above, is grounds for disciplinary action in the State of Kansas pursuant to K.S.A. 65-1627 (e)(1).

5. The Board finds and the Respondent agrees that the following disposition is just and appropriate under the circumstances:

A. FINE. Respondent hereby agrees and consents to the Board's entry of an order whereby within ten (10) days of the Board entering the Final Agency Order provided for herein, it shall pay to the Kansas Pharmacy Board an administrative fine in the amount of Five Hundred dollars ($500.00).

6. Respondent agrees that all information in the possession of the Board's Investigation Member, its staff, its investigators and or its attorney regarding the investigation which lead to this disciplinary action and all information discovered during the pendency of the disciplinary action may be disclosed to and considered by the Board as part of the presentation and consideration of the proposal of settlement in the form of this Stipulation and Final Agency Order and the Final Order provided for herein, with or without the presence of the Respondent or its attorney. In the event that this Stipulation and Final Agency Order and the Final Order provided for herein are not accepted and approved by the Board, the Respondent further waives any objection to the Board members' consideration of this Stipulation and Final Agency Order or the information mentioned in the preceding sentence and further agrees to waive any claim of due process violation or the right to seek the disqualification of any Board member as a result of the Board member's consideration of said document and information.

7. The stipulations contained herein shall not become binding until this Stipulation and Final Agency Action is approved by the Board and the Final Order provided for herein is entered by the Board. The Respondent acknowledges that the approval of the Board's Investigation Member or its attorney shall not constitute the approval of the Board or bind the Board to approve this Stipulation and Final Agency Action or the Final Order provided for herein.

8. The Respondent agrees that this Stipulation and Final Agency Order is in conformance with Kansas and federal law and the Board has jurisdiction to enter into it and enter the Final Order provided for herein. The Respondent further agrees, for purposes of this matter, that the Kansas Pharmacy Act, K.S.A. 65-1626 *et seq.* is constitutional on its face and as applied in this case.

9. This Stipulation constitutes the entire agreement of the parties and may only be modified by a subsequent writing signed by them. The agreement shall be interpreted in accordance with the laws of the State of Kansas.

The Respondent freely waives these rights and acknowledges that said waiver is made voluntarily and in consideration of the Board's limiting the disciplinary action taken against it to those provided for herein. The Respondent further waives the right to seek reconsideration or appeal or otherwise contest this Stipulation and Final Agency Order and the Final Order provided for herein.

11. The Respondent acknowledges that it enters into this Stipulation and Final Agency Order freely and voluntarily after consultation with counsel of its choosing. The Respondent further acknowledges that it has caused an authorized representative to read this Stipulation and Final Agency order in its entirety, that authorized representative understands its legal consequences and that the Respondent agrees that none of its terms are unconscionable, arbitrary or capricious.

12. Time is of the essence to this Stipulation and Final Agency Order. The pendency of any disciplinary action arising out of an alleged violation of this Stipulation and Final Agency Order shall not affect the obligation of Respondent to comply with all terms and conditions of this Stipulation and Final Agency Order.

13. This Stipulation and Final Agency Order constitutes the entire and final agreement of the parties. In the event any provision of this Stipulation and Final Agency Order is deemed invalid or unenforceable by a court of competent jurisdiction, it shall be severed and the remaining provisions of this Stipulation and Final Agency Order shall be given full force and effect.

MISSOURI BOARD OF PHARMACY
STATE OF MISSOURI

IN RE:	)	
	)	
PHARMACY CORPORATION OF AMERICA d/b/a PHARMERICA	)	**Case #2013-001441**

ORDER OF THE MISSOURI BOARD OF PHARMACY
ISSUING PHARMACY CORPORATION OF AMERICA d/b/a PHARMERICA
A PHARMACY PERMIT SUBJECT TO PROBATION

Comes now the Missouri Board of Pharmacy ("Board") and issues its ORDER granting a PROBATED pharmacy permit, permit number 2013019681, to Pharmacy Corporation of America d/b/a PharMerica ("PharMerica") pursuant to the provisions of Section 324.038, RSMo. As set forth in Section 324.038, RSMo, PharMerica may submit a written request for a hearing to the Administrative Hearing Commission seeking review of the Board's decision to issue a probated permit to Advantage. Such written request must be submitted to the Administrative Hearing Commission within thirty (30) days of issuance of this Order. The written request should be addressed to the Administrative Hearing Commission, P.O. Box 1557, Truman Building Room 640, Jefferson City, MO 65102-1557. If no written request for review is received by the Administrative Hearing Commission within the thirty (30) day period, the right to seek review of the Board's decision shall be waived.

The disciplinary period shall become effective immediately upon issuance of PharMerica's pharmacy permit. Should PharMerica file a written request for review of this Order, the terms and conditions of this Order shall remain in force and effect unless and/or until such time as the Administrative Hearing Commission issues an order contrary to this Order.

Findings of Fact

1. The Board is an agency of the State of Missouri created and established pursuant to Section 338.110, RSMo, for the purpose of executing and enforcing provisions of Chapter 338, RSMo.

2. PharMerica filed an application for a pharmacy permit with the Board on January 23, 2013. The permit is for a location at 12100 Plantside Drive, Louisville, Kentucky 40299-6343. The permit issued pursuant to this Order is in response to that application.

3. On March 5, 2003, the Kentucky Board of Pharmacy issued an Agreed Order placing PharMerica's pharmacy permit in the state of Kentucky on probation for a period of three

years because PharMerica allowed a diversion of approximately 75,000 dosage units of hydrocodone, 100 dosage units of oxycodone, 14,000 dosage units of diazepam, and 53,000 dosage units of alprazolam, all controlled substances, and because PharMerica failed to provide proper oversight of its pharmacy to prevent such diversion.

4. Based on information received by the Board, pursuant to Section 338.055 RSMo, the Board concluded PharMerica engaged in conduct which would be grounds for denying PharMerica a permit, or if it had been currently permitted by the Board, disciplinary action by the Board against its pharmacy permit.

5. Pursuant to the provisions of Section 324.038, RSMo, the Board hereby issues pharmacy permit number 2013019681 to PharMerica, in lieu of denial of PharMerica's request for a permit to practice pharmacy in Missouri. Permit number 2013019681 is issued subject to the terms and conditions set forth herein below.

Conclusions of Law

6. PharMerica's conduct as alleged above is cause for the Board to deny PharMerica a permit to practice pharmacy pursuant to Section 338.055.1 and .2, RSMo, which states in pertinent parts:

> 1. The board may refuse to issue any certificate of registration or authority, permit or license required pursuant to this chapter for one or any combination of causes stated in subsection 2 of this section. The board shall notify the applicant in writing of the reasons for the refusal and shall advise the applicant of his or her right to file a complaint with the administrative hearing commission as provided by chapter 621, RSMo.
>
> 2. The board may cause a complaint to be filed with the administrative hearing commission as provided by chapter 621, RSMo, against any holder of any certificate of registration or authority, permit or license required by this chapter or any person who has failed to renew or has surrendered his or her certificate of registration or authority, permit or license for any one or any combination of the following causes:
>
> * * *
>
> (8) Denial of licensure to an applicant or disciplinary action against an applicant or the holder of a license or other right to practice any profession regulated by this chapter granted by another state, territory, federal agency, or country whether or not voluntarily agreed to by the licensee or applicant, including, but not limited to, surrender of the license upon grounds for which denial or discipline is authorized in this state;

7. Section 324.038 RSMo, provides in pertinent part:

> Whenever a board within the division of professional registration, including the division itself when so empowered, may refuse to issue a license for reasons which also serve as a basis for filing a complaint with the administrative hearing commission seeking disciplinary action against a holder of a license, the board, as an alternative to refusing to issue a license, may, at its discretion, issue to an applicant a license subject to probation.

8. The Board hereby issues this ORDER in lieu of denial of PharMerica's request for a permit to practice pharmacy in Missouri pursuant to Section 324.038, RSMo.

9. Pursuant to the provisions of Section 324.038, RSMo, the Board hereby issues pharmacy permit number 2013019681 to PharMerica in lieu of denial of PharMerica's request for a license to practice pharmacy in Missouri. License number 2013019681 is issued subject to the terms and conditions set forth herein below.

Order

Based on the foregoing, it is the ORDER of the Missouri Board of Pharmacy that in lieu of denying Pharmacy Corporation of America a pharmacy permit, the Board hereby issues Pharmacy Corporation of America d/b/a PharMerica pharmacy permit #2013019681 subject to PROBATION for three (3) years (hereinafter "disciplinary period"). This Order shall become effective on the date of this Order. The terms of discipline shall be:

A. PharMerica shall pay all required fees for licensing to the Board and shall renew its permit prior to October 31 of each licensing year.

B. PharMerica shall comply with all provisions of Chapter 338, Chapter 195, and all applicable federal and state drug laws, rules and regulations and with all federal and state criminal laws. "State" here includes the State of Missouri and all other states and territories of the United States.

C. If requested, PharMerica shall provide the Board a list of all licensed pharmacists employed by PharMerica and the individuals' current home addresses and telephone numbers.

D. If, after disciplinary sanctions have been imposed, PharMerica fails to keep its pharmacy permit current, the period of unlicensed status shall not be deemed or taken as any part of the time of discipline so imposed.

E. PharMerica shall report to the Board, on a preprinted form supplied by the Board office, once every six months (due by each January 1 and July 1), beginning with whichever date occurs first after the date of this Order, stating truthfully whether or not it has complied with all terms and conditions of this Order.

F. PharMerica shall not serve as an intern training facility for interns.

G. PharMerica shall make a representative of the pharmacy available for personal interviews to be conducted by a member of the Board or the Board of Pharmacy staff. Said meetings will be at the Board's discretion and may occur periodically during the disciplinary period. PharMerica will be notified and given sufficient time to arrange these meetings.

H. PharMerica's failure to comply with any condition of probation set forth herein constitutes a violation of this Order.

I. The Board will maintain this Order as an open record of the Board as provided in Chapters 334, 338, and 610, RSMo.

J. Upon the expiration of the disciplinary period, the permit of PharMerica shall be fully restored if all requirements of law have been satisfied; provided, however, that in the event the Board determines that PharMerica has violated any term or condition of this Order, the Board may, in its discretion, after an evidentiary hearing, vacate and set aside the discipline imposed herein and may suspend, revoke or otherwise lawfully discipline PharMerica's permit.

K. No order shall be entered by the Board pursuant to the preceding paragraph of this Order without notice and opportunity for hearing before the Board in accordance with the provisions of Chapter 536, RSMo.

L. If the Board determines that PharMerica has violated a term or condition of this Order, which violation would be actionable in a proceeding before the Administrative Hearing Commission or the Circuit Court, the Board may elect to pursue any lawful remedies or procedures afforded it and is not bound by this Order in its determination of appropriate legal actions concerning that violation.

SO ORDERED this 19th day of June, 2013

Hello Ms. Turner and Ms. Nunnally,

We continue to diligently work to license around the country our new medical device distribution facilities opening in Greenwood, Indiana, but have run into issues in states like Michigan who are concerned we do not have an Indiana home state license. States like Michigan are asking for direct confirmation from Indiana that Indiana does not license medical device distributors. Our companies Tri-anim Health Services, Inc., Emergency Medical Products, Inc. and Bound Tree Medical, LLC do not sell drugs from the facilities in Indiana. Each facility merely distributes medical devices to EMS services, doctors and hospitals, not patient direct. Would you please reply to this email and confirm medical device distribution that does not qualify as durable medical equipment or home medical equipment is not regulated in Indiana?

Your kind response will do wonders to help us move our licensing goals forward.

Kind Regards,

Michael

Hello,
Please see the attached updated DR application for Hector Rodriguez with his new Indiana address, etc. He was also asked about the old charge on his record when he spoke with Mark and this is his response:
Back in the 90's, I went to the club and a mutual friend was always trying to start a fight. I ended up getting a restraining order due to the conflict. At one point, he tried to say my group of friends and I were starting fights with him. He said he was "scared." We ended up setting a court date to get a resolution, but he never showed up. I was informed by the court system that he had an extensive criminal background. I was also informed the restraining order would remain in effect. Last I heard, he had moved to Georgia and I haven't heard from him in 20+ years.

Please let me know if you need anything additional or have questions. This is for the open application for new wholesaler license for Tri-Anim Health Services, Inc.- Greenwood, IN location.

Thank you,

Jill Vennekotter

Labeler Name: J2 Bio-Pharma, LLC

This letter is to inform you that we are rejecting your Labeler Code request.

Rejection Comments

Labeler code 83325 is already assigned to your firm. Please note that the same labeler code can be used for multiple sites if they are under one company (parent, subsidiary, and/or affiliate). The labeler is usually the company that owns the brand, and the company most likely associated with the Labeler Code. If the company has multiple sites, each site must have its own DUNS and FEI number, but may operate under the same Labeler Code (83325). Just to clarify, DUNS and FEI are site-specific and labeler codes are company-specific.

Re: Letter of Explanation for Misdemeanor Arrest

To Whom it May Concern:

I was living with my mother and her boyfriend, whom I got in an argument with on July 25th 2006. Words were exchanged and he tried to kick me out of the house, so I obliged and packed my belongings. However, I was not "fast enough" because he wanted me out of there as soon as possible. He was getting in my face while I packed, and, as a result, I shoved him away from me. He immediately called the cops on me, and when two police officers arrived, I was already in my car preparing to find a place to move to. The officers took my statement, but because I strive to uphold my integrity, I admitted to pushing him. As a part of their duty to protect and serve, they had to arrest me, even though they both stated that it was ridiculous for them to respond there in the first place. They assured me that nothing drastic would probably result from this and a judge might throw this case out since there was no physical harm done. I was held in jail for a few hours and was given a court date after my immediate release. When I went for my court appearance a month later, my name was not on the docket. I was informed that the case was denied/dismissed by the District Attorney's Office, and, according to the letter they provided, the office was not filing formal charges against me either. Enclosed is a copy of that letter, which I have previously furnished to the Board when I answered "YES" on a question on prior applications (technician renewal, intern license, new pharmacist license, first pharmacist renewal, and pharmacy application). Hopefully, this explanation and attached documentation are sufficient and, if there are any additional questions, contact me via phone at (702) [redacted]

Sincerely,

Nicolle Gunn

CONSENT ORDER

Comes now the Division of Health Related Boards of the Tennessee Department of Health (State), by and through the Office of General Counsel and Respondent, Accredo Health Group, Inc. (Respondent) and respectfully moves the Tennessee Board of Pharmacy (Board) for approval of this Consent Order affecting Respondent's pharmacy license in the State of Tennessee.

I. Authority and Jurisdiction

The Board regulates and supervises pharmacies, pharmacists, pharmacy technicians, and pharmaceutical manufacturers, wholesalers, and distributors licensed to practice pursuant to the Tennessee Pharmacy Practice Act (Practice Act), Tennessee Code Annotated Section (TENN. CODE ANN. §) 63-10-101, *et seq.*, including the discipline of licensees, as well as those who are required to be licensed, who violate the Practice Act and the Rules promulgated by the Board, Official Compilation of Rules and Regulations of the State of Tennessee (TENN. COMP. R. & REGS.), 1140-01-.01, *et seq.* The Board enforces the Practice Act to promote and protect the health, safety and welfare of the public; accordingly, it is the policy of the Board to require strict compliance with the law and to apply the law to preserve the quality of pharmacy care provided in Tennessee.

II. Stipulations of Fact

1. Respondent has been at all times pertinent hereto licensed by the Board as a pharmacy in

the State of Tennessee, having been granted license number 3946 on October 6, 2003, which currently has an expiration date of December 31, 2015.

2. The Respondent, at all times pertinent hereto, was located in Memphis, Tennessee.

3. From May 12, 2014 until June 5, 2014, patient, "JH" attempted to obtain a refill of a prescription from the Respondent's facility.

4. Although several attempts were made by the Respondent to clarify a change with the prescription and thereafter system issues, the refilled prescription was not ready to be shipped until June 5, 2014.

III. Stipulated Grounds for Discipline

5. The State of Tennessee Board of Pharmacy has the authority to revoke, suspend, or impose other lawful disciplinary action, including a civil penalty for any violation of any laws relating to drugs or to the practice of pharmacy and/or the Board's rules pursuant to TENN. CODE ANN. §63-10-305, and TENN. COMP. R. & REG. 1140-8-.01 [CIVIL PENALTIES].

6. The Stipulations of Fact are sufficient to establish that Respondent has violated the following statutes or rules which are part of the Act, TENN. CODE ANN. § 63-10-101, *et seq.* and TENN. COMP. R. & REGS., 1140-01-.01, *et seq.*, for which disciplinary action by the Board is authorized.

7. The facts stipulated in paragraphs 3 and 4 constitute grounds for which the Board may discipline a Respondent's license to practice pharmacy pursuant to Tenn. Comp. R. & Regs. Rule 1140-2-01(1) [PHARMACISTS AND PHARMACY INTERNS], the relevant portion of which reads as follows:

(1) A pharmacist shall hold the health and safety of patients to be the first consideration and shall render to each patient the full measure of the pharmacist's ability as an essential health practitioner.

IV. Stipulated Disposition

8. Without admitting to the truth of the allegations herein or to any alleged failure to comply with a lawful order or duly promulgated rule in violation(s) of Tenn. Code Ann. § 63-10-305(8) and for the purpose of avoiding further administrative actions with respect to this cause, Respondent agrees to the following:

(a) Respondent agrees to pay a one thousand dollar ($1,000.00) civil penalty immediately upon execution of this Consent Order.

(b) Respondent agrees to provide a corrective plan of action to be approved by the Executive Director, Board of Pharmacy.

(c) Respondent shall submit to the Board of Pharmacy quarterly reports for a period of two (2) years relative to the return and processing of prescription turn around times.

V. Notice

9. The Respondent, by its signature to this Consent Order, waives the right to a contested case hearing and any and all rights to judicial review in this matter. Respondent agrees that presentation to and consideration of this Consent Order by the Board for ratification and all matters divulged during that process shall not constitute unfair disclosure such that the Board or any of its members shall be prejudiced to the extent that requires their

disqualification from hearing this matter should this Order not be ratified. Likewise, all matters, admissions and statements disclosed or exchanged during the attempted ratification process shall not be used against the Respondent in any subsequent proceeding unless independently entered into evidence or introduced as admissions.

10. Respondent expressly waives all further procedural steps and expressly waives all rights to seek judicial review of or to challenge or contest the validity of this Consent Order. Respondent understands that by signing this Consent Order, Respondent is allowing the Board to issue its order without further process. In the event that the Board rejects this Consent Order for any reason, it will be of no force or effect for either party.

11. Should this Consent Order not be accepted by the Board, it is agreed that the presentation and consideration of this Consent Order shall not unfairly or illegally prejudice the Board or any of its members from further participation in or resolution of these proceedings, including a formal disciplinary hearing.

12. Furthermore, Respondent acknowledges that they understand that they have a right to a hearing under the provisions of the Uniform Administrative Procedures Act, TENN. CODE ANN. Title 4, Chapter 5, but that they hereby waive that right in order to enter into this proposed Consent Order.

13. A violation of this Order shall constitute a separate violation of the Pharmacy Practice Act, TENN. CODE ANN. § 63-10-305(8), and is grounds for further disciplinary action by the Board.

AGREED BOARD ORDER #K-16-002

RE: IN THE MATTER OF
ACCREDO HEALTH GROUP, INC.
(PHARMACY LICENSE #28948)

BEFORE THE TEXAS STATE
BOARD OF PHARMACY

On this day came on to be considered by the Texas State Board of Pharmacy (Board) the matter of pharmacy license number 28948 issued to Accredo Health Group, Inc. (Respondent), 2825 West Perimeter Road, Suite 112, Indianapolis, Indiana 46241.

By letter dated January 29, 2016, the Board gave preliminary notice to Respondent of its intent to take disciplinary action. This action was taken as a result of an investigation which produced evidence indicating that Respondent may have violated:

Sections 562.156(a); and 565.002(a)(3) and (4) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3, Subtitle J (2013); and

Sections 291.104(a)(15); and 291.106(1) of the Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2015), in that allegedly:

COUNT

From on or about December 16, 2014, through April 14, 2015, Accredo Health Group, Inc., 2825 West Perimeter Road, Suite 112, Indianapolis, Indiana 46241, unlawfully shipped sterile preparations into Texas when it did not possess a Class E-S license. As evidenced by pharmacy records, the pharmacy shipped 21 sterile preparations to two patients into Texas without a Class E-S license during the time period previously described.

On or about April 15, 2015, Accredo Health Group, Inc. became licensed with the Board as a Class E-S pharmacy.

An informal conference was held in the Board's office on April 13, 2016, with J. Christopher Meilinger, R.Ph., Senior Director, Specialty Pharmacy Practice, on behalf of Respondent; Tera Teachout, R.Ph., Pharmacist-in-Charge; Dennis K. McAllister, Director, Pharmacy Regulatory Affairs, Express Scripts; Rhonda Graack, Assistant General Counsel, Express Scripts; and Mark W. Bina, Legal Counsel for Respondent, in attendance. The informal conference was heard by a Board panel comprised of: Christopher M. Dembny, R.Ph., Board Member; Gay Dodson, R.Ph., Executive Director/Secretary; and Carol Fisher, R.Ph., M.P.A., Director of Enforcement; with Caroline Hotchkiss, Assistant General Counsel. Megan Holloway, Staff Attorney, was also in attendance.

At the informal conference, Respondent presented information that it provided notice to the Board on November 19, 2014, that it had begun compounding sterile preparations, and that it submitted its application for change of class on January 2, 2015. Respondent also presented information that it has, at all times relevant to the count referenced above, maintained its pharmacy license in Indiana in active and good standing and has passed sterile compounding inspections by the Indiana Board of Pharmacy, the California Board of Pharmacy, and an independent third party inspector.

By signing this Order, Victor Perini, Vice President, Pharmacy Operations, Accredo Health Group, Inc., on behalf of Respondent, and Respondent's counsel neither admit nor deny the truth of the matters previously set out in this Order, and agree that the Board has jurisdiction in this matter and waive the right to notice of hearing, formal administrative hearing, and judicial review of this Order.

The parties acknowledge that this Order resolves the allegations set forth herein, and agree to the terms and conditions set forth in the ORDER OF THE BOARD below.

ORDER OF THE BOARD

THEREFORE, PREMISES CONSIDERED, the Board does hereby ORDER that:

(1) Respondent shall pay an administrative penalty of one thousand dollars ($1,000) due one hundred twenty (120) days after the entry of this Order.

(2) Respondent shall allow Board staff to directly contact Respondent on any matter regarding the enforcement of this Order.

(3) Failure to comply with any of the requirements in this Order constitutes a violation and shall be grounds for further disciplinary action. The requirements of this Order are subject to the Texas Pharmacy Act, TEX. OCC. CODE ANN., Title 3, Subtitle J (2015), and Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2016).

And it is so ORDERED.

THIS ORDER IS A PUBLIC RECORD.

SIGNED AND ENTERED ON THIS 2nd day of August, 2016.

ADMINISTRATIVE COMPLAINT

The Michigan Department of Licensing and Regulatory Affairs (Complainant) by Kim Gaedeke, Acting Director, Bureau of Health Care Services, files this Complaint against Accredo Health Group, Inc. (Respondent Pharmacy) as follows:

1. The Michigan Board of Pharmacy (Board) is an administrative agency established by the Public Health Code, 1978 PA 368, as amended; MCL 333.1101 et seq. Pursuant to section 17768 of the Public Health Code, supra, the Board's Disciplinary Subcommittee is empowered to discipline licensees for violations of the Public Health Code.

2. Respondent Pharmacy is currently licensed to practice as a pharmacy in the state of Michigan and has a current facility controlled substance license. Respondent Pharmacy has an address of record with Complainant of Memphis, Tennessee.

3. On January 28, 2015, the Tennessee State Board of Pharmacy (Tennessee Board) executed a Consent Order that ordered Respondent Pharmacy to pay a $1,000.00 civil penalty, provide a corrective plan of action, and submit quarterly

reports of processing prescription turn around times. The action was based on Respondent Pharmacy's failure to timely refill a prescription for patient J.H. (initials are used to protect the patient's identity). A copy of the Consent Order, marked Exhibit A, is attached and incorporated.

COUNT I

The action by the Tennessee Board, as set forth above, evidences a pharmacy, manufacturer, or wholesale distributor that has had its license or federal registration limited, suspended, or revoked, or been subject to any other criminal, civil, or administrative penalty in violation of section 17768(2)(d) of the Public Health Code, supra.

Complainant requests that this Complaint be served upon Respondent Pharmacy and that Respondent Pharmacy be offered an opportunity to show compliance with all lawful requirements for retention of the license. If compliance is not shown, Complainant further requests that formal proceedings be commenced pursuant to the Public Health Code, rules promulgated thereunder, and the Administrative Procedures Act of 1969, MCL 24.201 et seq.

Pursuant to section 16231(8) of the Public Health Code, supra, Respondent Pharmacy has 30 days from the date of receipt of this Complaint to submit a written response to the allegations contained herein. The written response shall be submitted to Complainant, Kim Gaedeke, Acting Director, Bureau of Health Care Services, Department of Licensing and Regulatory Affairs, P.O. Box 30670, Lansing, MI 48909.

Pursuant to section 16231(9) of the Public Health Code, supra, Respondent Pharmacy's failure to submit a written response within 30 days, as noted above, shall be treated as an admission of the allegations contained herein and shall result in transmittal of this complaint directly to the Board's Disciplinary Subcommittee for imposition of an appropriate sanction.

5. By execution of this Consent Order, Accredo and Teachout hereby release the Board, its members, agents, representatives, servants and employees from any and all liability, claims, damages, fees or expenses arising out of or made in connection with the matters relating to this Consent Order and Statement.

LICENSE RENEWAL APPLICATIONS

Prior to the next expiration date of pharmacy license #28948, the pharmacy will complete a license renewal application for the Texas State Board of Pharmacy. This application will require a pharmacy representative to answer the question:

> "Has the PHARMACY, THE PHARMACY'S owner or any officer or partner (if the pharmacy is owned by a corporation or partnership) been the subject of any professional disciplinary action or are any such actions pending against you by a regulatory authority within the last 36 months?..."

As a result of the entry of ABO #2018-06451, Accredo Health Group, Inc. must answer "yes" to this question for 36 months from the date of the termination of all sanctions. Consequently, an Accredo Health Group, Inc. representative must answer "yes" to this question on any renewal applications submitted beginning November 5, 2019 and ending 36 months following the termination of all sanctions.

AGREED BOARD ORDER #2018-06451

RE: IN THE MATTER OF

(PHARMACY LICENSE #28948)

BEFORE THE TEXAS STATE
BOARD OF PHARMACY

By letter dated October 4, 2019, the Board gave preliminary notice to Respondent of its intent to take disciplinary action. This action was taken as a result of an investigation which produced evidence indicating that Respondent may have violated:

Sections 565.001(a)(1), (2), (12) and (13); and 565.002(a)(3) of the Texas Pharmacy Act, TEX. OCC CODE ANN. Title 3, Subtitle J (2017); and

Sections 281.7(a)(12) and (13); 291.31(1), (15), (16) and (17); 291.32(a)(2)(H); 291.32(c)(1)(E) and (F); 291.32(c)(2)(B) and (D); 291.104(a)(15); and 295.3 of the Texas Pharmacy Board Rules, 22 TEX ADMIN. CODE (2018), in that allegedly:

PREVIOUS HISTORY

On or about August 2, 2016, the Texas State Board of Pharmacy entered Agreed Board Order #K-16-002 in the matter of Accredo Health Group, Inc. The Order was based on evidence that on or about December 16, 2014, through on or about April 14, 2015, Accredo Health Group, Inc. shipped 21 sterile preparations to two patients into Texas without a Class E-S license. The Order imposed a $1,000 penalty.

COUNT

On or about August 2, 2018, a pharmacist of Accredo Health Group, Inc., 2825 West Perimeter Road, Suite 112, Indianapolis, Indiana 46241, dispensed cyclosporine (modified) 25 mg capsules with directions to "take 2 capsules twice daily (total dose 150 mg twice daily)" to R.B., a patient with a recent kidney transplant, on a new electronically transmitted prescription. The prescriber intended that patient R.B. also receive a new electronically transmitted prescription calling for cyclosporine (modified) 100 mg capsules with directions to "take 1 capsule by mouth twice daily," for a total dose of 150 mg twice daily. The pharmacy did not dispense the second (100 mg) prescription until on or about August 10, 2018. Patient R.B. took the medication as instructed by the first (25 mg) prescription's label for approximately one week and received subtherapeutic treatment during that time. The prescriptions were assigned prescription numbers 55575779870 and 55575838520, respectively.

By letter dated October 4, 2019, Respondent was notified that the matters previously set out in this Order could be disposed of without the scheduling of an informal conference or a formal administrative hearing. By signing this Order, Bradley Earl Phillips, Corporate President, Accredo Health Group, Inc., on behalf of Respondent, neither admits nor denies the truth of the matters previously set out in this Order, and agrees that the Board has jurisdiction in this matter and waives the right to informal conference, notice of hearing, formal administrative hearing, and judicial review of this Order.

The parties acknowledge that this Order resolves the allegations set forth herein, and agree to the terms and conditions set forth in the ORDER OF THE BOARD below.

ORDER OF THE BOARD

THEREFORE, PREMISES CONSIDERED, the Board does hereby ORDER that:

(1) Respondent's license is reprimanded.

(2) Respondent shall develop and implement policies and procedures for a Continuous Quality Improvement Program for purposes of preventing and handling dispensing errors. The Continuous Quality Improvement Program shall include pharmacist peer review in compliance with guidelines approved by Board staff. In addition, the policies and procedures for pharmacist peer review shall state that:

(a) The peer review committee will:

- review incident reports;
- determine what caused errors;
- make recommendations to correct the problem that caused the errors; and
- monitor the changes to determine if the changes have improved the operation of Respondent and reduced errors.

(b) The peer review committee must be comprised of at least two employees of Respondent, including the pharmacist-in-charge and other pharmacist(s) or personnel who are employees of Respondent. The committee shall not be solely comprised of a district or regional manager/supervisor and the pharmacist-in-charge and shall not be used for personnel evaluation purposes.

(c) The peer review committee will meet regularly, and no less than quarterly.

(d) The peer review committee will make a record indicating:

- date of meeting;
- location of meeting;
- names of persons attending the meeting;

- description of activities;
- discussion of problems in Respondent's operation (e.g., work flow, dispensing process);
- findings;
- description of recommendations; and
- review of actions or changes relating to individuals, systems, or processes made as a result of previous recommendations.

(3) Respondent shall submit a report and/or documentation of such policies and procedures to Board staff within one hundred twenty (120) days after the entry of this Order. Copies of forms used by Respondent to collect the data on errors committed at the pharmacy (i.e., incident report forms) must be submitted to Board staff, as well as any other peer review forms that have been developed by Respondent. Additionally, records of the peer review committee, as described in subparagraph (d) above, shall be maintained for two (2) years at the location of Respondent and made available for inspection by Board employees.

(4) Respondent shall be responsible for all costs relating to compliance with the requirements of this Order.

(5) Failure to comply with any of the requirements in this Order constitutes a violation and shall be grounds for further disciplinary action. The requirements of this Order are subject to the Texas Pharmacy Act, TEX. OCC. CODE ANN., Title 3, Subtitle J (2017), and Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2019).

And it is so ORDERED.

THIS ORDER IS A PUBLIC RECORD.

Accredo Health Group, Inc.	)	CONSENT AGREEMENT
	)	
Complaint No. 2019-PHA-16187	)	

PARTIES

This document is a Consent Agreement regarding the pending application of Accredo Health Group, Inc., for the renewal of its mail order prescription pharmacy license. The parties to this Consent Agreement are: Accredo Health Group, Inc. ("Accredo"), the Maine Board of Pharmacy ("the Board"), and the Office of the Maine Attorney General ("the Attorney General"). This Consent Agreement is entered into pursuant to 10 M.R.S. § 8003(5-A).

STATEMENT OF FACTS

1. Since February 20, 2018, Accredo has been licensed in Maine as a mail order prescription pharmacy with a registered location of 41 Rachel Drive, Suite 1, Nashville, Tennessee (license number **MO40002360**).

2. On February 20, 2018, the Kansas Board of Pharmacy issued a Summary Order in Case No. 18-051 that imposed discipline against Accredo's Kansas pharmacy license (#22-02552).

3. Accredo then failed to report this disciplinary action to the Board within 10 days as required by 10 M.R.S. § 8003-G(2)(C).

4. On April 10, 2018, the Board received a letter from Accredo in which it submitted a copy of the Summary Order Case No. 18-051 and reported to the Board for the first time that its Kansas license had been disciplined by the Kansas Board of Pharmacy.

5. Pursuant to 10 M.R.S. § 8003(5-A)(A)(11) and 10 M.R.S. § 8003-G(2)(C), the Board may deny, refuse to renew, suspend, or revoke a license and impose other discipline for failing to report a license disciplinary action to the Board within 10 days of that action.

6. On November 3, 2018, Accredo submitted an application for the renewal of its license.

7. At its meeting on November 7, 2019, the Board reviewed the above information and voted to preliminarily deny Accredo's application for renewal of its license to be a mail order prescription pharmacy. In lieu of the denial, the Board also voted to offer Accredo this Consent Agreement. Unless Accredo either requests, in writing, a hearing regarding the appeal of the preliminary denial within thirty (30) days of receipt of the Notice of Preliminary Denial, or accepts this Consent Agreement by signing and dating it and returning it to Complaint Division, Board of Pharmacy, 35 State House Station, Augusta, ME 04333, by **January 6, 2020,** the preliminary denial of Accredo 's application for licensure as a mail order prescription pharmacy will become final.

COVENANTS

8. Accredo admits to the facts above and admits that such conduct constitutes grounds for denial of or refusal to renew its license and for the imposition of discipline pursuant to 10 M.R.S. §§ 8003(5-A)(A)(11), and 10 M.R.S. § 8003-G(2)(C) for failing to report disciplinary action taken against a license in another jurisdiction within 10 days after the action was taken.

9. As discipline for the violation admitted to in paragraph 8 above, Accredo agrees to accept the following DISCIPLINARY ACTION:

a) A REPRIMAND; and

b) A CIVIL PENALTY in the amount of two hundred fifty dollars ($250.00), payment of which shall be made by certified check or money order payable to the "Treasurer, State of Maine" and delivered to Complaint Division, Board of Pharmacy, Maine Department of Professional and Financial Regulation, 35 State House Station, Augusta, Maine 04333, and must be submitted with the signed Consent Agreement;

10. Violation of any of the terms or conditions of this Consent Agreement by Accredo shall constitute grounds for discipline, including but not limited to modification, suspension, or revocation of licensure or the denial of licensure or re-licensure.

11. The Board and Accredo agree that no further agency action will be initiated against its license by the Board based upon the specific violations admitted to herein, except or unless Accredo fails to comply with the terms and conditions of this Consent Agreement. The Board may however consider the conduct described above as evidence of a pattern of misconduct if other allegations are brought against Accredo, and this Consent Agreement will be admitted into evidence in any future adjudicatory hearing involving Accredo. The Board may also consider the fact that discipline was imposed by this Consent Agreement in determining appropriate discipline in any further complaints against Accredo.

12. This Consent Agreement is not appealable and is effective until modified or terminated by the parties hereto.

13. The Board and the Attorney General may communicate and cooperate regarding any matter related to this Consent Agreement.

14. Upon receipt of the signed Consent Agreement and the civil penalty payment, the Board will renew Accredo's license contingent upon it meeting all other eligibility criteria.

15. This Consent Agreement is a public record within the meaning of 1 M.R.S. § 402 and will be available for inspection and copying by the public pursuant to 1 M.R.S. § 408-A.

16. Nothing in this Consent Agreement shall be construed to affect any right or interest of any person not a party hereto.

17. Accredo acknowledges by its duly authorized representative's signature hereto that it has had an opportunity to consult with an attorney before executing this Consent Agreement, that it executes this Consent Agreement voluntarily, and that it agrees to abide by all terms and conditions set forth herein.

In the Matter of the Miscellaneous Permit of ACCREDO HEALTH GROUP, INC., Respondent.	PHA 2020-182-L SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER; EXHIBIT "1"

241042211

SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION
FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER

Petitioner, DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS' REGULATED INDUSTRIES COMPLAINTS OFFICE (hereinafter "RICO" or "Petitioner"), through its undersigned attorney(s) and Respondent ACCREDO HEALTH GROUP, INC. (hereinafter "Respondent"), enter into this Settlement Agreement on the terms and conditions set forth below.

A. UNCONTESTED FACTS:

1. At all relevant times herein, Respondent was permitted as a miscellaneous permit holder by the Board of Pharmacy (hereinafter the "Board") under permit number PMP 902. The permit was issued on or about January 1, 2014. The permit is set to expire or forfeit on or about December 31, 2021.

2. Respondent's mailing address for purposes of this action is c/o Edward Rickert, Quarles & Brady LLP, 300 N. LaSalle Street, Suite 4000, Chicago, IL 60654-3406.

I HEREBYCERTIFY THAT THE ATTACHED IS A TRUE AND CORRECT COPY OF THE ORIGINAL ON FILE IN THE DEPARTMENT OF COMMERCE & CONSUMER AFFAIRS.

Jennifer Haida

3. On or about November 5, 2019, Respondent entered into an Agreed Board Order in #2018-06451 (hereinafter the "Texas Order"). The Texas Order was based on an alleged dispensing error and, as set forth in the Texas order attached here as Exhibit "1", Respondent's license was reprimanded and was ordered to implement a Continuous Quality Improvement (hereinafter "CQI") Program.

4. On or about November 29, 2019, Respondent reported the Texas Order to the Board.

5. RICO alleges Respondent was disciplined by the State of Texas.

6. The foregoing allegations, if proven at an administrative hearing before the Board, would constitute violations of the following statute(s) and/or rule(s): Hawaii Revised Statutes (hereinafter "HRS") § 436B-19(13) (disciplinary action by another state or federal agency).

7. The Board has jurisdiction over the subject matter herein and over the parties hereto.

B. REPRESENTATIONS BY RESPONDENT:

1. Respondent is represented by Edward Rickert, Quarles & Brady LLP, 300 N. LaSalle Street, Suite 4000, Chicago, IL 60654-3406.

2. Respondent enters into this Settlement Agreement freely, knowingly, voluntarily, and under no coercion or duress.

3. Respondent is aware of the right to have a hearing to adjudicate the issues in the case. Pursuant to HRS § 91-9(d), Respondent freely, knowingly, and voluntarily waives the right to a hearing, and agrees to dispose of this case in accordance with the terms and conditions of this Settlement Agreement.

4. Respondent, being at all times relevant herein permitted as a miscellaneous permit holder by the Board, acknowledges that Respondent is subject to penalties including but not limited to, revocation, suspension or limitation of the permit and administrative fines, if the foregoing allegations are proven at hearing.

5. Respondent further understands that RICO enters into this Settlement Agreement, and agrees to the specific terms contained in this Settlement Agreement, based upon Respondent's representations made herein.

6. Respondent represents Exhibit "1" is a true and correct copy of the Texas Order.

7. Respondent understands that any false or untrue statement or any material misrepresentation or omission of fact by Respondent in this Settlement Agreement may be grounds for further disciplinary action under HRS Chapters 436B and 461.

8. Respondent does not admit to violating any law or rule, but acknowledges that RICO has sufficient cause to file a Petition for Disciplinary Action against Respondent's permit.

9. Respondent states in mitigation that this Settlement Agreement and any potential Petition for Disciplinary Action that could be filed by RICO is based solely on the Texas Order, and that there is no new conduct alleged by RICO that could give rise to discipline in Hawaii.

10. Respondent further states that the conduct giving rise to the Texas Order was an isolated event, caused by human error, and is not indicative of any ongoing, systemic issues at Respondent's pharmacy. The requirement contained in the Texas Order that Respondent implement a CQI Program was satisfied by a CQI Program that Respondent had in place prior to the incident alleged in the Texas Order, and that the CQI Program remains in place at each of Respondent's pharmacies.

11. Respondent enters into this Settlement Agreement as a compromise of the claims and to conserve on the expenses of proceeding with an administrative hearing on this matter.

12. Respondent agrees that this Settlement Agreement is intended to resolve the issues raised in RICO's investigation in RICO Case No. PHA 2020-182-L.

13. Respondent understands this Settlement Agreement is public record pursuant to HRS Chapter 92F.

C. TERMS OF SETTLEMENT:

1. Administrative Fine. Respondent agrees to pay a fine in the amount of FIVE HUNDRED AND NO/100 DOLLARS ($500.00). Payment shall be made by **cashier's check or money order made payable to "DCCA - Compliance Resolution Fund"** and mailed to the Regulated Industries Complaints Office, Attn: Stacia M. Silva, Esq., 235 S. Beretania Street, 9th Floor, Honolulu, Hawaii 96813. Payment of the fine shall be due at the time this Settlement Agreement is returned to RICO.

2. Failure to Comply with Settlement Agreement. If Respondent fails to fully and timely comply with the terms of this Settlement Agreement as set forth in paragraph C.1. above, Respondent's permit shall be automatically revoked upon RICO's filing of an affidavit with the Board attesting to such failure. In case of such revocation, Respondent shall turn in all indicia of licensure to the Executive Officer of the Board within ten (10) days after receipt of notice of the revocation. In case of such revocation, Respondent understands Respondent cannot apply for a new permit until the expiration of at least five (5) years after the effective date of the revocation. Respondent understands that if Respondent desires to become permitted again, Respondent must apply to the Board for a new permit pursuant to and subject to HRS §§ 92-17, 436B-21, and all other applicable laws and rules in effect at the time.

3. Possible Further Sanction. The Board, at its discretion, may pursue additional disciplinary action as provided by law to include further fines and other sanctions as the Board may deem appropriate if Respondent violates any provision of the statutes or rules governing the conduct of miscellaneous permit holders in the State of Hawaii, or if Respondent fails to abide by the terms of this Settlement Agreement.

4. Approval of the Board. Respondent agrees that, except for the representations, agreements and covenants contained in Paragraphs C.5., C.6., C.7., and C.8. below, this Settlement Agreement shall not be binding on any of the parties unless and until it is approved by the Board.

5. No Objection if Board Fails to Approve. If the Board does not approve this Settlement Agreement, does not issue an order pursuant thereto, or does not approve a lesser remedy, but instead an administrative hearing is conducted against Respondent in the Board's usual and customary fashion pursuant to the Administrative Procedure Act, Respondent agrees that neither Respondent, nor any attorney that Respondent may retain, will raise as an objection in any administrative proceeding or in any judicial action, to the Board's proceeding against Respondent on the basis that the Board has become disqualified to consider the case because of its review and consideration of this Settlement Agreement.

6. Any Ambiguities Shall be Construed to Protect the Consuming Public. It is agreed that any ambiguity in this Settlement Agreement is to be read in the manner that most completely protects the interests of the consuming public.

7. No Reliance on Representations by RICO. Other than the matters specifically stated in this Settlement Agreement, neither RICO nor anyone acting on its behalf has made any representation of fact, opinion, or promise to Respondent to induce entry into this Settlement Agreement, and Respondent is not relying upon any statement, representation or opinion, or promise made by RICO or any of its agents, employees, representatives, or attorneys concerning the nature, extent or duration of exposure to legal liability arising from the subject matter of this Settlement Agreement or concerning any other matter.

8. Complete Agreement. This Settlement Agreement is a complete settlement of the rights, responsibilities and liabilities of the parties hereto with respect to the subject matter hereof; contains the entire agreement of the parties; and may only be modified, changed or amended by written instrument duly executed by all parties hereto.

IN WITNESS WHEREOF, the parties have signed this Settlement Agreement on the date(s) set forth below. Each signatory to this Settlement Agreement hereby represents and warrants that he/she is authorized to execute and deliver this Settlement Agreement in the capacity shown below.

Said registration is scheduled to expire on March 31, 2023. At all times relevant hereto, said registration was in full force and effect.

2. Accredo Health Group, Inc., violated Virginia Code §§ 54.1-3316(1) and (2) and 54.1-3302(A) and (B) and 18 VAC 110-20-25(10) and 18 VAC 110-20-270(B) of the Regulations Governing the Practice of Pharmacy in that on March 26, 2021, it dispensed and shipped a prescription for Skyrizi to Patient A, though the prescription had been cancelled by the prescriber on March 12, 2021. The prescription was billed to Patient A's insurance for a total of $11,214.01, and Patient A was billed for a co-pay of $3,149.73.

2. Following an internal investigation into the dispensing of this cancelled prescription, Accredo Health Group, Inc., reversed the claim with Patient A's insurance and credited Patient A's account for the co-pay.

4. Accredo Health Group, Inc., waives its right to an informal conference.

6 Accredo Health Group, Inc., consents to the entry of the following Order affecting its right to conduct a non-resident pharmacy delivering in the Commonwealth of Virginia

2 Accredo Health Group, Inc., shall comply with all laws and regulations governing the practice of pharmacy in the Commonwealth of Virginia

3 Any violation of the foregoing terms and conditions of this Order or any statute or regulation governing the practice of pharmacy shall constitute grounds for further disciplinary action

HISTORY

This case comes before the State Board of Pharmacy (Board) upon a Petition for Reinstatement of the License to Practice Pharmacy by Petitioner, Stacey L. Beise, filed on or about February 4, 2008. On February 4, 2008, the Board issued an order scheduling a hearing before the Board on March 18, 2008. On that date, a formal hearing was held before the Board in this matter. Petitioner appeared *pro se*, and presented her husband, Shane Beise as a witness on her behalf. Juan A. Ruiz, Esquire represented the Commonwealth. A quorum of the Board was present at the hearing and deliberated at the close of testimony.

Petitioner's license was suspended for at least three years retroactive to October 15, 2003, by a June 30, 2004, Board order that made final a preliminary order entered on October 15, 2003. Petitioner's license was suspended for failure to comply with the terms of the Board order issued on July 18, 2001. The Board's October 15, 2003 order required Petitioner to demonstrate that she has been in documented recovery from drug and alcohol abuse for at lest three years and that she is fit to practice. Petitioner now seeks the reinstatement of her license to practice pharmacy.

FINDINGS OF FACT

1. Petitioner holds a license to practice pharmacy in the Commonwealth of Pennsylvania, License, No. RP-043564-L. (Board Records)
2. At all times relevant to these proceedings Petitioner held a license to practice pharmacy in the Commonwealth of Pennsylvania. (Board Records)
3. Petitioner's last address known to the Board is 611 Chesapeake Court, Hermitage, PA 16148. (Board Records; Petition)
4. On or around June 8, 2001, Petitioner signed a Consent agreement ("VRP Agreement"), which was approved by the Board on July 18, 2001. (Exhibit B-2, VRP agreement).
5. In the VRP Agreement, Petitioner admitted that she suffered from chemical abuse or dependence. (Exhibit B-2, VRP agreement ¶ 3(c)).
6. In the VRP Agreement, Petitioner's license was suspended for no less than 3 years, with the suspension stayed in favor of no less than 3 years of probation, during which time Petitioner agreed to completely abstain from the use of controlled substances, mood altering drugs, and the abuse of alcohol in any form. (Exhibit B-2, VRP agreement, ¶¶ 7(d) and 7(d)(xviii)).
7. In the VRP agreement, petitioner agreed to fully and completely comply and cooperate with the Bureau of Professional and Occupational Affairs, Professional Health Monitoring Program, VRP agents and employees in their monitoring of Petitioners impairment. (Exhibit B-2, VRP agreement, ¶ 7(d)(i)).

8. Petitioner's entry into the VRP agreement was precipitated by a single DUI conviction in 1999, and she was a social drinker. (N.T.10, 13).

9. While participating in the VRP program, Petitioner tested positive for alcohol in urine screens on August 27, 2001, January 24, 2002, and October 1, 2002, and admitted these violations of her VRP Agreement. (Exhibit B-2, Petition for Appropriate Relief ¶ 6(1)).

10. Petitioner failed to submit when requested to an unannounced and observed body fluid toxicology screen on December 21, 2001. (Exhibit B-2, Petition for Appropriate Relief ¶ 6(2)).

11. On or around October 15, 2003, and based upon the violations noted above, the Commonwealth filed a Petition for Appropriate Relief, requesting that the stay of Petitioners suspension be lifted, and that her license be suspended pursuant to the VRP agreement. (Exhibit B-2, Petition for Appropriate Relief).

12. On or about October 15, 2003, the Board issued a Preliminary Order granting the Petition for Appropriate Relief, and activating the suspension of Petitioner's license for a period not less than 3 years. (Exhibit B-2, Preliminary Order).

13. On or about June 30, 2004, the Board issued a Final Order making the Preliminary Order Final. (Exhibit B-2, Final Order).

14. On or about February 4, 2008, Petitioner filed a Petition for Reinstatement of her license. (Exhibit B-1).

15. On or about February 4, 2008, the Board entered an order scheduling a hearing for March 18, 2008 concerning the reinstatement of the Petitioner's license. (Order Scheduling Hearing Before Board).

16. Petitioner appeared at the hearing *pro se*, and brought her husband, Shane Beise as a witness. (N.T. at page 1; Board Records).

17. Petitioner and her husband confirm that she has abstained from drinking alcohol since fall 2003. (Exhibit B-1; N.T. 14, 28, and 29).

18. Petitioner had a stroke in 2004, and is now fully recovered. (N.T. 14).

19. The medication Petitioner takes as a result of her stroke would interact badly with alcohol, and cause serious risk to Petitioner's health. (N.T. 28, 37, 38).

20. Petitioner submitted to an evaluation by SARPH, who stated that she is "full sustained remission" and that there are no current symptoms and alcohol use has been discontinued. (Exhibit B-1).

21. In the time that Petitioner's license to practice pharmacy has been suspended, she has completed a computer networking degree with a 4.0 GPA and gotten married. (N.T. 22, 26, 28).

CONCLUSIONS OF LAW

1. The Board has jurisdiction in this matter. (Findings of Fact Nos. 1, 2)
2. Petitioner was given an opportunity to be heard in accordance with Section 504 of the Administrative Agency Law, 2 Pa. C.S. §504. (Findings of Fact No. 14, 15, 16)
3. Petitioner is eligible to have her license to practice pharmacy reinstated. (Findings of Fact Nos. 17-20)

DISCUSSION

Petitioner came before the Board to request the reinstatement of her license to practice pharmacy. In 1999, Petitioner, a social drinker, was convicted of a DUI. (Finding of Fact no. 10). She reported this DUI when she applied to renew her license, which led her to enter a VRP agreement. Petitioner violated the VRP agreement by testing positive for alcohol in urine screens on August 27, 2001, January 24, 2002, and October 1, 2002, and by failing to submit to an unannounced and observed body fluid toxicology screen on or about December 21, 2001. Petitioner's license was suspended on October 15, 2003, for at least three years based on violating the terms of a consent agreement and order that placed her in the Voluntary Recovery Program (VRP).

In the VRP agreement, Petitioner agreed that if her license was suspended for a violation of that agreement, that in order to have her license restored, she would be required to make an affirmative showing that she had at least 36 months of sustained documented recovery, a VRP-approved provider's evaluation that she is fit to safely practice, and verification that Licensee had abided by and obeyed all laws of the United States, the Commonwealth of Pennsylvania, and its political subdivisions, and all rules and regulations pertaining to the practice of the profession in this Commonwealth, and had not practiced pharmacy during her suspension.

Petitioner submitted a VRP approved provider's evaluation that she is fit to safely practice, and verification that she had not practiced pharmacy while her license was suspended. She made an affirmative showing that she had abstained from alcohol for a period of at least three years, however her recovery was not documented. Petitioner's recovery was confirmed by her husband who testified that she cannot drink with her

stroke medication. Petitioner's suspension was for a term not less than three years, and her license has now been suspended for more than four and a half years. In the time that Petitioner's license has been suspended, she completed a computer networking degree with a 4.0, which lends some credence to statements that she has not been abusing alcohol during this time. During the suspension of her license, Petitioner has gotten married, and she testified that this has resulted in a change in her lifestyle, and in her maturing significantly and becoming more responsible. In 2004, Petitioner suffered a stroke, from which she is now fully recovered. The medications that Petitioner must take as a result of this stroke would interact badly with alcohol, and could lead to serious health risks for Petitioner. This tends to confirm that Petitioner now has the necessary motivation to abstain from drinking alcohol. To further support Petitioner's claim of sobriety, SARPH had no further treatment recommendations for Petitioner.

Although Petitioner did not have a lot of documentary evidence, the Board is persuaded that Petitioner is fit to resume the practice of pharmacy. The testimony presented by both Petitioner and her husband was convincing to the Board that she has abstained from alcohol for at least three years. Petitioner's practice as a pharmacist will give her access to a large number of controlled substances. Because of this, and because Petitioner's recovery has not been fully documented, the Board believes that in order to protect the public Petitioner should be monitored for a period of time upon her return to practice. The Board will require Petitioner be monitored through the Disciplinary Monitoring Unit.

Thus the following order will issue:

FINAL ORDER

AND NOW, this 24th day of June, 2008 upon consideration of Petitioner's Petition for Reinstatement, review of the pleadings and record, and review of the evidence presented at the hearing on March 18, 2008, Petitioner's request to reinstate her license to practice pharmacy in Pennsylvania, No. RP-043564-L, is **GRANTED**. Petitioner's license shall be reactivated upon filing the proper forms and paying the necessary fees. Petitioner's license shall be placed on **PROBATIONARY** status to run for at least **THREE YEARS** from the date of reinstatement of Petitioner's license. Petitioner must complete at least sixty (60) hours of ACPE-accredited continuing education and submit certificates of completion to the Board Counsel listed below before her license may be reinstated.

The probationary terms are as follows:

1. Petitioner shall not be a pharmacist-manager of any pharmacy licensed by this Commonwealth.
2. Petitioner shall fully and completely comply and cooperate with the Bureau of Professional and Occupational Affairs, Professional Health Monitoring Program (PHMP) and its agents and employees in their monitoring of Petitioner under this Order.

3. Petitioner shall abide by and obey all laws of the United States, the Commonwealth of Pennsylvania and its political subdivisions and all rules and regulations and laws pertaining to the practice of the profession in this Commonwealth or any other state or jurisdiction in which Petitioner holds a license to practice a health care profession. Summary traffic violations shall not constitute a violation of this Order.
4. Petitioner shall at all times cooperate with the PHMP and its agents and employees in the monitoring, supervision and investigation of Petitioner's compliance with the terms and conditions of this Order, including requests for, and causing to be submitted at Petitioner's expense, written reports, records and verifications of actions that may be required by the PHMP.
5. Petitioner's failure to fully cooperate with the PHMP shall be deemed a violation of this Order.
6. Petitioner shall not falsify, misrepresent or make material omission of any information submitted pursuant to this Order.
7. Petitioner may not be absent from the Commonwealth of Pennsylvania for any period exceeding twenty (20) days unless Petitioner seeks and receives prior written permission from the PHMP subject to any additional terms and conditions required by the PHMP.
8. Petitioner shall notify the PHMP in writing within five (5) days of the filing of any criminal charges against Petitioner, the initiation of any legal action pertaining to Petitioner's practice of the profession, the initiation of charges, action, restriction or limitation related to Petitioner's practice of the profession by

a professional licensing authority of any state or jurisdiction or the Drug Enforcement Agency of the United States Department of Justice, or any investigation, action, restriction or limitation related to Petitioner's privileges to practice the profession at any health care facility.

9. Petitioner shall notify the PHMP by telephone within 48 hours and in writing within five (5) days of any change of Petitioner's home address, phone number, employment status, employer and/or change in practice at a health care facility. Failure to timely advise the PHMP under this subsection due to the PHMP office being closed is not an excuse for not leaving a voice mail message with this information.

10. In the event Petitioner relocates to another jurisdiction, within five days (5) days of relocating Petitioner shall either enroll in the other jurisdiction's impaired professional program and have the reports required under this Order sent to the Pennsylvania PHMP, or if the other jurisdiction has no impaired professional program, Petitioner shall notify the licensing board of the other jurisdiction that Petitioner is impaired and enrolled in this Program. In the event Petitioner fails to do so, in addition to being in violation of this Order, the periods of suspension and probation shall be tolled.

11. Petitioner shall cease or limit his/her practice if the PHMP case manager directs that Petitioner do so.

13. Petitioner shall provide the PHMP-approved provider with a copy of any prior evaluations and counseling records and a copy of this Order.

14. Petitioner shall authorize, in writing, the PHMP to have a copy of the PHMP-approved provider's written evaluation reports.

Failure to provide a specimen when requested will be considered a violation of this Order.

29. Petitioner shall avoid all foods that contain poppy seeds. Ingestion of poppy seeds will not be accepted as a valid explanation for a positive screen. **Petitioner shall avoid all substances containing alcohol including alcohol in food, chemical solutions, gasoline, medications, cleaning solutions hand sanitizers, or other skin preparations. BUREAU/PHMP EVALUATIONS

34. Upon request of the PHMP, the Petitioner shall submit to mental or physical evaluations, examinations or interviews by a PHMP-approved treatment provider or the PHMP. Petitioner's failure to submit to such an examination, evaluation or interview shall constitute a violation of this Order.

35. Notification of a violation of the terms or conditions of this Order shall result in the, **TERMINATION** of the period of probation, and **ACTIVATION** of a period of suspension of Petitioner's license to practice the profession in the Commonwealth of Pennsylvania as follows:

(a) The prosecuting attorney for the Commonwealth shall present to the Board's Probable Cause Screening Committee ("Committee") a Petition that indicates that

Petitioner has violated any terms or conditions of this Order.

(b) Upon a probable cause determination by the Committee that Petitioner has violated any of the terms or conditions of this Order, the Committee shall, without holding a formal hearing, issue a preliminary order terminating this probation and suspending Petitioner's license for the remaining period of probation.

(c) Petitioner shall be notified of the Committee's preliminary order within three (3) business days of its issuance by certified mail and first class mail, postage prepaid, sent to the Petitioner's last registered address on file with the Board, or by personal service if necessary.

Commonwealth, as well as all subsequent filings in the matter.

(e) If the Petitioner submits a timely answer and request for a formal hearing, the Board or a designated hearing examiner shall convene a formal hearing within forty-five (45) days from the date of the Prothonotary's receipt of Petitioner's request for a formal hearing.

(f) Petitioner's submission of a timely answer and request for a hearing shall not stay the suspension of Petitioner's license under the preliminary order. The suspension shall remain in effect unless the Board or the hearing examiner issues an order after the formal hearing staying the suspension again and reactivating the probation.

(g) The facts and averments in this Adjudication and Order shall be deemed admitted and uncontested at this hearing.

(h) If the Board or hearing examiner after the formal hearing makes a determination against Petitioner, a final order will be issued sustaining the suspension of Petitioner's license and imposing any additional disciplinary measures deemed appropriate.

(i) If Petitioner fails to timely file an answer and request for a hearing, the Board, upon motion of the prosecuting

attorney, shall issue a final order affirming the suspension of Petitioner's license.

(j) If Petitioner does not make a timely answer and request for a formal hearing and a final order affirming the suspension is issued, or the Board or the hearing examiner makes a determination against Petitioner sustaining the suspension of Petitioner's license, Petitioner may petition the Board for reinstatement based upon an affirmative showing through a PHMP-approved provider's evaluation that Petitioner is fit to safely practice, and verification that Petitioner has abided by and obeyed all laws of the United States, the Commonwealth of Pennsylvania and its political subdivisions, and all rules and regulations pertaining to the practice of the profession in this Commonwealth.

36. Petitioner's failure to fully comply with any terms of this Order may also constitute grounds for additional disciplinary action.

37. After successful completion of the minimum period of probation, Petitioner may petition the Board to reinstate Petitioner's license to unrestricted, non-probationary status upon an affirmative showing that Petitioner has successfully completed the requirements of the DMU. Petitioner shall be required to remain in compliance with all terms and conditions of this Order until the Board issues an order terminating Petitioner's probationary status.

This order shall take effect immediately.

Re: Attachment to Out-Of-State Pharmacy Application (New Facility Application) – Explanation of Disciplinary Actions

To Whom it May Concern,

I am writing on behalf of Credena Health LLC ("Credena") to provide additional information with its Out-Of-State Pharmacy Application (New Facility Application). Credena indicated "Yes" in response to the question, "Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?" Please accept this letter as further explanation of Credena's response.

The Oregon Board of Pharmacy reprimanded the pharmacy license of Credena's current pharmacist-in-charge, Clay Parkel, due to a dispensing strength error, which occurred on October 22, 1999, approximately 23 years ago. Tambocor 100 mg was dispensed to a patient instead of Tambocor 50 mg. At the time, Mr. Parkel was a pharmacist employed at Certifax Pharmacy in Beaverton, Oregon. He has not had any Pharmacy Board action taken against him following this action. A copy of the Board's 2000 consent order is attached.

Please feel free to contact me if you have any questions.

Sincerely,

Erica Beacom

Scope of Practice	Policy Number: 002
Effective Date:	June 7, 2021
Last Revision Date:	October 17, 2022
Last Reviewed Date:	October 17, 2022
Policy Owner(s):	Dane Osmanski, Head of Operations

Policy Purpose:

This policy is intended to outline Koala Pharmacy Boston's (KPB) scope of practice as it relates to the population served, products dispensed, and regulations outlined by licensing bodies.

Definitions:

Companion Animal: domesticated or domestic-bred animals whose physical, emotional, behavioral and social needs can be readily met as companions in the home, or in close daily relationships with humans.

Customer: A customer of KPB is the owner of a companion animal for which KPB provides or may prospectively provide prescription and non-prescription medications as well as other pet products.

Practice Scope:

1. KPB is a pharmacy intended to specifically service the prescription and over the counter medication needs of companion animals, specifically cats and dogs.
2. KPB does not service a human population beyond the provisioning of medications to be administered to their pets.
    a. Exception to this exclusion is that KPB complies with MA Policy No. 2018-04 and will maintain a supply of Naloxone as part of a Naloxone Rescue Kit.
3. KPB will maintain an account hierarchy such that there is an animal-owner relationship and prescription profiles are only maintained for animals.
4. KPB will maintain the confidentiality of both the customers' and their animals' profile information which will only be shared on a need-to-know basis between care providers and pharmacy staff.
5. Prescriptions will only be accepted from licensed veterinarians operating within a valid veterinarian-client-patient-relationship (VCPR).
6. KPB does not dispense or administer vaccinations for pets or their owners.

Scope of Offering:

1. KPB will accept and dispense valid prescriptions issued pursuant to a VCPR relationship with the following exceptions:

e. All customers wanting to receive prescriptions dispensed in a customized medication pack will first need to acknowledge a waiver to the Poison Prevention Packaging Prevention Act. This waiver specifically outlines that the customized medication packs are not child resistant and that they would like their medications dispensed in that manner.

Practice Regulations:

1. The Pharmacist Manager of Record may delegate duties and responsibilities including, but not limited to those outlined in 247 CMR 9.00 to another registered pharmacist while not on duty.

Provide explanation below:

A complaint was made concerning grants made by the Board of Pharmacy to PRN, Inc to Mary Grear, Executive Divector. The Board of Pharmacy sent notice of a request for hearing to the wrong mailing address even though the correct address was on file at the Board Office. This resulted in my not being aware that I needed to appear until after the Board Meeting. I subsequently prepared the requested documents and submitted them to the Board Auditors who found no discrepencies in the funds granted by the Board of Pharmacy to PRN and the expense record under my administration. A rehearing was held and the case was closed finding all monies were accounted for the PRN, Inc grants.

Re: Notification of a Report in the Data Bank(s)

This notice is to inform you that the enclosed report of an action taken against you was recently submitted to the Healthcare Integrity and Protection Data Bank (HIPDB).

What is the HIPDB? Section 1128E of the Social Security Act as added by Section 221(a) of the Health Insurance Portability and Accountability Act of 1996, established the HIPDB. Section 1128E mandates that information on certain final adverse actions (e.g., licensure, civil judgment and criminal convictions related to health care, exclusions from Federal or State health care programs and certain other adjudicated actions and decisions) taken against health care practitioners, providers and suppliers be reported to the HIPDB. Federal and State government agencies and health plans are authorized to query the HIPDB.

Confidentiality.

All information in the HIPDB is considered confidential and is disclosed only to legally authorized queriers for specified uses. Disclosure or use of confidential information for other purposes is a violation of Federal law. Health care practitioners, providers and suppliers may query the Data Bank about themselves (self-query) and may share their self-query results with anyone they choose. Information in the Data Bank is NOT available to the public.

What does the report mean to you?

The enclosed report summarizes an action taken against you. The HIPDB may contain more than one report on a particular incident, if two or more actions were taken that related to that one incident, e.g., an adverse licensure action and an exclusion from the Medicare and Medicaid programs. A report in the Data Bank does not necessarily reflect adversely on your professional competence or conduct. Those entities authorized to access the HIPDB use the information in conjunction with information from other sources, including you, when granting clinical privileges or making employment, affiliation or licensure decisions. This report is being sent to you so that you can check its accuracy. This is important because the Data Bank is a clearinghouse for reports, which are maintained exactly as submitted.

>> **If the report is accurate,** you need not respond to this mailing. The report will be available to authorized queriers exactly as submitted.

>> **If the mailing address in this report is incorrect,** you may update your mailing address as maintained by the Data Banks using the on-line Report Response Service, available at http://www.npdb-hipdb.hrsa.gov. Future correspondence from the Data Banks will be mailed to you at the address specified. Please be advised that this does not change your address as reflected in the report. Only the entity that originally submitted the report can modify or correct information provided in the report.

>> **You may add a statement** expressing your view of the events described in the report using the on-line Report Response Service, available at http://www.npdb-hipdb.hrsa.gov.

>> **You may submit both** a statement and dispute the report.
>> **You must certify** that you are the subject of the report in the Certification section of the Subject Statement and Dispute screen if you submit a statement, dispute the report or both.

Do not send this form directly to the Secretary of the U.S. Department of Health and Human Services. To avoid lengthy processing delays, send the form to: NPDB-HIPDB, P.O. Box 10832, Chantilly, VA 20153-0832.

If you submit a Subject Statement or place the report in disputed status using the Report Response Service, you will be prompted to print a copy for your records. When the Data Banks process a statement and/or dispute, notification of the statement and/or disputed status is sent to all queriers who received the report. If the entity that submitted the report to the Data Bank submits a change or correction to the report, a copy of the revised report will be sent to you and to any queriers who received a previous version of the report.

If a reporting entity subsequently corrects or changes a report that contains a Subject Statement, the original statement will be maintained in the modified report until the Subject elects to remove it or replace it with a new statement.

Additional Information.

The U.S. Department of Health and Human Services, Health Resources and Service Administration, Division of Practitioner Data Banks operates the HIPDB under regulations codified at 45 CFR Part 61. Provide explanation below:

A complaint was made concerning grants made by the Board of Pharmacy to PRN, Inc in care of Executive Director Mary Grear. The Board of Pharmacy sent notice of a request for hearing to the wrong mailing address even though the correct address was on file at the Board Office. This resulted in my not being aware that I needed to appear until after the Board Meeting. I subsequently prepared the requested documents and submitted them to the Board Auditors who found no discrepencies in the funds granted by the Board of Pharmacy to PRN, Inc. and the expense record under my administration. A rehearing was held and the case was closed finding all monies were accounted for the PRN, Inc. grants.

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **WALGREENS PHARMACY #4854, Pharmacy License No. PH01293, and** **MINHQUANG D. NGUYEN, RPH, Certificate of Registration No. 15913,** **Respondents.**	**CASE NOS. 19-100-PH-S** **19-100-RPH-S** **NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over this matter because at the time of the events alleged herein, Respondent Walgreens Pharmacy #4854 ("Walgreens") held a Nevada Pharmacy License No. PH01293, Respondent Minhquang D. Nguyen, RPh, ("M. Nguyen") held a Nevada Pharmacist Certificate of Registration No. 15913, all issued by the Board.

FACTUAL ALLEGATIONS

2. Respondent Walgreens is located at 4771 W. Craig Road in North Las Vegas, Nevada.

3. Respondent Nguyen was employed as the pharmacy manager of Walgreens during the alleged and relevant timeframes.

4. On April 15, 2019, Board Inspector Leo Basch ("Basch") found certain violations, or expired drugs/medications.

Probiotic – expiration date 2/2019

Humalog mix 50/50 vial – expiration date 7/2018

Promethazine suppositories – expiration date 12/2018

5. In addition, there was a manufacturer's box of promethazine suppositories with an expiration date of 12/2018, which contained a partial quantity.

6. Eight (8) boxes of Protofoam were in the refrigerator, when the packaging specifically state "do not refrigerate".

7. MMR vaccine, expiration date 5/18/2018, and diluent, expiration date 4/21/2019 were found in the freezer. Even though the MMR box had the letters "EXP" written on it, the MMR was still in the pharmacy's active inventory.

8. In room temperature storage, numerous expired drugs were discovered. Some were in manufacturers' original bottles and some with Walgreens amber vials with patient labels that had apparently been returned to stock.

9. Inspector Basch notified Respondent Nguyen that corrective actions included removing expired refrigerated products within three (3) days and removing expired non-refrigerated products within fourteen (14) days. Further, staff was instructed to review all active inventory to remove expired medications/drugs.

10. On or about April 26, 2019, Respondent Nguyen sent an email to the Board inspector stating that the tasks to review expired drugs in refrigeration and active inventory was completed.

11. However, on May 1, 2019, when Board inspectors returned to re-inspect Walgreens, Board inspectors discovered six (6) expired medications in Walgreens' amber vials, and found an additional violation of unlabeled liquid in an amber bottle on a shelf of active

inventory. Further, it appeared that the same expired medications noted on the original inspection were still on the pharmacy shelves in active inventory.

NOTICE OF INTENDED ACTION AND ACCUSATION

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, makes the following that will serve as both a notice of intended action under NRS 233B.127(3) and as an accusation under NRS 622A.300(1) and/or NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy (Board) has jurisdiction over this matter because at the time of the events alleged herein, Respondent Kristi Nguyen, RPH (Nguyen), Certificate of Registration No. 18861, Respondent Cheryl Mettus, RPH (Mettus), Certificate of Registration No. 17225, and Respondent Thuy TranDac, RPH (TranDac), Certificate of Registration No. 17658, were pharmacists registered with the Board, and Respondent Walgreens Pharmacy #3842, Pharmacy License No. PH01249, was a pharmacy licensed by the Board.

FACTUAL ALLEGATIONS

2. Respondents Nguyen, Mettus and TranDac were employed by Walgreens Pharmacy #3842 at the time of the events alleged herein.

3. Patient T.M. was being treated by several different providers for memory issues, pain, and other health conditions. B.H. was assisting T.M. with his medications because of T.M.'s memory issues.

4. On or about August 13, 2017, an electronic prescription from practitioner M.S. was transmitted to Walgreens Pharmacy #3842 for gabapentin 600 mg tablets for T.M., designated prescription no. 2933151, and dispensed to the patient.

5. On or about August 16, 2017, T.M. tendered a written prescription from practitioner E.S. for gabapentin 300 mg capsules for T.M to Walgreens Pharmacy #3842; this was designated prescription no. 2933209. On or about August 18, 2017, Respondent Mettus overrode a drug utilization review (DUR) alert for prescription no. 2933209 and dispensed to the patient. Respondent Mettus failed to contact the prescriber(s) to clarify the potential duplication error prior to overriding the DUR alerts. Therefore, both gabapentin prescriptions nos. 2933151 and 2933209 were dispensed, duplicating the same medication in different dosages within days.

6. On or about August 29, 2017, T.M. tendered two (2) written prescriptions from practitioner Z.G. for T.M to Walgreens Pharmacy #3842: 1) Aricept (generic donepezil) 5 mg, designated prescription no. 2939936; and 2) Seroquel (generic quetiapine) 100 mg, designated prescription no. 2939938. Prescription no. 2939936 included an order to discontinue Zaleplon 5 mg capsules previously prescribed by practitioner W.T. and designated prescription no. 2933781. However, Respondent Nguyen failed to discontinue the Zaleplon 5 mg prescription no. 2933781 as directed.

7. On or about September 13, 2017, T.M. tendered a written prescription from practitioner Z.G. for Zyprexa (generic olanzapine) 10 mg tablets for T.M. to Walgreens Pharmacy #3842; this was designated prescription no. 2948045. The prescription also had an order to discontinue Seroquel (generic quetiapine). However, Respondent Nguyen failed to discontinue the Seroquel (generic quetiapine) 100mg prescription no. 2939938 as directed,

overrode a DUR alert that olanzapine and quetiapine are similar therapies, and refilled prescription no. 2939938 for quetiapine 100 mg tablets.

8. On or about September 24, 2017, Respondent TranDac refilled prescription no. 2939936. However, Respondent TranDac failed to discontinue the Zaleplon 5 mg prescription no. 2933781 as previously directed and overrode a DUR alert.

9. On or about September 27, 2017, Respondent Mettus performed final product review and dispensed Seroquel (generic quetiapine) 200 mg tablets for prescription no. 2942008, in violation of the prior order from practitioner Z.G. on prescription no. 2948045 to discontinue Seroquel (generic quetiapine). Respondent Mettus also refilled prescription no. 2939938 for quetiapine 100 mg tablets on the same day and failed to contact the prescribing practitioner(s) to confer about the potential error/duplication. DUR alerts were overridden by an out-of-state pharmacist.[1]

10. On or about September 27, 2017, Respondent Mettus overrode a DUR alert and refilled prescription no. 2933781 for Zaleplone 5 mg, in violation of the prior order from practitioner Z.G. on prescription no. 2939936 to discontinue the Zaleplon 5 mg prescription no. 2933781.

COUNT ONE

(Respondents Nguyen, Mettus, TranDac)

11. Unprofessional conduct includes the failure by a registrant to follow strictly the instructions of a practitioner when filling, labeling, and dispensing a prescription. NAC 639.945(1)(d). Unprofessional conduct also includes failing to confer with the person writing or ordering a prescription if there is an error or omission which should be questioned. NAC

[1] The DUR alerts for prescription no. 2939938 were overridden by a Walgreens' pharmacist located in an out-of-state central fill facility, who was not licensed by the Board.

639.945(1)(e). Unprofessional conduct also includes a licensee performing his or her duties in an "incompetent, unskillful, or negligent manner." NAC 639.945(1)(i).

12. A pharmacist shall review a patient's record before dispensing a prescription to determine its therapeutic appropriateness, including overutilization, therapeutic duplications, contraindications and interactions. NAC 639.707(4).

13. As alleged in paragraphs 4 through 10 herein, Nguyen, Mettus and TranDac each violated NAC 639.707(4) and engaged in unprofessional conduct as defined in NAC 639.945(1)(d), (e) and/or (i) when they verified the final product as accurate, failed to contact the prescriber(s) to clarify potential duplication errors, overrode DUR alerts and/or erroneously dispensed medication, and each is therefore subject to discipline pursuant to NRS 639.210(4) and/or (12).

COUNT TWO
Pharmacy/Pharmacy Owner Responsibility
(Respondent Walgreens Pharmacy #3842)

14. NRS 639.230(5) provides: "Any violation of any of the provisions of this chapter [NRS Chapter 639] by a managing pharmacist or by personnel of the pharmacy under the supervision of the managing pharmacist is cause for the suspension or revocation of the license of the pharmacy by the Board." *See also* NAC 639.702. Further, the owner of any business or facility licensed, certified or registered by the Board is responsible for the acts of all personnel in his or her employ. NAC 639.945(2).

15. As the pharmacy/pharmacy owner at which the violations of law alleged herein occurred, including the acts and omissions of Respondents Nguyen, Mettus and TranDac, Walgreens Pharmacy #3842 is responsible for those violations pursuant to NRS 639.230(5), NAC 639.702 and/or NAC 639.945(2).

WHEREFORE, it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the pharmacy license, and certificates of registrations of these Respondents.

NEVADA STATE BOARD OF PHARMACY, Petitioner, v. CHERYL METTUS, RPC, Certification of Registration No. 17725, Respondent.	CASE N0. 17-105-RPH-B-S ANSWER AND NOTICE OF DEFENSE

Respondent above named, in answer to the Notice of Intended Action and Accusation filed in the above-entitled matter before the Nevada State Board of Pharmacy, declares:

1. **That her objection before the Notice of Intended Action and Accusation as being incomplete or failing to state clearly the charges against her, is hereby interposed on the following grounds:** Your Intended Action is frivolous. I am no longer a practicing pharmacist. I have not been a practicing pharmacist for over four years. I last worked as a pharmacist with Walgreens. My last workday as a pharmacist was January 16, 2019. I have not renewed my license (Certificate of Registration No. 17725), I have no intention of renewing my license, I am retired. I have been notified that I am past the point that I could renew my license. Based on the above, I am no longer subject to any disciplinary actions by the Nevada State Board of Pharmacy.

2. That, in answer to the Notice of Intended Action and Accusation, she admits, denies and alleges as follows: I deny I committed any unprofessional conduct as alleged in your Notice of Intended Action and Accusation. Additionally, this Notice of Intended Action is frivolous in that I am no longer a practicing pharmacist and as such I am not subject to any disciplinary actions by your Nevada State Board of Pharmacy.

If you still believe your Intended Action is not frivolous, that I am still subject to your disciplinary powers, I will attend the meeting on March 8, 2023. I trust you will not require me to attend unless you have a good faith belief that I am subject to your disciplinary powers. I know you are aware that if you abuse your authority under the NRS, you could be subject to appropriate disciplinary penalties and fees.

I have attached a copy of a letter I sent to a Walgreens supervisor, Holly Prievo, back on December 11, 2018. I wrote this letter after meeting with your investigator, Mr. Kenneth Scheuber. This letter would be my best recollection of this incident from over four years ago. I have reviewed that letter and it accurately reflects what occurred and properly summarizes my denial of your allegations.

I hereby declare, under penalty of perjury, that the foregoing Answer and Notice of Defense, and all facts therein stated, are true and correct to the best of my knowledge.

Attn: Kenneth Scheuber
Re: Case 17-105-S
Walgreens #03842

On November 20th, 2018 I met with Mr. Kenneth Scheuber, Pharmacy Board Investigator, and Holly Prievo of Walgreens to discuss a letter written to the board in regards to prescriptions I filled on 9/27/2017 at Walgreens #3842. I am a staff pharmacist at this store location.

Patient T[redacted] M[redacted] and I spoke that day regarding refilling medications. The phone call took place 15 months ago as I write my response, and I truly do not recall the specifics of the conversation. The medications which were refilled were Quetiapine 200mg, Quetiapine 100mg, and Zaleplon 5mg. All three medications had active refills.

It was brought to my attention at the meeting that a prescription filled at the store on 8/29/17 had a note from the physician to discontinue the Zaleplon. The pharmacist of record that day should have closed the prescription for the Zaleplon 5mg but this did not happen. It was also discussed at the meeting that Walgreens has CPO (Central Processing Operation) locations that have pharmacists entering and reviewing prescriptions and overriding drug utilization reviews. A pharmacist at a CPO location is on record for the review of the prescription that day. Walgreen's system does not notify in-store pharmacists of the actions of CPO pharmacists. Mr. Scheuber shared with me at the meeting that the Nevada Board of Pharmacy does not recognize the responsibility of CPO pharmacists. This information was never shared with me by Walgreens. This causes me great concern for patient safety and places me in a situation where I am responsible for another pharmacist's actions.

There was review of the filling of a Gabapentin 300mg prescription on or near 8/16/2017 which overlapped an active Gabapentin 600mg prescription for the patient. I shared with Mr. Scheuber that patients will alternate between medication strengths. This may be due to dose changes by the physician or the actual tablet or capsule size may be difficult for the patient to physically swallow.

It was discussed that Mr. M[redacted] was having difficulty managing his medications. He expressed confusion over his medications on a regular basis. He also had identified a caregiver who was helping him with his medications. The Pharmacy Manager had requested numerous times for proper HIPPA documentation to be completed and filed to facilitate communication with Mr. M[redacted]s caregiver, but this was never completed to my knowledge. Having either the patient

independently, the caregiver, or both on a conference call to discuss medications was causing additional difficulty helping the patient manage his medications.

It was shared that the refilled medications were not taken by Mr. M[redacted] and that no harm came to the patient. I would never want a patient to be concerned or to question their medication use. I take great pride in providing all of my patients the highest level of quality pharmacy care. I have been practicing pharmacy for 41 years, and this is the first time that I have had to respond to an investigation.

Please do not hesitate to contact me if you need any additional information.

Sincerely,

Cheryl Mettus RPH

COMES NOW, Respondent WESLEY ROBERTSON, M.D. ("Dr. Robertson"), as a licensed Medical Doctor and holder of a controlled substance registration, subject to the jurisdiction of the Nevada State Board of Pharmacy ("Board"), based upon information, belief, and personal knowledge, by and through his counsel of record, and responds the Board's Notice of Intended Action and Accusation ("Complaint"), as follows:

JURISDICTION

1. Dr. Robertson admits that at all times relative to the Complaint he was a medical doctor holding a controlled substance registration issued by the Board (Cert. of Registration No. CS07810);

FACTUAL ALLEGATIONS

2. Dr. Robertson admits that he owned and operated Sunshine Valley Pediatrics located at 9091 W. Post Road, Las Vegas, Nevada during the relevant time period.

3. Dr. Robertson does not have actual knowledge or possession of the May 1,

2021, complaint received by the Board against him, and on that basis denies the allegations contained in Paragraph 3 of the Board's Complaint.

4. Dr. Robertson admits that he submitted a written statement on June 17, 2021, to the Board indicating that he gave his secondary authenticator token to his MA K.S. However, Dr. Robertson denies that he delegated his signing authority to his MA K.S. Rather, he only provided her with the secondary authenticator token so MA K.S. could electronically enter the prescriptions that were prescribed and signed by Dr. Robertson only. Dr. Robertson denies any remaining allegations contained in Paragraph 4 of the Board's Complaint against Him.

APPLICABLE LAW

5. Dr. Robertson presently lacks sufficient information to determine the veracity of the allegations contained in Paragraphs 5-15 of the Board's Complaint, and on that basis denies the same.

COUNT ONE
(Unprofessional Conduct – Party to a Fraudulent/Deceitful Practice/Transaction)

6. Dr. Robertson denies the allegations contained in Paragraph 16 of the Board's Complaint.

COUNT TWO
(Unprofessional Conduct – Incompetent, Unskillful or Negligent Performance of Duties)

7. Dr. Robertson denies the allegations contained in Paragraph 17 of the Board's Complaint.

COUNT THREE
(Unprofessional Conduct – Aiding and Abetting Unlicensed Practice)

AFFIRMATIVE DEFENSES

1. Respondent denies he committed malpractice as defined in Nevada Administrative Code Section 630.040.

2. Respondent denies that he violated any other state or federal statute or regulation, including but not limited to NRS Chapters 453, 454, 639, 21 U.S.C. §§ 822, 823, 846, and 21 CFR §§ 1306, 1311.

3. Respondent contends that in all professional services rendered by Respondent, Respondent possessed and exercised that degree of skill ordinarily possessed and exercised by reasonably well-qualified pediatricians practicing in the same field and acting under the same or similar conditions. At no time was Respondent guilty of negligence or improper treatment.

4. The allegations in the Complaint with respect to Respondent and each and every purported cause for discipline fail to allege facts sufficient, or facts at all, to constitute a cause or causes for discipline against the Respondent.

5. By responding to this Complaint, Respondent does not stipulate to the authenticity or admissibility of any medical records as they are hearsay.

6. The Complaint, or portions thereof, should be dismissed on grounds of due process and equal protection, including the right to an unbiased investigation. *See Mishler v. Clift, M.D. et al*, 191 F.3d 998 (9th Cir. 1999).

7. Any scope of practice allegations should be dismissed, as the statutes and regulations are unconstitutionally vague and ambiguous as applied to the subject matter of this case, and do not clearly prohibit the conduct which the Board seeks to discipline.

8. Respondent objects to the Complaint on the ground that it does not state acts or omissions upon which the agency may proceed.

9. NRS 622.400 is unconstitutional on due process and/or equal protection grounds. Alternatively, if such provision is constitutional, the statute should be interpreted as mutual and reciprocal, and Respondent is entitled to and hereby prays for an award against the Complainant of the Respondent's costs and/or fees in his investigation, preparation and defense to the Board's charges herein, to the extent that he prevails. If not reciprocal, then Complainant should receive a cost recovery, if at all, proportionate to the extent it prevails.

10. The Nevada State Board of Pharmacy exceeded its regulatory function by proceeding to file a Complaint prior to meeting the statutory requirements.

11. This Complaint does not further the goal of public protection or protection of the public health, safety or morals as there is no allegation or evidence of injury to the patients.

12. The Complaint, or portions thereof, should be dismissed on grounds of equitable estoppel.

Based on the above, Respondent Dr. Robertson respectfully requests that he be assessed no administrative penalty or any sanctions.

CRIMINAL INDICTMENT

2:19-cr-00154

CASE NO: ~~2:18-CR-~~154

VIOLATIONS:

21 U.S.C. § 841(a)(1) & (b)(1)(E) and b(2) – Distribution of a Controlled Substance (Schedules III & IV)

21 U.S.C. § 843 – Obtaining a Controlled Substance by Misrepresentation

21 U.S.C. § 846 - Conspiracy to Distribute a Controlled Substance

21 U.S.C. § 856 – Maintaining a Drug-Involved Premises

18 U.S.C. § 2 – Aiding and Abetting

THE GRAND JURY CHARGES THAT:

INTRODUCTION

At all times material to this Indictment:

1. The Controlled Substances Act, Title 21, United States Code, Sections 801, *et seq.*, governs the manufacture, distribution, and dispensing of controlled substances in the United States. With limited exceptions for medical professionals, the CSA makes it "unlawful for any person knowingly or intentionally ... to manufacture, distribute, or dispense ... a controlled substance."

2. The CSA defines a "controlled substance" as a drug or other substance that is included in one of five schedules - Schedule I, II, III, IV, or V - of Subchapter I, Part B of the Act. 21 U.S.C. § 802(6). Drugs or substances are placed into these schedules based, at least in part, on their potential for abuse, likelihood of physical or psychological dependency, accepted medical use, and accepted safety for use under medical supervision.

a. "Schedule II" indicates that the drug or other substance has a currently accepted medical use with severe restrictions and has a high potential for abuse that can lead to severe psychological or physical dependence. 21 U.S.C. § 812(b)(2).

b. "Schedule III" indicates that the drug or other substance has a currently accepted medical use with a potential for abuse that is less than those drugs listed in Schedule II, but can lead to moderate or low physical dependence or high psychological dependence. 21 U.S.C. § 812(b)(3).

3. Title 21, Code of Federal Regulations, Sections 1308.12, 1308.13, 1308.14, and 1308.15 lists the drugs and other substances contained in Schedules II, III, IV, and V, respectively.

4. Title 21, United States Code, Section 822(b) and Title 21, Code of Federal Regulations, Section 290.1, provide that the controlled substances listed in Schedules II-V can be dispensed or distributed only pursuant to a prescription issued by a medical

practitioner registered with the United States Drug Enforcement Administration ("DEA"). The DEA, as authorized by the Controlled Substances Act, issues registration numbers to qualifying medical practitioners that allow them to issue prescriptions for Schedule II-V controlled substances.

5. Accordingly, under Title 21, Code of Federal Regulations, Section 1306.03, controlled substances, such as opioid pain medications, can be dispensed only pursuant to a valid prescription from a medical practitioner authorized by the DEA to distribute controlled substances.

6. Under Title 21, United States Code, Section 802(10), the term "dispense" means to deliver a controlled substance to an ultimate user or research subject by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance and the packaging, labeling, or compounding necessary to prepare the substance for such delivery. The term "dispenser" means a practitioner who so delivers a controlled substance to an ultimate user.

7. Under Title 21, United States Code, Section 802(11), the term "distribute" means to deliver (other than by administering or dispensing) a controlled substance or a listed chemical. The term "distributor" means a person who so delivers a controlled substance or a listed chemical.

8. Title 21, Code of Federal Regulations, Section 1306.04 provides that in order for a prescription for a controlled substance to be valid, it "must be issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice."

9. A prescription for a controlled substance issued without a legitimate medical purpose or outside of the individual practitioner's usual course of his professional practice

is not a valid prescription, and the person who issues the prescription violates Title 21, United States Code, Section 841(a)(1).

10. The Defendant, Chad Hall (hereinafter "Hall"), is a licensed Doctor of Osteopathic Medicine ("D.O.") who practices in Nevada under D.O. license number DO1729. As part of Hall's practice, he prescribes Controlled Substances, including highly addictive opioids, under his DEA license number FH3496557. Hall maintains the licensure for a medical practice known as Detoxification Solutions ("Solutions"), doing business as Advanced Medical – Center for Detoxification and Psychiatry (CPRX), LLC.

11. The Defendant, Michael Halprin (hereinafter "Halprin") a/k/a Michael Vincent, is an unlicensed, in Nevada, Advanced Practice Registered Nurse ("APRN") who formerly practiced in Florida under license number APRN935042. Halprin cannot prescribe any medications, including controlled substances, or independently provide treatment for patients. Halprin is the sole managing member of Solutions. Halprin sometimes presents himself to patients as "Dr. Mike."

12. The Defendant, Ronald Smith ("Smith"), is a licensed Medical Doctor ("M.D.") who practices in Nevada under M.D. license number 11778. As part of Smith's practice, he prescribes Controlled Substances including highly addictive opioids, under his DEA license number BS9687116.

13. The Defendant, Janell Olson ("Olson") is not licensed as a medical practitioner. Olson cannot issue valid prescriptions for any medications, including controlled substances, or independently provide treatment for patients.

14. The Defendant, Eghomware Igbinovia, a/k/a Jerry Igbinovia (hereinafter "Igbinovia"), is the owner and head pharmacist at ACRx Pharmacy ("ACRx"), 3200 N. Soaring Gulls Dr., Suite 101, Las Vegas, Nevada, 89129. Igbinovia is responsible for

furnishing specially compounded patient-specific buprenorphine troches directly to Solutions.

15. During the date range alleged in this Indictment, Defendants Hall and Smith routinely prescribed Schedule III controlled substances including buprenorphine and Suboxone to Solutions patients, outside the usual course of professional practice, without a legitimate medical purpose. Additionally, Defendant Halprin routinely distributed Schedule III controlled substances, including buprenorphine and Suboxone, without a medical license or a DEA Number. Defendant Olson also distributed Schedule III controlled substances without a medical license or a DEA Number and assisted all other defendants in their unlawful practices.

16. Defendants Hall, Halprin, Smith and Olson also submitted patient-specific prescriptions for specially-compounded buprenorphine lozenges under false patient names to ACRx Pharmacy. Defendant Igbinovia specially compounded the buprenorphine lozenges and delivered them to Solutions. Hall, Halprin, Smith and Olson then dispensed these patient-specific Schedule III medications to patients at Solutions in exchange for cash payments.

Brett,

I telephoned Chad Hall and Michael Sanft once I noticed your message. I am in the state of Utah right now and the notice of hearing mailed out was sent to an old office address that I never received.

I recognize that you were moving this case forward around the holidays and that I am just now getting back to work and noticing your attempts to contact me.

Could you please stipulate to a 30 day continuance of the hearing? We will not request another continuance. I am forwarding your emails and documents to Michael Sanft, who will have to take over at this point, since he is the only one being paid by Chad Hall regarding any legal matters at this time.

Please let me know as soon as you can. Thank you Brett.

Brett I spoke to my client about what we discussed on Friday. He is willing to agree to continue any action to January and agrees not to write any scrips for controlled substances as we discussed. This will leave his license intact.

Please prepare the document and I will have him sign and get it back to you. Thanks Brett.

Provide explanation below:

My sister in law asked me if I could pick her up in Park City, UT. I never drove by myself to Park City before and wasn't familiar with the road so I asked my friend to drive with me. When I got to my friend's place (Willow Cove apartment), the parking stall was pretty tight. I tried to adjust several times to park and I felt that my car bumper hit a tire of the pickup truck which was parked in the next stall. After I checked the condition of the tire and my car bumper, I went up to my friend's house while running my car to ask her opinion on what to do. She said she knows where the truck owner lives and she will explain to him in person since the damages are barely noticeable. I didn't have much experience and never been involved in any type of car accident before. I was vulnerable to take my friend's advice. When we got out of her apartment, she mentioned that I'm not allowed to park my car in the residential parking area so I moved my car to the public parking area which was the closest available one from the pickup truck. While leaving my car there,I requested my friend to drive her car instead. After we got back from Park City, the note from the truck owner was left on my car windshield. The note was saying that I need to contact him right away. When I called him back, he said that he wanted to give me a lesson about not leaving contact information after the accident and he said that he already called the police. After I explained what was going on, he said that he wanted to help me cancel the police report. So we called back to the police station but the officer said that it's impossible to cancel the report once the report was accepted by the police station. I got a fine and my license had been on probation for 6 months. Based on my clean driving history, my case was dismissed.
