FDA's acceptance of registration and listing information, inclusion of a drug in our database of drugs, or assignment of an NDC does not denote approval of the establishment or the drug or any other drugs of the establishment, nor does it mean that the drug may be legally marketed. Any representation that creates the impression that a drug is approved or is legally marketable because it appears in our database of drugs, has been assigned or displays an NDC, or the establishment has been assigned an establishment registration number or Unique Facility Identifier is misleading and constitutes misbranding (21 CFR § 207.77(b)).

Pauliana Hall,

The purpose of requesting a labeler code is to list drugs (prescription or OTC) that you manufacture or distribute in the US. If you do not have any drugs manufactured or distributed for US commercial distribution, your labeler code cannot remain active indefinitely. Email us when you are ready to launch your products, and we can reactivate your labeler code 70792.

Dear Sir/Madam:

We confirm that we do not have any marketed product required listing at the FDA.

We would like to keep our Labeler Code 70792 remain active in anticipation of our lead product candidate registration next year if the outcome of our ongoing Phase 3 clinical study is statistically very persuasive.

Thank you very much for your followup with us!

RE: Labeler Code 70792 verification
Dear Pauliana Hall:
The Food and Drug Administration?s Drug Registration and Listing System employs a number of surveillance methods and quality control checks to ensure the completeness and accuracy of the drug listing data. A recent check of our database indicates that there are no drug product listings for the labeler code referenced above, which was assigned to Tonix Pharmaceuticals, Inc. over two years ago.
Section 510(j) of the Federal Food, Drug, and Cosmetic Act (FDCA) provides that every person required to register with FDA must, at the time of initial registration list all drugs which are being manufactured, prepared, propagated, compounded, or processed by him for commercial distribution. Drug listing information also must be updated in June and December each year to report any material change in a previously listed drug; any new drugs introduced into US commercial distribution; or any drugs being discontinued. In addition, owners or operators of establishments not otherwise required to register under section 510 of the act that distribute under their own label or trade name a drug manufactured or processed by a registered establishment may elect to submit listing information directly to FDA and to obtain a Labeler Code. All distributors who submit drug listing information to FDA assume full responsibility for compliance with all of the listing requirements.
The labeler code is a unique 4 or 5 digit number assigned to any company that manufactures or distributes drug(s). Firms use this FDA assigned labeler code to compose a unique National Drug Code (NDC) for drugs they manufacture or distribute for commercial distribution in the United States. This NDC number is reported by labelers as part of their drug listing requirements. It is used by the FDA for surveillance and regulation of the pharmaceutical industry. It is also used by the Centers for Medicare and Medicaid Services (CMS) as well as other government agencies and the medical insurance industry for reimbursement and other medical benefits. Assignment of NDC numbers to non-drug products is extremely prohibited. Furthermore, assignment of an NDC does not denote approval or endorsement of the firm or its products by the FDA. Any representation that creates an impression of such approval or endorsement because of the possession of an NDC is misleading and may constitute misbranding, resulting in legal action.
We request that you respond to this notification by emailing us at eDRLS@fda.hhs.gov within 30 days of receipt to state the reason for your continuing need for this labeler code assignment.

- If you do not manufacture or distribute drugs for US commercial distribution and do not need the labeler code anymore, please state so in your response. In addition:
- If the labeler code was requested and assigned after June of 2009 (via Structured Product Labeling (SPL) and the electronic submissions process), then please submit an NDC Labeler Code Inactivation SPL to close it out. (For assistance in the electronic submission of registration and listing data via Structure Product Labeling SPL, please refer to our website at www.fda.gov/edrls)
- If the labeler code was assigned prior to June of 2009 (via paper submission), no further action is necessary other than including it in your email response. We will administratively inactivate the labeler code.

- If you have drug(s) listed with the FDA, please provide in your response the full ten digit NDC number, proprietary/established name, and packaging for each drug product. The FDA may require a copy of the original Form 2656 for product listings that were submitted in paper prior to June 2009.
- If you do not have any drugs listed with FDA, but believe you are required to have an active Labeler Code, please state in your response the reason you believe your Labeler Code should remain active.

If you have any questions, think you received this letter in error, please contact the Drug Registration & Listing (DRLS) team at the email address below.

Sincerely,

Drug Registration and Listing Team

Description of Disciplinary Action and Remedial Actions

In November 2022, MedMinder Pharmacy converted its pharmacy information software to a new product, McKesson Enterprise. In early 2023 were informed by the Colorado PDMP that they were not receiving the required daily reports.

After being informed that the PDMP was not receiving reports there were multiple communications between MedMinder and the Colorado Board of Pharmacy to resolve the problem. We also investigated our reporting procedures to ensure that reports were both submitted by MedMinder and received by PDMP. One of the issues that we discovered was that we could not identify if a report was missing until notified by the PDMP.

Ultimately MedMinder decided it would be in its best interest to upgrade from McKesson internal controlled substance reporting to a third-party reporting software which is fully automated and currently functioning as it should.

As the Colorado State Board of Pharmacy concluded its inquiry into the matter, it was the Board's decision not to commence with formal proceedings against our professional license. However, the Colorado Board did determine disciplinary action in the form of a letter of admonishment was warranted. MedMinder agreed to the acceptance of the admonishment letter. A copy of the letter is attached.

Re: License Number: OSP.6771
Case Number: 2023-1045

Dear Pharmacist Manager,

The State Board of Pharmacy ("Board") has concluded its inquiry into the aforementioned matter. It was the Board's decision not to commence with formal proceedings against your professional license. However, the Board did determine disciplinary action in the form of this letter of admonition is warranted, pursuant to section 12-280-127(6), C.R.S.

Failing to timely submit data into Colorado's Prescription Drug Monitoring Program violates section 12-280-126(1)(c)(I) and (III) and (k), C.R.S.

By this letter, the Board takes the formal disciplinary action of admonishing you for the conduct specified above, and warns you that repetition of such practice may lead to imposition of more severe disciplinary action. This letter is an open public record and a reportable action to individuals or entities requesting disciplinary information. The Board strongly encourages you to review and understand the Pharmacists, Pharmacy Business, and Pharmaceuticals Practice Act requirements and obligations for the practice of pharmacy or as a pharmacy technician in Colorado.

In accordance with section 12-20-404(4), C.R.S., the Board advises you that you have the right to make a written request that the Board initiate formal disciplinary proceedings in order to adjudicate the conduct or acts upon which this letter is based. You must make your written request within twenty (20) days after receipt of this letter and address your request to Dmitry Kunin, Program Director, at the address listed below. If you make a timely request, the Board will deem this letter of admonition vacated and may proceed with disciplinary and/or injunctive proceedings in accordance with section 12-20-404(4)(b)(II), C.R.S., and applicable rules.

A Letter of Admonition, when accepted, becomes a permanent, public portion of your record. It is not, however, a restriction on your practice as a professional pharmacist or pharmacy technician.

If you have further questions or concerns, please visit our website at https://www.colorado.gov/dora/dpo or you can contact our office at dora_pharmacyboard@state.co.us or by calling (303) 894-7800.

Sincerely,

FOR THE STATE BOARD OF PHARMACY

Texas State Board of Pharmacy
"Red Flags" Checklist for Pharmacies
YOU MIGHT BE A PILL MILL IF...

Check all that apply:

	(1) Your pharmacy fills a discernable pattern of prescriptions for prescribers who write essentially the same prescriptions for numerous persons, indicating a lack of individual drug therapy
	(2) Your pharmacy operates with limited hours of operation or closes after a certain threshold of controlled substance prescriptions are dispensed, and has overall low prescription dispensing volume.
	(3) Prescriptions presented to the pharmacy are for controlled substances with popularity as street drugs, such as opiates, benzodiazepines, muscle relaxants, psychostimulants, and/or cough syrups, or any combination of these drugs.
	(4) The prescriptions for controlled substances contain nonspecific or no diagnoses.
	(5) The prescriptions are commonly for the highest strength of the drug and/or for large quantities.
	(6) Dangerous drugs or OTC products (such as multi-vitamins or laxatives) are added to the controlled substance prescriptions, maintaining relatively consistent 1:1 ratio of controlled substances to dangerous drugs and/or OTC products dispensed as prescriptions.
	(7) Prescriptions are authorized by the same prescriber with what appears to be different handwriting on the hardcopy prescription drug order forms.
	(8) Upon contact with the prescriber's office, you are unable to engage in comprehensive discussion with the actual prescriber, or he/she is unconcerned about your apprehensions regarding his/her prescribing practices or unwilling to provide additional information, such as treatment goals and/or prognosis with prescribed drug therapy.
	(9) You rely solely on the prescriber's representation, or on the representation of the individual answering the phone at the number on the prescription, that prescriptions are legitimate.
	(10) The prescriber's clinic is not registered as a pain management clinic by the Texas Medical Board, despite routinely receiving prescriptions from the prescriber foropiates, benzodiazepines, and/or muscle relaxants.
	(11) Drugs prescribed are inconsistent with the prescriber's area of practice.
	(12) The prescriber of the drugs is located a significant distance from your pharmacy.
	(13) The prescriber has been subject to disciplinary action by the licensing board, had his/her DEA registration removed, or been subject to criminal action.
	(14) The Texas PMP system indicates that persons are obtaining prescriptions for the same drugs from multiple prescribers or that persons are filling prescriptions for the same drugs at multiple pharmacies.
	(15) The person's address is a significant distance from your pharmacy and/or from the prescriber's office.
	(16) Multiple persons with the same address present prescriptions from the same prescriber.
	(17) Persons pay with cash or credit card more often than through insurance.
	(18) Persons presenting controlled substance prescriptions are doing so in such a manner that varies from seeking routine pharmacy services (e.g., willing to wait in long lines to receive drugs, persons arrive in the same vehicle with prescriptions from same prescriber, one person presents to pick up prescriptions for multiple others, persons refer to drugs by "street names" and/or comment on drug's color, persons seek early refills, persons travel from outside reasonable trade area of pharmacy).
	(19) Your pharmacy charges and persons are willing to pay more for controlled substances than they would at nearby pharmacies.
	(20) Your pharmacy routinely orders controlled substances from more than one drug supplier, or your pharmacy has been discontinued by a drug supplier related to controlled substance orders.
	(21) Sporadic and non-consistent dispensing volume (including zero dispensing) varies from day to day and week to week, and your pharmacy does not maintain operational hours each week on Monday through Friday.
	(22) Your pharmacy employs or contracts security personnel during operational hours to prevent problems.
	(23) Your pharmacy has been previously warned or disciplined by the Texas State Board of Pharmacy for inappropriate dispensing of controlled substances (i.e., corresponding responsibility).

If you checked any of the above items, you should review the laws and rules regarding corresponding responsibility and non-therapeutic dispensing, especially Board rule §291.29, in the law book or on our website: www.pharmacy.texas.gov (click on Texas Pharmacy Rules and Laws). Additional educational material is available at: http://www.pharmacy.texas.gov/Nontherapeutic.asp. Failure of pharmacies and pharmacists to detect patterns of inappropriate dispensing of prescription drugs is unprofessional practice and constitutes grounds for disciplinary action.

Section 3: History of Company

Statement of Explanation for Question 3: "Has the corporation, any owner(s), shareholder(s) or partner(s) with any interest, ever been subject of an administrative action, board citation, cite fine, or proceeding related to the pharmaceutical industry?

Regarding the question at hand, the answer is affirmative but pertains to a different pharmacy location (Portland, OR) owned by the same entity as our pharmacy seeking licensure in Harrisburg, PA.

On November 23, 2016, Vetsource Home Delivery (located in Portland, OR), was named in an Administrative Complaint, File #53-16-142154 issued by the Michigan Department of Licensing and Regulatory Affairs. The complaint accused Vetsource Home Delivery of submitting prescription drug monitoring data files with incomplete information and failing to respond to email notifications regarding the errors. On June 27, 2017, Vetsource Home Delivery agreed to a Consent Order, including a $500 fine and sanctions, to settle the complaint. Vetsource Home Delivery accepted the agreement, paid the fine, and disclosed the sanctions. An accurate and authentic copy of the Consent Order is included with this letter.

Vetsource Home Delivery (Portland, OR) has a miscellaneous Pharmacy permit, Permit Number PMP 540, in Hawaii. However, the Hawaii Regulated Industries Complaints Office ("RICO") initiated an investigation into Vetsource Home Delivery, claiming that the pharmacy failed to properly disclose the Michigan consent order information to the Hawaii Board of Pharmacy under Haw. Rev. Stat. §436B-19(13) and (15). To avoid the costs, inconvenience, delays, and uncertainties of contesting the alleged violations, Vetsource Home Delivery agreed to a Settlement Agreement Prior to Filing of Petition for Disciplinary Action with RICO on November 14, 2019, and paid a $1,000 fine. On January 23, 2020, the Hawaii Board of Pharmacy approved the Settlement Agreement Prior to Filing of Petition for Disciplinary Action. Vetsource Home Delivery was notified of the approval on January 27, 2020.

This letter contains an accurate and authentic copy of the Settlement Agreement between Vetsource Home Delivery and RICO, signed by both parties. Under the agreement, Vetsource Home Delivery does not admit to any violation of law or regulation but acknowledges RICO's right to pursue disciplinary action.

8. Respondent does not admit to violating any law or rule, but acknowledges that RICO has sufficient cause to file a Petition for Disciplinary Action against Respondent's permit.

9. Respondent enters into this Settlement Agreement as a compromise of the claims and to conserve on the expenses of proceeding with an administrative hearing on this matter.

10. Respondent agrees that this Settlement Agreement is intended to resolve the issues raised in RICO's investigation in RICO Case No. PHA 2019-76-L.

11. Respondent understands this Settlement Agreement is public record pursuant to Hawaii Revised Statutes Chapter 92F.

C. TERMS OF SETTLEMENT:

1. Administrative Fine. Respondent agrees to pay a fine in the amount of ONE THOUSAND AND NO/100 DOLLARS ($1,000.00). Payment shall be made by **cashier's check or money order made payable to "DCCA - Compliance Resolution Fund"** and mailed to the Regulated Industries Complaints Office, Attn: Stacia M. Silva, Esq., 235 S. Beretania Street, 9th Floor, Honolulu, Hawaii 96813. Payment of the fine shall be due at the time this Settlement Agreement is returned to RICO.

In case of such revocation, Respondent shall turn in all indicia of licensure to the Executive Officer of the Board within ten (10) days after receipt of notice of the revocation. In case of such revocation, Respondent understands Respondent cannot apply for a new permit until the expiration of at least five (5) years after the effective date of the revocation. Respondent understands that if Respondent desires to become permitted again, Respondent must apply to the Board for a new permit pursuant to and subject to HRS §§ 92-17, 436B-21, and all other applicable laws and rules in effect at the time.

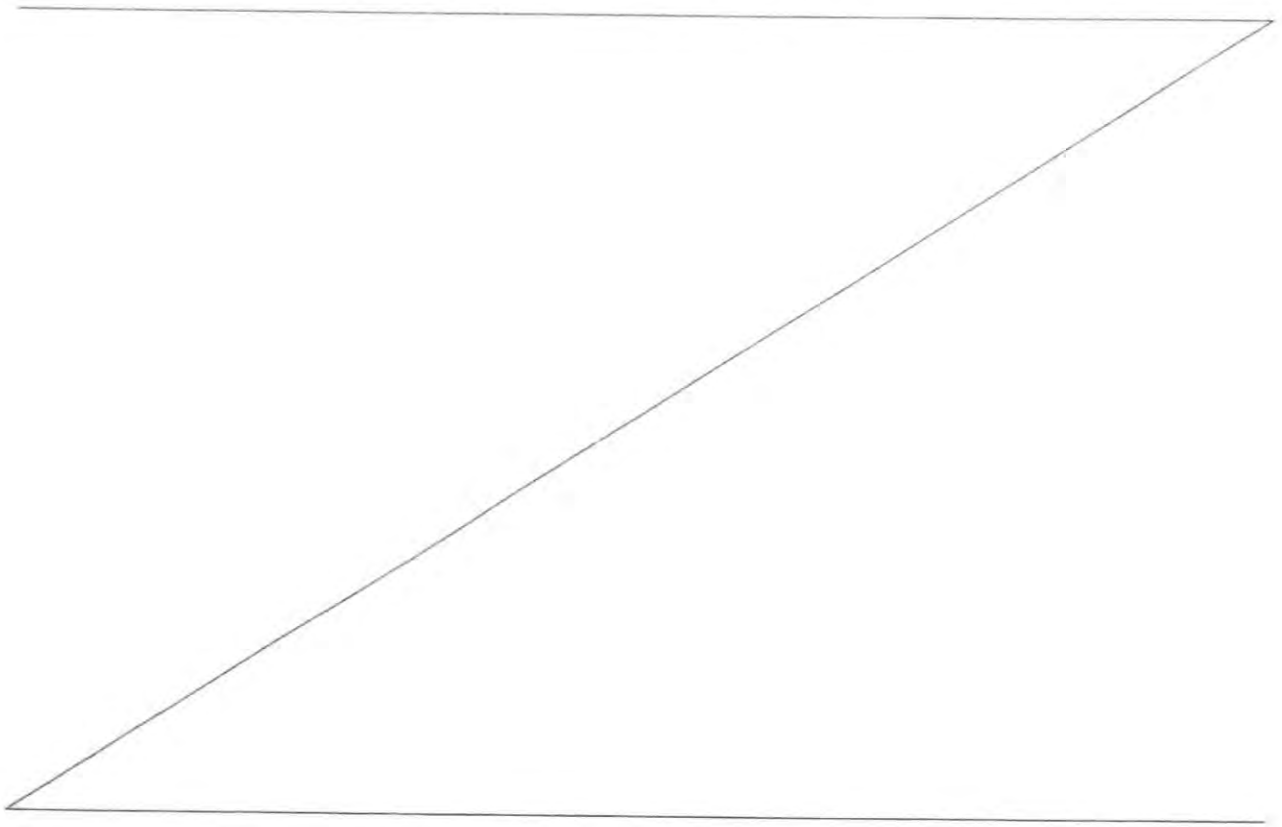
3. Possible Further Sanction. 4. Approval of the Board. Respondent agrees that, except for the representations, agreements and covenants contained in Paragraphs C.5., C.6., C.7., and C.8. below, this Settlement Agreement shall not be binding on any of the parties unless and until it is approved by the Board.



5. No Objection if Board Fails to Approve. If the Board does not approve this Settlement Agreement, does not issue an order pursuant thereto, or does not approve a lesser remedy, but instead an administrative hearing is conducted against Respondent in the Board's

usual and customary fashion pursuant to the Administrative Procedure Act, Respondent agrees that neither Respondent, nor any attorney that Respondent may retain, will raise as an objection in any administrative proceeding or in any judicial action, to the Board's proceeding against Respondent on the basis that the Board has become disqualified to consider the case because of its review and consideration of this Settlement Agreement.

Vetsource SOP 10: Administrative Requirements Quality Assurance Program

Item F, G, H:

- Vetsource defines a pharmacy service complaint and/or dispensing error as a Quality Related Event in SOP 10.
    - They are also further defined as a "product quality complaint" in SOP 7 Reporting Adverse Drug Events, when the complaint is about a manufacturer's defect.
    - All ADEs and product quality complaints are documented and reported to the drug manufacturer.
- Service complaints and errors are documented by the QA team(s).
    - These issues are resolved with the pet owner immediately after the investigation is completed.
    - Often, the pharmacy team is also in touch with the prescribing veterinarian to help resolve complaints and service issues reported by a pet owner.
    - Pharmacists may communicate with the pet owner and vet hospital depending on the nature of the event.
- The QA team and the PIC review all quality events and determine whether any of the following actions are warranted:
    - Assign root cause analysis, retrain and/or discipline staff, conduct staff awareness meetings, update SOPs or other procedures, develop technology solutions for further error prevention.
- Additionally, Vetsource records all calls and monitors for quality assurance, regulatory compliance and training.
    - SOP 55 Telework outlines procedures for recording and monitoring calls, and ensuring oversight of the call center and other remote pharmacy personnel.

Vetsource SOP 35: Pharmacist Procedures Client Notification Undue Delay

Item I:

- The pharmacy has specific procedures for notifying clients when a medication is out of stock or a shipment is delayed. If an order is delayed more than 24 hours, clients are notified.
    - In the event of a delayed order, Vetsource will establish the necessary delivery timeline with the pet owner, oftentimes upgrading the shipping at no cost to the pet owner.
- Vetsource does not make order substitutions. The pharmacy ensures that all orders are shipped exactly as prescribed.
    - This is due to the fact that there is limited data on the therapeutic equivalence between branded and generic veterinary medications.

Vetsource SOP 23: Inventory Maintenance Product Recalls and SOP 22: Inventory Maintenance Expiring Meds

Item J:

- The pharmacy has defined procedures for ensuring notification of the pet owner and veterinary practice for recalls:
    - Recall notices are immediately reviewed and prioritized
    - All Recalls are reviewed in the central inventory database and investigated for products that may be in the pharmacies and need to be quarantined
    - The Portland PIC will confirm the severity of the Recalls (Class I, II or III) and will initiate the appropriate notification protocol
    - Procedures will include instructions for pet owners to return the product to the pharmacy for return to the manufacturer, if applicable
- The inventory team will continually monitor the central inventory database for medications that expire with less than 12 months expiration dating. Short dated medications will be removed from stock and quarantined.
- In some cases, short dated medications may be sold provided that the Expiration date is clearly marked on the pharmacy label. E.g. immediate and one time use products.

    - Vetsource maintains a reference log that documents the allowable temperature excursions for sensitive and popular products, sourced from the manufacturer
    - Vetsource ensures the appropriate packaging and handling for sensitive items and denotes these products in our catalog database, adjusting this list where needed
    - All refrigerated items are packed in coolers and overnighted. Each item has a temperature indicator device (Warm Mark tag) that alerts the pet owner if a product experienced an inappropriate temperature exposure.

120 ADDITIONAL ARREST INFORMATION

On 8-20-2015 at about 2345 hours, Sgt. METOYER, Officer BROWNLEE and I were flagged down by the manager of Hurricanes at 200 Main St #201 for a report of a female causing a disturbance and refusing to leave. We responded to the back door of Hurricances and the manager pointed her out to us. She was standing outside the door blocking the entrance and exit and refusing to leave. She demanded to be let back in several times and refused my directions to leave. She had the objective symptoms of intoxication. I could smell a strong odor of alcoholic beverage coming from her breath and person. She had blood shot watery eyes and slurrred speech. The female later identified as CORPUZ would not give her name and would not answer any of my questions. She continuously yelled " I wanna go in" and made several attempts to walk in. I advsed her she would be placed under arrest if she continued to cause a scene. She then told me to arrest her turned around and put her hands behind her back and kept backing up into me. Based on her consistent yelling, constant effort to go into HURRICANES despite staff physically trying to stop her, I determined she was so intoxicated she was unable to care for her safety or the safety of others. I was also unable to locate anyone to care for her. I placed her under arrest and placed her in handcuffs without incident. Once she was in handcuffs she became stiff then limp several times then went to the ground. She refused to get up, then suddenly tried to get up and walk away. I placed a hold of her left arm to stop her and she threw herself on the ground again. SGT. METOYER and BROWNLEE detained her by holding her legs and arms, while I pulled a patrol vehicle close. We then placed her in a RIPP hobble restraint and RIPP violent prisoner transport restraint (VPT) for precaution while we placed her the patrol vehicle. As she got in the patrol vehicle she tried several times to bang her head on the back seat. I was able to stop her by holding her shoulders and legs. Officer BROWNLEE was able to connect the VPT which prevented her from huritng herself. We then transported her to the jail where she was booked without any further incident. I conducted no further investigation at this time.

Provide explanation below: In 2001, shortly after I turned 18 years old I was involved in a car accident and the passenger in my vehicle was hurt and had to be hospitalized. I was speeding in a 25mph zone. Because of this I was convicted of reckless driving causing substantial bodily harm. I was sentenced to informal probation and community service. After completion of my probation my attorney filed a motion to have my records sealed so that this would never hinder me from getting a job seeing as I was so young and had my whole future ahead of me. Since then I have never put this on a job application. I have held a Nevada state gaming license, cleared an FBI background check for a CNA License. I was previously a medication Technician at a Senior Living facility and I cleared a FBI background check for that as well. (cont.)

Provide explanation below:

I had my gaming license from 2010 to 2014. My medication technician FBI background check was in 2022 and that same year is when I passed the FBI background check to become a CNA. Never once have I ever failed a background check for employment so I assumed incorrectly that I didn't have to disclose it because ~~had~~ I didn't before and it never came up. I assumed it was cleared off my record. I wasn't trying to deceive anyone I honestly just thought that horrible mistake was behind me and off my record. I am sorry I don't have any of the court documentation any more. (cont.)

Hello,

Yes, I got a DUI in 2011. A couple days after we spoke, I thought about it and wondered why that didn't show on my background check as well, since you stated that even though my records were sealed the state board of pharmaceuticals are able to see even sealed convictions. There also would be a charge on my record for "failure to supervise" that was a charge that was brought up from a messy divorce from my ex husband. I don't remember the year of that conviction. I am not the same person I was back then and I am not proud of who I was back then. I have since then dedicating my life to helping others and being the best person I can be.

Again, none of these things have ever shown up on any other background checks that I have submitted which I assumed was because I had my records sealed. Please let me know if this is going to prevent me from getting my license, as I can pursue other opportunities as a CNA and continue to do what I do best, which is help others. I love my job as an inpatient pharmacy technician and I would hate to have to leave Renown. I am also acutely aware that I should have listed these things on my application and paid more attention to where it said even if my records were sealed I had to disclose these convictions. Please let me know how I should proceed.

Thank you,
Shelah O'Neal

To Whom It May Concern-

In 2022, I was living in St.George, Utah while attending school at Dixie Tech.

I was hanging out with questionable people that I thought were friends and made the choice to drive them to another one of their friend's house.

While waiting in the car in front of the house with one friend a bike policeman came up to the car and questioned why we were there. He then asked us to get out of the car while he searched it. He found an open can of beer and remnants of marijuana. After further search he found a gun.
The gun was not mine however; I was arrested. I submitted a breathalyzer and blew 0.00 but then they did a blood draw at the jail and it showed some marijuana in my system.

I was 23 and the vehicle is mine. I took full responsibility of my poor choices and accepted the consequences of my actions.

I immediately retained an attorney and moved home with my parents.
I completed all of the court requirements right away.

I have never been in any trouble before this incident therefore the prosecutor down graded the gun charge to a misdemeanor. I have 2 years probation. It will be off my record in 7 years. All other charges were dropped.
I do not have any plans of repeating any of the mistakes I have made.

I completed the Pharmacy Tech program at Pima Institute in Las Vegas. I graduated with honors. I got a job immediately after my externship at Walgreens.

I am so sorry for not including this information on my application. I did not understand the ramifications of saying no.

I pray that you will accept this information and hope that I will be able to get my Pharmacy Tech license. I love and thrive in this field and want to go back to school to become a Pharmacist.

I understand my answer has delayed my license but am willing to help in any way I can to expedite the process as I am gainfully employed and would hate to have ruined this opportunity.

If you have any further questions please feel free to contact me.

Thank you for your time and prompt attention to this matter.

Sincerely,

FIFTH DISTRICT COURT
WASHINGTON COUNTY, STATE OF UTAH

STATE OF UTAH, Plaintiff, vs. WESLEE BRYAN NESHEIM, Defendant.	PLEA IN ABEYANCE AGREEMENT, STATEMENT OF DEFENDANT IN SUPPORT OF GUILTY PLEA, AND CERTIFICATE OF COUNSEL Criminal No. [redacted] Judge Keith C. Barnes

I, WESLEE BRYAN NESHEIM, hereby acknowledge and certify that I have been advised of and that I understand the following facts and rights:

Notification of Charges

I am pleading guilty to the following crime(s):

No.	Crime & Statutory Provision	Degree	Punishment Min/ Max and/or Minimum Mandatory

1	POSSESSION OF A DANGEROUS WEAPON BY A RESTRICTED PERSON, Section 76-10-503(3)(a), Utah Code Annotated, 1953, as amended. *This charge has been reduced from a third degree felony pursuant to Section 76-3-402, Utah Code Annotated, 1953, as amended.*	Class A Misdemeanor	One year in the Washington County Jail and a fine in the amount of $2,500.00, plus a 90% surcharge Plus a $53.00 Court Security Fee.

I have received a copy of the Information against me. I have read it, or had it read to me, and I understand the nature and the elements of the crime(s) to which I am pleading guilty.

The elements of the crime(s) to which I am pleading guilty are:

COUNT 1: POSSESSION OF A DANGEROUS WEAPON BY A RESTRICTED PERSON, a Class A Misdemeanor, in that the defendant, being a Category II restricted person, purchased, transferred, possessed, used, or had under his or her custody or control a firearm, in violation of Section 76-10-503(3)(a), Utah Code Annotated, 1953, as amended. *This charge has been reduced from a third degree felony pursuant to Section 76-3-402, Utah Code Annotated, 1953, as amended.*

I understand that by pleading guilty I will be admitting that I committed the crime(s) listed above. I stipulate and agree that the following facts describe my conduct and the conduct of other persons for which I am criminally liable. These facts provide a basis for the Court to accept my guilty plea and prove the elements of the crime(s) to which I am pleading guilty:

On or about April 02, 2022, in Washington County, Utah, Officers with St. George Police Department responded to assist the SGPD Bike Unit. Officers found the defendant, Weslee Bryan Nesheim, knowingly and intentionally in possession of a small black handgun with a loaded magazine in the glove box of the vehicle. The defendant is a Category I restricted person.

Waiver of Constitutional Rights

I am entering these pleas voluntarily. I understand that I have the following rights under the constitutions of Utah and of the United States. I also understand that if I plead guilty I will give up all the following rights:

Counsel. I know that I have the right to be represented by an attorney and that if I cannot afford one, an attorney will be appointed by the Court at no cost to me. I understand that I might later, if the judge determined that I was able, be required to pay for the appointed lawyer's

service to me.

I (have not) (have) waived my right to counsel. If I have waived my right to counsel, I have done so knowingly, intelligently, and voluntarily for the following reasons:

If I have waived my right to counsel, I certify that I have read this statement and that I understand the nature and elements of the charge(s) and crime(s) to which I am pleading guilty. I also understand my rights in this case and other cases and the consequences of my guilty plea.

If I have **not** waived my right to counsel, my attorney is Jacob E. Fisher. My attorney and I have fully discussed this statement, my rights, and the consequences of my guilty plea.

Jury Trial. I know that I have a right to a speedy and public trial by an impartial (unbiased) jury and that I will be giving up that right by pleading guilty.

Confrontation and cross-examination of witnesses. I know that if I were to have a trial: (a) I would have the right to see and observe the witnesses who testified against me; and (b) my attorney, or myself if I waived my right to an attorney, would have the opportunity to cross-examine all of the witnesses who testified against me.

Right to compel witnesses. I know that if I were to have a trial, I could call witnesses if I chose to, and I would be able to obtain subpoenas requiring the attendance and testimony of those witnesses. If I could not afford to pay for the witnesses to appear, the State would pay those costs.

Right to testify and privilege against self-incrimination. I know that if I were to have a trial, I would have the right to testify on my own behalf. I also know that if I chose not to testify, no one could make me testify or make me give evidence against myself. I also know that if I chose not to testify, the jury would be told that they could not hold my refusal to testify against me.

Presumption of innocence and burden of proof. I know that if I do not plead guilty, I am presumed innocent until the State proves that I am guilty of the charged crime(s). If I choose to fight the charge(s) against me, I need only plead "not guilty," and my case will be set for a trial. At a trial, the State would have the burden of proving each element of the charge(s) beyond a reasonable doubt. If the trial is before a jury, the verdict must be unanimous, meaning that each juror would have to find me guilty.

I understand that if I plead guilty, I give up the presumption of innocence and will be admitting that I committed the crime(s) stated above.

Appeal. I know that under the Utah Constitution, if I were convicted by a jury or judge, I would have the right to appeal my conviction and sentence. If I could not afford the costs of an appeal, the State would pay those costs for me. I understand that I am giving up my right to appeal my conviction if I plead guilty. I understand that if I wish to appeal my sentence I must file a notice of appeal within 30 days after my sentence is entered.

I know and understand that by pleading guilty, I am waiving and giving up all the statutory and constitutional rights as explained above.

Consequences of Entering a GUILTY Plea

Potential penalties. I know the maximum sentence that may be imposed for each crime to which I am pleading guilty. I know that by pleading guilty to a crime that carries a mandatory penalty, I will be subjecting myself to serving a mandatory penalty for that crime. I know my sentence may include a prison term, fine, or both.

I know that in addition to a fine, a ninety percent (90%) surcharge will be imposed. I also know that I may be ordered to make restitution to any victim(s) of my crimes, including any restitution that may be owed on charges that are dismissed as part of a plea agreement.

Consecutive/concurrent prison terms. I know that if there is more than one crime involved, the sentences may be imposed one after another (consecutively), or they may run at the same time (concurrently). I know that I may be charged an additional fine for each crime that I plead to. I also know that if I am on probation or parole, or awaiting sentencing on another offense of which I have been convicted or which I have plead guilty, my guilty plea now may result in consecutive sentences being imposed on me. If the offense(s) to which I am now pleading guilty occurred when I was imprisoned or on parole, I know the law requires the Court to impose consecutive sentences unless the Court finds and states on the record that consecutive sentences would be inappropriate.

Deportation. I know, and it has been explained to me, that a Plea in Abeyance may have adverse immigration consequences. Further, I know and understand that a Plea in Abeyance could result in my removal and deportation. My attorney has advised me that Immigration Law is a specialized field, that my attorney is not an immigration lawyer, and that I would need to consult with an immigration specialist if I want further advice on that subject.

Enhanced Penalties for Future Convictions. I have been further informed that my Plea in Abeyance could be used in the future to increase the severity of future criminal offenses and/or increase the severity of the sentence that I might receive for convictions of criminal offenses.

Plea in Abeyance Agreement. My guilty plea is the result of a plea agreement between myself and the prosecuting attorney. All the promises, duties, and provisions of the plea agreement, if any, are fully contained in this statement as follows:

The foregoing plea will be held in abeyance for twenty-four (24) months from the date of this agreement. At the end of twenty-four (24) months, the defendant's plea will be withdrawn. and the defendant may move to have the charges dismissed if the defendant:

1. The defendant agrees to plead "guilty" to COUNT 1: COUNT 1: POSSESSION OF A DANGEROUS WEAPON BY A RESTRICTED PERSON, a Class A Misdemeanor; *This charge has been reduced from a third degree felony pursuant to Section 76-3-402, Utah Code Annotated, 1953, as amended.*

2. The State agrees to dismiss COUNT 2: DRIVING UNDER THE INFLUENCE OF ALCOHOL AND/OR DRUGS, a class B misdemeanor; COUNT 3: POSSESSIN OR USE OF A CONTROLLED SUBSTANCE (MARIJUANA), a class B Misdemeanor; COUNT 4: POSSESSION OF DRUG PARAPHERNALIA, a class B Misdemeanor; COUNT 5: OPEN CONTAINER IN VEHICLE, a class C Misdemeanor.

3. The defendant shall pay a $1,000.00 fee. Said fine shall be paid at the rate of $50.00 per month payable on the first of the month. 12/1/22

4. The defendant is not to possess any firearm during the term of this Plea in Abeyance.

5. The defendant shall submit to a search of his person possessions, vehicles, and residence upon request of a peace officer, probation officer, or any official in any program in which defendant is enrolled including submitted to tests of his breath blood, urine, or any other bodily fluid to determine his compliance with the terms of this probation.

6. The defendant shall maintain full time employment and/or schooling.

Defendant's Certification of Voluntariness

I am entering this plea of my own free will and choice. No force, threats, or unlawful influence of any kind have been made to get me to plead guilty. No promises except those contained in this statement have been made to me.

I have read this statement, or I have had it read to me by my attorney, and I understand its contents and adopt each statement in it as my own. I know that I am free to change or delete anything contained in this statement, but I do not wish to make any changes because all of the statements are correct.

I am satisfied with the advice and assistance of my attorney.

I am 24 years of age. I have attended school through the 13+ grade. I can read and understand the English language. If I do not understand English, an interpreter has been provided to me. I was not under the influence of any drugs, medication, or intoxicants which would impair my judgment when I decided to plead guilty. I am not presently under the influence of any drug, medication, or intoxicants which impair my judgment.

I believe myself to be of sound and discerning mind and to be mentally capable of understanding these proceedings and the consequences of my plea. I am free of any mental disease, defect, or impairment that would prevent me from understanding what I am doing or from knowingly, intelligently, and voluntarily entering my plea.

I understand that if I want to withdraw my guilty plea, I must file a written motion to withdraw my plea before sentence is announced. I understand that for a plea held in abeyance, a motion to withdraw from the plea agreement must be made within 30 days of pleading guilty. I will only be allowed to withdraw my plea if I show that it was not knowingly and voluntarily made. I understand that any challenge to my plea made after sentencing must be pursued under the Post-Conviction Remedies Act in Title 78, Chapter 35a, and Rule 65C of the Utah Rules of Civil Procedure.

NEVADA STATE BOARD OF PHARMACY, Petitioner, v. LINCARE INC., License No. MP00012, Respondent.	CASE NO. 22-552-MP-N OBJECTION, ANSWER, AND NOTICE OF DEFENSE TO FIRST AMENDED NOTICE OF INTENDED ACTION AND ACCUSATION

The above-named Respondent, Lincare Inc. ("Lincare," or the "Respondent"), by and through its undersigned counsel of Holland & Hart LLP, in response to the First Amended Notice of Intended Action and Accusation filed on February 26, 2024 (the "Amended Accusation") filed in the above-captioned matter before the Nevada State Board of Pharmacy ("Board"), declares as follows in response to the Amended Accusation:

OBJECTIONS TO AMENDED ACCUSATION

Pursuant to NRS 639.244(1)(b), NRS 622A.320(1), and NRS 233B.121(4), Lincare makes the following objections to the Amended Accusation:

1. Lincare objects to the Amended Accusation as untimely and barred by the doctrine of laches, as it is premised upon and seeks to impose discipline for actions that allegedly occurred in calendar year 2022, despite the original Accusation and superseding Amended Accusation being filed in 2024 (*See* Accusation at 1; Amended Accusation at 1).

2. Lincare objects to the Amended Accusation as failing to state a claim for relief that is cognizable as a matter of law.

3. Lincare objects to the allegations in the Amended Accusation on the basis that it hired duly qualified personnel that discharged all regulatorily required activities and duties during the relevant time period of October 2022 through December of 2022, and no public or private harm has been alleged by the Board in connection with the assertions contained in the Amended Accusation.

ANSWER AND NOTICE OF DEFENSE

Pursuant to NRS 639.244(1)(b), NRS 622A.320(1), and NRS 233B.121(4), Lincare hereby answers the allegations in the Amended Accusation as follows:

HOLLAND & HART LLP
9555 HILLWOOD DRIVE, 2ND FLOOR
LAS VEGAS, NV 89134

JURISDICTION[1]

1. Answering Paragraph 1 of the Amended Accusation, this paragraph contains legal conclusions to which no response is required; nonetheless, to the extent there are factual allegations within Paragraph 1 of the Amended Accusation that require a response, Lincare admits that only it holds a license for the sale and distribution of medical devices, equipment, and gases ("MDEG"), License No. MP00012, for the facility located at 1380 Greg Street #201, in Sparks, Nevada (the "Sparks Facility"), and denies all allegations within Paragraph 1 of this Amended Accusation not specifically admitted herein.

FACTUAL ALLEGATIONS

2. Answering Paragraph 2 of the Amended Accusation, Lincare admits only that the Board conducted an inspection of the Sparks Facility on or about December 12, 2022, and denies all other allegations within Paragraph 2 not specifically admitted herein.

3. Answering Paragraph 3 of the Amended Accusation, Lincare admits only that, during October 2022, the Sparks Facility's previously designated administrator, Martin Salvo, had ceased employment at the Sparks Facility, and denies all other allegations within Paragraph 3 not specifically admitted herein.

4. Answering Paragraph 4 of the Amended Accusation, Lincare denies the allegations within this paragraph and puts the Board to its proof regarding its alleged lack of notice regarding the departure of the Sparks Facility's prior administrator.

5. Answering Paragraph 5 of the Amended Accusation, this paragraph contains legal conclusions to which no response is required; nonetheless, to the extent there are factual allegations within Paragraph 5 of the Amended Accusation that require a response, Lincare denies that it continued to operate the Sparks Facility "without an administrator" and puts the Board to its proof regarding its allegations.

[1] The headings used by Lincare in this Objection, Answer and Notice of Defense in response to the Accusation are copied from the Accusation for organizational purposes only; Lincare's adoption of these headings does not constitute and cannot be construed as any admission as to any fact.

HOLLAND & HART LLP
9555 HILLWOOD DRIVE, 2ND FLOOR
LAS VEGAS, NV 89134

6. Answering Paragraph 6 of the Amended Accusation, Lincare admits only that it submitted an administrator application for Richard Scurry on or about December 7, 2022, which the Board approved, and denies all other allegations within Paragraph 6 not specifically admitted herein.

APPLICABLE LAW

7. Answering Paragraphs 7, 8, 9, 10, and 11 of the Amended Accusation, these paragraphs contain legal conclusions to which no response is required; however, to the extent these paragraphs contain any factual allegations to which a response is required, Lincare denies the allegations within Paragraphs 7, 8, 9, 10, and 11, inclusive.

COUNT ONE

8. Answering Paragraph 12 of the Amended Accusation, this paragraph contains legal conclusions to which no response is required; however, to the extent this paragraph contains any factual allegations to which a response is required, Lincare denies the allegations within Paragraph 12.

COUNT TWO

9. Answering Paragraph 13 of the Amended Accusation, this paragraph contains legal conclusions to which no response is required; however, to the extent this paragraph contains any factual allegations to which a response is required, Lincare denies the allegations within Paragraph 13.

AFFIRMATIVE DEFENSES

Lincare asserts and raises the following affirmative defenses to the Board's allegations contained within the Amended Accusation:

1. The Amended Accusation, in whole or in part, fails to state a claim upon which relief may be granted.

2. Lincare exercised due care and good faith towards the Board and/or made a good faith effort to comply with all application statutes and administrative code provisions, including

HOLLAND & HART LLP
9555 HILLWOOD DRIVE, 2ND FLOOR
LAS VEGAS, NV 89134

by dutifully submitting an application for the Board's approval of its acting administrator, which the Board granted.

3. The Board consented to and ratified the conduct now alleged against Lincare in the Amended Accusation, including by approving Lincare's administrator application.

4. The Board has not alleged any facts to demonstrate any harm or damages, whether public or private, resulting from Lincare's alleged acts or omissions.

5. The Board's claims are barred by the doctrines of laches and estoppel.

6. The Board's claims are barred in equity and by the doctrine of unclean hands.

7. All possible affirmative defenses may not have been alleged herein insofar as sufficient facts were not available after reasonable inquiry upon the filing of Lincare's Answer and insofar as the Amended Accusation is couched in conclusory and vague terms, and therefore Lincare hereby reserves the right to assert additional affirmative defenses.

PRAYER FOR RELIEF

WHEREFORE, Lincare respectfully requests the following relief be granted by the Board:

1. That following the hearing this action be dismissed with prejudice;

2. That the Board award Lincare's attorneys' fees and costs incurred in defense of this action; and

3. For such other and further relief as the Board deems proper.

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **NAZANIN KAZEMINY, RPH,** **Certificate of Registration No. 20034,** **Respondent.**	**Case No. 23-140-RPH-N** **FIRST AMENDED NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a first amended notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has personal jurisdiction over Respondent Nazanin Kazeminy ("Respondent"), because Respondent holds a certificate of registration issued by the Board that authorizes her to engage in the practice of pharmacy. Respondent holds certificate of registration no. 20034, which was issued by the Board pursuant to NRS 639.127.

2. The Board has jurisdiction over the subject matter of this accusation because the alleged violations involve the dispensing of poisons, drugs, chemicals and medicines and the regulation of the practice of pharmacy. NRS 639.070.

FACTUAL ALLEGATIONS

3. Respondent is a pharmacist registered by the Board to engage in the practice of pharmacy. Respondent has practiced as a Nevada-registered pharmacist since October 2018. Respondent's certificate of registration is currently in full force and effect.

4. Between October 2019 and November 2021, Respondent was employed at CVS #9586, a pharmacy located at 55 Damonte Ranch Parkway in Reno, Nevada. During that time, Respondent met James Biggs ("Biggs"), with whom she became romantically involved.

5. In late 2020 or early 2021, Respondent told Biggs that she and/or her pharmacist friends were creating false COVID-19 vaccination cards for friends and/or close family members. Respondent offered to create a false vaccination card for Biggs, and Biggs accepted the offer.

6. Sometime prior to April 2021, Respondent provided Biggs with a false vaccination card. Respondent advised Biggs that her friend Arnold had created the card at her request. The card falsely stated that Biggs had been vaccinated at Vons Pharmacy #1795 on March 16, 2021. Further, the card falsely stated that Biggs had been vaccinated with the Janssen COVID-19 vaccine. Vons Pharmacy #1795, located in Henderson, Nevada, has no record of a vaccination administered to Biggs.

7. In April 2021, Respondent provided Biggs with a second false vaccination card indicating that Biggs had been vaccinated at CVS # 9586 on April 24, 2021. The second vaccination card falsely stated that Biggs had received the first dose of the Moderna COVID-19 vaccine. Respondent told Biggs to destroy or discard the first vaccination card, explaining that Biggs should have only one vaccination card in his possession. Biggs retained a photograph of the first vaccination card even though Respondent told him to discard it.

8. Respondent, or someone acting at Respondent's direction, created a false record of the vaccination allegedly administered to Biggs at CVS # 9586 on April 24, 2021. That record was reported to and appears in the Immunization Information System established by the Department of Health and Human Services pursuant to NRS 439.265 and implementing regulations. That system is known as "Nevada WebIZ."

9. In May 2021, Respondent, or someone acting at Respondent's direction, made a second entry on Biggs' false vaccination card. The second entry falsely indicated that Biggs had been vaccinated at CVS # 9586 on May 26, 2021. The entry falsely stated that Biggs had received the second dose of the Moderna COVID-19 vaccine.

10. Respondent, or someone acting at Respondents' direction, created a false record of the second Moderna vaccination allegedly administered to Biggs at CVS # 9586 on May 26, 2021. That record was reported to and appears in Nevada WebIZ.

11. In September 2021, Respondent left the employ of CVS and moved to Yerington, Nevada, where she resided with Biggs. While in Yerington, Respondent worked briefly for Raley's Pharmacy. In October 2021, Respondent returned to Reno and began working for Safeway Pharmacy #0188, located at 1031 Steamboat Parkway in Reno, Nevada.

12. In March 2022, Respondent, or someone acting at Respondent's direction, made a third entry on Biggs' false vaccination card. The third entry falsely stated that Biggs had been vaccinated at Safeway # 0188 on March 12, 2022. The entry falsely stated that Biggs had received a booster dose of the Moderna COVID-19 vaccine.

13. Respondent, or someone acting at Respondent's direction, created a false record of the Moderna booster vaccination allegedly administered to Biggs at Safeway #0188 on March 12, 2022. That record was reported to and appears in Nevada WebIZ.

14. In 2021, as noted above, Respondent worked for CVS. In 2022, Respondent worked for Safeway as a "floating" pharmacist. This means that she worked at different Safeway Pharmacy locations as needed. These locations included Safeway Pharmacy #0188, located at 1031 Steamboat Parkway in Reno, Nevada, and Safeway Pharmacy #1210, located at 5150 Mae Anne Avenue in Reno, Nevada.

15. In June 2021, while still employed by CVS, Respondent, or someone acting at Respondent's direction, created a false record of an immunization allegedly administered to Chang Suh ("Suh") on June 24, 2021, at CVS # 9586, located at 55 Damonte Ranch Parkway in Reno, Nevada. The record falsely indicates that Suh received the first dose of the Moderna COVID-19 vaccine. That record was reported to and appears in Nevada WebIZ.

16. In August 2021, while still employed by CVS, Respondent, or someone acting at Respondent's direction, created a false record of an immunization allegedly administered to Suh on

August 18, 2021, at CVS # 9841, located at 1695 Robb Drive in Reno, Nevada. The record falsely indicates that Suh received the second dose of the Moderna COVID-19 vaccine. That record was reported to and appears in Nevada WebIZ.

17. In February 2022, while employed by Safeway, Respondent, or someone acting at Respondent's direction, created a false record of an immunization allegedly administered to Suh on February 27, 2022, at Safeway Pharmacy # 0188, located at 1031 Steamboat Parkway in Reno, Nevada. The record falsely indicates that Suh received the Pfizer COVID-19 vaccine. That record was reported to and appears in Nevada WebIZ.

18. In August 2022, while employed by Safeway, Respondent, or someone acting at Respondent's direction, created a false record of an immunization allegedly administered to Suh on August 6, 2022, at Safeway Pharmacy # 1210, located at 5150 Mae Anne Avenue in Reno, Nevada. The record falsely indicates that Suh received a booster dose of the Moderna COVID-19 vaccine. That record was reported to and appears in Nevada WebIZ.

19. On information and belief, Respondent, or someone acting at Respondent's direction, provided Suh with a false vaccination card for use by Suh. On information and belief, said card reflects the fictitious vaccination information described in paragraphs 15 through 18 above.

20. In April and May of 2021, Respondent worked at CVS # 9586, located at 55 Damonte Ranch Parkway in Reno, Nevada. During that time, Respondent maintained a close friendship with Jessica Porreca-Moser ("Porreca-Moser"), a pharmacist colleague who was then working at CVS #9841, located at 1695 Robb Drive in Reno, Nevada.

21. In April 2021, Respondent, or someone acting at Respondent's direction, created a false record of an immunization allegedly administered to Porreca-Moser on April 22, 2021, at CVS # 9586, located at 55 Damonte Ranch Parkway in Reno, Nevada. The record falsely indicates that Porreca-Moser received the first dose of the Moderna COVID-19 vaccine. That record was reported to and appears in Nevada WebIZ.

22. In May 2021, while employed by CVS, Respondent, or someone acting at Respondent's direction, created a false record of an immunization allegedly administered to Porreca-Moser on May 21, 2021, at CVS # 9586, located at 55 Damonte Ranch Parkway in Reno, Nevada. The record falsely indicates that Porreca-Moser received the second dose of the Moderna COVID-19 vaccine. That record was reported to and appears in Nevada WebIZ.

23. On information and belief, Respondent, or someone acting at Respondent's direction, provided Porreca-Moser with a false vaccination card for use by Porreca-Moser. On information and belief, said card reflects the fictitious vaccination information described in paragraphs 21 and 22 above.

Respondent Nazanin Kazeminy, RPH., hereby files with the Nevada State Board of Pharmacy ("Board"), her Answer and Notice of Defense to the First Amended Notice of Intended Action and Accusation ("Accusation") filed on February 22, 2024.

ANSWER TO ACCUSATION

Jurisdiction

Ms. Kazeminy agrees that the Board has jurisdiction in this matter as set forth in Paragraphs 1 and 2 of the Accusation. Ms. Kazeminy further answers the Factual Allegations set forth in the Accusation as follows:

Factual Allegations: Paragraphs 3-23

Paragraph 3: Ms. Kazeminy acknowledges being registered as a pharmacist with the Board since October 2018.

Paragraph 4: Ms. Kazeminy acknowledges that she was employed by CVS at its pharmacy located on Damonte Ranch Parkway in Reno, Nevada between the dates noted in

Paragraph 4. Ms. Kazeminy acknowledges that she met James Biggs as stated in Paragraph 4. Ms. Kazeminy met Mr. Biggs while employed at the CVS and had a casual dating relationship with Mr. Biggs until approximately August 2021.

Paragraph 5: Ms. Kazeminy denies the allegations set forth in Paragraph 5. Ms. Kazeminy never told Biggs that she was creating false COVID -19 cards and absolutely has no distrust of the vaccine. As discussed further below, Ms. Kazeminy has been a proponent of the vaccine. Ms. Kazeminy never offered to provide Mr. Biggs with a false vaccine card.

Paragraph 6: Ms. Kazeminy denies the allegations set forth in Paragraph 6 in full. Ms. Kazeminy never had a false vaccine card created and never provided one to Mr. Biggs.

Paragraph 7: Ms. Kazeminy denies that she provided Mr. Biggs with a second false vaccine card in April 2021. Ms. Kazeminy in fact did administer Mr. Biggs' first COVID-19 vaccination dose at CVS pharmacy location #9586 in April 2021. Ms. Kazeminy denies that she had any conversation, at any time, with Mr. Biggs regarding a false vaccine card.

Paragraph 8: Ms. Kazeminy denies that she created, or directed anyone to create, a false record of the vaccine which was in fact administered to Mr. Biggs and contends that there was no way to falsify the information in the WebIZ system. Rather, the information regarding Mr. Biggs' first vaccination dose automatically uploaded to the state WebIZ system. For at least the first two doses of the vaccine, CVS Pharmacy required all patients to make an appointment on-line and fill out on-line forms including a consent for the vaccine. The information provided by the patient themselves automatically uploaded to the WebIZ system after the administering provider, in this case Ms. Kazeminy, scanned the bar code of the vaccine administered which then automatically created the entry in the WebIZ system.

Paragraph 9: Ms. Kazeminy denies that she, or someone acting at her direction, made a false entry on Mr. Bigg's vaccination card. Rather, Ms. Kazeminy asserts that she did indeed administer Mr. Biggs' second COVID-19 vaccination in May 2021.

Paragraph 10: Ms. Kazeminy denies that Mr. Biggs' second COVID-19 vaccination was falsely entered into the state WebIZ system. Again, as with the first administered dose, Mr. Biggs' received his second dose and that information was automatically uploaded to the WebIZ system upon scanning the bar code on the vaccine along with the information, including the consent to vaccinate, that the patient had entered when making the appointment for the vaccine.

Paragraph 11: Ms. Kazeminy acknowledges she left the employ of CVS in September 2021 and did work for Raley's Pharmacy in Yerington briefly. However, Ms. Kazeminy denies that she resided in Yerington, rather she commuted between Reno and Yerington as she was unable to find suitable housing and opted to return to work in Reno. Ms. Kazeminy denies that she ever lived with Mr. Biggs either in Yerington or anywhere else. Ms. Kazeminy agrees that she began working for the Safeway Pharmacy location noted in Paragraph 11.

Paragraph 12: Ms. Kazeminy denies that she, or someone acting at her direction, entered any false entry on Mr. Biggs' vaccination card in March 2022. Rather, Mr. Biggs was administered his third dose of the Moderna COVID-19 vaccine in March 2022.

Paragraph 13: Ms. Kazeminy denies that Mr. Biggs' COVID-19 booster vaccination was falsely entered into the state WebIZ system. Mr. Biggs' received his third vaccine dose and that information was automatically uploaded to the WebIZ system upon scanning the bar code on the vaccine and scanning his consent for the vaccination.

Paragraph 14: Ms. Kazeminy agrees with the factual allegations in paragraph 14 only to the extent that she worked for Safeway as a floater for approximately two and a half months before

becoming managing pharmacist at the Safeway location at which Ms. Kazeminy currently works and has done so since late 2021.

Paragraph 15: Ms. Kazeminy denies that in June 2021 she, or someone acting at her direction created a false record of the first COVID-19 vaccination dose administered to patient C.S[1]. Ms. Kazeminy did administer the first dose of the Moderna COVID-19 vaccine to patient C.S. in June 2021.

Paragraph 16: Ms. Kazeminy denies that she, or someone acting at her directing, created a false immunization record in the state WebIZ system regarding the administration of patient C.S.'s second COVID-19 dose. Patient C.S. received the vaccination at another CVS location at which Ms. Kazeminy did not work at the time and to the best of her information he did receive that vaccination.

Paragraph 17: Ms. Kazeminy denies that she, or someone acting at her directing, created a false immunization record in the state WebIZ system regarding the administration of patient C.S.'s third COVID-19 dose as patient C.S. did receive the vaccination and the information was automatically uploaded into the WebIZ system.

Paragraph 18: Ms. Kazeminy denies that she, or someone acting at her directing, created a false immunization record in the state WebIZ system regarding the administration of patient C.S.'s COVID-19 booster as patient C.S. did receive the vaccination and the information was automatically uploaded into the WebIZ system.

---

[1] While the Accusation does include the full name of patient C.S., Ms. Kazeminy shall refer to him by initials to avoid further violation of HIPAA and NRS 629.061(7),

Paragraph 19: Ms. Kazeminy denies the allegations contained in paragraph 19 and contends that patient C.S. did receive all noted doses of the COVID-19 vaccination.

Paragraph 20: Ms. Kazeminy acknowledges that she worked at the CVS location noted in paragraph 20 and that she did know Ms. Porreca-Moser who also worked for CVS at the time indicated

Paragraph 21: Ms. Kazeminy denies the allegations contained in paragraph 21 and contends that all records contained in the state WebIZ system regarding this vaccination are accurate.

Paragraph 22: Ms. Kazeminy denies the allegations contained in paragraph 22 and contends that all records contained in the state WebIZ system regarding this vaccination are accurate.

Paragraph 23: Ms. Kazeminy denies the allegations contained in paragraph 23.

Applicable Law: Paragraphs 24-28

Paragraph 24: Ms. Kazeminy agrees the paragraph 24 accurately reflects the contents of NRS 639.210(4). Ms. Kazeminy agrees that paragraph 24 partially reflects the contents of NRS 639.255 as other discipline may be imposed other than a suspension or revocation. Ms. Kazeminy agrees that paragraph 24 accurately reflects the contents of NAC 639.945 and 955 to the extent that both set forth grounds for which a pharmacist may be disciplined.

Paragraph 25: Ms. Kazeminy agrees that paragraph 25 accurately reflects the contents of NAC 639.945(1)(h).

Paragraph 26: Ms. Kazeminy contends that paragraph 26 does not accurately reflect the contents of NRS 454.213(1)(r) which simply authorizes a pharmacist to administer a vaccine. Ms. Kazeminy contends that paragraph 26 does not accurately reflect the substance of NRS 639.2592.

Ms. Kazeminy agrees that paragraph 26 accurately reflects the substance of NAC 639.2977. Ms. Kazeminy agrees that paragraph 26 accurately reflects the substance of NAC 439.893.

Paragraph 27: Ms. Kazeminy agrees that paragraph 27 accurately reflects the substance of NRS 639.210(11). Ms. Kazeminy agrees that paragraph 27 accurately reflects the substance of 18 USC § 1035 and 18 USC § 24(b) but contends these provisions are not applicable to the alleged factual allegations set forth in the First Amended Notice of Intended Action and Accusation.

NOTICE OF DEFENSE/MITIGATING INFORMATION

Ms. Kazeminy has been a licensed pharmacist since 2018 after immigrating to the United States and putting herself through school. She takes her professional duties extremely seriously and is a proponent of vaccinations, especially the COVID-19. Ms. Kazeminy has received accolades from current and former pharmacy employers for her advocacy in not just COVID-19 vaccinations, but all vaccinations Ms. Kazeminy remains current on her COVID vaccinations both for her health and the health of her family, including her parents who both have life threatening conditions. Ms. Kazeminy notes that for her most recent vaccinations, no vaccine mandate was in place and there would be no reason for Ms. Kazeminy to falsify administration of a nonmandated vaccine for herself or anyone else.

Ms. Kazeminy became involved with the complainant in this matter James Biggs, in late 2020 and was in a casual dating relationship with him until the summer of 2021 but continued to see him on and off until February 2022. Ms. Kazeminy currently has an extended restraining order in place against Mr. Biggs which was issued in November 2023; an initial restraining was issued by the Second Judicial District Court in April 2023 for stalking and harassment. The current restraining order is in effect until June 2024. In regard to the COVID-19 vaccinations that Mr. Biggs received, Ms. Kazeminy asserts that he was administered all vaccinations noted in the state WebIZ system.

Regarding patient C.S., he was known to Ms. Kazeminy through his wife, with whom Ms. Kazeminy was familiar. Ms. Kazeminy utilized the services of patient C.S., who is a real estate professional, to assist her in attempting to locate housing in Yerington, and also administered some of patient C.S.'s vaccinations. Patient C.S. is prepared to testify at any hearing held in this matter and will testify that he did indeed receive all COVID vaccines notes in the WebIZ system.

In regard to Ms. Porreca-Moser, Ms. Kazeminy believes that the allegations made by Mr. Biggs are his attempt to seek retribution for her terminating their relationship and ultimately seeking a restraining order against

him. Ms. Kazeminy is prepared to present evidence and testimony to refute Mr. Biggs' claims and to show that his campaign of stalking and harassment of her and her family has not ceased.

Respectfully submitted this 13th day of March, 2024.

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **NGAN TAN, RPH,** **Certificate of Registration No. 23478,** **and,** **RALEY'S DRUG CENTER #105,** **Pharmacy License No. PH01965,** **Respondents.**	**CASE NOS. 23-365-RPH-N** **23-365-PH-N** **NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has personal jurisdiction over Respondent Ngan Tan ("Respondent Tan"), because Respondent Tan holds a certificate of registration issued by the Board pursuant to NRS 639.127, authorizing him to engage in the practice of pharmacy in the state of Nevada.

2. The Board has personal jurisdiction over Respondent Raley's Drug Center #105 ("Respondent Raley's"), because Respondent Raley's holds a license issued by the Board pursuant to NRS 639.230, authorizing Respondent Raley's to operate a pharmacy located at 1630 Robb Drive in Reno, Nevada.

3. The Board has jurisdiction over the subject matter of this accusation because, at the time of the violations alleged herein, Respondent Tan was a Nevada-registered pharmacist engaged in the practice of pharmacy at a business location operated by Respondent Raley's in Reno, Nevada.

FACTUAL ALLEGATIONS

4. In September 2023, Respondent Tan was a registered pharmacist employed by Respondent Raley's at its pharmacy on Robb Drive in Reno, Nevada.

5. On September 9, 2023, while on duty at the pharmacy location on Robb Drive, Respondent Tan filled a prescription for patient JN ("JN"), a 16-month-old toddler. The prescription was issued by JN's health care provider for amoxicillin, an antibiotic often administered as an oral solution to treat infections in small children. The prescription was assigned Rx# 6364412.

6. JN's provider prescribed oral solution amoxicillin for what she diagnosed to be an eye infection. However, she mistakenly wrote the prescription for an adult dose as opposed to a pediatric dose. The adult dose was large enough to treat a 290-pound adult. JN weighed just 29 pounds.

7. Respondent Tan, or a pharmacy technician acting under Respondent Tan's supervision, transferred the prescription information into Respondent Raley's drug utilization review (DUR) system. The DUR system signaled a "high dose" alert. Respondent Tan overrode the alert and filled RX# 6364412 as incorrectly written by JN's health care provider.

8. According to Respondent Tan, he attempted to contact JN's health care provider to inquire about the unusually large dose, but he was unable to reach her. Respondent Tan filled the prescription as written even though he knew or should have known that the dosing instruction was incorrect.

9. On September 9, 2023, JN's mother was out of the country and had left JN in the care of family members. According to Respondent Tan, one or more family members were in a hurry to leave with JN's prescription and pressured Respondent Tan to fill the prescription before he had an opportunity to speak with JN's health care provider. JN's family member(s) left the pharmacy with instructions to give JN 16.7 ml dose of amoxicillin once every 12 hours for 10 days. Based upon JN's weight, this was roughly ten times the correct dose.

10. When JN's mother returned home, she observed that JN was suffering from diaper rash and diarrhea. Earlier, JN's health care provider had re-diagnosed JN's eye condition as a stye, not an

infection. Consequently, JN's family members discontinued the amoxicillin after giving JN just one dose in accordance with the dosing instructions on the label. JN's mother attributes JN's diaper rash and diarrhea to this extra-large dose of amoxicillin.

APPLICABLE LAW

11. The Board may revoke or suspend the registration of any pharmacist who has been guilty of unprofessional conduct or conduct contrary to the public interest. *See* NRS 639.210(4). In lieu of revoking or suspending a pharmacist's registration, the Board may impose fines as a disciplinary measure. *See* NRS 639.255; NAC 639.955.

12. A pharmacist's conduct is unprofessional if the pharmacist fails to "confer with the person writing, making or ordering a prescription or chart order if there is an error or omission in it which should be questioned." NAC 639.945(1)(e). Additionally, a pharmacist's conduct is unprofessional if the pharmacist performs his or her duties in an incompetent, unskillful or negligent manner. NAC 639.945(1)(i).

13. Pursuant to NRS 639.230(5), NAC 639.702 and NAC 639.945(2), pharmacies, pharmacy managers, and/or pharmacists are responsible for the acts and omissions of the pharmacy workers under their supervision and/or in their employ.

COUNT ONE
Unprofessional Conduct by a Pharmacist

14. On or about September 9, 2023, Respondent Tan filled JN's prescription for amoxicillin oral solution even though he knew or should have known that the health care provider's dosing instructions were incorrect. Respondent's conduct was unprofessional because he failed to confer with JN's health care provider regarding the correct dose.

15. Respondent's unprofessional conduct caused harm to JN.

16. For this unprofessional conduct, the Board may discipline Respondent Tan pursuant to NRS 639.210(4), NRS 639.255(1), NAC 639.945, and NAC 639.955.

17. As the owner/operator of the pharmacy at which Respondent Tan worked, Respondent Raley's is liable for Respondent Tan's unprofessional conduct. Accordingly, the Board may discipline Respondent Raley's pursuant to NRS 639.210(4), NRS 639.255(1), NAC 639.945, and NAC 639.955.

COUNT TWO

18. On or about September 9, 2023, Respondent Tan filled JN's prescription for amoxicillin oral solution even though he knew or should have known that the health care provider's dosing instructions were incorrect. Having failed to exercise independent professional judgment, Respondent Tan performed his duties in an incompetent, unskillful or negligent manner.

19. Respondent Tan's unprofessional conduct caused harm to JN.

20. For the unprofessional conduct as described above, the Board may discipline Respondent Tan pursuant to NRS 639.210(4), NRS 639.255(1), NAC 639.945, and NAC 639.955.

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **NGAN TAN, RPH,** **Certificate of Registration No. 23478,** **Respondent.**	**Case No. 23-365-RPH-N** **STIPULATION AND ORDER**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, by and through its Senior General Counsel, Gregory L. Zunino, and Respondent Ngan Tan ("Respondent"), Certificate of Registration No. 23478, by and through counsel Amanda E. Rosenthal, Esq., hereby stipulate and agree as follows:

1. The Nevada State Board of Pharmacy ("Board") has jurisdiction over Respondent and this matter.

2. The Board's staff properly served Respondent with the Notice of Intended Action and Accusation ("Accusation") on file in this matter, together with the Statement to Respondent and Notice of Hearing.

3. The Board and Respondent agreed to delay the date for submitting a Notice of Answer and Defense as both parties pursued settlement negotiations.

4. Respondent acknowledges that having consulted with counsel, he understands the terms of this Stipulation and Proposed Order ("Stipulation"), and that he has executed it knowingly and voluntarily.

5. Respondent is aware of his right to a hearing on the matters alleged in the Accusation, his right to reconsideration of a Board determination in a contested case, his right to appeal a Board determination in a contested case, and all other rights afforded him under NRS Chapter 233B, the Nevada Administrative Procedure Act, NRS Chapter 622A, which governs administrative procedure before the Board, NRS Chapter 639, the Nevada Pharmacy Act, and NRS Chapter 453, the Nevada Uniform Controlled Substances Act.

6. Conditioned on the acceptance of this Stipulation by the Board, and excluding the right to challenge any determination that Respondent has failed to comply with the provisions of this Stipulation, Respondent hereby freely and voluntarily waives his rights to a hearing, reconsideration, appeal, and other rights related to this action as identified above.

7. Respondent admits that evidence exists, and that Board staff prosecuting this case could present such evidence at an administrative hearing, to establish a factual basis for the violations alleged in Count One of the Accusation. The parties agree that as it pertains to Respondent, Count Two of the Accusation is duplicative of Count One. Therefore, upon approval of this Stipulation by the Board, Count Two of the Accusation shall be dismissed with prejudice as to Respondent.

8. To resolve this matter without incurring any further costs or the expenses associated with a hearing, the Board and Respondent agree to the imposition of the following penalties:

A. Respondent shall pay an administrative fine of One Thousand and 00/100 Dollars ($1000.00). This sum shall be payable by *cashier's check, certified check* or *money order* written to the "**State of Nevada, Office of the Treasurer.**" Respondent shall remit payment in full to the Board's Reno office, located at 985 Damonte Ranch Parkway, Suite 206, Reno, Nevada 89521, on or before May 31, 2024.

B. Respondent shall pay the sum of Five Hundred and 00/100 Dollars ($500.00) to partially reimburse the Board for recoverable attorney's fees and costs incurred in investigating and prosecuting this matter. This sum shall be payable by *cashier's check, certified check* or *money order* written to the "**Nevada State Board of Pharmacy.**" Respondent shall remit payment in full to the Board's Reno office, located at 985 Damonte Ranch Parkway, Suite 206, Reno, Nevada 89521, on or before May 31, 2024

9. This Stipulation constitutes a full and final resolution of the Accusation in Case No. 23-365-RPH-N as to Respondent. However, any failure by Respondent to comply with the terms stated herein may result in issuance by the Executive Secretary of an order to show cause, pursuant to NAC 639.965, directing Respondent to appear before the Board at the next regularly scheduled meeting for

a show cause hearing. If such a hearing results in a finding of a violation by Respondent, the Board may impose additional discipline upon Respondent not inconsistent with the provisions of NRS Chapter 639.

10. The Board's Senior General Counsel will present this Stipulation to the Board for approval pursuant to NRS 622.330 at the Board's regularly scheduled public meeting on April 17, 2024, in Reno, Nevada. The Board Members and Staff may discuss and deliberate regarding this Stipulation, even if Respondent or his attorney fails to appear for the meeting.

11. The Board may accept this Stipulation, but it is not obligated to do so. If this Stipulation is approved by the Board, it shall be a public record pursuant to NRS 622.330 and shall be reported to the National Practitioner Data Bank pursuant to 42 U.S.C. § 1396r–2 and 45 CFR Part 60.

12. If the Board rejects any part or all this Stipulation, and unless the parties reach an alternative agreement on the record during the hearing, the parties agree that the Board may hear a full contested hearing on the merits of all alleged violations as stated in the Accusation. The terms and admissions herein may not be used, relied upon, or referred to by any party during any such hearing.

13. Subject to the approval of this Stipulation by the Board, the Board and Respondent agree to release each other from any or all additional claims arising from the facts set forth in the Accusation on file herein, whether known or unknown that might otherwise have been asserted by the Board on or before the effective date of this Order.

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **WALGREENS PHARMACY #12540, Pharmacy License No. PH02587,** **Respondent.**	**CASE NO. 23-408-PH-N** **NOTICE OF INTENDED ACTION AND ACCUSATION**

J. David Wuest, in his official capacity as Executive Secretary of the Nevada State Board of Pharmacy, files the following document that will serve as both a notice of intended action under NRS 233B.127(3) and an accusation under NRS 622A.300(1) and NRS 639.241.

JURISDICTION

1. The Nevada State Board of Pharmacy ("Board") has personal jurisdiction over Respondent Walgreens #12540 ("Walgreens") because Walgreens is licensed by the Board to dispense dangerous drugs and controlled substances in Nevada. Walgreens holds pharmacy license number PH02587.

2. The Board has jurisdiction over the subject matter of this accusation because, as alleged below, Walgreens Pharmacy operated a pharmacy without having designated and/or employed a managing pharmacist to manage its pharmacy operations.

FACTUAL ALLEGATIONS

3. At all times relevant to this accusation, Walgreens operated a pharmacy at 9705 Pyramid Way in Sparks, Nevada. Between October 13, 2022, and October 3, 2023, Walgreens employed Bea Garcia, R.Ph. ("RPH Garcia"), as the managing pharmacist for its location on Pyramid Way.

4. On October 3, 2023, RPH Garcia began a period of maternity leave. Between October 3, 2023, and October 6, 2023, Chris Huynh, R.Ph. ("RPH Huynh"), temporarily assumed the duties of

managing pharmacist. Walgreens did not notify the Board that RPH Huynh had assumed these duties in RPH Garcia's absence.

5. RPH Huynh allegedly clashed with his co-employees and patients during his brief tenure as managing pharmacist. On October 6, 2023, these alleged clashes culminated in a disagreement involving RPH Huynh, Pharmacy Technician Deijunae Sandefur ("PT Sandefur"), Assistant Store Manager Ashley Miramontes ("ASM Miramontes"), and a patient who was waiting for a prescription. The patient allegedly left the pharmacy in tears.

6. Immediately after the incident described above, RPH Huynh announced that he was experiencing symptoms of COVID-19. He closed the pharmacy at approximately 3 p.m. that day and never returned to work at Walgreens.

7. In a subsequent complaint to the Board, RPH Huynh alleged that PT Sandefur and ASM Miramontes, both non-pharmacists, pressured him to fill a patient's prescription despite his professional concerns about the practitioner's dosing instructions. In a separate complaint to the Board, PT Sanderfur expressed concerns about alleged erratic behavior on the part of RPH Huynh.

8. Between October 6, 2023, and November 17, 2023, Walgreens conducted business as a pharmacy without having designated and/or employed a managing pharmacist for its pharmacy location on Pyramid Way.

9. On November 17, 2023, in response to the Board's investigation of the complaint(s) noted above, ASM Miramontes informed the Board that Tanya Saura, R.Ph. ("RPH Saura"), had agreed to serve as the managing pharmacist pending RPH Garcia's return from maternity leave in January 2024. Separately, RPH Saura indicated that she was unsure whether she had been selected for the role of managing pharmacist.

10. On or after November 17, 2023, after conferring with ASM Miramontes, RPH Saura confirmed that she had assumed the duties of managing pharmacist for Walgreens. RPH Saura stated that she had assumed the duties of managing pharmacist as of November 3, 2023.

11. Walgreens supplied no contemporaneous documentation to support RPH Saura's claim that she was designated the managing pharmacist for Walgreens effective November 3, 2023. In one conversation with Board staff, RPH Saura stated that she began her employment as a "staff pharmacist" for Walgreens on November 3, 2023.

12. As of November 30, 2023, Walgreens had not submitted a form or written communication reflecting its decision to designate RPH Saura as its managing pharmacist.

APPLICABLE LAW

13. Every pharmacy in Nevada must be licensed by the Board to dispense dangerous drugs and/or controlled substances. NRS 639.230; NRS 639.231.

14. Additionally, every pharmacy must be managed by a registered pharmacist, *approved by the Board*, who is responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. NRS 639.220(1).

15. Every pharmacy must notify the Board *before* designating a new managing pharmacist. NRS 639.220(4). The Board supplies licensees with a form for making the appropriate notification. The form may be downloaded from the Board's web site.

16. It is unlawful for any person who is not a registered pharmacist to manage a pharmacy or dispense dangerous drugs or controlled substances. NRS 639.284; NRS 639.100(1). A "registered pharmacist" is a natural person registered by the Board to engage in the practice of pharmacy only as authorized by Nevada law. NRS 639.015; NRS 639.120; NRS 639.127; NAC 639.205–.212.

17. A "managing pharmacist" is a registered pharmacist who is responsible for managing the operation of the pharmacy. NRS 639.0087.

18. The Board may revoke or suspend the license of any pharmacy that has violated any Nevada law or regulation relating to the practice of pharmacy. NRS 639.210(12); NRS 639.230(5).

19. The Board may revoke or suspend the license of any pharmacy upon finding that the pharmacy committed unprofessional conduct or conduct contrary to the public interest. NRS 639.210(4); NRS 639.230(5).

20. A pharmacy commits unprofessional conduct and/or conduct contrary to the public interest when the pharmacy performs its duties as the holder of a license or registration issued by the Board in an incompetent, unskillful, or negligent manner. NAC 639.945(1)(i).

21. A pharmacy commits unprofessional conduct and/or conduct contrary to the public interest when the pharmacy and/or its employees perform any act, task or operation for which licensure, certification or registration is required without the required license, certificate, or registration. NAC 639.945(1)(k).

22. Pursuant to NRS 639.230(5), NAC 639.702 and NAC 639.945(2), pharmacies, pharmacy managers, and/or pharmacists are responsible for the acts and omissions of the pharmacy employees under their supervision.

23. In addition to or in lieu of revoking or suspending a license or certificate of registration due to unprofessional conduct and/or conduct that violates Nevada law relating to the practice of pharmacy, the Board may impose an administrative fine upon the offending pharmacy. The fine may not exceed $10,000 for each offense. NRS 639.255(3).

COUNT ONE

Operating a Pharmacy Without a Managing Pharmacist

24. During the period between October 6, 2023, and November 17, 2023, Walgreens dispensed dangerous drugs and/or controlled substances to consumers in Nevada without having designated and/or employed a managing pharmacist qualified to supervise the operation of its pharmacy and/or the dispensing activities of its employees, agents, and/or representatives.

25. Walgreens' conduct as alleged above violated Nevada law relating to the practice of pharmacy, including NRS 639.100(1), NRS 639.220 and NRS 639.284.

26. Walgreens' conduct as alleged above was unprofessional and/or contrary to the public interest because Walgreens had a duty to designate a managing pharmacist to supervise its pharmacy operations and failed to do so. Having failed to designate a managing pharmacist, Walgreens performed its duties as the holder of a license issued by the Board in an incompetent, unskillful, or negligent manner. NAC 639.945(1)(i).

27. Walgreens' conduct as alleged was unprofessional and/or contrary to the public interest because Walgreens designated a managing pharmacist to supervise pharmacy operations without having obtained the Board's prior approval to the designation as required by NRS 639.220(1). Therefore, Walgreens caused RPH Saura and/or other of its employees to perform the duties of a managing pharmacist without the proper registration. NAC 639.945(1)(k).

28. For any one or all of the reasons stated above, Walgreens is subject to discipline pursuant to NRS 639.210(4), NRS 639.210(12), NAC 639.945(1)(i) and/or NAC 639.945(1)(k).

COUNT TWO
Failure to Notify the Board of Change to Managing Pharmacist

29. During the period between October 6, 2023, and November 17, 2023, Walgreens, dispensed dangerous drugs and/or controlled substances to consumers in Nevada without having notified the Board that it had designated and/or employed a new managing pharmacist to act in the place of RPH Garcia while RPH Garcia was on maternity leave.

30. Walgreens' conduct as alleged above violated Nevada law relating to the practice of pharmacy, including NRS 639.100(1), NRS 639.220(4), and/or NRS 639.284.

31. Walgreens' conduct as alleged above was unprofessional and/or contrary to the public interest because Walgreens had a duty to notify the Board, pursuant to NRS 639.220(4), before it designated and/or employed a new managing pharmacist to act in the place of RPH Garcia while she was on maternity leave. Having failed to notify the Board of a change to its managing pharmacist, Walgreens performed its duties as the holder of a license issued by the Board in an incompetent, unskillful, or negligent manner. NAC 639.945(1)(i)

32. For any one or all of the reasons stated above, Walgreens is subject to discipline pursuant to NRS 639.210(4), NRS 639.210(12), and/or NAC 639.945(1)(i).

WHEREFORE it is requested that the Nevada State Board of Pharmacy impose appropriate discipline with respect to the pharmacy license of Walgreens #12540.

DATED this 25th day of JANUARY 2024.

(Respondents Burgner and Gonzalez)

40. Respondents Burger violated NRS 453.164(7) by failing to make a query of her PMP MyRx account from December 10, 2015, and June 23, 2022, to ensure the legitimacy of the prescriptions dispensed under Burgner's DEA registration.

41. Respondent Gonzalez violated NRS 453.164(7) by failing to make a query of his PMP MyRx account between January 29, 2018, to April 7, 2022, to ensure the legitimacy of the prescriptions dispensed under Burgner's DEA registration.

42. By failing to make queries of their PMP MyRx accounts at least once every six months, Respondents Burgner and Gonzalez performed their duties in an incompetent, unskillful or negligent manner which constituted unprofessional conduct, as defined by NAC 639.945(1)(i) and NRS 639.210(4), and which renders their continued registration to prescribe controlled substances inconsistent with the public interest pursuant to NRS 453.236(1)(d) and/or (e). Therefore, Respondents Burgner and Gonzalez are subject to discipline pursuant to NRS 639.210(4); and/or NRS 639.255; and/or NRS 453.236(1)(d) or (e); and/or NRS 453.241.

43. WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificate of registration of this respondent.

DATED this 18th day of March 2024.

1. The Nevada State Board of Pharmacy (Board) has personal jurisdiction over Respondent Heliodoro Magana, P.A. 4. Respondent has been registered by the Board to prescribe dangerous drugs pursuant to NRS 639.1373 since March 18, 2019.

5. Respondent has never held a controlled substance certificate of registration with the Board.

6. In Nevada, prior to prescribing controlled substances, a Physician's Assistant must obtain a controlled substance certificate of registration with the Board pursuant to NRS 453.226.

7. A requirement of possessing a controlled substance registration with the Board and prescribing controlled substances in Nevada is to maintain and actively use a prescription monitoring program (PMP) account. NRS 453.162.

8. Respondent never had a Nevada PMP account.

9. Board PMP Compliance Coordinator Dave Jones conducts audits of practitioners to ensure that they are compliant with state law related to the PMP. The audits are conducted to ensure compliance with NRS 453.164(7) and NRS 639.23507.

10. Board PMP Compliance Coordinator Jones attempted to conduct an audit of Respondent's PMP account.

11. Board PMP Compliance Coordinator Jones found that Respondent was never issued a Nevada controlled substance certificate of registration. Respondent also never was able to establish a Nevada PMP account.

12. Respondent was never able to review the prescriptions for controlled substances he had written every six (6) months, as required by NRS 453.164(7).

13. Additionally, Respondent was not able to individually query any patient he prescribed controlled substances to for the first time, or every ninety (90) days thereafter, if applicable, as required by NRS 639.23507.

14. Respondent wrote at least 690 total prescriptions for controlled substances between the dates of March 18, 2018, and January 12, 2022.

15. Respondent wrote prescriptions for at least 150 unique patients during this time period.

APPLICABLE LAW

16. Each practitioner who is authorized to write prescriptions for human consumption of controlled substances listed in schedule II, III, IV or V shall access the database of the (PMP) program at least once every 6 months to review the information concerning the practitioner that is listed in the database, including, without limitation, information concerning prescriptions issued by the practitioner, and notify the Board if any such information is not correct, and to verify to the Board that he or she continues to have access to and has accessed the database as required by this subsection. NRS 453.164(7).

17. Every practitioner or other person who dispenses any controlled substance within this State or who proposes to engage in the dispensing of any controlled substance within this State shall obtain a certificate of registration with the Board. NRS 453.226(I).

18. A practitioner shall, before issuing an initial prescription for a controlled substance listed in schedule II, III or IV or an opioid that is a controlled substance listed in schedule V and at least once every 90 days thereafter for the duration of the course of treatment using the controlled substance, obtain a patient utilization report regarding the patient from the computerized program established by the Board. NRS 639.23507.

19. The Board may suspend or revoke any registration if the holder or applicant is guilty of unprofessional conduct or conduct contrary to the public interest. NRS 639.210(4).

20. Unprofessional conduct includes, "performing any duties as the holder of a license issued by the Board in an incompetent, unskillful or negligent manner. NAC 639.945(1)(i).

21. Unprofessional conduct includes, "performing any act, task or operation for which licensure, certification or registration is required without the required license, certificate or registration." NAC 639.945(1)(k).

22. In lieu of a suspension or revocation, the Board may impose a fine of up to $10,000 for each violation committed. NRS 639.255(1)(f) and (3).

COUNT ONE

Unprofessional Conduct – Failure to Query PMP Every 6 Months

23. Respondent never established his PMP account. Since Respondent never had an active PMP account between the dates of March 18, 2018, and January 12, 2022, Respondent was never able to review his PMP account every six (6) months to ensure that the information in the account concerning the practitioner, including the legitimacy or validity of the prescriptions Respondent is shown as having written was correct. *See* NRS 453.164(7). During this period, Respondent wrote over 690 prescriptions for controlled substances.

24. Because of these actions, Respondent has engaged in unprofessional conduct. NRS 639.210(4). Respondent engaged in unprofessional conduct because Respondent, as the holder of a certificate of registration issued by the Board, performed his duties in an incompetent, unskillful or negligent manner. NAC 639.945(1)(i).

25. Respondent performed his duties as the holder of a certificate of registration issued by the Board in an incompetent, unskillful or negligent manner because Respondent failed to query his PMP account every six (6) months to review the information in the account regarding the practitioner as is required by law. *See* NRS 453.164(7) and NAC 639.945(1)(i). The information regarding the practitioner that Respondent was and still is required to look at includes information concerning the prescriptions written by the practitioner. *See* NRS 453.164(7). A check of the PMP account at least once every six (6) months ensures that a practitioner has not had their credentials stolen or duplicated and that, if they have been stolen or duplicated, the Board is notified of any potentially forged prescriptions by the practitioner in a timely manner. *See* NRS 453.164(7). The required six (6) month check of a practitioner's PMP account guards against forged controlled substance prescriptions and allows practitioners to work with the Board to stop them in real time. *See* NRS 453.164(7).

26. Having engaged in unprofessional conduct as alleged above, Respondent is subject to discipline by the Board. NRS 639.210(4); NRS 639.255; NAC 639.945.

COUNT TWO
Unprofessional Conduct – Failure to Query Patients Prior to Issuing an Initial Prescription for a Controlled Substance

27. Between March 18, 2018, and January 12, 2022, Respondent was never able to conduct an individual PMP patient inquiry because Respondent had not established an account. During the same period, Respondent wrote over 690 prescriptions for over 150 unique patients.

28. Because of these actions, Respondent has engaged in unprofessional conduct. NRS 639.210(4). Respondent engaged in unprofessional conduct because Respondent, as the holder of a certificate of registration issued by the Board, performed his duties in an incompetent, unskillful or negligent manner. NAC 639.945(1)(i).

29. Respondent performed his duties as the holder of a certificate of registration issued by the Board in an incompetent, unskillful or negligent manner because Respondent failed to conduct patient queries on any patients Respondent prescribed controlled substances to during the time period referenced in paragraph 27. *See* NRS 639.23507 and NAC 639.945(1)(i).

30. Having engaged in unprofessional conduct as alleged above, Respondent is subject to discipline by the Board. NRS 639.210(4); NRS 639.255; NAC 639.945.

COUNT THREE
Unprofessional Conduct – Prescribing Controlled Substances in Nevada Without Having the Authority to do so

31. Respondent never possessed a Nevada controlled substance certificate of registration. Respondent wrote over 690 prescriptions for controlled substances in Nevada without possessing the required certificate of registration to do so.

32. Because of these actions, Respondent has engaged in unprofessional conduct. NRS 639.210(4). Respondent engaged in unprofessional conduct because Respondent performed an act for which obtaining a certificate of registration was required without having obtained the required certificate of registration. NRS 453.226(1) and NAC 639.945(1)(k).

33. Respondent performed an act for which obtaining a certificate of registration was required without having obtained the required certificate of registration because Respondent prescribed controlled substances in Nevada without having obtained a Nevada controlled substance certificate of registration. *See* NRS 453.226(1) and NAC 639.945(1)(k). A Nevada controlled substance certificate of registration is required to prescribe controlled substances in Nevada. NRS 453.226(1).

34. Having engaged in unprofessional conduct as alleged above, Respondent is subject to discipline by the Board. NRS 639.210(4); NRS 639.255; NAC 639.945.

WHEREFORE it is requested that the Nevada State Board of Pharmacy take appropriate disciplinary action with respect to the certificate of registration of this respondent.

CEASE-AND-DESIST and CITATION-AND-FINE ORDER: Case No. 23-167-N, Unlawful Possession, Storage, and Sale of Dangerous Drugs

Greetings:

The Nevada State Board of Pharmacy (Board) has determined that you are engaged in the business of furnishing dangerous drugs to Nevada consumers without having secured a pharmacy license, a certificate of registration to engage in the practice of pharmacy, or a medical license authorizing you to possess, store, and administer dangerous drugs. Pursuant to NRS 639.285 and NRS 639.100(1), it is unlawful for any person to furnish dangerous drugs to consumers without having secured the appropriate license and/or certificate of registration from the Board.

Additionally, it is unlawful to furnish dangerous drugs to anyone except upon the prescription of a practitioner. NRS 454.221(1). "'Furnish' means to supply by any means, by sale or otherwise." NRS 454.006. The term "dangerous drug" includes any drug that has been approved by the Food and Drug Administration for use only with a prescription. *See* NRS 454.201. Prior to any sale at retail, a dangerous drug may only be possessed by a registered pharmacist or certain licensed health care practitioners. *See* NRS 454.213.

The relevant facts are as follows:

- On or about May 8, 2023, the Board received a complaint from the Nevada State Board of Cosmetology. The complaint alleges that you own and/or operate Aesthetics MedSpa, located at 6295 Sharlands Ave., Suite C1, in Reno, Nevada. The complaint further alleges that your employee, Kylie Sondermann, RN, injected consumers with dangerous drugs including botulinum toxin type A and various injectable dermal fillers. These are "dangerous drugs" as defined by NRS 454.201.

- Ms. Sondermann, a registered nurse, is not a health care practitioner who is authorized to possess, store, or administer dangerous drugs without direct supervision by a physician, an advanced practice registered nurse, or a physician assistant.

9171 9690 0935 0307 2049 93

- Between May 15, 2023, and July 3, 2023, Board Investigator Monica Segedy interviewed multiple witnesses and gathered documentary evidence confirming that Ms. Sondermann, at your direction, possessed, stored, and/or administered dangerous drugs without a prescription and without supervision by a physician, advanced practice registered nurse, or physician assistant. These dangerous drugs included Versa, Botox, Voluma, Volbella, Kybella, Juvéderm, and Vollure.

- On July 3, 2023, you advised Inspector Segedy that you had hired an advanced practice registered nurse, Rose Parizo, to supervise Ms. Sondermann. Ms. Parizo later denied that she had agreed to work for you at Aesthetics MedSpa, or to supervise Ms. Sondermann. Your untruthful statement to Investigator Segedy indicates that you intend to continue to furnish dangerous drugs to Nevada consumers in adherence to an unlawful business model.

Accordingly, based upon the above evidentiary summary, the Board hereby orders you to immediately **CEASE and DESIST** furnishing dangerous drugs to Nevada consumers until such time as you have hired a licensed practitioner who is authorized under Nevada law to possesses, store, and administer dangerous drugs. This person must directly supervise Ms. Sondermann and any other registered nurses who possess, store, or administer dangerous drugs in the course and scope of their employment at Aesthetics MedSpa. Should you fail to comply with this cease-and-desist order, the Board will take such additional legal action as it deems appropriate.

Additionally, pursuant to NRS 639.2895(3), the Board has assessed an **administrative fine** against you in the amount of **Five Thousand and 00/100 Dollars ($5,000.00).** If you do not intend to contest the above fine, please pay the fine within 30 days of receipt of this citation, or otherwise contact Board staff to request an alternative payment plan. Payment must be by *cashier's check*, *certified check* or *money order* made payable to "State of Nevada, Office of the Treasurer," to be received at the Board's Reno office, located at 985 Damonte Ranch Parkway – Suite 206, Reno, NV 89521.

You may contest this citation by submitting to the Board, at the Reno address listed above, a written request for a public hearing. You must submit any such request not later than 30 days after receipt of this notice. *See* NRS 639.2895(2). Additionally, please be aware that issuance of the foregoing letter does not preclude the filing of an administrative disciplinary complaint, a civil suit, or criminal charges, if deemed appropriate based upon evidence not currently available to the Board's investigative staff. If you have any questions, please contact me by telephone at 775-850-1440, ext. 124, or *via* email at zunino@pharmacy.nv.gov.

BEFORE THE NEVADA STATE BOARD OF PHARMACY

NEVADA STATE BOARD OF PHARMACY, **Petitioner,** **v.** **JASMINE WELLS, AND KYLIE SONDERMANN** **Respondents.**	**Case Nos. 23-167-N** **23-167-A-N** **STATEMENT TO THE RESPONDENTS AND NOTICE OF HEARING**

TO THE RESPONDENT ABOVE-NAMED, PLEASE TAKE NOTICE THAT:

The Nevada State Board of Pharmacy ("Board") has ordered Jasmine Wells ("Wells"), the owner of Aesthetics MedSpa in Reno, Nevada ("Aesthetics MedSpa"), and Kylie Sondermann, RN ("Sondermann"), an employee of Aesthetics MedSpa, to cease and desist from furnishing dangerous drugs to Nevada consumers while not having a practitioner on the premises who is qualified and legally authorized to possess, store, and administer dangerous drugs. Additionally, pursuant to NRS 639.2895(3), the Board imposed upon each of Wells and Sondermann a fine of Five Thousand and No/100s Dollars ($5,000.00). Through counsel, Sondermann and Wells contest the above-described administrative actions. Pursuant to NRS 639.070, NRS 639.2895, and NRS 233B.121-.126, inclusive, the Board has the authority and jurisdiction to adjudicate this contested case. For purposes of the forthcoming hearing in this matter, it is alleged that:

FACTUAL ALLEGATIONS

1. On or about May 8, 2023, the Board received a complaint from the Nevada State Board of Cosmetology. The complaint alleged that Aesthetics MedSpa, located at 6295 Sharlands Ave., Suite C1, in Reno, Nevada, was not properly licensed to possess, store, administer, and/or dispense botulinum toxin type A and injectable dermal fillers.

2. At all times mentioned herein, Wells owned, operated, and exercised managerial control over Aesthetics MedSpa. Wells is not a "practitioner" as that term is defined at NRS 639.0125 and NRS 454.00958.

3. Wells has never possessed a license, registration, or permit issued by the Board authorizing her to prescribe, sell, or dispense dangerous drugs in Nevada.

4. Wells has never held a professional license authorizing her to store, possess, prescribe, or administer dangerous drugs in Nevada.

5. Sondermann has never possessed a license, registration, or permit issued by the Board authorizing her to prescribe, sell, or dispense dangerous drugs in Nevada.

6. Sondermann has never held a professional license in Nevada authorizing her to prescribe dangerous drugs, or to administer dangerous drugs under circumstances not authorized by NRS 454.213(1)(c).

7. Between May 15, 2023, and July 3, 2023, Wells, or persons acting with Wells' permission or at her direction, possessed, stored, administered, and/or dispensed "dangerous drugs" as that term is defined NRS 454.201. These included dangerous drugs marketed under the brand names Versa, Botox, Voluma, Volbella, Kybella, Juvéderm, and Vollure.

8. Between May 15, 2023, and July 3, 2023, Wells employed Sondermann to inject customers of Aesthetics MedSpa with botulinum toxin type A and injectable dermal fillers. Sondermann was not then a "practitioner" as that term is defined at NRS 639.0125 and NRS 454.00958.

9. On information and belief, Sondermann is not currently a "practitioner" as that term is defined at NRS 639.0125 and NRS 454.00958.

10. Between May 15, 2023, and July 3, 2023, Wells entrusted Sondermann with responsibilities that required Sondermann to perform the functions of a practitioner even though Sondermann did not hold the necessary professional credentials. Although Wells periodically

employed practitioners to assist her with the operation of Aesthetics MedSpa, she commonly hosted and/or treated "patients" when there were no practitioners on site.

11. Between May 15, 2023, and July 3, 2023, Wells directed, caused, encouraged, and/or knowingly permitted Sondermann to possess, store, administer, and/or dispense dangerous drugs without supervision or direction by a practitioner.

12. Between May 15, 2023, and July 3, 2023, Wells directed, caused, encouraged and/or knowingly permitted Sondermann to inject botulinum toxin type A and injectable dermal fillers without an order issued by a practitioner.

13. On information and belief, Wells continues to operate Aesthetics MedSpa in the manner described above.

14. On information and belief, Wells continues to employ Sondermann in furtherance of the business of Aesthetics MedSpa.

COUNT ONE
(Unlicensed Activity-Wells)

Surety Bond
Suppliers of Durable Medical Equipment, Prosthetics, Orthotics and Supplies
Medicare Program

KNOW ALL PERSONS BY THESE PRESENTS, that subject to the terms, conditions and limitations of this bond, Z-O MEDICAL SUPPLIES LLC, as Principal, and Philadelphia Indemnity Insurance Company One Bala Plaza, Suite 100 BALA CYNWYD PA 19004, a corporation organized and existing under the laws of Pennsylvania, as Surety, are held and firmly bound unto the Centers for Medicare & Medicaid Services ("CMS"), an agency of the United States Department of Health and Human Services, as Obligee, in the Penal Sum of fifty thousand dollars Dollars ($ $50,000.00) for the payment of which Principal and Surety bind themselves, their heirs, executors, administrators and assigns, jointly and severally, by these presents.

WHEREAS, Principal is enrolled in or is seeking to be enrolled in the Medicare program as a supplier of durable medical equipment, prosthetics, orthotics and supplies ("DMEPOS"); and

WHEREAS, pursuant to Section 4312(a) of the Balanced Budget Act of 1997 (Pub. L. 105-33) and 42 CFR § 424.57, the Principal is required to provide a surety bond as a condition of participation in the Medicare program, and this bond is provided in compliance with the supplier's obligations as set forth in those authorities.

NOW THEREFORE, the condition of this Bond is that if the Principal shall pay the Obligee any unpaid claims, civil money penalties and assessments (as such terms are defined by 42 CFR § 424.57(a)) then this Bond shall be null and void, otherwise to remain in full force and effect, subject, however, to the following:

1. Principal and Surety are liable under this Bond for only the amount of any unpaid claim, civil money penalty or assessment imposed by CMS or the Office of Inspector General, plus accrued interest, for which the Principal is responsible and for which, subject to Paragraph 7, the Obligee first demands payment from the Surety during the term of this Bond; provided, however, that any claim under this Bond must be related to overpayments or other events that occurred on or after March 3, 2009.

2. Surety agrees to pay a claim within 30 days of receiving written notice of the claim and sufficient evidence (as such term is defined by 42 CFR § 424.57(a)) to establish Surety's liability under this Bond.

3. CMS is the sole Obligee of this Bond, and no action may be brought on it by, or for the use or benefit of, any person or entity other than CMS or its contractors.

4. Regardless of the number of years this Bond is in effect, the number of premiums paid, or the number of claims made, the Surety's aggregate liability shall not be more than the penal sum of this Bond.

5. Subject to Paragraph 7, the Surety's liability under this Bond shall terminate and the Surety shall have no further liability upon the effective date of cancellation or expiration of this Bond by the Surety or Principal in accordance with Paragraph 6 of this Bond.

6. The Surety or Principal may cancel this Bond by providing written notice of such cancellation to the Obligee. Cancellation or expiration shall be effective 30 days after notice of cancellation or expiration is sent to the Obligee's contractor, the National Supplier Clearinghouse, provided such notice is actually received.

7. In the event this Bond is cancelled or expires, and the Principal fails to submit a new bond to the Obligee, the Surety remains liable for unpaid claims, civil money penalties or assessments that were imposed or assessed by CMS or the Office of Inspector General during the 2 years following the effective date of cancellation or expiration of this Bond.

In witness whereof, the undersigned Principal and Surety have set their hands and seals on this 04th day of January, 2024.

SECTION 5: COMPREHENSIVE LIABILITY INSURANCE INFORMATION

As required in 42 C.F.R. section 424.57(c)(10), all DMEPOS suppliers must have comprehensive liability insurance in the amount of at least $300,000 (for each incident) and the insurance must remain in force at all times. The NSC MAC, with full mailing address as shown on page 3, must be listed on the policy as a certificate holder. You must submit a copy of the liability insurance policy or evidence of self-insurance with this application. Failure to maintain the required insurance at all times will result in revocation of your Medicare supplier billing number retroactive to the date the insurance lapsed, and/or overpayment collection.

Malpractice insurance is not the same as comprehensive liability insurance and does not meet compliance for this requirement.

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☐ Low ☒ Medium ☐ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☒ Yes ☐ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Please see attached. Note that Oxytocin IV bag is the only USP 800/NIOSH product compounded in this facility.

4. Will you be utilizing beyond use dates in excess of USP-797? ☒ Yes ☐ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:
Full expiry studies are performed per the cGMP Guidance for 503B Outsourcing facilities.

6. What laboratory performs this additional testing?

Name: Fagron Sterile Services (our sister 503B compounding site in KS does our testing)

Address: 8710 E 34th St N

City: Wichita State: KS Zip: 67226

Telephone: 877 - 405 - 8066

7. What is your procedure for visual inspection of compounded sterile products?
Qualified manufacturing personnel will perform 100% visual inspection of each compounded sterile products that will be labeled prior to the packaging operation. Personnel who compound a batch will not perform visual inspection of that batch. Line clearance is performed prior to beginning of the inspection of a batch as well as at the end of the inspection of a batch. Only one batch can be inspected at a time per inspection line. Using an inspection hood, operator inspects one unit of CSP at a time. CSP unit should be held, slightly wiggled and/or inverted, and inspected for defects for 5 seconds against white background and 5 seconds against black background under 8,000 lux of light using calibrated inspection hood timer. Operators will only perform continuous visual inspection for 45 minutes followed by non-inspection period of 15 minutes before the next period of visual inspection.

8. How often do you perform glove fingertip and medial fill testing?
Full gowning qualification is performed annually, which includes sampling of glove fingertips, forehead, shoulders, forearms, and chest. Additionally, glove fingertip testing is performed at the end of pooling and filling process for each batch compounded. Media fill testing is performed biannually.

9. What is your policy if an employee fails a glove fingertip or media-fill test?
After a glove fingertip test failure during gowning qualification, the employee will be disqualified, and an Event Record will be initiated to determine impact on previous work and determine appropriate retraining. The employee will have to perform a new initial qualification, which consists of 3 consecutive successful tests completed on at least 2 different days. After a personnel media fill test failure, the operator is not allowed to perform aseptic processing until an initial personnel media qualification is successful, which is performing a minimum of 18 media fill units in one shift. In addition, Operations and Quality Management will determine what qualification and/or training is required.

10. Describe your initial and annual training program for all personnel performing sterile compounding:
Initial training for sterile compounding includes reading SOPs, classroom trainings, 1:1 trainings, and passing initial glove fingertip and media fill tests. Classroom trainings are provided involving cGMP compliance and aseptic processing and contamination control. All personnel receive 1:1 training in a simulated environment on how to properly gown into ISO 7 cleanroom. Then, a qualified trainer instruct on how to perform aseptic manipulations in an ISO 5 Vertical Laminar Flow Hood. After testing, trainees undergo on-the-job training by qualified trainers. For the annual training, all personnel are responsible to maintain their qualifications for media fill and glove fingertip testing, and to complete training by reading SOPs.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
Primary engineering controls: Pre-production cleaning is performed daily prior to start of working day, using sterile Vesta Syde SQ 64 (quaternary ammonium disinfectant) and sterile 70% IPA (isopropyl alcohol solution). If multiple batches are compounded in the same VLFH, between batch cleaning is performed using sterile 70% IPA. Post-production cleaning is performed daily at the end of the working day once all production has completed, using SWFI (Sterile Water for Injection) and sterile 70% IPA. Every Wednesday, weekly cleaning is performed with sterile Sporklenz (peracetic acid/hydrogen peroxide sporicidal agent) and sterile 70% IPA, which will replace post-production daily cleaning.
Secondary engineering controls: Areas of the room is cleaned in this order - ceiling (weekly), walls (weekly), VLFH or Fume Hood exterior (weekly), horizontal work surfaces (daily), and floors (daily). Monthly cleaning is also performed for the entire room. Sterile Vesta Syde SQ 64 is used for daily cleaning and SporKlenz is used for weekly and monthly cleaning.

12. Who performs the sterile compounding process at your facility?
Qualified cleanroom technicians perform the sterile compounding process under the direct supervision of room supervisors.

13. Who is responsible and accountable for the sterile compounding process at your facility?
All personnel who are authorized and trained to perform aseptic manipulations in an ISO 5 VLFH are responsible for the sterile compounding process. In addition, manufacturing management and pharmacists are responsible for creation and maintenance of the batch records and SOPs with Quality approval before implementation.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?
Controlled Room Temperature and Refrigerated product studies have been completed to ensure efficacy of products during shipments. Product labeling also provides storage conditions. All products have tamper evident caps or devices. All products have primary and secondary containment to contain product. Packing of product is defined in Standard Operating Procedure and material specifications to safeguard/protect products during transport.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? ISO 5 Vertical Laminar Flow Hood inside an ISO 7 clean room. Our only USP800 product is Oxytocin and we manufacture using sterile to sterile vials in a virtually closed system and do not use powdered API.		
2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	■ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	■ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	■ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	■ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	■ No
7. If yes, list the name of the device: N/A

9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs? Refer to Question 10 in Section 2. Employees are also trained for hazardous drugs by reading SOPs about the OSHA Hazard Communication Standard and hazardous drug spills.

This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations, and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

DURING AN INSPECTION OF YOUR FIRM I OBSERVED:

OBSERVATION 1

Procedures designed to prevent microbiological contamination of drug products purporting to be sterile are not established, written and followed.

Specifically, on 01/31/2023, production operators were observed performing preproduction cleaning of the interior of the ISO 5 VHLFs located in ISO 7 Room 139. During the cleaning operations, multiple operators were observed leaning their bodies inside the ISO 5 VLFHs in order to clean the interior of the VLFHs. By leaning inside the ISO 5 VLFHs, the operators blocked the path of the unidirectional airflow inside the VLFHs immediately prior to performing production operations. Operators then manufactured Rocuronium 50mg per 5mL Syringe, Lot # 654618 in VLFH # E00034.00; Phenylephrine HCl 20mg added to 250mL Bag, Lot # 654619 in VLFH E00033.00; Vancomycin HCl 2g added to 500mL Bag, Lot # 654620 in VLFH E00031.00; and Norepinephrine 4mg added to 250mL Bag, Lot # 654621 in VLFH E00035.00.

OBSERVATION 2

The accuracy, sensitivity, specificity and reproducibility of test methods have not been established.

Specifically, the USP <71> method suitability tests performed for your injectable Vancomycin drug products failed to recover *Bacillus subtilis* demonstrating that the Fluid washes were not adequately neutralizing the antibiotic in order to detect all potential microbial contamination.
Between June 11, 2021, and January 30, 2023, your firm used USP <71> to perform sterility testing on approximately 478 batches of your injectable Vancomycin drug products that were distributed for use in treating patients.

Response

We acknowledge the observation and the importance of proper cleaning techniques to prevent microbial contamination to the aseptic processing environment to ensure sterility of product is maintained.

In addition to determining corrective actions for this process, as part of our investigation of the Observation, we assessed scope and impact and we do not consider this a risk to our product. Refer to the below information from our initial investigation.

Cleaning of the Manufacturing Vertical Laminar Flow Hoods (VLFH) is governed by SOP 14-01-00-0012 "Operation, Cleaning and Maintenance of the Walker Vertical Laminar Flow Hoods (VLFH)". Cleaning of the QC Microbiology Vertical Laminar Flow Hoods (VLFH) is governed by SOP 14-01-00-0105 "Operation, Cleaning, and Maintenance of the Baker Vertical Laminar Flow Hoods (VLFH)". Based on the identified procedural gap, the scope of this investigation is not limited to the four lots listed in FDA Observation 1. This impact assessment will consider impact to all production within the VLFH.

The QC microbiology VLFH cleaning procedure was reviewed to determine if the QC microbiology VLFHs are also within scope. Per procedure 14-01-00-0105 "Operation, Cleaning, and Maintenance of the Baker Vertical Laminar Flow Hoods (VLFH)", the VLFHs are cleaned before each day of use. Peracetic acid or Hydrogen Peroxide must be used at least one day per work week. All other days must use a Quaternary Ammonium disinfectant. A post-use cleaning is performed at the end of the working day using sterile 70% IPA. All QC hood cleanings are documented Attachment A of SOP 14-01-00-0105.

QC Micro personnel do not reach into the VLFH beyond sterile sleeves as a best practice. In addition, the design of the Microbiology Baker VLFH is different than the Manufacturing Walker VLFHs used in production. The Baker VLFH is smaller (~4 ft long vs ~6ft long) and less deep (~25in vs ~30in), allowing for easier reach of all interior sides. However, since SOP 14-01-00-0105 does not state this requirement to not reach, the QC VLFHs are also within scope and a CAPA will be opened to address the procedural gap.

There is expected to be no impact as the QC VLFHs are used for sterility testing. Any deficiency in the cleaning of the Microbiology VLFH would be detectable through routine EM, as well as the sterility testing being performed. Sterility testing is destructive, and all product used for sterility testing is disposed of upon completion of testing; therefore, there is no potential impact to patient safety.

Additionally, QC Analysts who clean VLFHs are gowning qualified per SOP 14-01-00-0018 "Gowning for Classified Areas at the Canton Compounding Facility" and SOP 14-01-00-0062 "Gowning Qualification at the US Compounding Sites." QC Analysts are fully gowned wearing sterile hoods, gowns, booties, masks, goggles, and gloves with no skin showing per SOP 14-01-00-0162, "Gowning for QC Classified Areas". Prior to entering the VLFH, sterile sleeves and gloves are additionally donned. To begin cleaning the hood, the analyst starts from the back ceiling of the VLFH (HEPA grid) and out toward the front of the VLFH, where the deck is the last section cleaned inside the VLFH prior to wiping the outer sash. Specifically, the VLFH is wiped in a sweeping motion from left to right and back to front following this order:

- Ceiling HEPA grid (taking care not to wet the filter)
- Back interior wall of the VLFH
- Interior sides of the VLFH
- Inside of the glass VLFH sash
- All external surfaces of any equipment that remained inside the VLFH using IPA
- Deck of the VLFH, ensuring area under equipment is wiped
- Outside of the glass VLFH sash
- Bottom edge of the glass VLFH sash

For the Manufacturing VLFH, per procedure 14-01-00-0012 "Operation, Cleaning and Maintenance of the Walker Vertical Laminar Flow Hoods (VLFH)", VLFH cleaning is performed prior to each day of use for production. A pre-production cleaning is performed with Sterile Vesta Syde SQ 64 and Sterile 70% IPA and a post-production cleaning is performed with Sterile Water for Injection and 70% IPA using Benchmark Sterile Suite Wipes. Once a week, all in service VLFHs are cleaned using Spor-Klenz (a sporicidal cleaning agent) and Sterile 70% IPA per SOP 14-01-00-0012. All hood cleanings are documented in SOP 14-01-00-0012-FRM-A "Vertical Laminar Flow Hood Cleaning Log." All operators who clean VLFHs are gowning qualified per SOP 14-01-00-0018 "Gowning for Classified Areas at the Canton Compounding Facility" and SOP 14-01-00-0062 "Gowning Qualification at the US Compounding Sites." All operators are fully gowned with no skin exposed while in the ISO 7 and ISO 5 areas.

To begin cleaning, the operator adjusts the height of the hood to ensure all areas of the VLFH can be reached to be cleaned. SOP 14-01-00-0012 does not have instruction regarding how far into the VLFH operators may reach. Operators ensure the VLFH is clear of equipment and materials, then turn off the particle counter and cap it to prevent damage to equipment due to exposure of cleaning agents. For pre-production cleaning, a 20-minute contact time for Vesta Syde SQ 64 is required per SOP 14-01-00-0012. For weekly cleanings, a 20-minute contact time for Spor-Klenz is required per SOP 14-01-00-0012. Surfaces are rewet as necessary to ensure a full 20-minute contact time is achieved.

After the appropriate contact time, the operator starts from the back ceiling of the VLFH (HEPA grid) and out toward the front of the VLFH, where the deck is the last section cleaned inside the VLFH prior to wiping the outer sash. Specifically, the VLFH is wiped in a sweeping motion from left to right and back to front following this order:

- Ceiling HEPA grid (taking care not to wet the filter)

- Back interior wall of the VLFH
- Interior sides of the VLFH
- Bar and hooks on the bar near the ceiling of the VLFH
- Inside of the glass VLFH sash
- Deck of the VLFH
- Outside of the glass VLFH sash
- Bottom edge of the glass VLFH sash

The VLFH is always running, supplying a steady stream of HEPA filtered air at a velocity of approximately 0.45m/s flowing. Per SOP 14-01-00-0012, if the fans supplying the HEPA filtered air are turned off, the fans must run continuously for a minimum of 30 minutes prior to using the VLFH. As the fans are running while cleaning is performed, there is a continuous flow of air downward and out through the opening of the VLFH. The deck being cleaned last minimizes the potential for contaminants from operators reaching into the VLFH as first air is exposed to all surfaces after they are cleaned. Routine environmental monitoring (EM) data collected on each day of production and during weekly monitoring support that the cleaning process for the VLFH render the VLFH in a state of control with little to no bioburden.

During the cleaning process, operators are fully gowned. Gowning requirements for ISO 7 classified clean rooms include sterile hoods, gowns, booties, goggles, and gloves. Prior to entering the ISO 5 classified VLFH for production, operators additionally don sterile sleeves and gloves. No skin is exposed in the ISO 7 classified clean rooms. Since all gowning donned in an ISO 7 is sterile and low shedding, and all personnel must pass gowning qualification prior to gaining access to the ISO 7 clean rooms, there is little to no contamination risk if operators' bodies entered the VLFH during cleaning. While performing VLFH cleaning, operators follow cleanroom behaviour requirements to ensure deliberate movements and ensure overlapping strokes are being performed to achieve total coverage of the VLFH. After each stroke, the sterile suite wipe is rotated and folded to ensure a fresh surface is used each time. This process is repeated for each cleaning agent used within the VLFH. While tools are available to aid in reaching the far sections of the VLFH, manual wiping is preferred because it allows for more control of the wipe and consistent pressure and strokes. The VLFH deck is always the last section of the VLFH to be cleaned to ensure first air is maintained to all areas of the VLFH after cleaning is completed. After the VLFH has been properly cleaned, personnel are allowed to begin production.

Production starts with the performance of pre-use line clearance, which includes documentation of the differential pressure of the VLFH from the Certificate of Performance and verification that the value is within limits. After the necessary equipment and materials have been staged into the VLFH and the particle counter is verified to be on and within limits, the settling plate is opened and aseptic processing begins. Per SOP 14-01-00-0020, any critical connections performed by the operator within the VLFH must be made at least six inches from the front opening and four inches from the back and side walls without interrupting first air. Operators must not position themselves or objects between first air and sterile components. If any components are potentially compromised, they are discarded. Any time an operator comes out of the VLFH, their gloves must be sanitized using IPA prior to re-entry. Additionally, operators periodically sanitized gloves and sleeves using IPA throughout processing. Assistants are not to reach further than 4 inches into the hood and are required stay approximately 2 feet back from the VLFH unless directly assisting the operator as detailed in SOP 14-01-00-0020 "Aseptic Technique for the VLFH at the Canton Compounding Facility". Therefore, the procedural gap is limited to the cleaning of the VLFH.

There is no concern of impact to product manufactured in the VLFH that were cleaned per SOP 14-01-00-0012. Routine environmental monitoring (EM) is performed within the VLFH,

as well as the ISO 7 background rooms, per SOP 14-01-00-0079 "Environmental Monitoring Program" and SOP 14-01-00-0056 "Viable Surface Monitoring with Contact Plates." EM includes viable and nonviable air samples, viable surface monitoring with contact plates, and passive viable air monitoring with settling plates. Additionally, personnel monitoring (PM) is performed on operators' fingertips and forearms. During production, continuous nonviable air monitoring is performed per SOP 14-01-00-0150 "Operational and Data Management Procedure for Environmental Monitoring System" using Climet particle counters connected to the Environmental Monitoring System (EMS) and continuous passive viable air sampling is performed per SOP 14-01-00-0055 "Passive Viable Air Monitoring with Settle Plates" using settling plates. There are active air samples and viable surface samples taken within the VLFH at the end of the day after personnel monitoring is completed and prior to post-production cleaning of the VLFH. The VLFH viable sampling locations are detailed in SOP 14-01-00-0079-FRM-C and include:

Sample Location	Description
A1	Center of hood deck
W1	Left wall
W2	Right wall
W3	Back left wall
W4	Back right wall
F1	Left deck
F2	Right deck

All samples are required to have 0 CFU per SOP 14-01-00-0079. If any growth is recovered from viable samples, a deviation (KabiTrack, KT) is required to investigate the occurrence and assess impact to all lots produced that day and within that VLFH. Therefore, there is high detectability of insufficient cleaning methods that may result in insufficient bioburden reduction.

A review of all VLFH EM data collected on 31Jan2023 was performed. All results were within specification, indicating the pre-production cleaning performed for Rocuronium 50mg per 5mL Syringe, Lot # 654618 in VLFH # E00034.00; Phenylephrine HCl 20mg added to 250mL Bag, Lot # 654619 in VLFH E00033.00; Vancomycin HCl 2g added to 500mL Bag, Lot # 654620 in VLFH E00031.00; and Norepinephrine 4mg added to 250mL Bag, Lot # 654621 in VLFH E00035.00 was sufficient to prevent microbial contamination of the VLFH.

A review of all 2021, 2022 and 2023 ISO 5 EM data collected to-date was performed to review minimally one year's worth of data. Data include viable air, viable contact, and settling plate data for all VLFH.

In 2021, within the ISO 5 VLFHs, there were:

- 1054 viable air samples taken with one action level recovery
  - KT 1043721 for 1(1) CFU from the A1 sample location (center of VLFH deck) on 24May21 in VLFH E00035.00 – The KT determined no expected impact to final product but as a conservative approach, the associated lot was rejected.
- 6314 contact samples taken with one action level recovery from a QC Micro VLFH .
  - KT 1186520 for 1 CFU from F1 sample location (left deck of VLFH) on 18Nov21 in VLFH E00052.00 (QC Micro VLFH) during Environmental Qualification – The KT determined no impact.
- 2122 settling plate samples with two action level recoveries
  - KT 962686 for 1 CFU during Sterility Testing in VLFH E00123.00 on 19Feb21 – The KT determined no impact but one lot of product (Calcium Gluconate 2g lot 652160) was rejected due to an associated Sterility OOS event.

- KT 1138792 for 3 CFU during filling in VLFH E00031.00 on 24Sep21 – The KT determined potential risk to product and the lot was rejected.

Out of approximately 9490 samples, 4 samples (1 viable air, 1 contact plates and 2 settle plates) exceeded the limit of 0 CFU/plate for an action level recovery rate of 0.04% ((4/9490)* 100) for 2021. The contamination recovery rate was calculated as # CFU recovered divided by total number of samples taken (plates) based on USP <1116>. The contamination recovery rate is 0.06% ((6/9490)*100) for 2021. Refer to Observation 1, Attachment 1 for 2021 EM data.

In 2022, within the ISO 5 VLFHs, there were:

- 1115 viable air samples taken with no action level recoveries
- 5697 contact samples taken with two action level recoveries
  - KT 1333843 for 3 CFU from F1 sample location (left deck of VLFH) on 25May22 in VLFH E00031.00 – The KT determined no impact to final product.
  - KT 1422486* for 1 CFU from F1 sample location (left deck of VLFH) on 28Sep22 in VLFH E00034.00 – The KT determined likely no impact to final product.
- 2009 settling plate samples with four action level recoveries of 1 CFU each
  - KT 1422482 for 1 CFU during filling in VLFH E00031.00 on 29Sep22 – The KT determined likely no impact to final product.
  - KT 1435236 for 1 CFU during pooling in VLFH E00035.00 on 18Oct22 – The KT determined no impact to final product.
  - KT 1483332* for 1 CFU during filling in VLFH E00034.00 on 19Dec22 – The KT determined no impact to final product.
  - KT 1483422* for 1 CFU during filling in VLFH E00034.00 on 20Dec22 – The KT determined likely no impact to final product.

**These KT events were provided during the 2023 audit.*

Out of approximately 8821 samples, 6 samples (2 contact plates and 4 settle plates) exceeded the limit of 0 CFU/plate for an action level recovery rate of 0.07% ((6/8821)*100) for 2022. The contamination recovery rate was calculated as # CFU recovered divided by total number of samples taken (plates) based on USP <1116>. The contamination recovery rate is 0.09% ((8/8821)*100) for 2022. Refer to Observation 1, Attachment 2 for 2022 EM data.

In 2023 to-date (Jan to Mar), within the ISO 5 VLFHs, there were:

- 250 viable air samples taken with no action level recoveries
- 1500 contact samples taken with one action level recovery
  - KT 1534807 for 1 CFU from F2 sample location (right deck of VLFH) on 01Mar2023 in VLFH E00035.00 – Investigation pending as of 13Mar2023.
- 390 settling plate samples with no action level recoveries

Data from Jan to Mar 2023 were reviewed to capture a time period from directly before, during, and directly after the observation made on 31Jan2023. Thus far in 2023, approximately 2140 samples have been taken. Out of approximately 2140 samples, there was one contact plate sample that exceeded the limit of 0 CFU/plate for an action level recovery rate of 0.05% ((1/2140)*100) for 2023 to date. The contamination recovery rate was calculated as # CFU recovered divided by total number of samples taken (plates) based on USP <1116>. The contamination recovery rate is 0.05% ((1/2140)*100) for 2022. Refer to Observation 1, Attachment 3 for 2023 EM data.

Per USP <1116> "Microbiological Control and Monitoring of the Aseptic Processing Environments", "Within the ISO 5 critical zone, airborne and surface contamination recovery rates of 1% or less should be attainable with current methods. Contamination recovery rates

for closed RABS and isolator systems should be significantly lower still and can be expected to be <0.1%, on the basis of published monitoring results." The VLFH is considered an ISO 5 critical processing area. The low frequency of contamination recovery rates within the VLFH (<0.1% contamination recovery rate from all VLFH samples, annually) demonstrate that the cleaning method used is sufficient to control microbiological contamination within the hood and provide an acceptable aseptic processing area for production of sterile product.

In addition, SOP 14-01-00-0012 "Operation, Cleaning and Maintenance of the Walker Vertical Laminar Flow Hoods (VLFH)" will be updated to address the procedural gap identified through Observation 1.

In summary, we will complete the following actions as a result of this Observation:

Corrective and Preventive Actions:

1. Complete investigation in Trackwise™ (KabiTrack).

   Due Date: 06Apr2023 – Closure of Trackwise™ (KabiTrack) Record 1533809

2. Complete corrective action to update SOP 14-01-00-0012 "Operation, Cleaning and Maintenance of the Walker Vertical Laminar Flow Hoods (VLFH)" with new cleaning process to ensure personnel do not reach into the VLFH and to utilize a reaching tool for areas of the VLFH that cannot be reached without leaning into the VLFH.

   Due Date: 27Apr2023 - Closure of Trackwise™ (KabiTrack) record 1546426

3. Complete corrective action to update Quality Control SOP 14-01-00-0105 to clearly state that personnel may not reach into the VLFH beyond sterile sleeve at any point during pre-testing cleaning or testing.

   Due Date: 27Apr2023 - Closure of Trackwise™ (KabiTrack) record 1546427

4. Complete Effectiveness check: ISO 5 VLFH (both QC and Manufacturing) EM will be trended for 3 months. All data will be reviewed to ensure there is a less than 1% recovery rate from all viable contact samples and less than 1% recovery rate from all viable air samples per USP <1116>. If the recovery rate is 1% or greater, an additional 3 months of EM sampling will be reviewed. If a recovery rate of less than 1% for viable contact and 1% for viable air cannot be met over the course of 6 months, this effectiveness check will fail and an assessment of the current cleaning methods will be conducted. No additional sample locations are required based on historical data and the initial assessment determining little to no potential contamination from operators cleaning the VLFH using the existing method.

   Due Date: 29Nov2023 - Closure of associated Effectiveness Check record for Trackwise™ (KabiTrack) record 1533809

OBSERVATION 2

The accuracy, sensitivity, specificity and reproducibility of test methods have not been established.

Specifically, the USP <71> method suitability tests performed for your injectable Vancomycin drug products failed to recover Bacillus subtilis demonstrating tat the Fluid washes were not adequately neutralizing the antibiotic in order to detect all potential microbial contamination.

Between June 11, 2021, and January 30, 2023, your firm used USP <71> to perform sterility testing on approximately 478 batches of your injectable Vancomycin drug products that were distributed for use in treating patients.

Response

We acknowledge the observation and the importance of obtaining acceptable results during sterility testing method suitability data for compounded sterile products for patient use.

To assess potential impact to product as well as determine corrective actions, a KabiTrack (KT) system investigation has been initiated. The results of the investigation and corrective actions determined to date has been outlined below.

Background:
During the FDA inspection, the request was to provide USP <71> Sterility Test method suitability data for our Vancomycin compounded sterile products (CSPs) from both internal and Contract laboratory.

The data from the final testing runs was provided, which showed failing results for *Bacillus Subtilis* with both laboratories. Some of the additional data was obtained and provided for the internal testing performed but not all testing or justifications were able to be gathered for both internal and contract laboratory in the inspection timeline.

Contract Laboratory (Element) testing review:
Additional test data was obtained from the Contract laboratory and all testing completed by the Contract testing laboratory is detailed in Attachment 4 - Sterility Testing Summary.

As outlined in Attachment 4, *Bacillus subtilis* failed repeatedly during the Element contract laboratory method suitability as no growth occurred in all four (4) testing scenarios for test sample (but positive control passed). *Staphylococcus aureus* also showed failures with the original two test scenarios but passed the final two tests after method modifications.

The two method changes made by the contract laboratory were: increase of fluid wash volume and change in fluid wash. Per USP <71>, if the product has antimicrobial properties, wash the membrane not less than three times but do not exceed a washing cycle of five times 100mL even if during method suitability it has been demonstrated that such a cycle does not fully eliminate the antimicrobial activity. In addition, per USP<71>, Fluid A is the fluid wash test solution used for most products for sterility testing and is the starting point for method suitability; Fluid D can be used for the fluid washes for antibiotic molecules as it includes a neutralizing substance.

Method suitability testing was initiated on the Vancomycin 750mg (equivalent to 0.75g) product as this was the first CSP available for testing. Vancomycin 1.25g CSP was available shortly after and provided to the contract laboratory. As Vancomycin 1.25g added to 250mL Bag is the most concentrated of the Vancomycin compounded sterile products manufactured, it represents a worst case for sterility testing. Due to the gram-positive antimicrobial activity of the Vancomycin molecule, the most concentrated product would lead to the highest chance growth inhibition during sterility test of Vancomycin. Therefore, method suitability is at minimum required to be performed on the Vancomycin 1.25g CSP; additional Vancomycin CSP concentration products can also be tested.

The FDA was also concerned that the laboratory had referenced USP <61> on their CoAs to support the method suitability as acceptable, despite the *Bacillus subtilis* failures. During the inspection, it was clarified that the listing of USP <61> was to provide supporting language for the absence of growth and was not how the testing was performed by the Contract Laboratory (CoA stated, "Under similar circumstances," as a preface to the USP <61> reference).

After examination of all the Element contract laboratory data, the process for resolving failures during USP <71> method suitability testing was reviewed. Per USP <71>, if growth is not obtained then the product possesses antimicrobial activity that has not been satisfactorily eliminated under the conditions of the test and to modify the conditions in order to eliminate the antimicrobial activity. The contract laboratory data showed two changes with wash fluids and wash volume as part of their method suitability testing for Vancomycin. Both changes are outlined in USP <71> as method modifications.

Although the Element contract laboratory completed multiple attempts (and changes) for method suitability with Vancomycin, as they were not able to obtain passing results for the *Bacillus subtilis* organism and the FSS-Boston internal laboratory was able to, FSS-Boston will only continue with sterility testing internally. The sterility testing of Vancomycin compounded sterile products at the Element contract laboratory will be further assessment and only used if acceptable results are obtained.

This only impacts Vancomycin as all other products qualified by Element acceptably passed all organism challenges.

<u>Internal Laboratory (FSS-Boston in Canton, MA) testing review:</u>

Method suitability was performed internally at the Canton facility per SOP 14-01-00-0193, Sterility Product and Method Suitability Using Steritest Symbio Pump. (USP <71> compendial sterility testing in general was not initiated internally until after the contract laboratory was established.)

The sample canister used for the method suitability and sterility testing is Steritest™ NEO Devices for Antibiotics Low Binding PVDF Membrane 0.45µm. Per the vendor (Millipore), this filter has a PVDF (polyvinylidene fluoride) membrane which has a broad range for chemical compatibility and has low binding properties. The membrane thickness (0.45µm) is suitable for rinsing and reduces the risk of false negatives. The design is also suitable for rinsing residual antimicrobial agents. (The sample canister CoA as well as the vendor information was supplied during the inspection.)

Attachment 4 also provides details for the Internal testing and failure investigations.

Bacillus subtilis passed on two of the seven testing attempts. The first passing results were invalidated due to the unclear documentation of volumes; the second passing result was invalidated due to other organisms failing. This invalidation was unnecessary and was due to a misinterpretation of the SOP that all organism results must be passing. After additional testing was completed, the error was recognized but the data had already been invalidated and therefore was not presented as the final testing data.

Although multiple tests, including method changes, were performed, a consistent result for *Bacillus subtilis* sample or control growth was not obtained. As discussed in USP Microbiology FAQs, if it's not possible to neutralize the antimicrobial properties of a product during method suitability, it can be assumed that the failure to isolate the inoculated organism/s is attributable to the antimicrobial activity of the product.

For the Vancomycin 1.25g CSP manufactured at the FSS-Boston (Canton, MA) facility, the concentration of Vancomycin active ingredient is 5 µg/mL (0.005 g/mL), producing a high residual load of Vancomycin on the canister filter.

The FDA was also concerned that the lab had referenced USP <61> in our SOP and used similar wording in our justifications for acceptance. As discussed during the Contract laboratory testing data review, it was also clarified during internal testing review that the listing of USP <61> was to provide supporting language for the absence of growth; USP <71> was how the testing was performed.

The USP also provides similar language to USP <61> in the FAQs section (http://www.usp.org/frequently-asked-questions/microbiology):

> 2. What are you supposed to do when it is not possible to neutralize the antimicrobial properties of a product during method suitability demonstration of Sterility Tests despite the use of all suitable methods (dilution, chemical / enzymatic neutralization, membrane filtration)?
>
> If no suitable neutralizing method can be found, it can be assumed that the failure to isolate the inoculated organism/s is attributable to the antimicrobial activity of the product. This information serves to indicate that the article is not likely to be contaminated with the given species of the non-recovered microorganism(s). However, it is possible that the product inhibits only some of the microorganisms specified, but does not inhibit others not included among the test. Then, perform the test under the conditions compatible with microbial growth or recovery of most of the challenge microorganisms.

Impact to product:

To assess potential impact of Vancomycin sterility test method suitability not passing for the organism *Bacillus subtilis*, a review of environmental monitoring data which ranged from Jan2019 to Mar2023 was performed. The review included searching for *Bacillus* genus.

The data from Jan2019 to Mar2023 shows a total of 1977 total recoveries for all ISO classifications, of which 16 (0.8%) were of the *Bacillus* genus. Only one was recovered from the ISO 5 environment, which was on 29Nov2021. The only recovery of the *Bacillus* genus in the ISO 5 environment, had occurred 29Nov2021 during Environmental Qualification and was located in the Sterility testing suite (Attachment 5 KT 1186520). Per USP <1116> Microbiological Control and Monitoring of Aseptic Processing Environments, the limits for the

ISO 5 environment are <1.0%. For the specific *Bacillus* genus, the recovery rate meets requirements as well as the data overall reflects that there is currently no concern for contamination for spore forming organisms.

Therefore, there is low risk to previous Vancomycin sterility testing performed both at the Contract laboratory as well as In-House due to the *Bacillus subtilis* issues based on the Environmental monitoring data.

Batch data collected for personnel monitoring, environmental monitoring – viable and nonviable particulates, as well as environmental controls such as temperature and humidity support that the product was aseptically manufactured. In addition, FSS-Boston manufactures the Vancomycin CSP by using sterile FDA approved finished drug products which are aseptically handled for reconstitution, pooling, and compounding for the final product.

Additionally, there has been one customer complaint (Attachment 6 – CO20-00035182) and no product recalls for the Vancomycin compounded sterile product.

Although the method suitability had some failures, a passing result was obtained for each organism. Per USP <71> there is known effects of the active ingredient from the compounded sterile product on microorganisms and method suitability failures may occur. Due to the high concentration of our Vancomycin product, these failures are more likely.

Therefore, there is low risk to continued Vancomycin sterility testing performed In-House as method suitability testing reflected passing testing with *Bacillus subtilis*.

As discussed in the investigation completed to date, we will complete the following activities as part of our corrective and preventive actions.

Corrective and Preventive Actions:

1. Immediately revise documents to only allow for all Vancomycin products to be tested internally. The Form FSSBOS-WI-0003 (14-01-00-0061-FRM-B) lists Element testing from contract laboratory options for sample sterility testing for all Vancomycin concentrations and will be removed. Additionally, all Vancomycin product specifications with language including the Element laboratory for sterility testing will be removed.

   Due Date: 05Apr2023 – Closure of Trackwise™ (KabiTrack) Record 1546409

2. Complete investigation (record 1533819) in Trackwise™ (KabiTrack) for Vancomycin Method Suitability per USP<71>.

   Due Date: 06Apr2023 – Closure of Trackwise™ (KabiTrack) Record 1533819

3. Complete a summary report for internal testing reflecting the incorrect invalidation of all data in acceptable runs due to individual organism failures.

   Due Date: 20Apr2023 – Closure of Trackwise™ (KabiTrack) Record 1546425

4. Update Internal SOP 14-01-00-0193 to remove reference to <USP 61> and provide additional information for repeat testing.

   Due Date: 04May2023 – Closure of Trackwise™ (KabiTrack) Record 1545487

5. Assess additional method modifications for contract laboratory Element. Add Element testing as a testing option if acceptable results are obtained.

   Due Date: 30Jun2023 – Closure of Trackwise™ (KabiTrack) Record 1545500

VERBAL DISCUSSION ITEM

DISCUSSION ITEM 1

The FDA requested that "Aseptically don" be defined. *Although no personnel were observed by the FDA to complete the action incorrectly, the SOP 14-01-00-0018, Gowning for Classified Areas at the Canton Compounding Center, and associated training did not provide a well-defined process/action.*

Response
We acknowledge the discussion item and understand that our SOPs should reflect and define our processes.

In addition to determining corrective actions for this discussion item, as part of our investigation, we assessed scope and impact as outlined below.

All personnel who enter the cleanroom or perform aseptic processing (both Manufacturing and QC) are gowning qualified per SOP 14-01-00-0018 "Gowning for Classified Areas at the Canton Compounding Center". All personnel who perform aseptic processing are personnel monitored (PMed), allowing high detectability of potential contamination events. Any growth recovered from PM samples results in an event record which assesses impact to any product or test results. Additional controls will be further explained below.

Procedure 14-01-00-0018 "Gowning for Classified Areas at the Canton Compounding Center" defines "aseptic technique" as "Methods used to protect against contamination by microorganisms." The SOP does not include a definition of "aseptic donning" nor provide additional instruction regarding the technique required to aseptically don gowning materials.

All personnel who will work in the ISO 7 areas of the cleanrooms are required to attend an instructor-led training 14-ASEPWRKSHP-001, "Intro to Aseptic Processing," which addresses the importance of proper gowning, the risk personnel pose as a source of contamination in the cleanroom due to improper gowning, and the severity of the consequences of those risks. This training also includes a written assessment, required to be passed by all learners.

After being assigned job-specific curricula, potential operators/analysts must read and understand all SOPs relevant to performing duties in cleanrooms, including the ISO 7 and ISO 5 environments. The SOPs include, but are not limited to, the following:

- 14-01-00-0020 "Aseptic Technique for the VLFH at the Canton Compounding Facility" (part of curriculum 14-MFG-100 – Manufacturing Core and 14-MICRO-100 – QC Microbiology Core)
- 14-01-00-0022 "Cleanroom Behavior Procedure at the Canton Compounding Facility" (part of curriculum 14-CMPD-100 –Gowning Qualification)
- 14-01-00-0062 "Gowning Qualification at US Compounding Sites" (part of curriculum 14-CMPD-100 –Gowning Qualification)
- 14-01-00-0018 "Gowning for Classified Areas at the Canton Compounding Center" (part of curriculum 14-CMPD-100 –Gowning Qualification)
- 14-01-00-0113 "Personnel and Process Media Fill Qualification of the Aseptic Filling Process" (part of curriculum 14-MEDIA-100 –Media Fill Qualification)

As a best practice and part of an informal pre-requisite training, senior level operators perform hands on training with trainees. In the training room, a Senior Operator or Supervisor instructs the trainee on proper aseptic gowning after first demonstrating the proper method to follow. The trainee practices these techniques in the training room under observation by a Senior Operator or Supervisor, who provide oversight and feedback. When trainees are deemed ready after training is observed by a Senior Operator or Supervisor, a gowning qualification is scheduled. The trainee must then demonstrate that they can independently perform aseptic gowning through the cleanrooms as it is performed for production. This is witnessed by a Manufacturing Pharmacist, Manufacturing Technician 4, Manufacturing/ Packaging Supervisor, or QC Senior Scientist per SOP 14-01-00-0062 "Aseptic Gowning Evaluation", during which time the trainee is independently evaluated for gowning technique throughout their performance. All observations are documented on SOP 14-01-00-0062 Attachment A, including that the trainee does not touch the outside of sterile gowning materials with gloves when donned, which ensures personnel are being assessed consistently. When fully gowned, the candidate is sampled at 8 sites on their gowning, including each glove and forearm, which could be impacted if aseptic donning technique was not used. This is performed 3 times over at least a 2-day period. Only after these samples have been incubated and read, shown to be passing, and the documentation verified by Quality Assurance, may the trainee proceed to the next step of the aseptic operator pre-requisites.

In addition to the general gowning qualification, aseptic operators have additional required training and qualification. Operators undergo personnel media fill qualifications and partake in routine semi-annual process media fill qualifications. In the training room, a Senior Operator or Supervisor instructs the candidate on how to properly execute a Personnel Media Fill. As part of this training, they are instructed on how to properly don sterile sleeves by a Senior Operator or Supervisor, who details the proper method including stepwise instructions and further explanation of aseptic technique. Thereafter, the candidate practices these techniques in the training room under observation by a Senior Operator or Supervisor. When this skill set is deemed acceptable by the Senior Operator or Supervisor, the candidate is scheduled for a personnel media fill under observation of a Senior Operator or Supervisor. Personnel media fills are conducted per SOP 14-01-00-0113. The personnel media fill is performed in an ISO 7 room inside an ISO 5 VLFH and requires three successful operator media fill executions. The three executions must occur on the same day per SOP 14-01-00-0113 (to simulate operator fatigue) and, as a best practice, require at least one full exit from the cleanroom and a full regown in between attempts. The candidate must don new sterile sleeves and secondary gloves before each attempt and are under constant observation by the Senior Operator or Supervisor. Media fill samples produced are incubated for 14 days and inspected for turbidity every 7 days. In order for the candidate to pass this qualification, none of the samples produced may exhibit turbidity.

Once successfully qualified, aseptic operators are required to perform routine gowning and personnel requalification through the execution of annual gowning requalification and semi-annual operator media fill qualifications per SOP 14-01-00-0062 and 14-01-00-0113, respectively.

Based on this information, we do not consider this discussion item a risk to our products.

We will complete the following corrective and preventive actions to ensure our procedures reflect our processes.

Corrective and Preventive Actions:

1. Revise SOP 14-01-00-0018, "Gowning for Classified Areas at the Canton Compounding Center', to include a definition for "aseptic donning" and to revise the definition of "aseptic technique".

   Due Date: 06Apr2023 - Closure of Trackwise™ (KabiTrack) record KT 1533939

2. Create an On the Job Training (OJT) for sterile gowning, with a specific section on donning sterile sleeves/gloves.

   Due Date: 27Apr2023 - Closure of Trackwise™ (KabiTrack) record 1546433

3. Effective check for proper training by completing a self-inspection 3 months after implementation of the SOP update and a second check 3 months after implementation of the new training program.

   Due Date: 29Nov2023 - Closure of Trackwise™ (KabiTrack) record 1546435

2. Will you be performing sterile hazardous drug compounding? ☐ Yes ☒ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Vancomycin, ceftriaxone, gentamicin, and cefazolin will be the most common IV antibiotics we compound. Other antibiotics may appear, but this is all the medications we're aware of at this time that will need to be compounded.

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:

6. What laboratory performs this additional testing?

Name: _____

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?
The person that mixes medications inspects the final products in the clean room, then a pharmacist inspects them before they are dispensed.

8. How often do you perform glove fingertip and medial fill testing?
Every 6 months.

9. What is your policy if an employee fails a glove fingertip or media-fill test?
If an employee fails either test then they are not allowed to mix any medications until the test is repeated and passed. If these tests are failed more than once, the employee will not be able to compound for a period of 6 months. At that time they may repeat training and competency evaluation in order to compound again.

10. Describe your initial and annual training program for all personnel performing sterile compounding:
All pharmacists are trained on how to perform sterile compounding. Only technicians that have worked for the pharmacy for a year or longer and demonstrated the skills necessary to enter the clean room qualify to be trained. Training includes reading the sterile compounding policy and procedure. Trainees will observe the trainer until the trainer feels satisfied that the trainee can safely start to compound. The Trainee will then work under observation of the trainer, three staff pharmacists, and the pharmacist in charge. Once each trainer feels the trainee is competent, then fingertip, aseptic technique/sterility testing will be completed. After initial training, all personnel working in the clean room will be tested twice a year by the pharmacist in charge.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
Daily cleaning: isopropyl alcohol 70% is used to clean the hood (back to front and top to bottom), and mop the floors in the buffer, ante, and adjoining room.
Weekly cleaning: isopropyl alcohol 70% is used to clean the hood, floors, ceiling, walls, table, ante room ceiling and walls.
Monthly: Peridoxtru and Preempt Plus are used to clean the hood, floors, ceiling, walls, and table in the the clean room and ante room.

12. Who performs the sterile compounding process at your facility?
Three technicians, three pharmacists, and the pharmacist in charge are all trained and competent in sterile compounding. The three technicians complete most sterile compounding, with the pharmacists checking their work.
