- Worked alongside developers and other project stakeholders to build out new GxP clinical packaging and labeling facility
- Augmented knowledge of ERP software and tools by actively participating in available trainings and workshops
- Implemented new ERP system to drive quality, consistency, and compliance within

Operations

- Explored new technologies and tools for productivity, security and quality assurance purposes

US Head of Quality & Regulatory Affairs
Fargo, ND
Clinigen Clinical Supplies Management Inc/ Feb 2003 to Aug 2022

- Established a robust Quality, Compliance and Risk Management organization driving 25%+YOY reductions in deviations and non-conformances, major improvements in data-driven decision making and attaining KPIs, and a truly forward-thinking approach towards addressing emerging areas of risk
- Served as a trusted partner to senior leadership in defining long-term strategy
- Provided Quality oversight to 4 facilities
- Designed and led the internal audit and inspection readiness program resulting in 6 successful regulatory inspections and 125 successful client audits over 2 years
- Forged strong working relationships with federal and state regulators and demonstrated a talent for moving past complex roadblocks
- Redefined the role of Quality as a key facilitator of overall growth
- Maintained full compliance with the FDA, ICH, DEA, NABP, USDA import/export permits, GxP regulatory standards, and state licensing requirements during a period of spiking customer demands
- Implemented global Quality Governance Meetings with client Quality to ensure all entities involved are on the same page
- Maintained full compliance with states ensuring the appropriate licenses were acquired for clinical trials and Direct-to-Patient activities
- Experienced with requirements of the USDA for importing from Ex-US countries
- Defined core quality goals and partnered with global Quality Directors on strategy-through-execution of major initiatives
- Led, mentored, and supported the need of Quality Assurance and Quality Systems team members
- Emphasized priorities which yield both ROI and enable Clinigen to become a fundamentally stronger and more sound organization for years to come
- Brought an entirely new level of data-driven decision-making into play through implementation of an electronic Quality Management System (eQMS) standardizing and harmonizing quality metrics, KPIs, and reporting across the entire company
- Created a quality compliance scorecard, and numerous assessment reporting tools for accurately gauging the effectiveness and inspection readiness of quality management systems
- Ensures alignment of global compliance activities to business activities with a focus on Growth, Innovation, and Operational Effectiveness across all functional areas
- Changed the Quality and Compliance organization's role from "putting out fires" into an active enabler of sustainable growth, including assessing internal and external areas of vulnerability
- Introduced a virtual audit platform with no paper for hosting onsite audits which enabled the transition for complete virtual audits during COVID

- Implemented a global Learning Management System and training program.

Hello Maria,

Thank you for your reaching out.

I want to confirm that the application is for Pharmaceutical Trade Services, Inc. dba Uniphar Clinical.

I cannot provide any court documents as the incident occurred in August of 1989. I can attest that was the only occurrence.

Please find attached the Certificate of Good Standing.

If you need anything else, please reach out.

Best Regards,
Angela

Angela Calkins Humrich
US Head of Quality
Uniphar
Beacon Commerce Park
5100 Jones Sausage Rd, Ste 130 | Garner, North Carolina 27529

History of Business

Pharmaceutical Trade Services Inc., d/b/a Durbin USA, d/b/a Uniphar Clinical, d/b/a Uniphar is part of the Uniphar Group, a global life science and pharmaceutical distribution company. Pharmaceutical Trade Services Inc. has its principal place of business at 5820 Gulf Tech Drive, Ocean Springs, MS and is opening a new wholesale drug distribution facility at this address. The firm is affiliated with Uniphar Logistics USA, LLC located in Garner, NC under the parent company Uniphar plc located in Dublin, Ireland. The firm was licensed by NCDA&CS as a Wholesale Prescription Drug Distributor in November 2023.

Corporate Address

Pharmaceutical Trade Services Inc.
5820 Gulf Tech Drive
Ocean Springs, MS 39564

Corporate Officers

Dan Piggot	President
Melissa McLaughlin	Senior Vice President

Person(s) Interviewed and Individual Responsibilities

Credentials were presented and a Notice of Inspection issued to Mr. Erin Driggers, Head of Quality-US. Mr. Driggers, Mr. Bob Albanese, President, Uniphar Clinical, Mr. Mike Bernstein, Vice President, Uniphar Clinical, Mr. Rick Hughes, Managing Director, and Mr. Brian Pitchford, Operations Manager, accompanied me throughout the visual inspection of the facility and responded to all questions concerning the planned operation. Corporate policies and procedures and temperature records of the warehouse area were provided for review.

Background

This visit was the initial inspection of this facility following receipt of an application on 10/26/2023 for licensure as a Wholesale Prescription Drug Distributor. The purpose of this inspection was to verify compliance with NCGS §106 Article 12A prior to approval and release of the license.

Uniphar Logistics USA, LLC located in Suite 130, is contained within the same space, and maintains an active Third Party Logistics license #094-1713 in good standing with NCDA&CS.

Operations

Pharmaceutical Trade Services Inc. is part of the Uniphar Group, a global life sciences and pharmaceutical distribution company based in Dublin, Ireland. The facility in Garner is a new US location and will focus on providing an Expanded Access Program (EAP) to give patients with high unmet medical needs access to therapies that are not yet commercially available or approved in their country. The firm will provide services for primary solid dose packaging and labeling, as well as secondary packaging and labeling in support of masked clinical trials.

This facility is a new construction and contains a total of 65,000 ft.^{2} of space for administrative use, packaging, and storage. Access into and within the building will be limited to employees and escorted visitors and controlled by a digital card-key system; the entire facility is protected by a security system that includes intrusion alarms, glass break sensors, and surveillance cameras inside and outside. A limited-access storage vault of approximately 360 ft.2 is available for future storage of controlled substances; until this facility receives DEA approval, this area is being used for the segregated storage of outdated, damaged, or suspect products.

Temperature and relative humidity in all storage areas is controlled and continuously monitored by an environmental monitoring system, with designated personnel notified of excursions outside established ranges. A 500kw generator is available to support designated systems in the event of a loss of power. Rack storage is available for 3,000 pallets and shelf space is available for single-item bin storage at controlled-room temperature; storage space for cold-chain items with temperatures controlled at 2-8° C and cryogenic items was scheduled for installation shortly after the time of this inspection.

Corporate written procedures are established that address all areas of operations, including those required by NCGS §106 Article 12A. Inventory counts and discrepancy reconciliation, product rotation, and product recalls at the facility are defined in these procedures but may be at the direction of the client. The warehouse management system controls the movement of all products and maintains inventory count, location, and expiration dates of the products. Incoming drug products will be inspected for expiration dates, damages, and any other unusual appearances and entered into the system. The system is also responsible for the product hold process, restricting access to storage locations; these products may also

be identified by a label placed on the pallet and can be physically segregated and stored in a designated limited-access secure area in the warehouse.

Observations

There were no significant objectionable conditions noted during this inspection, and the Wholesale Prescription Drug Distributor license is approved.

Compliance

A limited inspection of operations at this facility will be conducted within 4-6 months.

- Please contact this office immediately if any information on this license is incorrect.
- This license must be displayed at the address licensed.
- The license renewal application and fee are due every two years BEFORE the anniversary date. Please note that it is the responsibility of the license holder to remit the licensure fee before the expiration date, whether a payment notice is received or not. Failure to submit the renewal fee before the expiration date will result in a $100.00 delinquency fee for each location and must be remitted before the license will be issued.
- A license that is amended, including a change of name, ownership, legal entity, or a notification of a change in the location of a licensed place of business will require submission of new application and fee. Applications for these changes can be downloaded from our website at **www.dshs.texas.gov**.
- Please submit written notice if you close or sell your business.
- If you have any questions or desire additional information concerning the application process or this license, please contact the Drug and Device Business Filing and Verification Unit at (512) 834-6727. Name: Christopher Musser Nevada License Number: 20144

A Nevada business license is not required, however if the OUTSOURCING FACILITY has a Nevada business license please provide the number: _____

This page must be submitted for all types of ownership.

Within the last five (5) years:

1) Has the corporation, any owner(s), shareholder(s) or partner(s) with any interest, ever been charged, or convicted of a felony or gross misdemeanor (including by way of a guilty plea or no contest plea)? Yes ☐ No ☑

2) Has the corporation, any owner(s), shareholder(s) or partner(s) with any interest, ever been denied a license, permit or certificate of registration? Yes ☐ No ☑

3) Has the corporation, any owner(s), shareholder(s) or partner(s) with any interest, ever been the subject of an administrative action, board citation, cite fine or proceeding relating to the pharmaceutical industry? Yes ☐ No ☑

4) Has the corporation, any owner(s), shareholder(s) or partner(s) with any interest, ever been found guilty, pled guilty or entered a plea of nolo contendere to any offense federal or state, related to controlled substances? Yes ☐ No ☑

5) Has the corporation, any owner(s), shareholder(s) or partner(s) with any interest, ever surrendered a license, permit or certificate of registration voluntarily or otherwise (other than upon voluntary close of a facility)? Yes ☐ No ☑

If the answer to question 1 through 5 is "yes", a signed statement of explanation must be attached. Copies of any documents that identify the circumstance or contain an order, agreement, or other disposition may be required.

APPLICATION FOR OUT-OF STATE OUTSOURCING FACILITY - Page 3

I hereby certify that the answers given in this application and attached documentation are true and correct. I understand that any infraction of the laws of the State of Nevada regulating the operation of an authorized OUTSOURCING FACILITY may be grounds for the revocation of this permit.

I have read all questions, answers and statements and know the contents thereof. I hereby certify, under penalty of perjury, that the information furnished on this application are true, accurate and correct. I hereby authorize the Nevada State Board of Pharmacy, its agents, servants and employees, to conduct any investigation(s) of the business, professional, social and moral background, qualification and reputation, as it may deem necessary, proper or desirable. The facility must be registered with the FDA as an outsourcing facility (503B) to obtain an outsourcing facility from the Board of Pharmacy.

Federal and State law require a licensed pharmacist to supervise the compounding taking place in a registered outsourcing facility. This supervising pharmacist must be licensed by the Nevada Board of Pharmacy.

Does your outsourcing facility wholesale compounded medication for resale? Yes ☐ No ■

The Law prohibits the resale of compounded medication. By signing this application you are attesting that your medications will be labeled with the statement "Not for Resale" and that the outsourcing facilities products will not be resold.

September 10, 2021

William E. Fixler
Co-Owner & Pharmacist in Charge
FH Investments Inc. dba Asteria Health
7004 Champion Boulevard, Suite 100
Birmingham, AL 35242

Mr. Fixler:

We are enclosing a copy of the Establishment Inspection Report (EIR) for the inspection conducted at your facility, FH Investments Inc. dba Asteria Health, located at 7004 Champion Boulevard, Suite 100, Birmingham, AL 35242, from June 12, 2018, through July 10, 2018, by the U.S. Food and Drug Administration (FDA).

When the Agency concludes that an inspection is "closed" under 21 C.F.R. 20.64(d)(3), it will release a copy of the EIR to the inspected establishment.

The Agency continually works to make its regulatory process and activities more transparent for regulated industry. Releasing this EIR to you is part of this effort. The copy being provided to you comprises the narrative portion of the report; it may reflect redactions made by the Agency in accordance with the Freedom of Information Act (FOIA) and 21 C.F.R. Part 20. This, however, does not preclude you from requesting and possibly obtaining any additional information under FOIA.

If there is any question about the released information, please contact please contact Shawn Larson – Compliance Officer at 214-253-5216.

Sincerely,

CDR John W. Diehl, M.S.

SUMMARY

This surveillance cGMP inspection of an outsourcing facility was conducted in accordance with a CDER Assignment issued on 1/30/2018. The MARCS Operation ID is 89829. This was the initial inspection of this facility.

The current inspection resulted in the issuance of a 5-item FDA 483 with the following observations:

1) Procedures designed to prevent microbiological contamination of drug products purporting to be sterile do not include adequate validation of the sterilization process;
2) Laboratory controls do not include the establishment of scientifically sound and appropriate test procedures designed to assure that drug products conform to appropriate standards of identity, strength, quality, and purity;
3) Equipment and utensils are not cleaned at appropriate intervals to prevent contamination that would alter the safety, identity, strength, quality, or purity of the drug product;
4) There is a failure to thoroughly review the failure of a batch or any of its components to meet any of its specifications whether or not the batch has already been distributed; and
5) Written procedures describing the handling of all written and oral complaints do not include provisions for review to determine whether the complaint represents a serious and unexpected adverse drug experience which is required to be reported to the Food and Drug Administration.

Additionally, one verbal observation was discussed with management regarding the environmental controls necessary for the manufacture of terminally sterilized drug products. They committed to responding to the FDA 483 within 15 business days. No samples were collected and no refusals were encountered.

FDA correspondence should be addressed to:

ADMINISTRATIVE DATA

Firm Name:	FH Investments Inc. dba Asteria Health
Firm Address:	7004 Champion Boulevard, Suite 100 Birmingham, AL 35242
Phone:	(205) 995-0505
Fax:	(205) 995-0507
Website:	www.asteriahealth.com
Dates of Inspection:	6/12-15, 18-20/2018, 7/2/2018, & 7/10/2018
Days at Firm:	9 days
Participants:	Samantha J. Bradley, Certified Drug Investigator Dorcas Ann Taylor, CDER Compliance Officer Todd Brooks, Drug Inspector, AL BOP

We arrived on 6/12/2018 and were introduced to William (Bill) E. Fixler, Co-Owner & Pharmacist in Charge (PIC), who identified himself as the most responsible individual at the site. We presented our credentials and issued an FDA 482, Notice of Inspection, to him. Mr. Fixler accepted the FDA 483, Inspectional Observations, on 7/10/2018.

Dorcas Ann Taylor, CDER CO, participated in the inspection on 6/12-15, 18-20/2018. Mr. Todd Brooks, Drug Inspector for the Alabama Board of Pharmacy (AL BOP) was present on 6/14/18, 7/2/18, and 7/10/18 under his own authority.

This report was written by Investigator Bradley.

HISTORY

FH Investments was incorporated as a LLC (limited liability corporation) in the state of Alabama in 2017. It is privately owned by three co-owners. They originally registered with the FDA as an outsourcing facility on 5/18/2017 and most recently registered on 1/6/2018.

Asteria operates Monday through Friday from 9:00 am to 5:00 pm. They have 6 full-time employees, as shown in their organizational chart (**exhibit 1**). Asteria produces hormone pellets intended for sub-cutaneous implantation. All compounded products are sold to physician's clinics per order (not prescription) and are intended for administration by medical personnel.

Asteria intends to move to a new location once they have completed designing and building a new facility. The new building will include facilities so that laboratory testing can be performed in-house. There was no anticipated time-frame for this at the time of this inspection. FH Investments also owns Asteria Specialty Pharmacy, which is a 503A pharmacy which has not yet begun operations. The facility is currently under construction in Birmingham, AL.

FDA correspondence should be addressed to:

William (Bill) E. Fixler, Co-Owner & Pharmacist in Charge
FH Investments Inc. dba Asteria Health
7004 Champion Boulevard, Suite 100
Birmingham, AL 35242

INTERSTATE COMMERCE AND JURISDICTION

The firm is registered with the US FDA as an outsourcing facility under section 503B of the Act. They manufacture sterile drug products which are shipped into interstate commerce in the US market for use. As such, the firm is subject to the adulteration provisions of section 501(a)(2)(b) of the Act, which requires all drugs to be manufactured in conformance with current Good Manufacturing Practices.

Asteria has been manufacturing products since 02/2018 and distributing products since 03/2018. They have made the following products:

Product Number	Product Description	Dosage Form	Active Ingredient
S-E006	Estradiol 6mg Pellet	Pellet, Implantable	Estradiol
S-E010	Estradiol 10mg Pellet	Pellet, Implantable	Estradiol
S-E012.5	Estradiol 12.5mg Pellet	Pellet, Implantable	Estradiol
S-E015	Estradiol 15mg Pellet	Pellet, Implantable	Estradiol
S-E018	Estradiol 18mg Pellet	Pellet, Implantable	Estradiol
S-E020	Estradiol 20mg Pellet	Pellet, Implantable	Estradiol
S-E025	Estradiol 25mg Pellet	Pellet, Implantable	Estradiol
S-T012.5	Testosterone 12.5 mg Pellet	Pellet, Implantable	Testosterone
S-T025	Testosterone 25 mg Pellet	Pellet, Implantable	Testosterone
S-T050	Testosterone 50 mg Pellet	Pellet, Implantable	Testosterone
S-T087.5	Testosterone 87.5 mg Pellet	Pellet, Implantable	Testosterone
S-T100	Testosterone 100 mg Pellet	Pellet, Implantable	Testosterone
S-T200	Testosterone 200 mg Pellet	Pellet, Implantable	Testosterone

All products are terminally sterilized and intended for subdermal implantation. Products are currently distributed into Alabama (about 40%) and Mississippi (about 60%). Additional strengths advertised as available for production, but not yet manufactured, include an Estradiol 37.5 mg Pellet and Testosterone 37.5 mg Pellet. Asteria also sells commercially-available Trocar Kits per physician request. Trocar kits are used for the implantation of pellets by medical staff. Asteria does not handle cytotoxic or beta-lactam products. No products are lyophilized.

Hormone pellets are made using three major parts: starting material trituration, hormone blend mix, and pelleting/vialling (finished product). This process results in the generation of up to three lot numbers per finished product. The same blend may be used to make multiple finished product batches. Trituration of the starting material began in late March 2018, so not all released products include an internally generated starting material batch number. The following is a summary of all released hormone pellet batches:

Starting Material	Material Lot #		Intermediate Blend	Blend Lot #		Finished Product	Product Lot #
n/a	n/a	--	Testosterone Powder Blend	02022018@1	→	Testosterone 100 mg Pellet	02022018@2
					→	Testosterone 200 mg Pellet	02052018@3
n/a	n/a	--	Testosterone Powder Blend	02052018@1	→	Testosterone 12.5 mg Pellet	02062018@2
					→	Testosterone 25 mg Pellet	02062018@3
					→	Testosterone 50 mg Pellet	02062018@1
n/a	n/a	--	Testosterone Powder Blend	02072018@1	→	Testosterone 87.5 mg Pellet	02072018@2
					→	Estradiol 12.5 mg Pellet	03062018@1
n/a	n/a	--	Estradiol Powder Blend	03012018@2	→	Estradiol 20 mg Pellet	03022018@2
					→	Estradiol 25 mg Pellet	03022018@3

Stearic Acid Triturated	03232018@1	→ Testosterone Powder Blend	03232018@2	→ Testosterone 200 mg Pellet	03232018@4
				→ Estradiol 6 mg Pellet	05222018@3
Stearic Acid Triturated	05222018@1	→ Estradiol Powder Blend	05222018@2	→ Estradiol 10 mg Pellet	05232018@1
				→ Estradiol 15 mg Pellet	05242018@1
				→ Estradiol 18 mg Pellet	05282018@1

INDIVIDUAL RESPONSIBILITY AND PERSONS INTERVIEWED

We were provided with an organizational chart for Asteria Health (**exhibit 1**).

William (Bill) E. Fixler, Co-Owner & Pharmacist in Charge (PIC), is the most responsible individual at Asteria Health. He is responsible for product formulation, compounding, production, and packaging activities. He is ultimately responsible for the overall compliance of Asteria Health. Mr. Fixler was present each day of the inspection and provided information specific to the operations in which he is involved. All references to Mr. Fixler within this report are in reference to Mr. Bill Fixler unless otherwise noted.

Wayne Fixler, Co-Owner & Compliance Manager, is responsible for overseeing compliance activities for Asteria Health including activities such as registration, product reporting, and licensing. He provided information relating to sales, product reporting, and registration during the inspection.

Carla Kutz, Quality and Regulatory Affairs Manager, oversees the quality operations as Asteria Health. She has been working with Asteria Health since July 2017, but officially began in September 2017. She was previously the Director of Quality and Regulatory Affairs at DynaLabs, LLC. Ms. Kutz was our primary contact during the inspection and provided the majority of information contained within this report.

Larry D. Stephens, Pharmacist, has been with Asteria since 01/2018. He serves as one of the pharmacists responsible for compounding and packaging operations. He was not actively involved in the inspection. Jonathan (Jon) R. Morrow, Pharmacist, has been with Asteria since 01/2017. He has performed compounding and packaging operations during his employment, but is no longer as actively involved in 503B compounding activities. Mr. Morrow is working to assist with 503A facility design and will operate as the pharmacist in the 503A facility exclusively once it opens.

INSPECTIONAL COVERAGE

Asteria compounds implantable pellets under controlled conditions which are e-beam (electron beam) sterilized in their final product vial. This is the only process currently being performed.

Quality

The quality system at Asteria appeared to be in an overall state of control. Ms. Kutz is the head of the Quality Control Unit. No major concerns were noted with document control, approval and release activities and records, SOP review and approval, or employee training and records. One comment was discussed with Ms. Kutz regarding control over the green "Release" stickers used for raw material identification. She understood and corrected this concern during the inspection.

Complaints & Adverse Event Reporting

Asteria began selling their implantable drug product in 03/2018. They had not received any complaints at the time of this inspection. Their complaint handling procedure is attached as **exhibit 23**. No concerns were noted with complaint handling, but there are no instructions to review for and report Adverse Drug Events. See *Observation 5* for additional details.

Recall

Asteria has never performed a recall. Their recall SOP is attached as **exhibit 24**. I had no concerns with the procedure in place. Traceability exercises are performed twice per year, but were not reviewed during this inspection.

Facilities & Equipment

Asteria is located in a small business complex off of Highway 280. Their facility is designed with limited access areas using keycard entry and monitored with security cameras. Due to their handling of testosterone, a controlled substance, they also utilize restricted access material cages and safes. An overview of the facility is provided in **exhibit 3**. No concerns were noted with the facility conditions.

Production Facility Design

The areas in which production activities occur are certified as ISO 7 and ISO 8, but Asteria made it clear they are not claiming these conditions during production. They explained they are "as clean as can be" rooms. I discussed the expectation to produce products intended to be sterile in controlled environments, with a minimum cleanliness of ISO 8. See *Verbal Observation 1*.

There are no ISO 5 hoods or areas at Asteria. Products are handled and made within dust control hoods located within ISO 7 or ISO 8 rooms. All doors, including in material pass-throughs, are interlocked. No concerns were noted with the flow of personnel and materials.

Facility and Hood Certification

Production activities take place in Rooms 16, 17, 18, and 19. Personnel enter through the main ante room, Room 16, which is positive pressure and certified to ISO 8. Blends are prepared in a dust control hood in Room 17, which is negative pressure and certified to ISO 8. Pelleting and vialling are performed in a dust control hood in Room 19, which is negative pressure and certified to ISO 7. Entry into this room is through Room 18, which is positive pressure and certified to ISO 7.

Facility certification is performed by ENV Services, Inc. based out of Hatfield, PA 19440. The most recent two certifications were performed in June 2018 and December 2017. Services include air changes per hour, non-viable particle counts, HEPA leak testing, and pressurization. Additionally, they perform viable sampling in controlled rooms including bacterial and fungal surface and air samples.

Pressure Monitoring

Ms. Kutz explained that she recently implemented the printing and inclusion of pressure data within batch documentation for each product. I reviewed several of these during batch record review. I noted there are no explanations for discrepancies which occur, such as pressure loss. I discussed the records including notes to explain excursions and Ms. Kutz agreed to update their practices. Although I noted excursions occurring, based on the design of the compounding rooms, which have both positive and negative pressures, excursions are expected each time a door is opened between a room with opposite pressure settings. No extended excursions were noted during review.

Equipment Calibration and Certification

ENV Services performs calibrations for all equipment used by Asteria for environmental monitoring of their cleanrooms. This includes temperature, pressure, and relative humidity gauges. They also certify the dust control hoods used for product handling (AST001, AST002, and AST023). I had no concerns after reviewing the certification and calibration data.

I reviewed the equipment used during production of the products including balances, hoods, torque wrench, and calipers. This equipment was observed to be within calibration and routinely scheduled for calibration/maintenance, with the exception of the calipers. The calipers are used to measure pellet length during production.

Ms. Kutz explained the manufacturer does not recommend calibration or preventative maintenance. She stated the calipers are calibrated to 'zero' each day of use. I explained this equipment is being used to measure a critical quality attribute of the drug product and it requires calibration on some frequency. In response to our discussion, the calipers in use were sent to CALTECH located in Oxford, AL 36203, and were found to be In Tolerance for calibration parameters. I was provided with a copy of the certification. Ms. Kutz explained they also purchased a certified master gage block set for internal verifications and updated their SOP to require annual calibration. I had no additional concerns.

Disinfection of Production Areas

Asteria uses the following disinfectants and cleaners:

- TrueCare Biomedix Sterile IPA 70% Cleanroom Wipes (low shedding)
- Veltek Associates Inc. HYPO-CHLOR 0.52% Sterile Sodium Hypochlorite in USP Water for Injection

- Decon Labs CiDehol ST Sterile 70% IPA
- Veltek Associates, Inc. DECON-SPORE 200 Plus Sterile Peracetic Acid and Hydrogen Peroxide

Asteria has not performed disinfectant effectiveness testing, but Ms. Kutz stated she is in the process of developing the protocol for one. They are currently basing effectiveness on the organisms the manufacturers state are neutralized in combination with results from the EM program.

Facility cleaning is described in SOP NSC 04, Terminally Sterilized & Non-Sterile Compounding Cleaning and Restocking, Version 1, Effective 10/15/2017. Cleaning is performed each day of use, weekly (minimum when not in use), and monthly. The sporicide is used once per month. I discussed the frequency of sporicide use and explained they must ensure monthly is frequent enough based on their findings from their EM samples. Additionally, I discussed the lack of specific details within the cleaning SOP on how cleaning is being performed and critical elements, such as dwell time. Ms. Kutz committed to adding more detail to the SOP.

Equipment Cleaning

During review of the process for production of both hormone products, we determined several pieces of equipment are used for both. The cleaning process has not been validated to ensure the disinfectants and methods in use effectively remove residual hormone powder to prevent cross-contamination. See *Observation 3* for additional details.

Environmental Monitoring

Environmental monitoring (EM) in compounding areas is outlined in SOP CMP 09, Environmental Monitoring, Version 1, Effective 10/15/2017 (**exhibit 27**). Routine personnel monitoring is not performed; it is only performed during gowning qualification activities. Per this procedure, EM is performed from the dirtiest to cleanest rooms and monitoring is not required for hoods and rooms each day unless they are used. TDA and SDA media which have been growth promoted are used and all growth is submitted for full identification. Disinfectant neutralizers are present in both types of media. Although gravity plates, or passive air plates, are described in the procedure, they are not currently in use at Asteria.

The specific EM performed is described in SOP NSC 05, Terminally Sterilized & Non-Sterile Compounding Environmental Monitoring, Version 2, Effective 5/21/2018 (**exhibit 28**). Sampling locations are shown on the corresponding Form, NSC 05 Form 1 (**page 4**). EM is performed prior to operations each day of use in the pelleting room (Room 19). It is performed in the mixing room (Room 17) day of use or at least weekly. EM includes non-viable particles (NVP), viable air samples, and surface samples. One of the NVP samples is taken under dynamic conditions and the surface sample is taken on the work surface used during operations.

I discussed sampling only occurring before operations with management and explained they are missing the collection of significant data. Ms. Kutz explained they did not want the extremely fine powder to impact the NVP samples or have the non-sterile excipient and API add microbes to their EM data. I explained the sampling should represent the conditions to which the product is exposed. They understood and promised to begin monitoring after operations as well.

I reviewed the trending of the data which had been collected since 01/2018 (**exhibit 29**). For viable monitoring, a deviation relating to one of their contract labs prevented them from obtaining identification for each situation during which CFUs were found. Counts are routinely 0 CFU and have not been higher than 3 CFU for any viable air or surface sample. The data indicates a level of control, though "after production" samples have not yet been taken. NVPs were also reviewed and none were observed to be outside acceptable ranges for ISO 7 or ISO 8 conditions.

Based on Asteria not considering the rooms classified, they have not set alert and action levels for the EM findings. Per the procedure, the results are for information purposes only. I discussed establishing limits and having a system in place to address how they will handle any findings which exceed them.

Materials

SOP MSP 03, Material Supplier Approval, Version 1, effective 9/1/2017, defines the requirements for the approval of suppliers for any packaging, raw material, intermediate, finished product, processing aid, and disposable or reusable supplies or equipment. Each supplier is approved prior to Asteria accepting materials and may be approved via an on-site audit or questionnaire. The SOP defines the information which must be provided from each type of supplier to be considered for approval.

Quality reviews information from the audits or questionnaires to determine if they are acceptable. Single source or critical suppliers are audited at least every 2 years. I reviewed the approved supplier list and several supplier questionnaires and had no concerns.

Material Acceptance

The APIs and excipients received by Asteria are currently fully tested per USP while their supplier is being qualified. Once they have been qualified, Asteria will perform identity testing for each material received. They also require a COA (certificate of analysis) accompany materials prior to acceptance. Examples of COAs for the APIs and excipient are shown in **exhibit 25**. Materials are identified with a sticker indicating their release status (yellow for quarantine, green for released).

Containers and closures are purchased sterile. They are accepted after verifying the information provided on an accompanying COA or COC (certificate of compliance) along with a visual inspection. They are logged into inventory (PK Compounder) and physically identified with their status.

Production

Production activities are captured on batch records and PK Compounding records. Batch records are completed as a batch is produced over several days. PK records are generated afterwards based on the information captured within the batch records; they are used to track material inventory.

Gowning

All gowning components used in the production areas of Asteria are sterile. Additional safety equipment is used for the compounding performed in Room 19. This involves the use of a respirator, specifically, a 3M Versaflo Respirator. In full gowning with the respirator, no operator skin is exposed. The respirator cannot be sterilized. It is routinely cleaned using sterile 70% IPA and sterile 0.52% hypochlorite solution.

Production Technique

Pellets are completed in five parts: stearic acid trituration (since 03/2018), powder blending, pelleting, vialing, and labeling.

Stearic acid is triturated within the powder control hood in Room 17. This is done to obtain uniform particle size to assist with flowability of the final blend for pelleting. This activity is captured in the Triturated Stearic Acid Record, SAP v4, CR18-084, effective 4/15/2018. This powder is used for both testosterone and estradiol pellets.

Powder blending is also performed within the powder control hood in Room 17. The API, estradiol or testosterone, and triturated stearic acid are measured into a single-use polypropylene jar (usually 4 or 8 oz.). The jar is closed with a screw cap within the hood and then placed in the RAM (Resonant Acoustic Mixer) for blending. The RAM is located on a table in Room 17. Estradiol is captured on the Estradiol-Stearic Acid Powder Mix Record, EPM v4, CR18-083, effective 4/15/2018. Testosterone is captured on the Testosterone-Stearic Acid Powder Mix Record, TPM v4, CR18-082, effective 4/15/2018.

Pelleting is performed within the powder control hood in Room 19. The pellet press is located within the hood. Pellet dimensions are critical to the assay of each individual pellet. The dimensions are determined using information from each API COA and will change based on this information. The pellet press is manually set-up for each batch of product. Pellet die sets are dedicated for each API. Each die is identified with a different strength. During the initial set-up of the pellet press, pellet length and weight are checked against the specifications. Once set, the pellets are 100% weigh checked and only checked for length at the middle and end of each run.

Estradiol pelleting is captured on the Estradiol Pelleting Record, EDP v4, CR18-078, effective 4/15/2018. Testosterone pelleting is captured on the Testosterone Pelleting Record, TRP v4, CR18-079, effective 4/15/2018.

Hold Times

During production, the API powder blends are allowed to be used for about 6 months after they have been blended. I asked for a study which showed the blends do not physically separate and was informed this has not been performed. I expressed my concerns with the powder blends physically separating over the course of time and Ms. Kutz committed to re-blending the powder immediately before use for each batch of product.

Batch Record Review

During review of batch records, I discussed concerns with the documentation of activities. Specifically, during pelleting and vialing, it is not clear from batch documentation how much waste was generated during set-up activities compared to in-process waste. Although finished product and waste are tracked through identification of Jar 1 and Jar 2, these same jar numbers are used during pelleting and packaging operations, which make it difficult to follow. Additionally, there is a third jar in use during pelleting which is not appropriately documented. It is used to catch the pellets as they are ejected from the pellet press.

For weight and length checks, there are no specific instructions which state weight and length failures must be documented. It is not clear if the number of weight checks documented are the number of pellets produced or the number of pellets which passed. There is no differentiation between weight and length checks during set-up versus during production. There is no tracking of pellet failures or the reason for failure.

I explained it is critical that set-up and in-process waste be differentiated between to establish a "norm" and identify anomalies. It is also critical they identify and track any pellet failures once set-up has been completed to identify drift and anomalies. The total number of pellets made is unclear which means the significance of anomalies cannot be established. Management understood my concerns with the batch records.

Electron Beam Sterilization

Hormone pellets are terminally sterilized via a third party contractor using e-beam (electron beam). Asteria contracts with MediZap for the e-beam service. MediZap has developed a packaging system for pellets which is used in the e-beam process. MediZap contracts with Steri-Tek for the e-beam process. Steri-Tek contracts with Pacific Biolabs to perform testing associated with the validation of e-beam sterilization. In summary:

Company	Roles
MediZap 4010 Technology Way Unit A-C Carson City, NV 89706	• Contracted by Asteria Health • Coordinates e-beam sterilization with Steri-Tek • Established the packaging components and configuration for pellets

Steri-Tek 48225 Lakeview Blvd Fremont, CA 94538 (510) 933-9700 www.steri-tek.com	• Contracted by MediZap • Previously Nutek Corporation • Performed validation for hormone pellets per ISO 11137-2 using VD_{max}^{25}
Pacific BioLabs (PBL) 551 Linus Pauling Drive Hercules, CA 94547 (510) 964-9000 www.pacificbiolabs.com	• Contracted by Steri-Tek • Performs the following per ISO 11737: o Bioburden Analysis o Bacteriostasis/Fungiostasis o VD Max Dose Audit (Sterility Testing)

During review of the validation documentation, I noted it lacks the identification of critical process parameters and acceptance criteria. I also determined through conversation with Asteria management that they are not familiar enough with the process to identify significant steps and attributes which may impact the validation. Both of these deficiencies were discussed with management. More significant concerns were noted with the validation pertaining to the use of other company's compounded pellets and the methods used by PBL during testing. These are described in *Observation 1*.

Packaging & Labeling

Pellets are manually packaged into individual vials and then a micro-capper is used to apply the appropriate torque to each cap for each vial. Torque is verified during set-up using a calibrated torque wrench. This is performed within Room 19, under the same controls used for pelleting. Visual inspection of the pellets includes identifying any damage, breakage, powder, or debris.

Estradiol vialing is captured on the Estradiol Pellets – Vialing Record, EPV v2, CR18-080, effective 4/15/2018. Testosterone vialing is captured on the Testosterone Pellets – Vialing Record, TPV v2, CR18-081, effective 4/15/2018.

In-process products are labeled using PK printed labels. These labels are not retained in batch records. In-process products are normally identified with a single label (bulk are kept together) and their locations are tracked through various logbooks used in different storage areas. The logbooks were reviewed in several different locations and no concerns were noted.

Finished product labels are printed per templates and reconciled for each batch of product. Labeling for both product types is captured on the Labelling and Retain Record, V2, C18-066, effective 3/27/2018. Labels are reviewed for accuracy prior to application and after labeling is completed, as captured through the QA Review/Approval sections on the record. A label is attached to each batch record and each PK Software record.

Container Closure Integrity Testing

CCIT (container closure integrity testing) was originally performed as part of the stability study in 2017, though it was discontinued after several failures were identified by the third-party lab. See the summary of stability lots in the *Stability & Method Validation* section below. CCIT was replaced by sterility testing for the remainder of stability and corrective actions were taken in response to the failures. A torque specification was established and torque checks were added to the vialing record for each type of vial cap.

An additional torque study was performed and completed in 05/2018 in order to verify the operation of a new digital torque wrench, ensure the XQ Micro-Capper settings are at the appropriate range, validate the acceptability of the set torque range specification, and ensure shipping and handling do not impact container closure integrity. All testing results were found to be acceptable, including the change in torque after shipping as well as the CCIT performed by a third-party lab after shipping.

Laboratory Controls

Asteria uses two contract laboratories for the following:

Dynalabs, LLC 2727 Chouteau Avenue St. Louis, MO 63103	Finished product release testing Stability testing
ARL Bio Pharma 840 Research Parkway, Suite 546 Oklahoma City, OK 73104	Environmental monitoring micro testing Media growth promotion testing Raw material USP testing

Finished product is tested for potency, sterility, and endotoxins. Samples are taken at random after the product has returned from terminal sterilization. A total of 26 vials are sampled including 1 for endotoxins, 5 for potency, and 20 for sterility testing. All laboratory test results are received and reviewed by Asteria prior to finished product release.

Stability & Method Validation

Asteria contracted method validation and stability to be performed for the highest and lowest strengths of testosterone and estradiol pellets at Dynalabs. Their stability program is outlined in SOP PRD 05, Assignment of BUD (**exhibit 26**).

Method validation included validation extension (potency validation), endotoxin validation per USP 85, and sterility validation per USP 71. Significant concerns were noted with the test method used for sterility testing of the pellets as described in *Observation 2*.

The stability studies for each product and strength included potency, endotoxin, sterility, identification, weight checks, and CCIT. Major testing timepoints included initial, 60 days, 90 days, and 180 days. The following lots of product were placed on stability:

Estradiol	Lot	Dynalabs Sample ID	Comments
6 mg	04252017@1	W-1-34	---
6 mg	04252017@2	W-1-35	---
6 mg	04252017@3	W-1-36	Potency OOS at 90 days: 89.4%
37.5 mg	02282017@4	W-1-5	CCIT OOS: 1/40 vials
37.5 mg	02282017@5	W-1-6	CCIT OOS: 1/40 vials
37.5 mg	02282017@6	W-1-7	---

Testosterone	Lot	Dynalabs Sample ID	Comments
12.5 mg	02272017@10	W-1-11	---
12.5 mg	02272017@11	W-1-12	---
12.5 mg	02272017@12	W-1-29	---
200 mg	02272017@7	W-1-30	---
200 mg	02272017@8	W-1-31	CCIT OOS: 1/40 vials
200 mg	02272017@9	W-1-32	CCIT OOS: 6/40 vials Potency OOS at 126 days: 88.94%

Based on the testing performed, the expiry for all pellets is 180 days. The CCIT OOS findings are discussed in the *Container Closure Integrity Testing* section above. The potency OOS findings are discussed in the *Out of Specification Results* section below. No other concerns were noted with the design of the study or the findings.

During the inspection, I asked why no on-going stability studies had been initiated and was informed they were waiting for their first FDA inspection because it will expand their ability to distribute to other states. Ms. Kutz committed to beginning the next study within a month after the close of the current inspection.

Out of Specification Results

No OOS had been identified from release testing at the beginning of the inspection, though one occurred at the end of the inspection for Estradiol 6 mg, Lot 05222018@3. This should be reviewed during the next inspection.

OOS results were reported during the stability studies for both estradiol and testosterone. Stability batches were not released for distribution. During review of the testosterone OOS investigation, I noted the root cause was most likely due to laboratory error and concurred with the invalidation of the results. For the estradiol pellet OOS, I found that it had been invalidated without adequate supporting evidence as described in *Observation 4*.

503B Coverage

Asteria Health sells their products to clinicians only and they require each have a medical license, DEA license, and state license to place an order. They do not wholesale their products and they do not fill prescriptions. They currently only sell to clinicians in Alabama and Mississippi.

Licensed Pharmacist Supervision

There are currently three pharmacists employed at Asteria Health, including the most responsible individual, Mr. Fixler. There are currently no pharmacy technicians. Mr. Fixler is the PIC and is responsible for the majority of production activities to this point. His licenses are attached in **exhibit 5**. Mr. Larry Stephens is currently the secondary pharmacist and his licenses are attached in **exhibit 6**. Mr. Jon Morrow has performed a significant amount of work for Asteria, but is currently transitioning to a 503A pharmacist role. His licenses are attached in **exhibit 7**.

State Pharmacy Licensure

Asteria Health holds the following licenses (**exhibit 4**):

Agency/State	License Type	License Number	License Expiration
DEA	Manufacturer	RF0532362	9/30/2018
Alabama	Manufacturer	195381	12/31/2018
Alabama	Pharmacy	113486	12/31/2018
Georgia	Non-Resident Pharmacy	PHNR000899	6/30/2019
New York	Non-Resident Pharmacy	031712	12/31/2018

Drug Reporting

Asteria Health has submitted their drug listing at each required time point since they registered as an outsourcing facility.

Bulk Drug Substances

Estradiol and testosterone are the two APIs used at Asteria Health. They are supplied by vendors registered with the FDA and accompanied by COAs. Examples of COAs are shown in **exhibit 25**. No drug products appear on the withdrawn or removed from market listing. SOP RMS 01, Incoming Material & Component Receiving, Inspection, and Labeling, Version 2, Effective 1/15/18 (**exhibit 32**), requires materials be accompanied by a COA or COC.

SOP MSP 03, Material Supplier Approval, Version 1, Effective 9/1/2017 (**exhibit 33**), describes the requirements for suppliers of raw materials, though does not explicitly require they be FDA registered. This was not identified during the inspection, so it was not discussed with management.

Compounded Drug Labeling and Containers

No deficiencies were identified from review of the drug product labeling and containers. Examples of finished product labeling for each product type and strength are shown in **exhibit 30.** SOP PRD 01, Finished Product Labeling, Version 1, effective 10/31/2017 **(exhibit 31)** describes finished product labeling requirements and the requirement to include a copy in the batch record.

Adverse Event Reporting

Asteria has a complaint procedure in place, but does not explicitly require review of complaints for adverse events or define timelines for filing MedWatch reports. See *Observation 5* for additional details.

MANUFACTURING CODES

Asteria's products are assigned batch codes via PK Compounding Software. They consist of a date and consecutive number. For example:

06302018@3, which represents:

06 = Month (MM)
30 = Day (DD)
2018 = Year (YYYY)
@ = Signifier between the date and consecutive number (does not change)
3 = 3rd batch code generated on that day (Begins with 1 each day)

OBJECTIONABLE CONDITIONS AND MANAGEMENT'S RESPONSE

OBSERVATION 1

Procedures designed to prevent microbiological contamination of drug products purporting to be sterile do not include adequate validation of the sterilization process. Specifically, during electron beam (e-beam) sterilization validation,

a. The bioburden and sterility method validation and suitability testing used for dose verification testing were not performed using testosterone and estradiol pellets made by your firm.
b. The sterility and bioburden testing methods do not evaluate the entirety of each implantable pellet, only the external surfaces.

Reference: 21 CFR 211.113(b)

Supporting Evidence & Relevance:

The Dose Verification Protocol for Asteria Health (Medizap) – Drug Pellet Family, Protocol No. Steri-Tek DVP004, approved on 3/31/2017, is attached as **exhibit 8.** This executed protocol

summarizes the data used to verify the e-beam dose used to sterilize Asteria Health's 200 mg testosterone pellets and 50 mg estradiol pellets. These are the maximum strengths of each product type.

ISO 11137-2:2012, Method VD_{max}^{25} was used as the basis for the sterilizing dose. Per this guidance, bioburden testing is first performed for 10 units and then sterility testing is performed after sterilization. Testing is performed per methods described in ISO 11737 by Pacific BioLabs (PBL), the contract lab for Steri-Tek. The bioburden test method requires a Bioburden Recovery Study and the sterility test method requires Bacteriostasis/Fungistasis Testing (comparable to method suitability testing).

a. During review of data, I found the bioburden recovery and suitability testing were not performed using Asteria's products. The summarized testing results and the referenced laboratory documents are outlined in the table below:

Asteria bioburden testing summary – Testosterone	**Exhibit 8, page 5**
Bioburden Analysis Study 17A0272S-M01 Testosterone Pellet 200 mg Made by Asteria Health	**Exhibit 8, page 15**
Bioburden Recovery Study Study 15B0102S-M01 Testosterone Pellet 200 mg Made by Wells Pharmacy Network, LLC	**Exhibit 9, page 1**
Asteria bioburden testing summary – Estradiol	**Exhibit 8, page 6**
Bioburden Analysis Study 17A0271S-M01 Estradiol Pellet 50 mg Made by Asteria Health	**Exhibit 8, page 17**
Bioburden Recovery Study Study 15L0323S-M01 Estradiol Pellet 75 mg Made by Westcliff Compounding Pharmacy	**Exhibit 9, page 3**
Asteria sterility testing summary – Testosterone	**Exhibit 8, page 9**
VD Max Dose Audit Study 17C0058S-M01 Testosterone Pellet 200 mg Made by Asteria Health	**Exhibit 8, page 11**
Bacteriostasis/Fungistasis Test Study 15B0103S-M01 Testosterone Pellet 200 mg Made by Wells Pharmacy Network, LLC	**Exhibit 10, page 1**

Asteria sterility testing summary – Estradiol	**Exhibit 8, page 9**
VD Max Dose Audit Study 17C0059S-M01 Estradiol Pellet 50 mg Made by Asteria Health	**Exhibit 8, page 13**
Bacteriostasis/Fungistasis Test Study 15L0318S-M01 Estradiol Pellet 50 mg Made by Pavilion	**Exhibit 10, page 3**

Sterility and bioburden testing methods were not verified as being acceptable for Asteria Health's products prior to their use for dose verification testing.

b. Both methods used are performed by direct inoculation of the hormone pellets. PBL's methods include SOP 14B-11, Revision 7A.01, Bioburden Testing, effective 8/26/16 (**exhibit 11**) and SOP 14B-13, Revision 4C.00, Sterility Testing for AAMI Dose Studies or Tests Utilizing One Medium, effective 10/14/16 (**exhibit 12**). The results for bioburden and sterility are only representative of microorganisms on the exterior surfaces of the pellets. There is no evaluation of the entire pellet, which is intended to completely dissolve in patients sub-dermally.

Discussion with Management:

Management understood the concerns and promised correction.

OBSERVATION 2

Laboratory controls do not include the establishment of scientifically sound and appropriate test procedures designed to assure that drug products conform to appropriate standards of identity, strength, quality, and purity. Specifically, sterility testing of hormone pellets during release testing only provides information for the exterior surfaces of the implantable pellets. There is no evaluation of the entire pellet.

Reference: 21 CFR 211.160(b)

Supporting Evidence & Relevance:

Each batch of pellets is sampled for release testing which includes potency/purity, endotoxin, and sterility testing. Release testing is performed by Dynalabs, LLC, and their sterility test method, MIC 16, Sterility Testing, Version 3, Effective 11/16/2015, is attached as **exhibit 13**. This version of the method was used during the stability study completed for hormone pellets.

Sterility validation was performed during stability testing. Per the Sterility Validation record for Estradiol 37.5 mg pellet (**exhibit 14, page 1**), and Testosterone 200 mg pellet (**exhibit 14, page 2**), Dynalabs used Direct Inoculation for validation activities. Ms. Kutz confirmed the same method is being used for their routine sterility testing. Testing results are not representative of the entire pellet, only the external surfaces.

Although this was not discussed during the inspection, it appears endotoxin testing also only evaluates the exterior surfaces of the pellets.

Discussion with Management:

Ms. Kutz explained they would be moving to parametric release of product and would no longer be performing sterility testing for the release of each batch. She stated she understood the method in use is not representative of the entire pellet and committed to correcting this if they perform sterility testing in the future.

OBSERVATION 3

Equipment and utensils are not cleaned at appropriate intervals to prevent contamination that would alter the safety, identity, strength, quality, or purity of the drug product.

Specifically, the equipment cleaning process has not been validated to ensure there is no cross-contamination between the hormone active pharmaceutical ingredients (APIs), testosterone and estradiol. The CST Stokes Pellet Press, Model 511, is used for both API products and poses the highest risk for cross-contamination due to non-dedicated product contact parts. Other equipment used with both APIs include powder control hoods, analytical balances, and calipers.

Reference: 21 CFR 211.67(a)

Supporting Evidence & Relevance:

Equipment at Asteria Health which is exposed to both testosterone and estradiol include:

AST #	Description	Manufacturer	Model	Location	Contact
AST 001	Powder Hood	Germfree	CSED-6SS	Room 17	Indirect
AST 002	Powder Hood	Germfree	CSED-6SS	Room 19	Indirect
AST 004	Analytical Balance	O'Haus	Voyager Pro 114CN	Room 19	Indirect
AST 005	Pellet Press	CCS, LLC	Stokes 511	Room 19	Direct
AST 006	Analytical Balance	O'Haus	Explorer EX1103N	Room 17	Indirect
AST 013	Calipers	Mitutoyo	CD 6" ASX	Room 19	Direct
AST 023	Powder Hood	LabConco	Xpert	Room 9	Indirect
AST 027	Analytical Balance	O'Haus	Explorer EX423N	Room 9	Indirect

Room 9 is used for incoming material sampling activities, Room 17 is used for powder blend activities, and Room 19 is used for pelleting activities.

For the pellet press, the dies used are product specific and are not shared between the two different hormone products. Equipment which is non-dedicated includes the die table, the feed shoe, and the hopper.

Although SOP CMP 07, General Compounding Cleaning and Restocking, Version 1, Effective 9/7/2017 (**exhibit 15**), states that equipment is cleaned per respective equipment procedures, there are few details for the cleaning of the pellet press within its equipment procedure. SOP EQP 08, CST Stokes Model 511 Pellet Press, Version 1, Effective 9/7/2017 (**exhibit 16**), states dies are cleaned with warm water and food grade or better detergent (step 21) and isopropyl alcohol (IPA) wipes are used for the hopper, feed cup, and metal surfaces of the press (step 22). There are no additional details for the cleaning of the press.

Cleaners used at Asteria Health include CiDehol 70 (sterile 70% IPA solution), HYPO-CHLOR 0.52% (sterile sodium hypochlorite solution), and DECON-SPORE 200 Plus (sterile peracetic acid and hydrogen peroxide solution). 70% IPA is the primary cleaner for all equipment and HYPO-CHLOR was added into use for painted and acrylic surfaces. DECON-SPORE is used for facility cleaning.

Discussion with Management:

Management understood the concerns and committed to completing a study to verify their cleaners are capable of removing traces of each hormone. However, I was provided with a written response to this observation later (**exhibit 17**) and it is not clear if they are still committed to completing cleaning validation. Although a lot of information is discussed in this response, it does not adequately substitute for information which would be gathered through a study. For example, in point 7, the argument is made that the presence of each hormone would be detected during potency testing. From the attached documentation, it shows the HPLC set-up for potency testing is similar between both hormones, except the detector for estradiol testing uses UV at 218 nm (**exhibit 17, page 4**) whereas testosterone testing uses UV at 245 nm (**exhibit 17, page 8**). There is no assurance both APIs are detectable at both wavelengths.

At the end of the inspection, Ms. Kutz also informed me they are in the process of performing IQ for a different pellet press, AST 090, Natoli, Model NP-P20A, which they intend to use exclusively for testosterone. She explained they are now intending to use separate presses for each of their hormone products.

OBSERVATION 4

There is a failure to thoroughly review the failure of a batch or any of its components to meet any of its specifications whether or not the batch has already been distributed. Specifically, the assessment of the investigation into the assay failure of an Estradiol 6 mg Pellet, Lot

04252017@3, at the 90-day time-point lacks evidence to support invalidation of the out-of-specification (OOS) result.

Reference: 21 CFR 211.192

Supporting Evidence & Relevance:

Asteria Health's BUD Assignment Report for Estradiol Pellets, 6 mg – 37.5 mg, dated 1/15/2018 (**exhibit 18**), was generated to support the 180-day expiry based on the data generated from stability data. In the section describing Study Details, an assay failure at day 90 for Lot 04252017@3 is described and invalidated.

The report states, "Despite the laboratory being unable to perform a fully FDA compliant investigation, the weight of 1 pellet being atypical compared all other pellet weights in multiple stability studies, a confirmed laboratory history of 2 identical failures in the previous 3 weeks, and Asteria Health records showing each pellet was weighed and verified during compounding, the laboratory posted the original failing result and stated there was insufficient evidence to continue investigating, or set aside the original result" (**exhibit 18, page 2**). Asteria concludes the OOS was due to a laboratory attributable error and the Estradiol 6 mg Pellets are stable.

I found numerous issues with these conclusions during my review of the data available.

Regarding the concerns with the lab investigation:

> The third-party lab, Dynalabs, was unable to perform a complete investigation because they discarded the original dilution and the HPLC vial solution, however, they still had the original stock solution.
>
> Per Dynalabs Investigation Report No. 15607 (**exhibit 18, page 13**), on 7/24/2017, day 90, Lot 04252017@3 was found to have an assay of 89.4% with a specification of 90.0 – 110.0%. On 7/25/2017, the original stock solution was re-diluted, injected, and found to have an assay of 89.6%. Per the report, the original stock solution was made with 2 pellets weighing 5.9 mg and 5.7 mg. The original dilution and HPLC vial solution were discarded, so could not be re-injected as part of the investigation. The report states no laboratory error was identified and concludes the irregular pellet weights caused the out-of-specification (OOS) result (**exhibit 18, page 15**).
>
> Although the investigation conclusion is not actually conclusive because they were unable to ensure no errors occurred from the original dilution or HPLC vial, the results from the reinjection of the original stock solution suggests the original result may be accurate. There is no obvious lab error from this report.

Regarding the conclusion that there is "a confirmed laboratory history of 2 identical failures in the previous 3 weeks":

This is not an accurate statement. It appears the 2 other failures referenced in this report are for an Asteria Testosterone 12.5 mg Pellet, Lot 0222017@2, with a low assay OOS (Dynalabs Investigation Report No. 15475) and another estradiol assay OOS in the same run as Lot 04252017@3 (Dynalabs Investigation Report No. 15598).

The testosterone assay failure, per Investigation 15475, appears to be the result of laboratory error (**exhibit 19**). The stock solution, original dilution, and HPLC vial were all tested in this case and the result appears to be poor dissolution in the original stock solution due to the variability seen during testing. This is not identical or similar to their estradiol investigation because variance would have been observed in the re-injection of the stock solution.

The estradiol assay OOS in Investigation 15598 is for pellets owned by another company; Asteria is not privy to the information from this investigation. This OOS is referenced in Section 3A, Question 7 of the investigation (**exhibit 18, page 13**). There is no way for Asteria to know whether or not this OOS is identical, or even similar, to their estradiol investigation.

Regarding the statement, "...Asteria Health records showing each pellet was weighed and verified during compounding...":

This is not an accurate statement. Per management, they weigh 100% of their pellets prior to vialling, so the pellet weights reported by the lab of 5.9 mg and 5.7 mg are not possible. The batch documentation for Lot 04252017@3 does not include pellet weights. I asked how they could come to this conclusion and was informed the pellet weights were recorded, just not using controlled forms. Management had to dig through boxes to locate the records. Pellet weight records were found and provided on 6/18/2018.

From batch documentation for Estradiol, Lot 04252017@3, a total of 325 pellets were made (**exhibit 20, page 1**) and a total of 325 were sent for sterilization (**exhibit 20, page 3**). Per the pellet weight records provided, only 321 pellet weights were recorded, including 1 pellet which was discarded for being overweight (**exhibit 21**). At least 5 pellet weights were not documented. Due to the lack of procedure and documentation, there is no way to know exactly how many pellets were made, how many were weighed/discarded, and how many were not weighed at all. Asteria cannot conclude each pellet weight was verified during compounding.

Asteria invalidated the stability assay OOS for Estradiol, Lot 04252017@3, without any supporting data.

Discussion with Management:

Ms. Kutz was surprised this observation was on the FDA 483, although we had discussed the issues I found during the inspection. She believed the data she obtained during the inspection, which she used to more adequately invalidate the data, was sufficient to address the concern. She was able to obtain chromatograms upon contacting DynaLabs and concluded the integration parameters were wrong and caused the failures to occur. When comparing the integration parameters for the reference standard curves versus the sample curves, Ms. Kutz stated it is apparent the sample curves do not include the entirety of the beginning of the curve. See **exhibit 22** for an updated investigation and new supporting evidence.

I explained that corrections made during an inspection do not negate the significance of observations. I pointed out that her most recent reason for invalidating the data is in no way supported by her original rationale described in the report. I did not re-evaluate the adequacy of this updated investigation during the inspection.

OBSERVATION 5

Written procedures describing the handling of all written and oral complaints do not include provisions for review to determine whether the complaint represents a serious and unexpected adverse drug experience which is required to be reported to the Food and Drug Administration.

Reference: 21 CFR 211.198(a)

Supporting Evidence & Relevance:

The Asteria complaint procedure does not include instructions for evaluation of whether a complaint represents an adverse drug event. Per SOP GMP 11, Customer Complaints and Inquiries, Version 2, Effective 11/1/2017 (**exhibit 23**), the PIC and Quality will perform required FDA Medwatch notifications, but it lacks direction to evaluate each complaint, definitions for adverse events and serious adverse events, and the timelines for reporting each event type.

Discussion with Management:

Management understood and promised correction.

REFUSALS

No refusals were encountered during this inspection.

GENERAL DISCUSSION WITH MANAGEMENT

At the conclusion of the inspection on 7/10/2018, I held a closing meeting with the following people present:

- William (Bill) E. Fixler, Co-Owner & Pharmacist in Charge (PIC)

- Wayne Fixler, Co-Owner & Compliance/Operations Manager
- Carla Kutz, Quality & Regulatory Affairs Manager
- Larry Stephens, Pharmacist
- Jeanne Cochran, Customer Service & Administrative Assistant
- Todd Brooks, Drug Inspector, AL Board of Pharmacy
- Dorcas Ann Taylor, CDER Compliance Officer (via teleconference)

Each item listed on the FDA 483 was read to the above individuals. I encouraged management to discuss each item and to ask any questions or for clarification, if needed. Management promised to respond to each observation in writing within 15 business days. I stated our inspection is not considered all-inclusive. I explained that these observations are in our judgment and are not necessarily those of the agency; the agency will make their final compliance determination after reviewing all information. I stated that legal sanctions available to the FDA for non-compliance include untitled letter, warning letter, injunction, seizure, and civil money penalties.

In addition to the FDA 483, I verbally discussed the following observations with management:

1. I discussed the requirement to produce products intended to be sterile under a controlled environment, minimum of ISO 8. I explained their environmental data supports the production areas being maintained at ISO 7 and ISO 8 conditions, but their EM program requires additional sampling to provide enough meaningful data. Management understood my concerns and promised correction.

No other discussions were held and the inspection was concluded. We thanked management for their time and cooperation during this inspection.

SAMPLES COLLECTED

No samples were collected.

ADDITIONAL INFORMATION

The officially sealed original copy and unsealed working copy discs containing photographs taken and electronic documentation collected during the inspection are filed with the unlabeled exhibits and attachments.

FIRM NAME FH Investments Inc. dba Asteria Health	STREET ADDRESS 7004 Champion Blvd, Suite 100
CITY, STATE, ZIP CODE, COUNTRY Birmingham, AL 35242	TYPE ESTABLISHMENT INSPECTED Outsourcing Facility

This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations, and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

DURING AN INSPECTION OF YOUR FIRM (I) (WE) OBSERVED:

OBSERVATION 1

Procedures designed to prevent microbiological contamination of drug products purporting to be sterile do not include adequate validation of the sterilization process. Specifically, during electron beam (e-beam) sterilization validation,

a. The bioburden and sterility method validation and suitability testing used for dose verification testing were not performed using testosterone and estradiol pellets made by your firm.
b. The sterility and bioburden testing methods do not evaluate the entirety of each implantable pellet, only the external surfaces.

OBSERVATION 2

Laboratory controls do not include the establishment of scientifically sound and appropriate test procedures designed to assure that drug products conform to appropriate standards of identity, strength, quality, and purity. Specifically, sterility testing of hormone pellets during release testing only provides information for the exterior surfaces of the implantable pellets. There is no evaluation of the entire pellet.

OBSERVATION 3

Equipment and utensils are not cleaned at appropriate intervals to prevent contamination that would alter the safety, identity, strength, quality, or purity of the drug product.

Specifically, the equipment cleaning process has not been validated to ensure there is no cross-contamination between the hormone active pharmaceutical ingredients (APIs), testosterone and estradiol. The CST Stokes Pellet Press, Model 511, is used for both API products and poses the highest risk for cross-contamination due to non-dedicated product contact parts. Other equipment used with both APIs include powder control hoods, analytical balances, and calipers.

OBSERVATION 4

There is a failure to thoroughly review the failure of a batch or any of its components to meet any of its specifications whether or not the batch has already been distributed. Specifically, the assessment of the investigation into the assay failure of an Estradiol 6 mg Pellet, Lot 04252017@3, at the 90-day time-point lacks evidence to support invalidation of the out-of-specification (OOS) result.

OBSERVATION 5

Written procedures describing the handling of all written and oral complaints do not include provisions for review to determine whether the complaint represents a serious and unexpected adverse drug experience which is required to be reported to the Food and Drug Administration.

***DATES OF INSPECTION:**

ADDRESS INFORMATION

Address 1 : 7004 CHAMPION BLVD

Address 2 : SUITE 100

City : BIRMINGHAM

State / Zip : AL 35242

STORAGE CONDITIONS

Facility must have proper lighting.	☑ Yes	☐ No	☐ N/A	680-X-2-.23 (2a)
The storage area must be kept free from infestation by insects, rodents, birds or vermin of any kind and must be maintained in a clean and orderly manner.	☑ Yes	☐ No	☐ N/A	680-X-2-.23 (2a)
All drugs or medicines must be stored at appropriate temperatures and under appropriate conditions in accordance with the requirements, if any, in the labeling of such drugs or medicines or with the requirements in the current edition of an official compendium. If no storage requirements are established for a drug or medicine they may held at "controlled" room temperature as defined in an official compendium to help ensure the identity, strength, quality, and purity of the same are not adversely affected.	☑ Yes	☐ No	☐ N/A	680-X-2-.23 (2a)
Must have appropriate manual, electromechanical, or electronic temperature and humidly recording equipment, devices, and/or logs shall be utilized to document proper storage of drugs.	☑ Yes	☐ No	☐ N/A	680-X-2-.23 (2a)
A separate quarantine storage section must be provided for drugs or medicines that are deteriorated, outdated, misbranded, or otherwise adulterated, or that are in immediate or sealed secondary containers that have been opened.	☑ Yes	☐ No	☐ N/A	680-X-2-.23 (2a)
Drugs shipments must be visually examined for identity and to prevent the acceptance or distribution of contaminated or damaged products.	☑ Yes	☐ No	☐ N/A	680-X-2-.23 (2a)

FACILITIES

Must be of suitable size, construction, and location to facilitate cleaning, maintenance, and proper operations. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2b)

Buildings must meet all applicable federal, state and local standards. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2b)

A facility may not be located in a residence. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2b)

SECURITY

Facility secure from unauthorized entry. ☑ Yes ☐ No ☐ N/A

Key pad locked entry door.
680-X-2-.23 (2c)

Facility must be equipped with an alarm system to detect entry after hours. ☑ Yes ☐ No ☐ N/A

CSV ALARM
680-X-2-.23 (2c)

Must ensure access from outside their premise is reduced to a minimum and well controlled. This includes but not limited to, the installation of adequate lighting at the outside perimeter. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2c)

Internal security policies to provide reasonable protection against theft by personnel. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2c)

Policies for protection against computer theft and crimes. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2c)

Entry to areas where drugs are held shall be limited to authorized personnel. ☑ Yes ☐ No ☐ N/A

Secured at all times.
680-X-2-.23 (2c)

RECORD KEEPING REQUIREMENTS

Drug Distributors shall establish and maintain inventories and records of all transactions regarding the receipt and distribution or other disposition of drugs. Shall consist of the following:
1. The source of all drugs, including the name and principle address of the seller or transferor, and the address of the location from which the drugs were shipped. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2e1)

2. The identity and quantity of the drugs received and distributed or disposed of. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2e1)

3. The dates or receipt and distribution or disposition of the drugs. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2e1)

Inventories and records must be kept 2 years following disposition of the drugs, for inspection and photocopying. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2e1)

All records described in this rule, that are kept on site or that can be immediately retrieved by computer or other electronic means shall be readily available for inspection during the retention period. ☑ Yes ☐ No ☐ N/A
680-X-2-.23 (2e1)

Records kept at a central location apart from the inspection site and not electronically retrievable shall be made available for inspection within two (2) working days of a request by authorized personnel.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (2e1)

All charge back transactions must be maintained separately from al other records.

☑ Yes ☐ No ☐ N/A

Reviewed multiple physicians orders.

680-X-2-.23 (2e1)

Copies of records and reports required by DEA concerning the increases in purchases or high volumes purchased by pharmacies, shell be forwarded to the Board of Pharmacy.

☑ Yes ☐ No ☐ N/A

Last DEA INSPECTION 9-22-21.

680-X-2-.23 (2e1)

WRITTEN POLICIES AND PROCEDURES

A procedure to ensure that wholesale drug distributors prepares for, protect against, and handle any crisis that affects security or operation of any facility in the event of strike, fire, flood or other natural disaster or any other situation of local, state, or nation emergency.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (g1.i)

A written procedure to ensure that any outdated drugs shall be segregated from other drugs and either returned to the manufacturer or destroyed. This procedure shall provide for written documentation of the disposition of outdated drugs and shall be maintained for two (2) years.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (g1.ii)

A procedure whereby the oldest approved stock of a drug product is distributed first. The procedure may permit deviation if temporary and appropriate.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (g1.iii)

A procedure to be followed for handling recalls and withdrawals of drugs which shall be adequate to deal with recalls and withdrawals due to:
1.Any action initiated at the request of the FDA or other Federal, State or Municipal law enforcement or other governmental agency including the Alabama State Board of Pharmacy.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (g1.iv)

2. Any voluntary action by the manufacturer to remove defective or potentially defective drugs from the market.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (g1.iv)

3. Any action undertaken to promote public health and safety by placing existing merchandise with an improved product or new package design.

☑ Yes ☐ No ☐ N/A

680-X-2-.23 (g1.iv)

CHEMICAL PERMIT HOLDERS

A licensee shall make an accurate and legible record of any transaction of listed precursor chemicals and maintain such record together with the following records for a period of at least two (2) years:
1. Inventory on hand

☐ Yes ☐ No ☑ N/A

20-2-182 (d)

2. Purchase receipts.

☐ Yes ☐ No ☑ N/A

20-2-182 (d)

3. Manufacturing records including the date and quantity of any listed precursor chemicals manufactured, the quantity of listed precursor chemicals used in the manufacturing any other substance or product, and the inventory on hand of listed precursor chemicals after the manufacturing of any substance or product

☐ Yes ☐ No ☑ N/A

20-2-182 (d)

4. Copies of the Board of Pharmacy licenses or permits.

☐ Yes ☐ No ☑ N/A

20-2-182 (d)

5. Records of substance disposal.

☐ Yes ☐ No ☑ N/A

20-2-182 (d)

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: FH Investments Inc. d/b/a Asteria Health

NV Pharmacy or Outsourcing facility license # (if applicable): OUT00011

Physical Address: 7004 Champion Blvd, Suite 100

City: Birmingham State: AL Zip: 35242

Mailing Address (if different from physical address): same as above.

City: State: Zip:

Telephone: 205-995-0505 Toll Free # (NAC 639.708, NRS 639.23286): 855-771-0505

Fax: 205-995-0507 Contact Email: licensing@biote.com

Website: www.asteriahealth.com

Nevada Business License # (if applicable)

Supervising/Managing Pharmacist Name (NRS 639.220): Christopher Musser

Supervising/Managing Pharmacist NV Pharmacist Registration #: 20144

Name of Person with direct knowledge of compounding procedures: Christopher Musser

Email of Person with direct knowledge of compounding procedures: Christopher Musser

Telephone of Person with direct knowledge of compounding procedures: 205-995-0505

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☐ Low ☐ Medium ☒ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☒ Yes ☐ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

All products are terminally sterilized per ISO by electron beam exposure. All products are compounded in an ISO-8 environment, as required by FDA guidance for 503B for terminally sterilized products.

Estradiol Pellets: 6mg, 10mg, 12.5mg, 15mg, 18mg, 20mg, 22mg, 25mg and 37.5mg
Testosterone Pellets: 12.5mg, 18mg, 25mg, 37.5mg, 50mg, 62.5mg, 87.5mg, 100mg, 200mg and 303mg
Testosterone 60mg / Anastrozole 4mg Pellets
Testosterone 75mg / Anastrozole 4mg Pellets
Testosterone 100mg / Anastrozole 4mg Pellets
Testosterone 200mg / Anastrozole 10mg Pellets
Testosterone 87.5mg / Triamcinolone Acetonide 17.5mcg Pellets
Testosterone 100mg / Triamcinolone Acetonide 20mcg Pellets

4. Will you be utilizing beyond use dates in excess of USP-797? ☒ Yes ☐ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:

USP compliant stability testing per ICH Q1 (R2). Products successfully passed established criteria for beyond use dating of 1 year.

6. What laboratory performs this additional testing?

Name: Dynalabs
Address: 2327 Shouteau Blvd
City: St. Louis State: MO Zip: 63103
Telephone: 1-800-DYNALABS

7. What is your procedure for visual inspection of compounded sterile products?

See attached PRD-04 for visual inspection of pellets.

8. How often do you perform glove fingertip and medial fill testing?

Glove fingertip testing is performed quarterly for all employees entering the production rooms in triplicate. No media fill testing is possible since this is a dry granulation compressed into pellets.

9. What is your policy if an employee fails a glove fingertip or media-fill test?

Gloved fingertip testing is performed for all the employee's thumbs, left hand, and right hand. A 'set' is the group of 3 plates from one complete verification. If the set shows 3-4 cfu, the employee will be retrained and retested once. If the set shows 5 cfu or more, the employee will be retrained and repeat testing in triplicate. If failed again, they will be reassigned to a non-product contact function.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

See attached training modules for PIC (Pharmacist In Charge), Staff Pharmacist, TS Technician 1 and 2.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

See attached cleaning procedures describing steps and frequency of clean and disinfectant validated. There are weekly and monthly cleaning forms that are completed as described, and CMP 07 describes cleaning and restocking.

12. Who performs the sterile compounding process at your facility?

Qualified and trained employees that have demonstrated competency and understanding of SOPs. In addition, there are two pharmacists on staff that oversee activities in the processing rooms.

13. Who is responsible and accountable for the sterile compounding process at your facility?

All employees are responsible for following SOPs governing the process, but the Pharmacist in Charge (PIC) is ultimately accountable for all products and that they were manufactured under cGMP processes.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

All packages are sent through a 3PL supplier (FedEx) with a priority of not longer than 2-day express. In addition, shipping validation has been performed at both extreme temps (hot and cold) and showed no impact on the efficacy of the pellets.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? All hazardous compounding is performed in a biological safety cabinet (BSC-I) which is externally vented to the outside, physically separated from the other suites, meets ISO-8 guidelines for air changes per hour, and runs continuously.		
2. Is your BSC or CACI vented 100% to the outside?	■ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	■ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	■ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	■ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	■ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers? We do not provide any information to patients since the pellets are administered by a health care professional in a doctor's office or clinic setting. The clinic is responsible for the handling and disposal of hazardous or controlled substances and creating their SOPs and processes to adhere to DEA and OSHA regulations.		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs? See attached training modules for PIC (Pharmacist In Charge), Staff Pharmacist, TS Technician 1 and 2.		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

Testosterone 60mg / Anastrozole 4mg Pellets
Testosterone 75mg / Anastrozole 4mg Pellets
Testosterone 100mg / Anastrozole 4mg Pellets
Testosterone 200mg / Anastrozole 10mg Pellets

All of the products manufactured at this site are considered high risk compounding because they originate from non-sterile ingredients. In addition, Anastrozole is a Table 1 hazardous drug on the NIOSH list and the products containing Anastrozole are listed above.

2. What sterilization methods are utilized at your facility?

Asteria Health is a 503b compounding outsourcing facility and all of our pellets are terminally sterilized using e-beam technology at Steri-Tech.

3. Does your facility utilize biological indicators? ☐ Yes ☒ No

4. If yes, describe how they are utilized:

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the EVP, Officer (title) for Tractor Supply Company (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, John Jairo Navas hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Officer (title) for Agropec Trading, LLC DBA Allivet (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 11: Managing Pharmacist Acknowledgement, Professional/Personal History – REQUIRED TO BE COMPLETED BY THE MANAGING PHARMACIST FOR NEVADA LOCATED PHARMACY APPLICANTS ONLY

Managing Pharmacist Name: Christopher Erast Tarangul Pharmacist Registration #: Nevada 09314

Pharmacy Name: Agropec Trading, LLC DBA Allivet

Initial each statement below to indicate you have read and agree with the following:

CT I understand that as the managing pharmacist I am responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. I understand my license can be revoked or that I can be subject of disciplinary action if such laws or regulations are knowingly violated in the pharmacy in which I am the managing pharmacist.

CT I understand within 48 hours after I report for duty as the managing pharmacist, I shall complete an inventory of all controlled substances of the pharmacy pursuant to 21 CFR Part 1304 and maintain a copy of the inventory in the file at the pharmacy.

CT I understand that if I cease to be managing pharmacist of the above-named pharmacy, I will jointly, with the new managing pharmacist, take an inventory of all controlled substances.

CT I understand that as the managing pharmacist I must ensure that all loss or theft of controlled substances are reported on forms provided by the Nevada State Board of Pharmacy and Department of Public Safety within 10 days after the date of discovery of theft or loss. NRS 453.568. Federal regulations require that registrants notify the Field Division Office of the Administration in his area, in writing, of the theft or significant loss of any controlled substance, disposal receptacles or listed chemicals within one business day of discovery of such loss or theft. The registrant shall also complete and submit to the Field Division Office in his area, DEA Form 106 regarding the loss or theft (21 C.F.R. §1301.76(b) and 21 U.S.C. §830(b)(1)(C)).

CT I understand that as the managing pharmacist I must notify the Nevada State Board of Pharmacy of all employment changes of pharmacy staff within 10 days of the change. NAC 639.540

Personal and Professional History	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔
2. Have you been charged, arrested, or convicted of a felony or misdemeanor in any state?		✔
3. Have you been the subject of a board citation or an administrative action whether completed or pending in any state?		✔
4. Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?		✔

If you marked YES to any questions above, include the following information and provide a signed statement of explanation. Copies of any documents that identify the circumstance or contain an order, agreement or other disposition is required.

Re: Agropec Trading, LLC dba Allivet

Nevada Pharmacy Application – Signed Statement of State Actions Explanation

This statement serves as an explanation in response to Section 3, Question 3: History of Company, on the Nevada Pharmacy application, which was answered "Yes."

Agropec Trading, LLC, doing business as Allivet, has been the subject of regulatory actions concerning its licenses in other states, specifically related to our Miami Lakes, Florida pharmacy.

A detailed summary of the state actions related to this matter is attached for your review.

I affirm that the above information and the attached documentation are true and correct to the best of my knowledge.

John Jairo Navas – Officer

State Disciplinary Actions

1. **Oregon - 2008-0097 - 12/09/08**

   The case with the state of Oregon was opened on Dec 9th, 2008, and settled with a consent order dated February 18th, 2009. There was a civil fine of $750 due to Allivet shipping to Oregon in early 2008 without an out of state license. This was an unintentional oversight as Allivet was a new pharmacy and was in the process of obtaining all licenses.

2. **Indiana - 2011 IBP 0053 - 09/28/11**

   Allivet began shipping prescription orders into the state of Indiana while the pharmacy application was still in process. Because of that, Indiana sent a stop-ship order dated September 28th, 2011. Allivet received its out of state pharmacy license from the state of Indiana in December 2011 and was able to continue operating without any further issues.

3. **Alabama-16-L-0130 - 02/28/17**

   This action was a ***derivative action*** referencing the following disciplinary actions:

   - Oregon - 2008-0097 - 12/09/08
   - Indiana - 2011 IBP 0053 - 09/28/11

4. **Colorado - CO-2013-534 - 12/19/13**

   Allivet was fined $1,100 by Colorado for dispensing medications without a wholesale license to a veterinarian. At the time of the incident in 2011, Isoxsuprine was on manufacturer backorder, but Allivet had the product in stock. Due to the product's constrains Allivet was contacted by a veterinarian urgently requiring this medicine for his pet owners in Colorado. Allivet provided the medication, unaware of the wholesale licensing requirements. Allivet does not engage in any wholesale pharmacy transactions to ensure full compliance with state regulations.

5. **Alabama-AL-2015-001 - 10/10/15**

   Allivet applied for a Pharmacist-in-Charge (PIC) license with the Alabama Board of Pharmacy on November 10, 2014, to facilitate the renewal of its pharmacy license for 2015. Alabama scheduled a meeting for Allivet's pharmacist in February 2015, beyond the expiration date of the license on December 31, 2014. To address this, Allivet contacted the Board of Alabama to request an earlier meeting and to confirm that its renewal would not be affected by the schedule. During this time, it was assured that Allivet's pharmacy license would remain in good standing until the in-person meeting, and the Board's website indicated the license as active. Operating under this assumption, Allivet continued shipping products. When questioned about early 2015 shipments, Allivet explained that it believed it was permitted to do so based on prior communications. As a result, Allivet was fined $500 for shipping into the state without an Alabama-licensed Pharmacist-in-Charge.

Fax 877-500-9950
www.allivet.com

6. **Arkansas-AR-2015-049 - 10/13/15**

   In 2015, a technical issue in Allivet's system compromised the designated safety measures to prevent shipment of prescription items without active licenses. As a result, orders placed over the phone were processed and shipped into Arkansas without a valid license in 2015.

7. **Alabama-17-L-0050 - 05/18/17**

   This action was a ***derivative action*** referencing the following disciplinary action:

   - Arkansas-AR-2015-049 - 10/13/15

8. **Colorado - 2018-6062 - 08/13/18**

   This action was a ***derivative action*** referencing the following disciplinary action:

   - Arkansas-AR-2015-049 - 10/13/15

9. **Michigan-53-17-148216 - 06/25/18**

   Action I:
   In late 2008, Allivet changed locations and failed to report the change of location within 30 days to the Michigan Board of Pharmacy. This was an unintentional oversight as Allivet had just opened its pharmacy in 2007. At the following renewal date, Allivet noted the new address which triggered the action.

   Action II:
   This action was a ***derivative action*** referencing the following disciplinary actions:
   - Oregon - 2008-0097 - 12/09/08
   - Alabama-AL-2015-001 - 10/10/15
   - Arkansas-AR-2015-049 - 10/13/15

10. **Texas-K-17-031 - 07/09/18**

    Action I:
    This action was a ***derivative action*** referencing the following disciplinary actions:

    - Oregon - 2008-0097 - 12/09/08
    - Indiana - 2011 IBP 0053 - 09/28/11
    - Colorado - CO-2013-534 - 12/19/13

Miami Lakes, FL 33014
Phone 877-500-9944
Fax 877-500-9950
www.allivet.com

Action II:
On September 1st, 2016, the Texas Board of Pharmacy changed the requirement for non-resident pharmacies to have a licensed Texas Pharmacist in Charge. Allivet immediately began the process to obtain licensure for its pharmacist, but due to the lengthy process, the license was not granted until May 2017. Therefore, due to the Texas regulatory change, Allivet operated without a Texas-licensed Pharmacist-in-Charge from September 1, 2016, to May 21, 2017. Currently, Allivet holds an active license and is in good standing with the state of Texas.

11. Illinois - 021930788 - 11/05/19

This action was a ***derivative action*** referencing the following disciplinary actions:

- Oregon - 2008-0097 - 12/09/08
- Indiana - 2011 IBP 0053 - 09/28/11
- Colorado - CO-2013-534 - 12/19/13
- Alabama-AL-2015-001 - 10/10/15
- Arkansas- AR-205-049 - 10/13/15
- Michigan-53-17-1481216 - 06/25/18
- Texas-K-17-031 - 07/09/18

12. Hawaii-RICO Case No. PHA 2019-79-L - 12/26/19

This action was a ***derivative action*** referencing the following disciplinary actions:

- Texas-K-17-031 - 07/09/18
- Michigan-53-17-148216 - 06/25/18

13. Alabama-19-L-0007 - 01/06/20

This action was a ***derivative action*** referencing the following disciplinary actions:

- Florida Case No. 2008-26608[1]
- Texas-K-17-031 - 07/09/18
- Colorado - 2018-6062 - 08/13/18
- Michigan-53-17-148216 - 06/25/18
- Alabama-16-L-0130 - 02/28/17
- Alabama-17-L-0050 - 05/18/17

[1] Original case was under a different pharmacy license, which has no impact or connection to Allivet's current license nor disciplinary history.

14. Hawaii-RICO Case No. PHA 2020-168-L - 01/18/21

This action was a ***derivative action*** referencing the following disciplinary actions:

- Michigan-53-17-148216 - 06/25/18
- Texas-K-17-031 - 07/09/18
- Colorado - 2018-6062 - 08/13/18
- Illinois- 021930788 - 11/05/19

15. Nebraska - Censure Complaint #20190354 - 07/09/20

This censure derived from selling rabies vaccines to consumers in Nebraska, instead of the prescribing veterinarian. Allivet has since taken down the sales of all rabies vaccines across all 50 states to avoid similar circumstances where the Board changes its stance with this product. Dismissal order matter was approved by Hearing Officer on 07/09/2020.

16. Alabama - Consent Letter - 11/10/21

This action was a ***derivative action*** referencing the following disciplinary action:

- Nebraska - Censure Complaint #20190354 - 07/09/20

17. Hawaii - RICO Case No. PHA2022-2-L - 05/25/22

This action was a ***derivative action*** referencing the following disciplinary action:

- Nebraska - Censure Complaint #20190354 - 07/09/20
- Alabama - Consent Letter - 11/10/21

Non-Disciplinary Communications

1. Tennessee – Consent Letter – 01/25/2024 Case No. 2023026981

In June 2023, the company changed the Pharmacist in Charge (PIC) at its Miami facility and as required, notified each State Board of Pharmacy. Unfortunately, the notification sent to Tennessee contained an incorrect date, suggesting that there was a brief period when the Miami facility did not have a PIC. This was merely a clerical error. The company has provided all requested records to the Tennessee Board, along with an affidavit from the PIC, demonstrating compliance with PIC regulations at all times. On October 16, 2024, the Tennessee Attorney General for the Board of Pharmacy communicated that the case was closed. No discipline was imposed.

2. **Missouri – Letter of Concern – 03/28/2024**

This action was a letter of concern related to the failure to report disciplinary action taken by Hawaii (RICO Case No. PHA2022-2-L; see 17 above). No discipline was imposed.

Section 9: Statement of Responsibility - MUST BE COMPLETED by an Authorized Person (NAC 639.945)

Statement of Responsibility

1. I am the Secretary (title) for OptumRx Pharmacy of Nevada, Inc. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be responsible for any violations of pharmacy law that may occur in the Pharmacy owned by such owner(s), shareholder(s), member(s), or partner(s).
3. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) may be named in any action taken by the Nevada State Board of Pharmacy against the Pharmacy.
4. I further understand and acknowledge that any owner(s), shareholder(s), member(s), or partner(s) cannot require or permit the pharmacist(s) in said Pharmacy to violate any provision of local, state, or federal laws or regulations pertaining to the practice of pharmacy.
5. I further understand and acknowledge that Nevada law requires that each pharmacy located inside the State of Nevada employ only pharmacists, intern pharmacists, pharmaceutical technicians, and technicians in training that are licensed by the Nevada State Board of Pharmacy. (NRS 639.100).
6. I further understand and acknowledge that Nevada law requires that each pharmacy located outside the State of Nevada engaged in providing pharmacy services into Nevada employs at least one pharmacist licensed by the Nevada State Board of Pharmacy who will be responsible for any prescription dispensed to a patient located in Nevada and responsible for any acts or omissions of pharmacy personnel who are not registered with the Board. (NRS 639.2328).

Section 10: Affidavit for Pharmacies- MUST BE COMPLETED by pharmacies NOT CURRENTLY PERFORMING Sterile Compounding

Affidavit for Pharmacy License

I, Vivian ho hereby certify that the assertions in this Affidavit are true and correct to the best of my knowledge and belief, and state as follows:

1. I am the Pharmacist-in-Charge (title) for OptumRx Pharmacy of Nevada, Inc. (name of Pharmacy) and in that capacity, I am authorized to speak on the Pharmacy's behalf.
2. I certify that upon licensure, the Pharmacy will not perform sterile compounding or ship sterile compounds into Nevada.
3. I understand and acknowledge that the Pharmacy and any of its staff members may be subject to discipline by the Board if the Pharmacy performs sterile compounding or ships any sterile compounds into Nevada without first obtaining written authorization from the Board to do so.
4. I certify that if the Pharmacy makes the decision to perform sterile compounding or to ship any sterile compounds into Nevada, the Pharmacy, through an authorized representative, will first notify the Board via a written request, and obtain written approval to perform sterile compounding or to ship any sterile compounds into Nevada.
5. I understand that if the Pharmacy seeks approval to perform sterile compounding or to ship any sterile compounds into Nevada, an authorized representative of the Pharmacy may be required to appear before the Board to answer questions before such approval is granted.

FURTHER YOUR AFFIANT SAYETH NAUGHT.

Section 11: Managing Pharmacist Acknowledgement, Professional/Personal History – REQUIRED TO BE COMPLETED BY THE MANAGING PHARMACIST FOR NEVADA LOCATED PHARMACY APPLICANTS ONLY

Managing Pharmacist Name: Vivian Ho Pharmacist Registration #: 20251

Pharmacy Name: OptumRx Pharmacy of Nevada, Inc.

Initial each statement below to indicate you have read and agree with the following:

I understand that as the managing pharmacist I am responsible for compliance by the pharmacy and its personnel with all state and federal laws and regulations relating to the operation of the pharmacy and the practice of pharmacy. I understand my license can be revoked or that I can be subject of disciplinary action if such laws or regulations are knowingly violated in the pharmacy in which I am the managing pharmacist.

I understand within 48 hours after I report for duty as the managing pharmacist, I shall complete an inventory of all controlled substances of the pharmacy pursuant to 21 CFR Part 1304 and maintain a copy of the inventory in the file at the pharmacy.

I understand that if I cease to be managing pharmacist of the above-named pharmacy, I will jointly, with the new managing pharmacist, take an inventory of all controlled substances.

I understand that as the managing pharmacist I must ensure that all loss or theft of controlled substances are reported on forms provided by the Nevada State Board of Pharmacy and Department of Public Safety within 10 days after the date of discovery of theft or loss. NRS 453.568. Federal regulations require that registrants notify the Field Division Office of the Administration in his area, in writing, of the theft or significant loss of any controlled substance, disposal receptacles or listed chemicals within one business day of discovery of such loss or theft. The registrant shall also complete and submit to the Field Division Office in his area, DEA Form 106 regarding the loss or theft (21 C.F.R. §1301.76(b) and 21 U.S.C. §830(b)(1)(C)).

I understand that as the managing pharmacist I must notify the Nevada State Board of Pharmacy of all employment changes of pharmacy staff within 10 days of the change. NAC 639.540

Personal and Professional History	Yes	No
1. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		X
2. Have you been charged, arrested, or convicted of a felony or misdemeanor in any state?		X
3. Have you been the subject of a board citation or an administrative action whether completed or pending in any state?		X
4. Has your license been subjected to any discipline for violation of pharmacy or drug laws in any state?		X

If you marked YES to any questions above, include the following information and provide a signed statement of explanation. Copies of any documents that identify the circumstance or contain an order, agreement or other disposition is required.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		X
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		X
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		X
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		X
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		X
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		X
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		X
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		X
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		X

I, Vivian Ho, **certify that as the designated representative for**

OptumRx Pharmacy of Nevada, Inc., d/b/a Culinary Pharmacy,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. AAA I am at least 21 years of age;
3. AAA I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. AAA I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. AAA I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. AAA I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. AAA I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

Subject: Inspection Number: X2023-551
Facility Type: Mail Order
License Number: PHAR.CF.61458335
Inspection Type: NEW LICENSURE - INITIAL

Dear Nathan Robert Kenney,

This letter contains information regarding the recent inspection of Aequita Pharmacy, 12825 NE 126th Pl Ste B465, Kirkland, WA, 98034-7721 by the Washington State Department of Health. Your state licensing inspection was completed on 02/26/2024. Inspections represent the scope of practice observed during the inspector's time on-site and may not be all inclusive.

During the initial licensing inspection process, the licensee met minimum required expectations for licensure.

Please contact me if there are questions regarding the inspection process. You may reach me at (360) 485-5088. I am also available by email at Mariam.Boulos@doh.wa.gov.

Sincerely,

Mariam Boulos

Mariam Boulos BS Pharm
Pharmacist Inspector

How was your pharmacy inspection experience?

Please take a few minutes to complete this brief survey. In order to provide you with the best possible service, we need your comments on how we do our job, especially if you can offer suggestions for improvement. Unless you choose to give us your contact information, this is an anonymous survey. The survey is voluntary and will not affect your current or future inspection results. All responses will be used solely to improve our pharmacy inspection service.

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Aequita Pharmacy

NV Pharmacy or Outsourcing facility license # (if applicable): _____

Physical Address: 12825 NE 126th Pl.

City: Kirkland State: WA Zip: 98034

Mailing Address (if different from physical address): _____

City: _____ State: _____ Zip: _____

Telephone: 425-224-2330 Toll Free # (NAC 639.708, NRS 639.23286): 844-282-1430

Fax: 425-305-4175 Contact Email: nate@aequitapharmacy.com

Website: www.aequitapharmacy.com

Nevada Business License # (if applicable) _____

Supervising/Managing Pharmacist Name (NRS 639.220): Nathan Kenney

Supervising/Managing Pharmacist NV Pharmacist Registration #: n/a, no NV license. WA license # PH60287806

Name of Person with direct knowledge of compounding procedures: Nathan Kenney

Email of Person with direct knowledge of compounding procedures: nate@aequitapharmacy.com

Telephone of Person with direct knowledge of compounding procedures: 425-260-0045

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☐ Low ☒ Medium ☒ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☐ Yes ☒ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
tirzepatide/niacinamide injectable solution
semaglutide/cyanocobalamin injectable solution
methylcobalamin
Trimix/Bimix
glutathione

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:

6. What laboratory performs this additional testing?

Name: ARL Bio Pharma

Address: 80 Research Parkway Suite 546

City: Oklahoma City State: OK Zip: 73104

Telephone: 800-393-1595

7. What is your procedure for visual inspection of compounded sterile products?

Physical testing requirements:The end product must be visually inspected for: Container leaks, integrity, solution cloudiness or phase separation, appropriate color and volume separation

Particulate testing (liquids):
Sampling (one unit per batch and, if placed in storage, immediately before shipping).
Wipe the container with a damp, lint-free wipe to remove any external particles.
Using powder-free gloves, hold the container by its top and swirl the contents by rotating the wrist in a circular motion.
Hold the container horizontally about four inches below a light source against a white and/or black background and move the container back and forth.

8. How often do you perform glove fingertip and medial fill testing?

Every 3 months

9. What is your policy if an employee fails a glove fingertip or media-fill test?

Immediate re-training including in person coaching and review of any potential contributiing issues, as well as review of training modules, followed by a re-test of competency.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

Our staff annually review the 28 modules in CriticalPoint©s USP 797 course, as well as completion of on-site/in-person review of all USP 797 competencies in our Simplifi 797/SoleSource portal. These include garbing and gowning, gloved fingertip testing, and media fill testing.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

Weekly full cleaning of PECs and SEC are completed using PreEmpt RTU as disinfectant, followed by Peridox RTU as sporicidal agent, follwed by sterile isopropyl alcohol as cleaning agent.

12. Who performs the sterile compounding process at your facility?

Only pharmacists and technicians that are trained in our sterile compounding processes.

13. Who is responsible and accountable for the sterile compounding process at your facility?

The pharmacist in charge and staff pharmacists.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

If medications require refrigeration, they are shipped with freezer packs and/or ice rods to keep them at the desired temperature, inside a styrofoam-lined cooler box if needed depending on time of year and weather conditions in the place we are shipping to. They are also padded to avoid excessive shaking and labeled as fragile.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility?		
2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:
tirzepatide/niacinamide injectable solution
semaglutide/cyanocobalamin injectable solution
methylcobalamin
Trimix/Bimix
Glutathione

2. What sterilization methods are utilized at your facility?
Sterilization by filtration. Sterilization is tested and validated by a third party lab on each compound.

3. Does your facility utilize biological indicators? ☐ Yes ■ No

4. If yes, describe how they are utilized:
n/a

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. Kroger Specialty Infusion CA

Discipline Statement

On 8/3/21, the Texas State BOP issued KSI CA an administrative penalty for operating without a licensed Texas Pharmacist-in-Charge. KSI CA paid a $1000 fine. Documentation is attached.

In 2018, the Alabama BOP issued a Deferral Agreement with a $1,000; this agreement was not regarded as disciplinary action and had no impact on the pharmacy's license. Documentation is attached.

Under the previous ModernHealth ownership, the pharmacy was placed on probation by the Ohio, Oregon, Hawaii, and Texas Boards of Pharmacy.

- The OH BOP issued the probation in 2014 and terminated probation as a result of the change of ownership in 2017.
- The OR BOP issued probation in 2015, completed in 2016.
- The HI BOP issued a one-year probation and $2,500 fine in 2015.
- The TX BOP issued a two-year probation and $1,200 fine in 2015. All probation statuses have since been resolved.

RE: In the Matter of Kroger Specialty Infusion CA

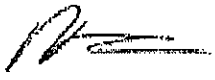
Dear Kirankumar Kanaiyalal Patel:

Enclosed is a copy of Agreed Board Order (ABO) #2020-02929 that was entered by the Texas State Board of Pharmacy (Board) concerning the above-referenced matter. The Board entered this Order on August 3, 2021. The requirements and conditions of the enclosed Order and matters relating to the Order are discussed below.

ADMINISTRATIVE PENALTY (FINE)

Under the terms of this Order, Kroger Specialty Infusion CA (pharmacy license #31361) must pay an administrative penalty (fine) of $1,000.00. **This fine is due on or before December 1, 2021.** Please make your cashier's check or money order payable to the "Texas State Board of Pharmacy" and submit to the Board's office by the due date. Please include your ABO number (#2020-02929) on the cashier's check or money order. **Note:** The Board will **not** accept partial payments. You must submit payment for the full amount by the due date.

LICENSE RENEWAL APPLICATIONS



Prior to the next expiration date of pharmacy license #31361, the pharmacy will complete a license renewal application for the Texas State Board of Pharmacy. This application will require a pharmacy representative to answer the question:

> "Has the PHARMACY, THE PHARMACY'S owner or any officer or partner (if the pharmacy is owned by a corporation or partnership) been the subject of any professional disciplinary action or are any such actions pending against you by a regulatory authority within the last 36 months?..."

As a result of the entry of ABO #2020-02929, Kroger Specialty Infusion CA must answer "yes" to this question for 36 months from the date of the termination of all sanctions. Consequently, a Kroger Specialty Infusion CA representative must answer "yes" to this question on any renewal applications submitted beginning August 3, 2021 and ending 36 months following the termination of all sanctions.

If you have any questions about this Order, please contact Madeline Fojtik, Enforcement Specialist, at (512) 305-8054 or via madeline.fojtik@pharmacy.texas.gov.

Sincerely,

Robert Rivera
Enforcement Program Manager

AGREED BOARD ORDER #2020-02929

RE: IN THE MATTER OF KROGER SPECIALTY INFUSION CA (PHARMACY LICENSE #31361)

BEFORE THE TEXAS STATE BOARD OF PHARMACY

On this day came on to be considered by the Texas State Board of Pharmacy (Board) the matter of pharmacy license number 31361 issued to Kroger Specialty Infusion CA (Respondent), 19110 Van Ness Avenue, Torrance, California 90501.

By letter dated May 18, 2021, the Board gave preliminary notice to Respondent of its intent to take disciplinary action. This action was taken as a result of an investigation which produced evidence indicating that Respondent may have violated:

Sections 562.101(f); and 565.002(a)(3) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3, Subtitle J (2019); and

Section 291.103 of the Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2020), in that allegedly:

COUNT

On or about January 24, 2020, through on or about June 21, 2020, Kroger Specialty Infusion CA, 19110 Van Ness Avenue, Torrance, California 90501, was engaged in the operation of a non-resident pharmacy engaged in compounding sterile preparations in violation of Texas State Board of Pharmacy Rules, in that the pharmacy was not under the supervision of a pharmacist-in-charge licensed as a pharmacist in Texas.

By letter dated May 18, 2021, Respondent was notified that the matters previously set out in this Order could be disposed of without the scheduling of an informal conference or a formal administrative hearing. By signing this Order, Christine Wheatley, Managing Officer, Kroger Specialty Infusion CA, LLC on behalf of Respondent, neither admits nor denies the truth of the matters previously set out in this Order, and agrees that the Board has jurisdiction in this matter and waives the right to an informal conference, notice of hearing, formal administrative hearing, and judicial review of this Order.

The parties acknowledge that this Order resolves the allegations set forth herein, and agree to the terms and conditions set forth in the ORDER OF THE BOARD below.

ORDER OF THE BOARD

THEREFORE, PREMISES CONSIDERED, the Board does hereby ORDER that:

(1) Respondent shall pay an administrative penalty of one thousand dollars ($1,000) due one hundred twenty (120) days after the entry of this Order.

(2) Failure to comply with any of the requirements in this Order constitutes a violation and shall be grounds for further disciplinary action. The requirements of this Order are subject to the Texas Pharmacy Act, TEX. OCC. CODE ANN., Title 3, Subtitle J (2019), and Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2021).

And it is so ORDERED.

THIS ORDER IS A PUBLIC RECORD.

SIGNED AND ENTERED ON THIS 3rd day of August, 2021.

DEFERRAL AGREEMENT

This Agreement is entered into by and between the Alabama State Board of Pharmacy (Board) and Kroger Specialty Infusion CA f/k/a Biofusion, LLC (Kroger).

WHEREAS, Kroger was timely served with a Statement of Charges and Notice of Hearing (Pending Charges) alleging violations of the Alabama Pharmacy Practice Act. A copy of the Pending Charges is attached hereto as Exhibit "A".

WHEREAS, the parties, through counsel, have engaged in discussions concerning an informal resolution of the Pending Charges.

WHEREAS, the parties have agreed to resolve this matter pursuant to Code of Alabama (1975) 41-22-12(f) by their approval of the following terms:

IT IS THE THEREFORE UNDERSTOOD AND AGREED BY THE PARTIES AS FOLLOWS:

1. The Pending Charges against Kroger shall be deferred until December 31, 2018.

2. As a condition to the deferral described above, Kroger shall pay costs in the amount of One Thousand Dollars ($1,000.00) within thirty (30) days of the effective date of this Agreement, that being the date it is signed on behalf of the Board. Failure to pay this amount shall be considered a probable cause violation by Kroger as defined below.

3. In the event there are no probable cause violations of the Alabama

Pharmacy Practice Act involving Kroger during the deferral period set forth above, the Pending Charges shall be dismissed. Discipline in another state based upon the Ohio Order the subject of the Pending Charges shall not be considered a probable cause violation.

4. In the event there is a probable cause violation of the Alabama Pharmacy Practice Act involving Kroger during the deferral period set forth above, both the Pending Charges and any new charges shall be noticed and scheduled for a hearing.

5. Neither the Pending Charges or this Agreement shall be reported as discipline as long as Kroger complies with the conditions of Paragraphs Two through Four of this Agreement.

STATEMENT OF CHARGES AND NOTICE OF HEARING

TO: **Kroger Specialty Infusion CA**
f/k/a BioFusion, LLC
19110 Van Ness Avenue
Torrance, California 90501

Pursuant to the provisions of Code of Alabama (1975), § 34-23-34 and § 34-23-92(12), Code of Alabama (1975), §20-2-213(e) and Code of Alabama (1975), § 41-22-12, you are hereby notified and requested to appear before the Alabama State Board of Pharmacy (hereinafter referred to as the "Board") on _____ _____, 2018 at _____m., at the State Board of Pharmacy Conference Room, 111 Village Street, Birmingham, Alabama 35242, and from time to time thereafter as may be required by the Board for the purpose of a hearing to determine why the permit to operate Kroger Specialty Infusion CA f/k/a BioFusion, LLC (Kroger) should not be revoked, suspended or placed on probation or a monetary penalty imposed in that it is alleged that Kroger has been guilty of the following, to-wit:

COUNT ONE

Violating Code of Alabama (1975), § 34-23-33(2) based upon an Order entered by the Ohio State Board of Pharmacy on February 7, 2014 attached hereto as Exhibit "A" resulting in your license as a Terminal Distributor of Dangerous Drugs being placed

on probation for a period of five (5) years subject to your compliance with the terms set out in the above referenced Order.

COUNT TWO

Violating Code of Alabama (1975), § 34-23-33(13) in that you violated Board Rule 680-X-2.22(2)(d) based upon any or all of the allegations of Count One above.

COUNT THREE

Violating Code of Alabama (1975), § 34-23-33(13) based upon the Agreed Board Order issued by the Texas State Board of Pharmacy on November 3, 2015 attached hereto as Exhibit "B" resulting in your license being placed on probation for two (2) years subject to your compliance with the terms set out in the above referenced Order.

COUNT FOUR

Violating Code of Alabama (1975), § 34-23-33(13) based upon the entry of a Consent Order by the Oregon State Board of Pharmacy as set out in Paragraph 5 on the Uncontested Facts in a Settlement Agreement entered by the Hawaii State Board of Pharmacy on April 6, 2016 attached hereto as Exhibit "C".

COUNT FIVE

Violating Code of Alabama (1975), § 34-23-33(13) based upon the entry of the discipline by the Hawaii State Board of Pharmacy referenced above.

Further, pursuant to the provisions of Code of Alabama, (1975), §20-2-53 and §41-22-12, you are hereby notified and requested to appear before the Board at the aforesaid time and place and from time to time thereafter as may be requested by the Board for the purpose of a hearing to determine why your registration to manufacture,

dispense or distribute controlled substances enumerated in Schedules II, III, IV and V of the Alabama Uniform Controlled Substances Act, Code of Alabama (1975), §20-2-1, et. seq., issued pursuant to Code of Alabama (1975), §20-2-52, should not be suspended or revoked in that it is alleged that you have been guilty of the following:

COUNT SIX

Violating Code of Alabama (1975), §20-2-54(a)(4) by violating the provisions of Code of Alabama (1975), §34-23-1 et seq., said violation being based upon any or all of the allegations contained in the preceding Counts of this Statement of Charges and Notice of Hearing.

At the aforesaid time and place and from time to time thereafter as may be directed by the Board, you may be represented by an attorney, if you so desire, cross-examine all witnesses who testify against you and present such evidence in your own behalf in response to these charges as you consider necessary and appropriate.

Dated this the _____ day of _____, 2017.

ORDER OF THE STATE BOARD OF PHARMACY
(Case Number 2013-1421)

In The Matter Of:

BIOFUSION, LLC
c/o SHERRI CHERMAN, R.Ph.
1910 Van Ness Ave.
Torrance, CA 9501

INTRODUCTION

The Matter of Biofusion, LLC came for hearing on January 7, 2014, before the following members of the Board: Kevin J. Mitchell, R.Ph.; (presiding); Edward T. Cain, Public Member; Melinda J. Ferris, R.Ph.; Margaret A. Huwer, R.Ph.; Megan E. Marchal, R.Ph.; Michael A. Moné, R.Ph.; and Kilee S. Yarosh, R.Ph.

Richard F. Kolezynski, R.Ph., Absent.

Biofusion, LLC was not present and Biofusion, LLC. is represented by Stacie K. Neroni, who also was not present. The State of Ohio was represented by Charissa D. Payer, Assistant Attorney General.

SUMMARY OF EVIDENCE

State's Witness:

1. Sheri Zapadka, R.Ph., Ohio State Board of Pharmacy

Respondent's Witnesses:

None

State's Exhibits:

1.	Copy of Proposal to Deny/Notice of Opportunity for hearing letter	[10-15-13]
1A-1C.	Procedurals	
2.	Correspondence from Staci K. Neroni; Application for Out of State Terminal Distributor of Dangerous Drugs License	[04-19-13]

Respondent's Exhibits:

A.	Contentions	[11-14-13]

FINDINGS OF FACT

After having heard the testimony, observed the demeanor of the witness, considered the evidence, and weighed the credibility of each, the State Board of Pharmacy finds the following to be fact:

(1) Records of the Board of Pharmacy indicate that on or about April 2, 2013, Sherri Cherman was the President of Biofusion, 19110 Van Ness Ave., Torrance, California and that on said date, Biofusion submitted an application for registration as a Terminal Distributor of Dangerous Drugs.

(2) On or around October 10, 2011, Modern Healthcare, Inc. D.B.A AD-Rx Pharmacy entered into a Stipulated Settlement and Disciplinary Order with the California State Board of Pharmacy concerning the loss of approximately 470,000 tablets of hydrocodone/APAP 10/325 mg tablets due to employee pilferage. In the Matter of the Accusation Against: Modern Healthcare, Inc., d.b.a., AD-Rx Pharmacy and Robert Antoine Charles, Case No. 3539. Modern Healthcare, Inc. is listed as an owner of Biofusion, the applicant. Such conduct, if proven, constitutes prior discipline by a professional licensing board pursuant within the meaning of Rule 4729-9-19 of the Ohio Administrative Code and Section 4729.57 of the Ohio Revised Code.

(3) The applicant has failed to furnish satisfactory proof to the Board that adequate safeguards are assured to prevent the sale or other distribution of dangerous drugs by any person other than a pharmacist or licensed health professional authorized to prescribe drugs as required by Ohio Revised Code Section 4729.55(C). To wit: another pharmacy owned by the same company did, on or before May 17, 2012, experience significant loss of controlled substances. Such loss was attributable to the actions of a pharmacy employees and poor recordkeeping. Such conditions violate, or allow the violation of Section 4729.55 of the Ohio Revised Code, and constitute a failure to meet the qualifications for a Terminal Distributor of Dangerous Drugs.

DECISION OF THE BOARD

Pursuant to Section 4729.11 of the Ohio Revised Code, and after consideration of the record as a whole, the State Board of Pharmacy hereby approves the Application for Registration as a terminal Distributor of Dangerous Drugs submitted by Biofusion, L.L.C. on or about April 2, 2013.

Further, State Board of Pharmacy hereby places on probation for a period of five years the Terminal Distributor License, issued to Biofusion, LLC effective as of the date the license becomes active. The terms of probation are as follows:

(A) Biofusion, L.L.C. must submit to this Board annual reports of any theft or loss of drugs during the period of probation.

(B) Biofusion, LLC must not violate the drug laws of Ohio, any other state, or the federal government.

(C) Biofusion, LLC must abide by the rules of the State Board of Pharmacy.

(D) Biofusion, LLC must comply with the terms of this Order.

(E) Biofusion, LLC's license is deemed to be not in good standing until successful completion of the probationary period.

(F) Any violation of probation may result in a Board hearing to consider alternative or additional sanctions under Section 4729.16 of the Ohio Revised Code.

Biofusion, LLC is hereby advised that the Board may at any time revoke probation for cause, modify the conditions of probation, and reduce or extend the period of probation. At any time during this period of probation, the Board may revoke probation for a violation occurring during the probation period.

Margaret Huwer moved for Findings of Fact; Megan Marchal seconded the motion. Motion passed (Aye-6/Nay-0).

Megan Marchal moved for Action of the Board; Michael Moné seconded the motion. Motion passed (Aye-5/Nay-1).

SO ORDERED.

It is hereby certified by this Board that the above language is a copy of the Order entered upon its journal in this case.

Section 119.12 of the Ohio Revised Code authorizes an appeal from this Order. An order that denied admission to an examination, or denied the issuance or renewal of a license or registration, or revoked or suspended a license, may be appealed to the court of common pleas in the Ohio county of your place of business or in your Ohio county of residence. Any other order may be appealed to the Court of Common Pleas of Franklin County, Ohio.

Such an appeal, setting forth the order appealed from and the grounds of the appeal, must be commenced by the filing of the ORIGINAL Notice of Appeal with the State Board of Pharmacy and a copy with the appropriate court within fifteen (15) days after the mailing of this Order and in accordance with the requirements of Section 119.12 of the Ohio Revised Code.

AGREED BOARD ORDER #L-15-003

RE: IN THE MATTER OF BIOFUSION (PHARMACY LICENSE #27196)

BEFORE THE TEXAS STATE BOARD OF PHARMACY

On this day came on to be considered by the Texas State Board of Pharmacy (Board) the matter of pharmacy license number 27196 issued to Biofusion (Respondent), 19110 Van Ness Avenue, Torrance, California 90501.

By letter dated July 13, 2015, the Board gave preliminary notice to Respondent of its intent to take disciplinary action. This action was taken as a result of an investigation which produced evidence indicating that Respondent may have violated:

> Sections 565.002(a)(9) and (13); and 565.002(c) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3, Subtitle J (2013), as alleged in the Count below.

The conduct described in the Order of the Ohio State Board of Pharmacy is substantially similar to conduct described in:

> Section 565.002(a)(9) and (13) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3; Subtitle J (2013); and
>
> Section 291.32(b)(2) of the Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2014).

COUNT

On or about February 7, 2014, the Ohio State Board of Pharmacy entered an Order against the application for registration as a terminal distributor of dangerous drugs of Biofusion, LLC. The Order was based on findings of fact that a listed owner of Biofusion, LLC (i.e., Modern Healthcare, Inc., d.b.a. AD-RX Pharmacy) had been subject to a Settlement and Disciplinary Order entered by the California Board of Pharmacy on October 10, 2011, for employee diversion of approximately 470,000 tablets of hydrocodone/APAP 10/325 mg tablets. Based on this finding, the Ohio State Board of Pharmacy determined Biofusion, LLC failed to furnish proof of adequate safeguards to prevent the sale or other distribution of dangerous drugs in an unauthorized manner. The Order granted the registration subject to a five-year probation.

An informal conference was held in the Board's office on September 2, 2015, with James Markis, Pharm.D., Director of Pharmacy, Biofusion; Michael R. Hess, General Counsel, Biofusion; Joan Schuckenbrock, Chief Administrative Officer, Modern Health, on behalf of Respondent; and Nanette K. Beaird, Legal Counsel for Respondent, in attendance. The informal conference was heard by a Board panel comprised of: Jeanne D. Waggoner, R.Ph., Board

Member; Gay Dodson, R.Ph., Executive Director/Secretary; and Carol Fisher, R.Ph., M.P.A., Director of Enforcement; with Caroline Hotchkiss, Assistant General Counsel. Ginger Shuffler, Staff Attorney, was also in attendance.

By appearing at the informal conference and by signing this Order, Joan Schuckenbrock and Respondent's counsel neither admit nor deny the truth of the matters previously set out in this Order, and agree that the Board has jurisdiction in this matter and waive the right to notice of hearing, formal administrative hearing, and judicial review of this Order.

The parties acknowledge that this Order resolves the allegations set forth herein, and agree to the terms and conditions set forth in the ORDER OF THE BOARD below.

ORDER OF THE BOARD

THEREFORE, PREMISES CONSIDERED, the Board does hereby ORDER that:

(1) Respondent's license shall be placed on probation for a period of two (2) years, with such period to commence thirty (30) days after the entry of this Order. During the period of probation, Respondent shall abide by the terms of this Order, and shall not violate any pharmacy or drug statute or rule of this state, another state, or the United States with respect to pharmacy, controlled substances, and dangerous drugs.

(2) Respondent shall pay a probation fee of one thousand two hundred dollars ($1,200) due one hundred twenty (120) days after the entry of this Order.

(3) Respondent shall allow Board staff to directly contact Respondent on any matter regarding the enforcement of this Order.

(4) Failure to comply with any of the requirements in this Order constitutes a violation and shall be grounds for further disciplinary action. The requirements of this Order are subject to the Texas Pharmacy Act, TEX. OCC. CODE ANN., Title 3, Subtitle J (2015), and Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2015).

And it is so ORDERED.

THIS ORDER IS A PUBLIC RECORD.

SIGNED AND ENTERED ON THIS 3rd day of November, 2015.

In the Matter of the Miscellaneous Permit of BIOFUSION, LLC, Respondent.	)	PHA 2015-134-L SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER; EXHIBITS "1" THROUGH "3"

241042211

SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION
FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER

Petitioner, DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS' REGULATED INDUSTRIES COMPLAINTS OFFICE (hereinafter "RICO" or "Petitioner"), through its undersigned attorney(s), and Respondent BIOFUSION, LLC (hereinafter "Respondent"), enter into this Settlement Agreement on the terms and conditions set forth below.

A. UNCONTESTED FACTS

1. At all relevant times herein, Respondent was permitted by the Board of Pharmacy (hereinafter the "Board") as a miscellaneous permit holder under permit number PMP 908. The permit was issued on or about January 1, 2014. The permit will expire or forfeit on or about December 31, 2017.

2. Respondent's mailing address for purposes of this action is 19110 Van Ness Avenue, Torrance, California 90501.

3. RICO received a request for investigation from the Board of Pharmacy after Respondent reported disciplinary actions on a December 2, 2015 renewal application.

I HEREBY CERTIFY THAT THE ATTACHED IS A TRUE AND CORRECT COPY OF THE ORIGINAL ON FILE IN THE DEPARTMENT OF COMMERCE & CONSUMER AFFAIRS.

4. Respondent attached a copy of an Order issued to Respondent by the Ohio State Board of Pharmacy in Case Number 2013-1421 (hereinafter "the Ohio Order") (Exhibit "1"). The Ohio Order was based on disciplinary action taken by the State of California against Respondent's corporate owner (also a permitted pharmacist), alleging failure to account for medications due to employee pilferage. Respondent's Ohio permit was placed on probation for five years with conditions.

5. Respondent also attached a copy of a Consent Order issued to Respondent by the Oregon Board of Pharmacy in Case No. 2015-0142 (hereinafter "the Oregon Order") (Exhibit "2"). The Oregon Order was also based on the California action against Respondent's corporate owner and imposed probation with conditions.

6. Respondent also attached a copy of Agreed Board Order #L-15-003 issued to Respondent by the Texas State Board of Pharmacy in Agreed Board Order #L-15-003 (hereinafter "the Texas Order") (Exhibit "3"). The Texas Order was also based on the California action against Respondent's corporate owner and imposed probation, with conditions, including a $1,200.00 probation fee.

7. RICO alleges that disciplinary action was taken against Respondent by the States of California, Oregon, and Texas and that Respondent failed to timely report the actions.

8. The foregoing allegations, if proven at an administrative hearing before the Board, would constitute violations of the following statute(s) and/or rule(s): Hawaii Revised Statutes ("HRS") § 436B-19(13) (disciplinary action by another state) and § 436B-19(15) (failure to timely report).

9. The Board has jurisdiction over the subject matter herein and over the parties hereto.

B. REPRESENTATIONS BY RESPONDENT:

1. Respondent is fully aware that Respondent has the right to be represented by an attorney and is represented in this matter by Ronald J. Friedman, Esq., Karr Tuttle Campbell, 701 Fifth Avenue, Suite 3300, Seattle, Washington 98104.

2. Respondent enters into this Settlement Agreement freely, knowingly, voluntarily, and under no coercion or duress.

3. Respondent is aware of the right to have a hearing to adjudicate the issues in the case. Pursuant to HRS § 91-9(d), Respondent freely, knowingly, and voluntarily waives the right to a hearing and agrees to dispose of this case in accordance with the terms and conditions of this Settlement Agreement.

//

OCT 15 2015

4. Respondent being at all times relevant herein permitted as a miscellaneous permit holder by the Board acknowledges that Respondent is subject to penalties including but not limited to, revocation, suspension or limitation of the permit and administrative fines, if the foregoing allegations are proven at hearing.

5. Respondent represents Exhibit "1" is a true and correct copy of the Order issued to Respondent by the Ohio State Board of Pharmacy in Case Number 2013-1421; Exhibit "2" is a true and correct copy of the Consent Order issued to Respondent by the Oregon Board of Pharmacy in Case No. 2015-0142; and Exhibit "3" is a true and correct copy of the Agreed Board Order #L-15-003 issued to Respondent by the Texas State Board of Pharmacy.

6. Respondent understands that any false or untrue statement or any material misrepresentation or omission of fact by Respondent in this settlement agreement may be grounds for further disciplinary action under HRS chapters 436B and 461.

7. Respondent does not admit to violating any law or rule, but acknowledges that RICO has sufficient cause to file a Petition for Disciplinary Action against Respondent's permit.

8. Respondent enters into this Settlement Agreement as a compromise of the claims and to conserve on the expenses of proceeding with an administrative hearing on this matter.

9. Respondent agrees that this Settlement Agreement is intended to resolve the issues raised in RICO's investigation in RICO Case No. PHA 2015-134-L.

10. Respondent understands that this Settlement Agreement may be subject to reporting requirements.

11. Respondent understands this Settlement Agreement is public record pursuant to Hawaii Revised Statutes chapter 92F.

C. TERMS OF SETTLEMENT:

1. Probation. Respondent's miscellaneous permit to practice in the State of Hawaii is hereby placed on probation for a period of one (1) year. Probation shall become effective immediately upon the approval of this Settlement Agreement by the Board. During the probationary period, Respondent agrees to comply with the following terms and conditions:

2. Administrative fine. Respondent agrees to pay a fine in the amount of TWO THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($2,500.00). Payment shall be made by **cashier's check or money order made payable to "DCCA - Compliance Resolution Fund"** and mailed to the Regulated Industries Complaints Office, Attn: John T. Hassler, Esq., 235 S. Beretania Street, 9th Floor, Honolulu, Hawaii 96813. Payment of the fine shall be due at the time this Settlement Agreement is returned to RICO.

3. Failure to Comply with Settlement Agreement. If Respondent fails to fully and timely comply with the terms of this Settlement Agreement as set forth in paragraph(s) C.1 and C.2 above, Respondent's permit shall be automatically revoked upon RICO's filing of an affidavit with the Board attesting to such failure. In case of such revocation, Respondent shall turn in all indicia of the permit to the Executive Officer of the Board within ten (10) days after receipt of notice of the revocation. In case of such revocation, Respondent understands Respondent cannot apply for a new permit until the expiration of at least five (5) years after the effective date of the revocation. Respondent understands that if Respondent desires to become permitted again, Respondent must apply to the Board for a new permit pursuant to and subject to HRS §§ 92-17, 436B-21, and all other applicable laws and rules in effect at the time.

4. Possible further sanction. The Board, at its discretion, may pursue additional disciplinary action as provided by law to include further fines and other sanctions as the Board may deem appropriate if Respondent violates any provision of the statutes or rules governing the conduct of miscellaneous permit holders in the State of Hawaii, or if Respondent fails to abide by the terms of this Settlement Agreement.

5. Approval of the Board. Respondent agrees that, except for the representations, agreements and covenants contained in Paragraphs C.6, C.7, C.8 and C.9 below, this Settlement Agreement shall not be binding on any of the parties unless and until it is approved by the Board.

6. No Objection if Board Fails to Approve. If the Board does not approve this Settlement Agreement, does not issue an order pursuant thereto, or does not approve a lesser remedy, but instead an administrative hearing is conducted against Respondent in the Board's usual and customary fashion pursuant to the Administrative Procedure Act, Respondent agrees that neither Respondent nor any attorney that Respondent may retain, will raise as an objection in any administrative proceeding or in any judicial action, to the Board's proceeding against Respondent on the basis that the Board has become disqualified to consider the case because of its review and consideration of this Settlement Agreement.

7. Any Ambiguities Shall be Construed to Protect the Consuming Public. It is agreed that any ambiguity in this Settlement Agreement is to be read in the manner that most completely protects the interests of the consuming public.

8. No Reliance on Representations by RICO. Other than the matters specifically stated in this Settlement Agreement, neither RICO nor anyone acting on its behalf has made any representation of fact, opinion or promise to Respondent to induce entry into this Settlement Agreement, and Respondent is not relying upon any statement, representation or opinion or promise made by RICO or any of its agents, employees, representatives or attorneys concerning the nature, extent or duration of exposure to legal liability arising from the subject matter of this Settlement Agreement or concerning any other matter.

//

9. Complete Agreement. This Settlement Agreement is a complete settlement of the rights, responsibilities and liabilities of the parties hereto with respect to the subject matter hereof; contains the entire agreement of the parties; and may only be modified, changed or amended by written instrument duly executed by all parties hereto.

IN WITNESS WHEREOF, the parties have signed this Settlement Agreement on the date(s) set forth below.

ORDER OF THE STATE BOARD OF PHARMACY
(Case Number 2013-1421)

In The Matter Of:

Kroger Specialty Infusion CA
(FKA Biofusion, LLC)
1910 Van Ness Ave.
Torrance, CA 90501
(TDDD No. 02-2315800)

Upon consideration of the documents submitted on September 20, 2017, Kroger Specialty Infusion CA, Terminal Distributor of Dangerous Drugs License Number 02-2315800, the State of Ohio Board of Pharmacy (Board), acknowledges the Change in Ownership from Biofusion, LLC to Kroger Specialty Infusion CA and hereby terminates the period of probation and other terms as set forth in the Board's Order dated February 7, 2014.

Kroger Specialty Infusion CA's License number 02-2315800 is now in good standing.

This matter was presented to the full Board on October 10, 2017 for consideration and final vote for termination of the Board's Order dated February 7, 2014.

ORDER OF THE STATE BOARD OF PHARMACY

(Case Number 2013-1421)

In The Matter Of:

BIOFUSION, LLC
c/o SHERRI CHERMAN, R.Ph.
1910 Van Ness Ave.
Torrance, CA 9501

INTRODUCTION

The Matter of Biofusion, LLC came for hearing on January 7, 2014, before the following members of the Board: Kevin J. Mitchell, R.Ph.; (presiding); Edward T. Cain, Public Member; Melinda J. Ferris, R.Ph.; Margaret A. Huwer, R.Ph.; Megan E. Marchal, R.Ph.; Michael A. Moné, R.Ph.; and Kilee S. Yarosh, R.Ph.

Richard F. Kolezynski, R.Ph., Absent.

Biofusion, LLC was not present and Biofusion, LLC. is represented by Stacie K. Neroni, who also was not present. The State of Ohio was represented by Charissa D. Payer, Assistant Attorney General.

SUMMARY OF EVIDENCE

State's Witness:

1. Sheri Zapadka, R.Ph., Ohio State Board of Pharmacy

Respondent's Witnesses:

None

State's Exhibits:

1.	Copy of Proposal to Deny/Notice of Opportunity for hearing letter	[10-15-13]
1A-1C.	Procedurals	
2.	Correspondence from Staci K. Neroni; Application for Out of State Terminal Distributor of Dangerous Drugs License	[04-19-13]

Respondent's Exhibits:

A.	Contentions	[11-14-13]

FINDINGS OF FACT

After having heard the testimony, observed the demeanor of the witness, considered the evidence, and weighed the credibility of each, the State Board of Pharmacy finds the following to be fact:

(1) Records of the Board of Pharmacy indicate that on or about April 2, 2013, Sherri Cherman was the President of Biofusion, 19110 Van Ness Ave., Torrance, California and that on said date, Biofusion submitted an application for registration as a Terminal Distributor of Dangerous Drugs.

(2) On or around October 10, 2011, Modern Healthcare, Inc. D.B.A AD-Rx Pharmacy entered into a Stipulated Settlement and Disciplinary Order with the California State Board of Pharmacy concerning the loss of approximately 470,000 tablets of hydrocodone/APAP 10/325 mg tablets due to employee pilferage. In the Matter of the Accusation Against: Modern Healthcare, Inc., d.b.a., AD-Rx Pharmacy and Robert Antoine Charles, Case No. 3539. Modern Healthcare, Inc. is listed as an owner of Biofusion, the applicant. Such conduct, if proven, constitutes prior discipline by a professional licensing board pursuant within the meaning of Rule 4729-9-19 of the Ohio Administrative Code and Section 4729.57 of the Ohio Revised Code.

(3) The applicant has failed to furnish satisfactory proof to the Board that adequate safeguards are assured to prevent the sale or other distribution of dangerous drugs by any person other than a pharmacist or licensed health professional authorized to prescribe drugs as required by Ohio Revised Code Section 4729.55(C). To wit: another pharmacy owned by the same company did, on or before May 17, 2012, experience significant loss of controlled substances. Such loss was attributable to the actions of a pharmacy employees and poor recordkeeping. Such conditions violate, or allow the violation of Section 4729.55 of the Ohio Revised Code, and constitute a failure to meet the qualifications for a Terminal Distributor of Dangerous Drugs.

DECISION OF THE BOARD

Pursuant to Section 4729.11 of the Ohio Revised Code, and after consideration of the record as a whole, the State Board of Pharmacy hereby approves the Application for Registration as a terminal Distributor of Dangerous Drugs submitted by Biofusion, L.L.C. on or about April 2, 2013.

Further, State Board of Pharmacy hereby places on probation for a period of five years the Terminal Distributor License, issued to Biofusion, LLC effective as of the date the license becomes active. The terms of probation are as follows:

(A) Biofusion, L.L.C. must submit to this Board annual reports of any theft or loss of drugs during the period of probation.

(B) Biofusion, LLC must not violate the drug laws of Ohio, any other state, or the federal government.

(C) Biofusion, LLC must abide by the rules of the State Board of Pharmacy.

(D) Biofusion, LLC must comply with the terms of this Order.

(E) Biofusion, LLC's license is deemed to be not in good standing until successful completion of the probationary period.
(F) Any violation of probation may result in a Board hearing to consider alternative or additional sanctions under Section 4729.16 of the Ohio Revised Code.

Biofusion, LLC is hereby advised that the Board may at any time revoke probation for cause, modify the conditions of probation, and reduce or extend the period of probation. At any time during this period of probation, the Board may revoke probation for a violation occurring during the probation period.

Margaret Huwer moved for Findings of Fact; Megan Marchal seconded the motion. Motion passed (Aye-6/Nay-0).

Megan Marchal moved for Action of the Board; Michael Moné seconded the motion. Motion passed (Aye-5/Nay-1).

SO ORDERED.

It is hereby certified by this Board that the above language is a copy of the Order entered upon its journal in this case.

Section 119.12 of the Ohio Revised Code authorizes an appeal from this Order. An order that denied admission to an examination, or denied the issuance or renewal of a license or registration, or revoked or suspended a license, may be appealed to the court of common pleas in the Ohio county of your place of business or in your Ohio county of residence. Any other order may be appealed to the Court of Common Pleas of Franklin County, Ohio.

Such an appeal, setting forth the order appealed from and the grounds of the appeal, must be commenced by the filing of the ORIGINAL Notice of Appeal with the State Board of Pharmacy and a copy with the appropriate court within fifteen (15) days after the mailing of this Order and in accordance with the requirements of Section 119.12 of the Ohio Revised Code.

Kroger Specialty Infusion CA

RE: Case # 2015-0142
Kroger Specialty Infusion CA (formerly known as BioFusion LLC)
Oregon Registration No. RP-0002741

This letter will confirm the end of Kroger Specialty Infusion CA's Oregon probation issued in Case No. 2015-0142. The completion date for Kroger Specialty Infusion CA's Board ordered probation was 9/2/2016 pursuant to documentation received on 4/19/2017 from the California State Board of Pharmacy.

It is the Board's desire that Kroger Specialty Infusion CA, continue its practice in accordance with all pharmacy laws and rules in order to avoid further action by the Board against its license.

Should you have any questions concerning your practice in the future, you are encouraged to call the Board office for assistance.

Sincerely,

Brianne Efremoff, Pharm.D, R.Ph.
Compliance Director

OF THE STATE OF OREGON

In the Matter of the Drug Outlet Registration of	)	Case No. 2015-0142
BIOFUSION LLC dba: BIOFUSION	)	CONSENT ORDER
Registrant	)	

WHEREAS, the Board of Pharmacy of the State of Oregon has filed a Notice of Proposed Disciplinary Action; Answer Required ("Notice"), hereby incorporated by reference, regarding the registrant in the above-captioned matter; and

WHEREAS, the above-noted Notice was duly served on the registrant as required by law; and

WHEREAS, the parties are desirous of resolving and settling those matters contained in the above-noted Notice without further proceedings thereon; and

WHEREAS, the registrant is aware of the right to a hearing with the assistance of counsel and the right to judicial review of the Board's decision, and hereby freely and voluntarily waives those rights; and

WHEREAS, the registrant admits, as described in the Notice, that action was taken against a separate corporate entity ModernHEALTH Specialty (AD-RX), LLC which is owned by the same parent company (Modern HC Pharmacy, Inc.) as the registrant, for AD-RX's violation of rules and statute in California in Board of Pharmacy #3539, and whereas the registrant does not contest lawful cause pursuant to ORS 689.405 for disciplinary action by the Board; and

WHEREAS, the registrant consents to the disciplinary action as set forth herein;

The Board finds that the allegations in the Notice are true and hereby imposes the following sanctions:

1. The registrant is placed on probation with the Oregon Board of Pharmacy for the duration of probation with the California Board of Pharmacy. Registrant shall comply with their probation with the California Board of Pharmacy and the following conditions of probation:
   a. The registrant must comply with all laws and rules.
   b. The registrant will notify the Board of all proposed, pending, and additional action against registrant within 15 days of registrant being notified of proposed, pending, or additional action against registrant.

2. Failure of the registrant to comply with all the requirements of this Consent Order

constitutes unprofessional conduct and is grounds for revocation or any other form of discipline or sanction authorized by law.

CONSENT

I hereby acknowledge that I am the authorized representative of registrant. On behalf of the registrant, I hereby acknowledge that I have read and understand the above-noted Notice and the terms of the Consent Order. I hereby acknowledge that I understand that the Consent Order with incorporated Notice is a public record and shall be available via the Board's online licensure verification; is available upon written request pursuant to public disclosure laws; and shall be reported to the National Practitioner Data Bank as required by federal law. I agree to the Board entering the Consent Order.

BOARD OF PHARMACY
FOR THE STATE OF OREGON

8/27/15

Gary Miner, R.Ph.,
Compliance Director

Date

BEFORE THE BOARD OF PHARMACY
OF THE STATE OF OREGON

In the Matter of the Drug Outlet Registration of BIOFUSION LLC dba: BIOFUSION Registrant	)	Case No. 2015-0142 NOTICE OF PROPOSED DISCIPLINARY ACTION; ANSWER REQUIRED

Under the authority granted pursuant to ORS 689.135, 689.145, 689.335, 689.405 and 689.445, the Oregon Board of Pharmacy proposes to take disciplinary action against your Certificate of Registration No. RP-0002741 because Biofusion violated the Oregon Pharmacy Act and the Board of Pharmacy rules as set forth below:

On or about 2/7/2014, Biofusion was placed on a 5 year probation with the Ohio Board of Pharmacy in Case Number 2013-1421. Findings of Fact include that Modern Healthcare dba: AD-Rx Pharmacy entered into a Stipulated Settlement and Disciplinary Order with the California State Board of Pharmacy concerning the loss of approximately 470,000 hydrocodone/APAP 10/325 mg tablets due to employee pilferage. In the Matter of the Accusation Against: Modern Healthcare, d.b.a., AD-Rx Pharmacy and Robert Antoine Charles, Case No. 3539. Modern Healthcare Inc. is listed as an owner of Biofusion.

On or about 4/2/2012, in Case No. 3539 the California Board of Pharmacy placed Modern Health Care, dba: AD-RX Pharmacy on probation for the loss of 470,000 hydrocodone/APAP 10/325 mg tablets from December 2006 to June 2007. Respondent agreed that at hearing the complainant could establish a factual basis for the charges in the Accusation. Case No. 3539 Accusation causes for discipline included failure to maintain adequate security for dangerous drugs, failure to maintain current inventory and complete accountability, and failure to timely notify the Board of a designated pharmacist in charge.

The above conduct is in violation and grounds for discipline, pursuant to OAR 855-041-1010(1) and (2), OAR 855-041-1020(1) and (2), OAR 855-019-0300(1) and (4)(a), OAR 855-041-1170(1), and 689.405(1)(a), (e)(B), and (j).

Based on these alleged violations, the Board proposes to revoke your registration and impose a $10,000 civil penalty per violation.

HEARING RIGHTS

The corporation is entitled to a hearing as provided by the Administrative Procedures Act (ORS chapter 183). An attorney must represent the corporation. If the corporation wishes to have a hearing, the corporation's attorney must file a written request for hearing with the Board within 21 days from the date this notice was mailed. The corporation's attorney may send or deliver a request

for hearing to:

Oregon Board of Pharmacy
800 NE Oregon Street, Suite 150
Portland, OR 97232
Fax: (971) 673-0002

If a request for hearing is not received within this 21-day period, the corporation's right to a hearing shall be considered waived.

If the corporation requests a hearing, the corporation's attorney will be notified of the time and place of the hearing. Before the commencement of the hearing, the corporation will be given information on the procedures, right of representation and other rights of parties relating to the conduct of the hearing.

If the corporation does not request a hearing within 21 days, or if it withdraws a hearing request, notifies the Board or Administrative Law Judge that it will not appear, or fails to appear at a scheduled hearing, the Board may issue a final order by default imposing discipline. If the Board issues a final order by default, it designates its file on this matter as the record.

ANSWER REQUIRED

Pursuant to OAR 855-001-0010 and OAR 855-001-0015, if you request a hearing you must also provide, within 21 days from the date this contested case notice was served, a written answer to the allegations set forth in this contested case notice. Your written answer must include an admission or denial of each factual matter alleged in the notice and a short and plain statement of each relevant affirmative defense you may have. Except for good cause, factual matters alleged in the notice and not denied in the answer shall be presumed admitted; failure to raise a particular defense in the answer will be considered a waiver of such defense; new matters alleged in the answer (affirmative defenses) shall be presumed to be denied by the agency; and evidence shall not be taken on any issue not raised in the notice and the answer.

Hearing Request and Answers:
Consequences of Failure to Answer
855-001-0015

(1) A hearing request, and answer when required, shall be made in writing to the Board by the party or his attorney and an answer shall include the following:

(a) An admission or denial of each factual matter alleged in the notice;

(b) A short and plain statement of each relevant affirmative defense the party may have.

(2) Except for good cause;

(a) Factual matters alleged in the notice and not denied in the answer shall be presumed admitted;

(b) Failure to raise a particular defense in the answer will be considered a waiver of such defense;

(c) New matters alleged in the answer (affirmative defenses) shall be presumed to be denied by the agency; and

(d) Evidence shall not be taken on any issue not raised in the notice and the answer.

In the Matter of the Miscellaneous Permit of BIOFUSION, LLC, Respondent.	PHA 2015-134-L SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER; EXHIBITS "1" THROUGH "3"

241042211

SETTLEMENT AGREEMENT PRIOR TO FILING OF PETITION FOR DISCIPLINARY ACTION AND BOARD'S FINAL ORDER

Petitioner, DEPARTMENT OF COMMERCE AND CONSUMER AFFAIRS' REGULATED INDUSTRIES COMPLAINTS OFFICE (hereinafter "RICO" or "Petitioner"), through its undersigned attorney(s), and Respondent BIOFUSION, LLC (hereinafter "Respondent"), enter into this Settlement Agreement on the terms and conditions set forth below.

A. UNCONTESTED FACTS

1. At all relevant times herein, Respondent was permitted by the Board of Pharmacy (hereinafter the "Board") as a miscellaneous permit holder under permit number PMP 908. The permit was issued on or about January 1, 2014. The permit will expire or forfeit on or about December 31, 2017.

2. Respondent's mailing address for purposes of this action is 19110 Van Ness Avenue, Torrance, California 90501.

3. RICO received a request for investigation from the Board of Pharmacy after Respondent reported disciplinary actions on a December 2, 2015 renewal application.

I HEREBY CERTIFY THAT THE ATTACHED IS A TRUE AND CORRECT COPY OF THE ORIGINAL ON FILE IN THE DEPARTMENT OF COMMERCE & CONSUMER AFFAIRS.

4. Respondent attached a copy of an Order issued to Respondent by the Ohio State Board of Pharmacy in Case Number 2013-1421 (hereinafter "the Ohio Order") (Exhibit "1"). The Ohio Order was based on disciplinary action taken by the State of California against Respondent's corporate owner (also a permitted pharmacist), alleging failure to account for medications due to employee pilferage. Respondent's Ohio permit was placed on probation for five years with conditions.

5. Respondent also attached a copy of a Consent Order issued to Respondent by the Oregon Board of Pharmacy in Case No. 2015-0142 (hereinafter "the Oregon Order") (Exhibit "2"). The Oregon Order was also based on the California action against Respondent's corporate owner and imposed probation with conditions.

6. Respondent also attached a copy of Agreed Board Order #L-15-003 issued to Respondent by the Texas State Board of Pharmacy in Agreed Board Order #L-15-003 (hereinafter "the Texas Order") (Exhibit "3"). The Texas Order was also based on the California action against Respondent's corporate owner and imposed probation, with conditions, including a $1,200.00 probation fee.

7. RICO alleges that disciplinary action was taken against Respondent by the States of California, Oregon, and Texas and that Respondent failed to timely report the actions.

8. The foregoing allegations, if proven at an administrative hearing before the Board, would constitute violations of the following statute(s) and/or rule(s): Hawaii Revised Statutes ("HRS") § 436B-19(13) (disciplinary action by another state) and § 436B-19(15) (failure to timely report).

9. The Board has jurisdiction over the subject matter herein and over the parties hereto.

B. REPRESENTATIONS BY RESPONDENT:

1. Respondent is fully aware that Respondent has the right to be represented by an attorney and is represented in this matter by Ronald J. Friedman, Esq., Karr Tuttle Campbell, 701 Fifth Avenue, Suite 3300, Seattle, Washington 98104.

2. Respondent enters into this Settlement Agreement freely, knowingly, voluntarily, and under no coercion or duress.

3. Respondent is aware of the right to have a hearing to adjudicate the issues in the case. Pursuant to HRS § 91-9(d), Respondent freely, knowingly, and voluntarily waives the right to a hearing and agrees to dispose of this case in accordance with the terms and conditions of this Settlement Agreement.

//

4. Respondent being at all times relevant herein permitted as a miscellaneous permit holder by the Board acknowledges that Respondent is subject to penalties including but not limited to, revocation, suspension or limitation of the permit and administrative fines, if the foregoing allegations are proven at hearing.

5. Respondent represents Exhibit "1" is a true and correct copy of the Order issued to Respondent by the Ohio State Board of Pharmacy in Case Number 2013-1421; Exhibit "2" is a true and correct copy of the Consent Order issued to Respondent by the Oregon Board of Pharmacy in Case No. 2015-0142; and Exhibit "3" is a true and correct copy of the Agreed Board Order #L-15-003 issued to Respondent by the Texas State Board of Pharmacy.

6. Respondent understands that any false or untrue statement or any material misrepresentation or omission of fact by Respondent in this settlement agreement may be grounds for further disciplinary action under HRS chapters 436B and 461.

7. Respondent does not admit to violating any law or rule, but acknowledges that RICO has sufficient cause to file a Petition for Disciplinary Action against Respondent's permit.

8. Respondent enters into this Settlement Agreement as a compromise of the claims and to conserve on the expenses of proceeding with an administrative hearing on this matter.

9. Respondent agrees that this Settlement Agreement is intended to resolve the issues raised in RICO's investigation in RICO Case No. PHA 2015-134-L.

10. Respondent understands that this Settlement Agreement may be subject to reporting requirements.

11. Respondent understands this Settlement Agreement is public record pursuant to Hawaii Revised Statutes chapter 92F.

C. TERMS OF SETTLEMENT:

1. Probation. Respondent's miscellaneous permit to practice in the State of Hawaii is hereby placed on probation for a period of one (1) year. Probation shall become effective immediately upon the approval of this Settlement Agreement by the Board. During the probationary period, Respondent agrees to comply with the following terms and conditions:

2. Administrative fine. Respondent agrees to pay a fine in the amount of TWO THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($2,500.00). Payment shall be made by cashier's check or money order made payable to "DCCA - Compliance Resolution Fund" and mailed to the Regulated Industries Complaints Office, Attn: John T. Hassler, Esq., 235 S. Beretania Street, 9th Floor, Honolulu, Hawaii 96813. Payment of the fine shall be due at the time this Settlement Agreement is returned to RICO.

3. Failure to Comply with Settlement Agreement. If Respondent fails to fully and timely comply with the terms of this Settlement Agreement as set forth in paragraph(s) C.1 and C.2 above, Respondent's permit shall be automatically revoked upon RICO's filing of an affidavit with the Board attesting to such failure. In case of such revocation, Respondent shall turn in all indicia of the permit to the Executive Officer of the Board within ten (10) days after receipt of notice of the revocation. In case of such revocation, Respondent understands Respondent cannot apply for a new permit until the expiration of at least five (5) years after the effective date of the revocation. Respondent understands that if Respondent desires to become permitted again, Respondent must apply to the Board for a new permit pursuant to and subject to HRS §§ 92-17, 436B-21, and all other applicable laws and rules in effect at the time.

4. Possible further sanction. The Board, at its discretion, may pursue additional disciplinary action as provided by law to include further fines and other sanctions as the Board may deem appropriate if Respondent violates any provision of the statutes or rules governing the conduct of miscellaneous permit holders in the State of Hawaii, or if Respondent fails to abide by the terms of this Settlement Agreement.

5. Approval of the Board. Respondent agrees that, except for the representations, agreements and covenants contained in Paragraphs C.6, C.7, C.8 and C.9 below, this Settlement Agreement shall not be binding on any of the parties unless and until it is approved by the Board.

6. No Objection if Board Fails to Approve. If the Board does not approve this Settlement Agreement, does not issue an order pursuant thereto, or does not approve a lesser remedy, but instead an administrative hearing is conducted against Respondent in the Board's usual and customary fashion pursuant to the Administrative Procedure Act, Respondent agrees that neither Respondent nor any attorney that Respondent may retain, will raise as an objection in any administrative proceeding or in any judicial action, to the Board's proceeding against Respondent on the basis that the Board has become disqualified to consider the case because of its review and consideration of this Settlement Agreement.

7. Any Ambiguities Shall be Construed to Protect the Consuming Public. It is agreed that any ambiguity in this Settlement Agreement is to be read in the manner that most completely protects the interests of the consuming public.

8. No Reliance on Representations by RICO. Other than the matters specifically stated in this Settlement Agreement, neither RICO nor anyone acting on its behalf has made any representation of fact, opinion or promise to Respondent to induce entry into this Settlement Agreement, and Respondent is not relying upon any statement, representation or opinion or promise made by RICO or any of its agents, employees, representatives or attorneys concerning the nature, extent or duration of exposure to legal liability arising from the subject matter of this Settlement Agreement or concerning any other matter.

//

9. Complete Agreement. This Settlement Agreement is a complete settlement of the rights, responsibilities and liabilities of the parties hereto with respect to the subject matter hereof; contains the entire agreement of the parties; and may only be modified, changed or amended by written instrument duly executed by all parties hereto.

IN WITNESS WHEREOF, the parties have signed this Settlement Agreement on the date(s) set forth below.

ORDER OF THE STATE BOARD OF PHARMACY

(Case Number 2013-1421)

In The Matter Of:

BIOFUSION, LLC
c/o SHERRI CHERMAN, R.Ph.
1910 Van Ness Ave.
Torrance, CA 9501

INTRODUCTION

The Matter of Biofusion, LLC came for hearing on January 7, 2014, before the following members of the Board: Kevin J. Mitchell, R.Ph.; (presiding); Edward T. Cain, Public Member; Melinda J. Ferris, R.Ph.; Margaret A. Huwer, R.Ph.; Megan E. Marchal, R.Ph.; Michael A. Moné, R.Ph.; and Kilee S. Yarosh, R.Ph.

Richard F. Kolezynski, R.Ph., Absent.

Biofusion, LLC was not present and Biofusion, LLC. is represented by Stacie K. Neroni, who also was not present. The State of Ohio was represented by Charissa D. Payer, Assistant Attorney General.

SUMMARY OF EVIDENCE

State's Witness:

1. Sheri Zapadka, R.Ph., Ohio State Board of Pharmacy

Respondent's Witnesses:

None

State's Exhibits:

1.	Copy of Proposal to Deny/Notice of Opportunity for hearing letter	[10-15-13]
1A-1C.	Procedurals	
2.	Correspondence from Staci K. Neroni; Application for Out of State Terminal Distributor of Dangerous Drugs License	[04-19-13]

Respondent's Exhibits:

A.	Contentions	[11-14-13]

EXHIBIT "1"

FINDINGS OF FACT

After having heard the testimony, observed the demeanor of the witness, considered the evidence, and weighed the credibility of each, the State Board of Pharmacy finds the following to be fact:

(1) Records of the Board of Pharmacy indicate that on or about April 2, 2013, Sherri Cherman was the President of Biofusion, 19110 Van Ness Ave., Torrance, California and that on said date, Biofusion submitted an application for registration as a Terminal Distributor of Dangerous Drugs.

(2) On or around October 10, 2011, Modern Healthcare, Inc. D.B.A AD-Rx Pharmacy entered into a Stipulated Settlement and Disciplinary Order with the California State Board of Pharmacy concerning the loss of approximately 470,000 tablets of hydrocodone/APAP 10/325 mg tablets due to employee pilferage. In the Matter of the Accusation Against: Modern Healthcare, Inc., d.b.a., AD-Rx Pharmacy and Robert Antoine Charles, Case No. 3539. Modern Healthcare, Inc. is listed as an owner of Biofusion, the applicant. Such conduct, if proven, constitutes prior discipline by a professional licensing board pursuant within the meaning of Rule 4729-9-19 of the Ohio Administrative Code and Section 4729.57 of the Ohio Revised Code.

(3) The applicant has failed to furnish satisfactory proof to the Board that adequate safeguards are assured to prevent the sale or other distribution of dangerous drugs by any person other than a pharmacist or licensed health professional authorized to prescribe drugs as required by Ohio Revised Code Section 4729.55(C). To wit: another pharmacy owned by the same company did, on or before May 17, 2012, experience significant loss of controlled substances. Such loss was attributable to the actions of a pharmacy employees and poor recordkeeping. Such conditions violate, or allow the violation of Section 4729.55 of the Ohio Revised Code, and constitute a failure to meet the qualifications for a Terminal Distributor of Dangerous Drugs.

'15 DEC -

DECISION OF THE BOARD

Pursuant to Section 4729.11 of the Ohio Revised Code, and after consideration of the record as a whole, the State Board of Pharmacy hereby approves the Application for Registration as a terminal Distributor of Dangerous Drugs submitted by Biofusion, L.L.C. on or about April 2, 2013.

Further, State Board of Pharmacy hereby places on probation for a period of five years the Terminal Distributor License, issued to Biofusion, LLC effective as of the date the license becomes active. The terms of probation are as follows:

(A) Biofusion, L.L.C. must submit to this Board annual reports of any theft or loss of drugs during the period of probation.

(B) Biofusion, LLC must not violate the drug laws of Ohio, any other state, or the federal government.

(C) Biofusion, LLC must abide by the rules of the State Board of Pharmacy.

(D) Biofusion, LLC must comply with the terms of this Order.

(E) Biofusion, LLC's license is deemed to be not in good standing until successful completion of the probationary period.
(F) Any violation of probation may result in a Board hearing to consider alternative or additional sanctions under Section 4729.16 of the Ohio Revised Code.

Biofusion, LLC is hereby advised that the Board may at any time revoke probation for cause, modify the conditions of probation, and reduce or extend the period of probation. At any time during this period of probation, the Board may revoke probation for a violation occurring during the probation period.

Margaret Huwer moved for Findings of Fact; Megan Marchal seconded the motion. Motion passed (Aye-6/Nay-0).

Megan Marchal moved for Action of the Board; Michael Moné seconded the motion. Motion passed (Aye-5/Nay-1).

SO ORDERED.

It is hereby certified by this Board that the above language is a copy of the Order entered upon its journal in this case.

Section 119.12 of the Ohio Revised Code authorizes an appeal from this Order. An order that denied admission to an examination, or denied the issuance or renewal of a license or registration, or revoked or suspended a license, may be appealed to the court of common pleas in the Ohio county of your place of business or in your Ohio county of residence. Any other order may be appealed to the Court of Common Pleas of Franklin County, Ohio.

Such an appeal, setting forth the order appealed from and the grounds of the appeal, must be commenced by the filing of the ORIGINAL Notice of Appeal with the State Board of Pharmacy and a copy with the appropriate court within fifteen (15) days after the mailing of this Order and in accordance with the requirements of Section 119.12 of the Ohio Revised Code.

BEFORE THE BOARD OF PHARMACY
OF THE STATE OF OREGON

In the Matter of the Drug Outlet Registration of	)	Case No. 2015-0142
BIOFUSION LLC dba: BIOFUSION	)	CONSENT ORDER
Registrant	)	

WHEREAS, the Board of Pharmacy of the State of Oregon has filed a Notice of Proposed Disciplinary Action; Answer Required ("Notice"), hereby incorporated by reference, regarding the registrant in the above-captioned matter; and

WHEREAS, the above-noted Notice was duly served on the registrant as required by law; and

WHEREAS, the parties are desirous of resolving and settling those matters contained in the above-noted Notice without further proceedings thereon; and

WHEREAS, the registrant is aware of the right to a hearing with the assistance of counsel and the right to judicial review of the Board's decision, and hereby freely and voluntarily waives those rights; and

WHEREAS, the registrant admits, as described in the Notice, that action was taken against a separate corporate entity ModernHEALTH Specialty (AD-RX), LLC which is owned by the same parent company (Modern HC Pharmacy, Inc.) as the registrant, for AD-RX's violation of rules and statute in California in Board of Pharmacy #3539, and whereas the registrant does not contest lawful cause pursuant to ORS 689.405 for disciplinary action by the Board; and

WHEREAS, the registrant consents to the disciplinary action as set forth herein;

The Board finds that the allegations in the Notice are true and hereby imposes the following sanctions:

1. The registrant is placed on probation with the Oregon Board of Pharmacy for the duration of probation with the California Board of Pharmacy. Registrant shall comply with their probation with the California Board of Pharmacy and the following conditions of probation:
   a. The registrant must comply with all laws and rules.
   b. The registrant will notify the Board of all proposed, pending, and additional action against registrant within 15 days of registrant being notified of proposed, pending, or additional action against registrant.

2. Failure of the registrant to comply with all the requirements of this Consent Order

EXHIBIT "2"

constitutes unprofessional conduct and is grounds for revocation or any other form of discipline or sanction authorized by law.

CONSENT

I hereby acknowledge that I am the authorized representative of registrant. On behalf of the registrant, I hereby acknowledge that I have read and understand the above-noted Notice and the terms of the Consent Order. I hereby acknowledge that I understand that the Consent Order with incorporated Notice is a public record and shall be available via the Board's online licensure verification; is available upon written request pursuant to public disclosure laws; and shall be reported to the National Practitioner Data Bank as required by federal law. I agree to the Board entering the Consent Order.

BOARD OF PHARMACY
FOR THE STATE OF OREGON

Gary Miner, R.Ph., — Date: 8/27/15
Compliance Director

RECEIVED
15 DEC -4 P6:18

BEFORE THE BOARD OF PHARMACY
OF THE STATE OF OREGON

In the Matter of the Drug Outlet Registration of	)	Case No. 2015-0142
BIOFUSION LLC dba: BIOFUSION	)	NOTICE OF PROPOSED DISCIPLINARY ACTION; ANSWER REQUIRED
Registrant	)	

Under the authority granted pursuant to ORS 689.135, 689.145, 689.335, 689.405 and 689.445, the Oregon Board of Pharmacy proposes to take disciplinary action against your Certificate of Registration No. RP-0002741 because Biofusion violated the Oregon Pharmacy Act and the Board of Pharmacy rules as set forth below:

On or about 2/7/2014, Biofusion was placed on a 5 year probation with the Ohio Board of Pharmacy in Case Number 2013-1421. Findings of Fact include that Modern Healthcare dba: AD-Rx Pharmacy entered into a Stipulated Settlement and Disciplinary Order with the California State Board of Pharmacy concerning the loss of approximately 470,000 hydrocodone/APAP 10/325 mg tablets due to employee pilferage. In the Matter of the Accusation Against: Modern Healthcare, d.b.a., AD-Rx Pharmacy and Robert Antoine Charles, Case No. 3539. Modern Healthcare Inc. is listed as an owner of Biofusion.

On or about 4/2/2012, in Case No. 3539 the California Board of Pharmacy placed Modern Health Care, dba: AD-RX Pharmacy on probation for the loss of 470,000 hydrocodone/APAP 10/325 mg tablets from December 2006 to June 2007. Respondent agreed that at hearing the complainant could establish a factual basis for the charges in the Accusation. Case No. 3539 Accusation causes for discipline included failure to maintain adequate security for dangerous drugs, failure to maintain current inventory and complete accountability, and failure to timely notify the Board of a designated pharmacist in charge.

The above conduct is in violation and grounds for discipline, pursuant to OAR 855-041-1010(1) and (2), OAR 855-041-1020(1) and (2), OAR 855-019-0300(1) and (4)(a), OAR 855-041-1170(1), and 689.405(1)(a), (e)(B), and (j).

Based on these alleged violations, the Board proposes to revoke your registration and impose a $10,000 civil penalty per violation.

PROFESSIONAL

HEARING RIGHTS

The corporation is entitled to a hearing as provided by the Administrative Procedures Act (ORS chapter 183). An attorney must represent the corporation. If the corporation wishes to have a hearing, the corporation's attorney must file a written request for hearing with the Board within 21 days from the date this notice was mailed. The corporation's attorney may send or deliver a request

for hearing to:

Oregon Board of Pharmacy
800 NE Oregon Street, Suite 150
Portland, OR 97232
Fax: (971) 673-0002

If a request for hearing is not received within this 21-day period, the corporation's right to a hearing shall be considered waived.

If the corporation requests a hearing, the corporation's attorney will be notified of the time and place of the hearing. Before the commencement of the hearing, the corporation will be given information on the procedures, right of representation and other rights of parties relating to the conduct of the hearing.

If the corporation does not request a hearing within 21 days, or if it withdraws a hearing request, notifies the Board or Administrative Law Judge that it will not appear, or fails to appear at a scheduled hearing, the Board may issue a final order by default imposing discipline. If the Board issues a final order by default, it designates its file on this matter as the record.

ANSWER REQUIRED

Pursuant to OAR 855-001-0010 and OAR 855-001-0015, if you request a hearing you must also provide, within 21 days from the date this contested case notice was served, a written answer to the allegations set forth in this contested case notice. Your written answer must include an admission or denial of each factual matter alleged in the notice and a short and plain statement of each relevant affirmative defense you may have. Except for good cause, factual matters alleged in the notice and not denied in the answer shall be presumed admitted; failure to raise a particular defense in the answer will be considered a waiver of such defense; new matters alleged in the answer (affirmative defenses) shall be presumed to be denied by the agency; and evidence shall not be taken on any issue not raised in the notice and the answer.

RECEIVED
DEC -4 P6:18

Hearing Request and Answers:
Consequences of Failure to Answer
855-001-0015

(1) A hearing request, and answer when required, shall be made in writing to the Board by the party or his attorney and an answer shall include the following:

(a) An admission or denial of each factual matter alleged in the notice;

(b) A short and plain statement of each relevant affirmative defense the party may have.

(2) Except for good cause;

(a) Factual matters alleged in the notice and not denied in the answer shall be presumed admitted;

(b) Failure to raise a particular defense in the answer will be considered a waiver of such defense;

(c) New matters alleged in the answer (affirmative defenses) shall be presumed to be denied by the agency; and

(d) Evidence shall not be taken on any issue not raised in the notice and the answer.

AGREED BOARD ORDER #L-15-003

RE: IN THE MATTER OF
BIOFUSION
(PHARMACY LICENSE #27196)

BEFORE THE TEXAS STATE
BOARD OF PHARMACY

On this day came on to be considered by the Texas State Board of Pharmacy (Board) the matter of pharmacy license number 27196 issued to Biofusion (Respondent), 19110 Van Ness Avenue, Torrance, California 90501.

By letter dated July 13, 2015, the Board gave preliminary notice to Respondent of its intent to take disciplinary action. This action was taken as a result of an investigation which produced evidence indicating that Respondent may have violated:

> Sections 565.002(a)(9) and (13); and 565.002(c) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3, Subtitle J (2013), as alleged in the Count below.

The conduct described in the Order of the Ohio State Board of Pharmacy is substantially similar to conduct described in:

> Section 565.002(a)(9) and (13) of the Texas Pharmacy Act, TEX. OCC. CODE ANN. Title 3, Subtitle J (2013); and
>
> Section 291.32(b)(2) of the Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2014).

COUNT

On or about February 7, 2014, the Ohio State Board of Pharmacy entered an Order against the application for registration as a terminal distributor of dangerous drugs of Biofusion, LLC. The Order was based on findings of fact that a listed owner of Biofusion, LLC (i.e., Modern Healthcare, Inc., d.b.a. AD-RX Pharmacy) had been subject to a Settlement and Disciplinary Order entered by the California Board of Pharmacy on October 10, 2011, for employee diversion of approximately 470,000 tablets of hydrocodone/APAP 10/325 mg tablets. Based on this finding, the Ohio State Board of Pharmacy determined Biofusion, LLC failed to furnish proof of adequate safeguards to prevent the sale or other distribution of dangerous drugs in an unauthorized manner. The Order granted the registration subject to a five-year probation.

An informal conference was held in the Board's office on September 2, 2015, with James Markis, Pharm.D., Director of Pharmacy, Biofusion; Michael R. Hess, General Counsel, Biofusion; Joan Schuckenbrock, Chief Administrative Officer, Modern Health, on behalf of Respondent; and Nanette K. Beaird, Legal Counsel for Respondent, in attendance. The informal conference was heard by a Board panel comprised of: Jeanne D. Waggener, R.Ph., Board

EXHIBIT "3"

Member; Gay Dodson, R.Ph., Executive Director/Secretary; and Carol Fisher, R.Ph., M.P.A., Director of Enforcement; with Caroline Hotchkiss, Assistant General Counsel. Ginger Shuffer, Staff Attorney, was also in attendance.

By appearing at the informal conference and by signing this Order, Joan Schuckenbrock and Respondent's counsel neither admit nor deny the truth of the matters previously set out in this Order, and agree that the Board has jurisdiction in this matter and waive the right to notice of hearing, formal administrative hearing, and judicial review of this Order.

The parties acknowledge that this Order resolves the allegations set forth herein, and agree to the terms and conditions set forth in the ORDER OF THE BOARD below.

ORDER OF THE BOARD

THEREFORE, PREMISES CONSIDERED, the Board does hereby ORDER that:

(1) Respondent's license shall be placed on probation for a period of two (2) years, with such period to commence thirty (30) days after the entry of this Order. During the period of probation, Respondent shall abide by the terms of this Order, and shall not violate any pharmacy or drug statute or rule of this state, another state, or the United States with respect to pharmacy, controlled substances, and dangerous drugs.

(2) Respondent shall pay a probation fee of one thousand two hundred dollars ($1,200) due one hundred twenty (120) days after the entry of this Order.

(3) Respondent shall allow Board staff to directly contact Respondent on any matter regarding the enforcement of this Order.

(4) Failure to comply with any of the requirements in this Order constitutes a violation and shall be grounds for further disciplinary action. The requirements of this Order are subject to the Texas Pharmacy Act, TEX. OCC. CODE ANN., Title 3, Subtitle J (2015), and Texas Pharmacy Board Rules, 22 TEX. ADMIN. CODE (2015).

'15 DEC -4 P6:18

And it is so ORDERED.

THIS ORDER IS A PUBLIC RECORD.

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Kroger Specialty Infusion CA

NV Pharmacy or Outsourcing facility license # (if applicable): PH02247

Physical Address: 19110 Van Ness Ave.

City: Torrance State: CA Zip: 90501

Mailing Address (if different from physical address):

City: State: Zip:

Telephone: 310-320-6444 Toll Free # (NAC 639.708, NRS 639.23286): 866-202-9552

Fax: 866-794-4844 Contact Email: license@bioplusrx.com

Website: https://www.krogerspecialtypharmacy.com/

Nevada Business License # (if applicable) N/A

Supervising/Managing Pharmacist Name (NRS 639.220): Kirankumar Patel

Supervising/Managing Pharmacist NV Pharmacist Registration #: 21368

Name of Person with direct knowledge of compounding procedures: Kirankumar Patel

Email of Person with direct knowledge of compounding procedures: Kirankumar Patel

Telephone of Person with direct knowledge of compounding procedures: 310 755 2199

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☐ Low ■ Medium ☐ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☐ Yes ■ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

- We will not be providing Sterile Compounded products for patients or consumers that reside in the state of Nevada.

- We only prepare and dispense Sterile Compounded products to patients or consumers that reside in the state of California.

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ■ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:
N/A

6. What laboratory performs this additional testing?

Name: N/A

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?
Pharmacist reviews Work Order/Compounding record for product to be dispensed. Review of medication and supplies utilized to prepare compounded item. Final product is visually inspected utilizing a black and white background to check for particulate matter/cloudiness. Final product is weighed and documented as to time of final check.

8. How often do you perform glove fingertip and medial fill testing?

Two times per 12 month period (Every 6 months)

9. What is your policy if an employee fails a glove fingertip or media-fill test?

Personnel who fail this test will require re-training and may not compound sterile products until tests have been repeated with successful results. On failed gloved test, the genus of growth colony will be identified to determine source of contamination.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

- All desired compounding personnel shall successfully complete an initial competency evaluation and gloved fingertip/thumb sampling procedure no less than three times before initially being allow to compound sterile products, this includes media transfer test.
- Immediately after the compounding employee completes the garbing procedure and prior to any disinfection with sterile alcohol, a gloved fingertip/thumb sample will be collected from both hands onto the agar plate. A surface sample is taken.
- The plates are to be incubated per USP 797 recommendation. If BD BBL Plates with Trypticase Soy Agar with Lecithin & Polysorbate 80 are used, they are to be incubated at: 30-35°C for no less than 48hrs and them at a temperature of 20-25°C for no less than 5 additional days; or as indicated per manufacture.
- Personnel are also required to pass didactic testing (Sterile Compounding Competency exam & Math Skills)

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

- Disinfectant agent: Isopropyl alcohol, 70% soln (IPA) or equivalent agent per USP 797 appendix; Germicidal agent: TB1-3300; - Sporicidal agent: Peridox RTU, Decon Spore 200-Plus
- Daily: Performed using a sterile low-lint wipe & cleaning agent. Hood: ISO Class 5 cleaned at beginning of each shift, before each batch, not longer than 30 minutes following previous surface disinfection when ongoing compounding activities are occurring, after spills & when surface contamination is known or suspected. ISO 5 LAFW cleaned with sterile water, then germicidal agent & then sterile 70% IPA. Compounding & miscellaneous equipment: Clean pump & filling devices used in the hood. Counter tops cleaned w/sterile water, sterile 70% IPA & germicidal agent. Floors cleaned by mopping once daily with sporicidal agent. Scrub sink w/disinfectant. Tacky mat changed daily or when appropriate. Clean pass-through window daily with disinfectant.

SEE ADDITIONAL SHEET FOR CONTINUATION

12. Who performs the sterile compounding process at your facility?

Sterile compounding is performed by Pharmacy Technicians and Pharmacists that have successfully passed all testing protocols.

13. Who is responsible and accountable for the sterile compounding process at your facility?

A designated person is identified as the responsible party and accountable for sterile compounding; for this facility is notated as the Director of Pharmacy.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

All compounded products are shipped using a cooler/insulated packaging to maintain appropriate temperature range for product, utilizing a predetermined quantity of frozen gel packs dependent on the size of cooler box. All packages are coordinated to be shipped priority overnight to minimize time in transit to recipient.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility?		
2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)	
1. List the specific high risk sterile products that your facility compounds:	
2. What sterilization methods are utilized at your facility?	
3. Does your facility utilize biological indicators?	☐ Yes ☐ No
4. If yes, describe how they are utilized:	

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Nevada State Board of Pharmacy: Sterile Compounding Questionnaire – Continued

Kroger Specialty Infusion CA – PH02247

Section 2, Question #11:

- Weekly: Cleaning procedures (in additional to daily):
  - Sporicidal agent used to sanitize ISO5/7/8 areas; alternated monthly.
  - Clean all chair, counter tops, carts, door handles, windows, ledges, pass-through, trash bins/barrels.
  - Wash cleaning equipment with isopropyl alcohol, 70% solution.
  - Trash bags will be replaced daily or when appropriate.
  - Clean the light fixtures & ceiling in the compounding room and Ante-area.
  - Walls and ceilings will be cleaned once a week with sporicidal agent (Peridox RTU or Decon Spore 200-Plus, products to be altered each month. A lint-free mop labeled "Walls/Ceilings" will be used.
  - Clean interiors and exteriors of cabinets, storage carts/bins, racks and sink.

- Monthly: Cleaning procedures (in addition to daily and weekly):
  - Documentation with date/time of cleaning will be made on internal form for record keeping.

- Clean LAFH/PEC pre-filters every other month, or when appropriate, based on manufacturer recommendation.

Secretary of State
Certificate of Status

I, SHIRLEY N. WEBER, PH.D., California Secretary of State, hereby certify:

Entity Name:	KROGER SPECIALTY INFUSION CA, LLC
Entity No.:	201220510197
Registration Date:	09/09/2005
Entity Type:	Limited Liability Company - CA
Formed In:	CALIFORNIA
Status:	Active

The above referenced entity is active on the Secretary of State's records and is authorized to exercise all its powers, rights and privileges in California.

This certificate relates to the status of the entity on the Secretary of State's records as of the date of this certificate and does not reflect documents that are pending review or other events that may impact status.

No information is available from this office regarding the financial condition, status of licenses, if any, business activities or practices of the entity.

IN WITNESS WHEREOF, I execute this certificate and affix the Great Seal of the State of California this day of July 08, 2024.

SHIRLEY N. WEBER, PH.D.

Inspector Remarks:

Performing on-site annual sterile compounding renewal inspection at Kroger Specialty Infusion Pharmacy in Torrance, CA. PIC Gilberto (Gilbert) Melo is present and assisting in the inspection. PIC Melo has been with Kroger Specialty Infusion Pharmacy since 2018.

PIC Melo's Contact information is: e-mail: gilberto.melo@krogerhealth.com Phone: 866-202-9552

Kroger Specialty Infusion Pharmacy is a closed door specialty infusion pharmacy which primarily (98%) compounds Intravenous Immune Globulin (IVIG). They also have a few patients who receive other infusion therapies (Entyvio, Tysabri, Rituxan, Ceprotin), but

INSPECTION REPORT

those are very few. They currently have approximately 400 California residents and approximately 200 non-CA residents on service for primarily IVIG therapy.

The facility is located in a large business complex in Torrance, CA. There is parking outside for staff. Upon entry to the facility there is a reception area. This opens up to a large work area with several cubicle work spaces for billing staff, etc. There is another open area for pharmacist and technicians to process orders, etc. There is a large conference room, staff breakroom, restrooms, etc. Non-resident pharmacy licenses are posted in breakroom hallway

This facility is part of the Kroger Specialty Pharmacy network which includes other Specialty Infusion locations in Texas and Alabama. Non-Infusion Kroger Specialty Pharmacies are located in Garden Grove, CA, along with others across the country including in Louisiana and Florida.

Some patients come to the Torrance facility to receive their infusion at the on-site 3-bed infusion center. There is a third-party contracted nursing agency who administers the on-site infusions when necessary. The infusion center is not used every day.

Kroger Specialty pharmacy dispenses IVIG to patient in their home and occasionally to the physician office. They are licensed in approximately 40 states across the U.S..

Kroger currently has approximately 12 patients in CA who receive compounded IVIG. These doses are compounded in the on-site sterile compounding suite and shipped to the patient's home. Compounding does not take place every day. IVIG is compounded approximately 3 days per week. Only 1 or 2 doses of IVIG are compounded on any given day in the sterile compounding suite. A 10-day BUD is assigned to compounded IVIG doses.

Concomitant therapies are dispenses including Acetaminophen, Diphenhydramine, Solu-Medrol, etc. related to IVIG therapy. Epi-Pens are dispensed in case of allergic reactions. There are no hazardous or cytotoxic drugs in inventory currently. This facility does have a DEA registration, but controlled substances are currently in inventory.

The facility is accredited buy ACHC and URAC. ACHC performed an on-site inspection on April 2024. NABP performed an on-site inspection in April 2023. There were not findings on that inspection.

Fingertip and media fill testing is performed and testing is reviewed internally. There are two incubators in the facility set at 25 and 35 degrees for incubation.

INSPECTION REPORT

LSC Inspection:

The compounding area is a two-room suite. There is an ISO8 gowning (ante) room that leads to an ISO7 positive pressure buffer zone with an ISO5 Germfree LFH.

Compounding Area:

- Flooring: Sheet vinyl
- Walls: Clean and washable
- Sink: Stainless steel in Gowning Room
- Emergency Eye Wash Station: In Gowning Room
- Air Pressure Monitoring: Continuous and electronic in Lab Alert system - E-fusion live website
  - Pharmacy staff is notified if out of range
  - Clean room temperature and humidity is recorded as well

Certification:

- Clean Room Services (CRS)
  - Last on 4/29/24
    - Environmental Viable Sampling: Passed during certification
    - Air Exchanges: Passed during certification
    - HEPA Filtration: Passed during certification

Smoke Tests:

- Viewed during inspection with PIC
- Passed during on-site certification on 4/29/24

Gowning Room:

- ISO8
- Air Exchanges Per Hour: 32
- Air Pressures: +0.046
- Line of Demarcation
- Sheet vinyl flooring
- Stainless steel sink
- Stainless steel bench
- Stainless steel table
- Stainless steel cart
- Mirror
- Emergency Eye Wash Station

INSPECTION REPORT

Positive Pressure Buffer Zone:
- ISO7
- Air Exchanges Per Hour: 103
- Air Pressures: +0.0846
- Laminar Flow Hood/Cabinet:
  - ISO5 Germfree LFH
- Stainless steel table
- Low air return
- Pass thru window to unlicensed area
- Large glass wall allowing for direct visual contact from outside sterile compounding area
- Repeater pump in LFH

Non-Hazardous Drugs Prepared:
- N/A

Negative Pressure Buffer Zone:
- N/A

Biological Safety Cabinet:
- N/A

Hazardous Drugs Prepared:
- N/A

CSTD System:
- N/A

PPE/Garbing:
- All required PPE is available in Gowning Room

BUD's:
- 10-days assigned to compounded IVIG doses
  - Category 2 CSPs refrigerated

Labeling:
- Labels reviewed for several medications
  - Gamunex
  - Acetaminophen

INSPECTION REPORT

- Diphenhydramine
- Lidocaine/Prilocaine Cream
- All required elements are present

Shipping:
- Products shipped both within and outside CA are shipped via Federal Express
- All products are shipped in insulated Styrofoam containers
- Policy in place for how to ship depending on temperature of receiving location
- Shipping studies performed with temperature tracking to ensure proper packaging

Adverse Drug Reactions:
- None to report

Master Formula:
- Master formula for compounded IVIG reviewed
- IVIG is simply transferred to empty bags or syringes
- No other ingredients are added to the IVIG transfer

Compounding Log:
- Reviewed for Gammagard liquid 45 gm dose
- All required elements are present
- Compounded on 7/10/24
- Pharmacist reviews drug and supplies prior to compounding
- Pharmacist weighs final bag(s) prior to dispensing

Inventory:
- Pre-Mixed Drips: N/A
- Outsourcing 503B: N/A
- TPN:N/A
- 503A: N/A
- Connector System: N/A

Controlled Substances:
- No controlled substances in inventory
- Quarterly reconciliation documented even though none in inventory
- Documentation is recorded and sent into Kroger compliance group in Florida

Cleaning Documentation:
- Recorded on manual log

INSPECTION REPORT

Refrigerator/Freezer Logs:
- Multiple medication refrigerators on site
- Freezers used for ice packs only
- Continuously recorded in Winland system for all refrigerators and freezers

Security:
- One main entry/exit door in front
- Second entry/exit door in back
- Roll up door in back for deliveries
- Security cameras throughout the facility

Cleaning Agents:
- TB1-3300
- Peridox RTU
- Decon-Spore 200 Plus
- Sterile IPA

Training:
- Fingertip testing semi-annually
- Media fill testing semi-annually
- Three technicians and all pharmacist are trained for sterile compounding
- Written exam taken annually
- Written math skills exam annually
- Reviewed documentation for:
  - Technicians R.N. and H.J.

Policy and Procedures:
- SOP manual reviewed
- Reviewed annually by PIC

Quality Assurance Program:
- Process Validation:
  - Magnesium Sulfate 250mg/50ml NS
    - 10/24/23
    - Eagle Labs
      - Potency: 98.0%
      - Sterility: Negative at 14 days
  - Magnesium Sulfate 250mg/50ml NS

Sacramento, CA 95833
Phone: (916) 518-3100 Fax: (916) 574-8618
www.pharmacy.ca.gov

Business, Consumer Services and Housing Agency
Department of Consumer Affairs
Gavin Newsom, Governor

INSPECTION REPORT

- 4/26/24
- Eagle Labs
  - Potency: 103.6%
  - Sterility: Negative at 14 days

Wholesaler:
- Cardinal

Reverse Distributor:
- Inmar
- Pharmalink (for Sandoz generic products only)

Education During Inspection:
- Security - Always ask for credentials from anyone representing themselves as being from a regulatory agency to ensure they are who they say they are.
- Security - Beware of scam callers representing themselves as being from a regulatory agency who threaten the status of your license and request money. No one from the CA Board of Pharmacy will call and request money.
- Quarterly inventory reconciliation - Be sure to include purchasing records as part of the reconciliation to reconcile the purchases with what is entered into the controlled substance inventory.
- Date and label any open bottle, i.e. sterile IPA to indicate either date of opening and/or expiration date after opening and removal from sterile packaging.

Topics to Educate

1. BPC 4052.04 – Pharmacist may furnish COVID-19 oral therapeutics following a positive test.
   - "COVID-19 oral therapeutics" means drugs that are approved or authorized by the FDA for the treatment of COVID-19 and administered orally.
   - Prior to furnishing COVID-19 oral therapeutics, a pharmacist shall utilize relevant and appropriate evidence-based clinical guidelines published by FDA in providing these patient care services.
   - A pharmacist who furnishes COVID-19 oral therapeutics shall notify patient's PCP or enter appropriate information into patient record system shared with PCP, as permitted by that PCP. If the patient does not have a PCP, the pharmacist shall provide the patient with a written record of the drugs furnished and advise the patient to consult a physician of the patient's choice.
   - Document the kind and amounts of COVID-19 oral therapeutics furnished, as well as any information regarding testing services provided, in the patient's record in the record system maintained by the pharmacy.

INSPECTION REPORT

- Retain records for 3 years.

2. BPC 4113 – PIC authority to make staffing decisions
   - PIC may make staffing decisions to ensure sufficient personnel are present in the pharmacy to prevent fatigue, distraction, or other conditions that may interfere with a pharmacist's ability to practice competently and safely.
   - If PIC is not available, a pharmacist on duty may adjust staffing according to workload if needed.
   - PIC or pharmacist on duty shall immediately notify the store management of any conditions that present an immediate risk of death, illness, or irreparable harm to patients, personnel, or pharmacy staff. If the conditions are not resolved within 24 hours, the PIC or RPH on duty shall ensure the BOP is timely notified. Conditions that present an immediate risk of death, illness, or irreparable harm to patients, personnel, or pharmacy staff include, but are not limited to:
     - Workplace safety and health hazards that present an immediate risk of death, illness or irreparable harm to patients, personnel, or pharmacy staff.
     - Sustained temperatures that could impact ambient temperature drug stability according to manufacturer data on acceptable drug storage conditions.
     - Vermin infestation that poses a risk to the safety or efficacy of medicine.
3. BPC 4113.1 – Reporting medication errors within 14 days from discovery.
   - Applies to "community pharmacies" – *i.e.,* any pharmacy that dispenses medication to an outpatient (but not including facilities of CDCR).
   - Per the BOP's AB 1286 Implementation Statement, the reporting of medication errors under BPC 4113.1 will not be required until the BOP approves an entity to receive the reports.
4. BPC 4113.6 – Chain community pharmacy subject to BPC 4113.5 must be staffed at all times with at least one clerk or pharmacy technician fully dedicated to performing pharmacy-related services. The BOP will not take action against a pharmacy for violation of this staffing requirement if any of the following conditions apply:
   - RPH on duty waives the requirement in writing during specified hours based on workload need.
   - The pharmacy is open beyond normal business hours (*i.e.,* before 8am, after 7pm). During the hours before 8am and after 7pm, the staffing requirement shall not apply.
   - The pharmacy's prescription volume per day on average is less than 75 prescriptions per day based on the average daily prescription volume for the past calendar year. However, if the pharmacist is also expected to provide additional pharmacy services (such as immunizations or CLIA-waived tests) this exception does not apply.

INSPECTION REPORT

When staffing of pharmacist hours within a chain community pharmacy does not overlap sufficiently, scheduled closures for lunch time for all pharmacy staff shall be established and publicly posted, and included on the outgoing telephone message.

5. BPC 4115 – Pharmacy technician may, under the direct supervision and control of a pharmacy, prepare and administer influenza and COVID-19 vaccines via injection or intranasally, prepare and administer epinephrine, perform specimen collection for tests that are CLIA waived, receive prescription transfers, and accept clarification on prescriptions under certain specified conditions.
6. BPC 4231 – CE required for pharmacists to renew their pharmacist license must now include at least one hour of participation in a cultural competency course which meets specified requirements.
7. The Board has posted on its website the FAQ's to address the changes in pharmacy law related AB1286, dated 12/21/2023. Here's the link:
https://pharmacy.ca.gov/publications/ab1286_faqs.pdf

DISCLAIMER:
Any issues referenced/discussed in this report are not intended to be an all-inclusive list of issues that may exist at your facility. Your facility is responsible for investigating and determining the causes of any issues and items to be corrected and for preventing their recurrence. Further review of items provided at inspection, may result in further communication after this report.

If there have been changes in your policies and procedures in the last year, please provide an electronic copy of the new or changed policies and procedures. You may do this by sending a disk or CD to the Board or e-mail the new policies and procedures to: compounding.pharmacy@dca.ca.gov. Please use the pharmacy's California sterile compounding license number (LSC or NSC and five-digit number) on the disk, CD, or in the subject line of the e-mail to ensure proper identification. Please identify or list the changes to your procedures. Failure to identify or list the changes will hinder timely renewal..

Discussion:

Please provide the following to Inspector Matthews at lyle.matthews@dca.ca.gov no later than 8/15/24:
1. N/A

Follow-up questions may be referred to Inspector Matthews at lyle.matthews@dca.ca.gov or to (909) 255-2973.

Explanation for "Yes" answer to section 3 of Nevada Pharmacy Application

- On 3/3/2014 we received notice from the Oregon Board of Pharmacy that a fine was being issued to us for one of our technicians actively working with a license that had lapsed and was expired. This occurred due to a lack of oversight into each employee's license status. We have fixed the problem and have not had another occurrence of this since we were fined.

OREGON BOARD OF PHARMACY

BEFORE THE BOARD OF PHARMACY
OF THE STATE OF OREGON

In the Matter of the Drug Outlet Registration of	)	Case No. 2013-0465
PAYLESS COMPOUNDERS, LLC dba: NORTHWEST COMPOUNDERS	)	CONSENT ORDER
Registrant	)	

WHEREAS, the Board of Pharmacy of the State of Oregon has filed a Notice of Proposed Disciplinary Action; Answer Required ("Notice"), hereby incorporated by reference, regarding the registrant in the above-captioned matter; and

WHEREAS, the above-noted Notice was duly served on the registrant as required by law; and

WHEREAS, the parties are desirous of resolving and settling those matters contained in the above-noted Notice without further proceedings thereon; and

WHEREAS, the registrant is aware of the right to a hearing with the assistance of counsel and the right to judicial review of the Board's decision, and hereby freely and voluntarily waives those rights; and

WHEREAS, the registrant admits that the facts alleged in the above-noted Notice are true, that legal cause exists pursuant to ORS 689.405 and ORS 689.445 for disciplinary action and imposition of a civil penalty by the Board; and

WHEREAS, the registrant consents to the civil penalty as set forth herein;

The Board finds that the allegations in the Notice are true and hereby:

1. The registrant shall pay the Board a civil penalty in the amount of $500 ($1,000 with $500 stayed pending no further similar violation for three years). The $500 payment shall be made within ten days from the date this Consent Order becomes final.

2. Failure of the registrant to pay the civil penalty as required under this Consent Order may, after notice and hearing, result in further disciplinary action.

CONSENT

I hereby acknowledge that I am the authorized representative of registrant. On behalf of the registrant, I further certify that I have read and understand the Notice and this Consent Order and am aware of the right to a hearing with the assistance of counsel and the right to judicial review of the Boards final order. On behalf of the registrant I agree to the Board entering the

Consent Order.

BOARD OF PHARMACY
FOR THE STATE OF OREGON

_____	3/4/14
Gary Miner, R.PH.,	Date
Compliance Director	

BEFORE THE BOARD OF PHARMACY
OF THE STATE OF OREGON

In the Matter of the Drug OutletRegistration of PAYLESS COMPOUNDERS, LLC dba: NORTHWEST COMPOUNDERS Registrant	Case No. 2013-0465 NOTICE OF PROPOSED DISCIPLINARY ACTION; ANSWER REQUIRED

Under the authority granted pursuant to ORS 689.135, 689.145, 689.335, 689.405 and 689.445, the Oregon Board of Pharmacy proposes to take disciplinary action against your Certificate of Registration No. RP-0002270 because Northwest Compounders violated the Oregon Pharmacy Act and the Board of Pharmacy rules as set forth below:

From on or about 9/25/2013 through 10/31/2013, Northwest Compounders, located at 17972 SW McEwan Rd in Tualatin, OR failed to enforce their written procedures for ensuring all who work in the pharmacy are appropriately licensed and registrant employed, allowed, aided, and abetted an unlicensed individual to perform the duties of a pharmacy technician without a pharmacy technician license.

The above conduct is contrary to accepted standards of practice and unprofessional conduct as defined by OAR 855-006-0005(28)(f) and (j) and in violation of OAR 855-025-0035(2),(3), OAR 855-041-1040(7), ORS 689.486(5) which is grounds for discipline pursuant to ORS 689.405(1)(a), (e)(B), (h) and (i).

Based on these alleged violations, the Board proposes to impose a civil penalty in the amount of $5,000 per violation.

HEARING RIGHTS

The corporation is entitled to a hearing as provided by the Administrative Procedures Act (ORS chapter 183). An attorney must represent the corporation. If the corporation wishes to have a hearing, the corporation's attorney must file a written request for hearing with the Board within 21 days from the date this notice was mailed. The corporation's attorney may send or deliver a request for hearing to:

Oregon Board of Pharmacy
800 NE Oregon Street, Suite 150
Portland, OR 97232
Fax: (971) 673-0002

If a request for hearing is not received within this 21-day period, the corporation's right to a hearing shall be considered waived.

If the corporation requests a hearing, the corporation's attorney will be notified of the time and place of the hearing. Before the commencement of the hearing, the corporation will be given

information on the procedures, right of representation and other rights of parties relating to the conduct of the hearing.

If the corporation does not request a hearing within 21 days, or if it withdraws a hearing request, notifies the Board or Administrative Law Judge that it will not appear, or fails to appear at a scheduled hearing, the Board may issue a final order by default imposing discipline. If the Board issues a final order by default, it designates its file on this matter as the record.

ANSWER REQUIRED

Pursuant to OAR 855-001-0010 and OAR 855-001-0015, if you request a hearing you must also provide, within 21 days from the date this contested case notice was served, a written answer to the allegations set forth in this contested case notice. Your written answer must include an admission or denial of each factual matter alleged in the notice and a short and plain statement of each relevant affirmative defense you may have. Except for good cause, factual matters alleged in the notice and not denied in the answer shall be presumed admitted; failure to raise a particular defense in the answer will be considered a waiver of such defense; new matters alleged in the answer (affirmative defenses) shall be presumed to be denied by the agency; and evidence shall not be taken on any issue not raised in the notice and the answer.

Hearing Request and Answers:
Consequences of Failure to Answer
855-001-0015

(1) A hearing request, and answer when required, shall be made in writing to the Board by the party or his attorney and an answer shall include the following:

- (a) An admission or denial of each factual matter alleged in the notice;
- (b) A short and plain statement of each relevant affirmative defense the party may have.

(2) Except for good cause;

- (a) Factual matters alleged in the notice and not denied in the answer shall be presumed admitted;
- (b) Failure to raise a particular defense in the answer will be considered a waiver of such defense;
- (c) New matters alleged in the answer (affirmative defenses) shall be presumed to be denied by the agency; and
- (d) Evidence shall not be taken on any issue not raised in the notice and the answer.

NEVADA STATE BOARD OF PHARMACY

985 Damonte Ranch Parkway, Suite 206 - Reno, NV 89521 - (775) 850-1440

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Northwest Compounders

NV Pharmacy or Outsourcing facility license # (if applicable): N/A

Physical Address: 8505 SW Creekside Place Suite 110

City: Beaverton State: OR Zip: 97008

Mailing Address (if different from physical address): _____

City: _____ State: _____ Zip: _____

Telephone: 503-352-3811 Toll Free # (NAC 639.708, NRS 639.23286): 1 (866) 632-0236

Fax: 503-624-0591 Contact Email: Luke@northwestcompounders.com

Website: www.northwestcompounders.com

Nevada Business License # (if applicable) N/A

Supervising/Managing Pharmacist Name (NRS 639.220): Luke Eilers

Supervising/Managing Pharmacist NV Pharmacist Registration #: N/A

Name of Person with direct knowledge of compounding procedures: Luke Eilers

Email of Person with direct knowledge of compounding procedures: luke@northwestcompounders.com

Telephone of Person with direct knowledge of compounding procedures: 503-352-3811

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☐ Low ☒ Medium ☒ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☒ Yes ☐ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Apomorphine SDV Inj (veterinary only)
Cidofovir Ophthalmic Drops (veterinary only)
Cyclosporine Ophthalmic Drops (veterinary only)
Desmopressin Ophthalmic Drops (veterinary only)
Idoxuridine Ophthalmic Drops (veterinary only)
Tacrolimus Ophthalmic Drops (veterinary only)

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:

6. What laboratory performs this additional testing?

Name: _____

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?
Final visual inpsection of compounded sterile products is performed only by pharmacists that have been specifically trained in sterile compounding and are also up to date with media fill, finger tip testing requirements, etc. These pharmacists use a light box located at the final check station that allows them to use regular light and black light to check for impurities, sedimentation, preciptiation and other undesired conditions.

8. How often do you perform glove fingertip and medial fill testing?
FInger tip and media fill testing completed 4 times per year. Two of each under USP <800> conditions.

9. What is your policy if an employee fails a glove fingertip or media-fill test?
If the employee does not correctly demonstrate a core competency criterion, the qualified evaluator must provide remedial training at the conclusion of the assessment. Any activities failed must be re-performed and re-assessed until a passing checkmark is achieved.

10. Describe your initial and annual training program for all personnel performing sterile compounding:
Initial training involves a sterile compounding training manual which is reviewed by the new technician and director of sterile compounding. Sections are reviewed verbally with practical demos reviewing equipment and techniques. Each section is signed when complete. Shadowing is then completed over a multiple month period to give practical application of the material. Then compounding may be started under direct supervision. All techniques are reviewed and practiced. initial fingertip, garbing, dynamic surface sampling and a media fill is completed before a person may perform sterile compounding unassisted.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:
CPEC and CSEC daily cleaning and disinfecting on days compounding occurs with sterile 70% IPA includes: CPEC surface and equioment inside CPEC, removal work tray, pass-through chambers, sink, powder containment hood, work surfaces outside the PEC, and floors (with Spartan hdqC2 2 in 1 neutral pH). Weekly sporicidal disinfectant using PeridoxRTU followed by sterile 70% IPA is completed to all locations above. Monthly cleaning with sporicidal disinfectant using PeridoxRTU followed by sterile 70% IPA includes locations already listed plus: Walls, doors, and door frames, ceilings, storage shelving and bins, equipment outside the CPECs.

12. Who performs the sterile compounding process at your facility?
Technicians who have completed sterile compounding training.

13. Who is responsible and accountable for the sterile compounding process at your facility?
Three pharmacists including CEO, Manager, and director of sterile compounding. Technicians who have completed sterile compounding training.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?
Products are shipped with bubble wrap in secure packaging. If needed products are shipped on ice to control temperature requirements. Hazardous drugs are shipped within plastic bags.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? Class II Type A2 BSC		
2. Is your BSC or CACI vented 100% to the outside?	☑ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☑ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API? ✓	☑ Yes	☑ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☑ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☑ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers? All hazardous drug products state "The FDA considers this a hazardous drug. Gloves should be worn when handling." Hazardous drugs are consulted to wear gloves and wash hands.		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs? Initial training involves a sterile compounding training manual which is reviewed by the new technician and director or sterile compounding. Sections are reviewed verbally with practical demos reviewing equipment and techniques. Each section is signed when complete. Shadowing is then completed over a multiple month period to give practical application of the material. Then compounding may be started under direct supervision. All techniques are reviewed and practiced. initial fingertip, garbing, dynamic surface sampling and a media fill is completed before a person may perform sterile compounding unassisted. Hazardous training also includes review of NIOSH hazardous list, review and knowledge of hazardous drug exposure, review of hazardous drug responses to spills, modified containment strategies, and respirator fit testing. Practical testing like media fills are repeated multiple times per year in congruence with USP chapters. Hazardous review is completed annually.		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:
Assuming high risk sterile products are in reference older USP chapters.

Apomorphine SDV Inj (veterinary only)
Cyclosporine Ophthalmic Drops (veterinary only)
Tacrolimus Ophthalmic Drops (veterinary only)

2. What sterilization methods are utilized at your facility?
Filter sterilization, autoclave sterilization, dry heat sterilization.

3. Does your facility utilize biological indicators? ☑ Yes ☐ No

4. If yes, describe how they are utilized:
Sporview biological indicators are run in our autoclave monthly to confirm cycle validation. Dry heat sterilization is verified annually with biological indicators.

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Drug Take Back Kiosk (Y/N)	N
RPh participating in inspection:	PIC Luke
Other staff (Name/Title) participating in inspection:	As needed- named throughout report

General Requirements

		Rule Reference	Observations
1	Does the pharmacy have access to current USP Chapters? Please list sterile and nonsterile compounding references available for staff use:	OAR 855-041-1035	PIC marked yes- USP Compounding Compendium
2	Does the pharmacy have a compounding accreditation? (Examples: VPP, PCAB, Joint Commission-Medication Compounding Certification) If yes, please specify: Date of the last accreditation: ***Please attach copy of accreditation report to this form.***		PIC marked no
3	What type of compounding is performed? Please check all that apply: Nonsterile: ☐ HRT ☐ veterinary ☐ pain creams ☐ other: Sterile: ☐ IV's ☐ TPN ☐ eye drops ☐ pellets ☐ intrathecal ☐ lyophilization ☐ other:		Nonsterile HRT, vet, pain creams and many others Sterile eye drops Some HD
4	Does the pharmacy provide sample(s) of compounded products to prescriber(s) or	OAR 855-060-0001 OAR 855-045-0210	No, but does have FDA manufacturing license

1573

		Rule Reference	Observations
	compound products to be sold OTC?		
5	Does the pharmacy have policies and procedures for **initial and ongoing** training and testing of all personnel according to the type of compounding performed? Are the current policies and procedures compliant with all applicable USP Chapters and Oregon laws and rules? Note: All personnel who prepare and supervise the preparation of a compound must complete appropriate training and be capable and qualified to perform assigned duties. Where are the records located?	OAR 855-045-0220 OAR 855-045-0270	CO observed initial and ongoing for techs M and S RPH- Sam and Jesse Techs A and T and Jacob
6	Describe supervision of the compounding process in the pharmacy: Note: A technician may only compound under the direction, supervision and control of a pharmacist.	ORS 689.486(6)	Yes, RPh can see through windows. Also have mid-point checks for most compounds
7	Does the pharmacy have standard operating policies and procedures for cleaning, testing and calibration of all equipment and devices?	OAR 855-045-0220 OAR 855-045-0270	PIC indicated yes

1574

		Rule Reference	Observations
8	Does the pharmacy have standard operating policies and procedures for establishing beyond-use dates (BUDs) for compounded products? Where are the records located?	OAR 855-045-0220	PIC indicated yes- USP binder
9	Does the pharmacy handle hazardous drugs (HD's)? Is the pharmacy currently in compliance with USP 800? If so, where are the policies and procedures located? If not, what is the anticipated date of compliance? _____ Note: Handling HDs includes, but is not limited to, the receipt, storage receipt, storage, compounding, dispensing, administration, and disposal of sterile and nonsterile products and preparations.	OAR 855-045-0200 USP 800	Yes, respirators and separate USP 800 room
10	Does the pharmacy extend any BUD's beyond USP standards? If so, please describe the QA process to ensure sterility and/or stability are maintained: How often are samples sent for testing to an independent laboratory?	OAR 855-045-0220	Stability Indicating Assay Weekly

1575

		Rule Reference	Observations
	Note: The products must be tested to account for the facility's unique processes.		
11	Does the pharmacy batch compounded products? Where are the standard operating policies and procedures, including date of last documented review?		Yes, SOP binder
12	Do bulk drug substances have the required certificate of analysis? Are bulk drug substances acquired only from Board registered manufacturers or wholesalers?	e-CFR 503A Guidance Document 503B Guidance Document	yes
13	Is the pharmacy only using active pharmaceutical ingredients (API's) that are approved for use in humans?	e-CFRs	Yes, CO observed 2 shelving units of drugs – Medisca and PCCA
14	Do the master formulation records include all required elements? To include, when appropriate: • The name, strength and dosage form of the preparation; • Physical description of the final preparation; • Ingredient identities and amounts; • Complete instructions for preparing the product, including equipment, supplies, and a description of the compounding steps;	OAR 855-045-0270	CO reviewed acepromazine, budesonide, carprofen

1576

		Rule Reference	Observations
	• Calculations needed to determine and verify quantities of components and doses of ingredients; • Compatibility and stability information, including references; • BUD assignment and storage requirements, including reference source; • Sterilization method utilized, when applicable. Methods include steam, dry heat, radiation and filtration; • Quality control procedures and expected results; and • Appropriate ancillary instructions, such as storage instructions or cautionary statements, including hazardous drug warning labels where appropriate. Be prepared to provide documentation at the time of inspection.		
15	Do completed compounding records include all required elements? • Drug name, strength, and dosage form of the preparation; • Physical description of the final preparation, when dispensed to a patient for self-administration;	OAR 855-045-0270	CO reviewed 3 CR's as being verified by RPh

1577

		Rule Reference	Observations
	• Master formulation record reference for the preparation, when applicable; • Quantity prepared; • Date and time prepared; • Pharmacy unique lot number; • Name, quantity, and manufacturers' lot numbers and expiration dates for all ingredients used to prepare compounded product, to include the name of the base, diluent, or primary excipient; • BUD; • Pharmacist documented verification of order accuracy; • Identity of all personnel involved in each step of the process; • Documentation of the proper weight and measurement of each ingredient; • Pharmacist documented verification of compounded product accuracy including the correct formula, calculations, and the correct measurements and drugs used; • Total quantity compounded; • BUD assignment and storage requirements, including reference source, if differs from		

1578

		Rule Reference	Observations
	master formulation record; • Documentation of any quality control issue and any adverse reaction or preparation problem, including those reported by the patient, caregiver, or other person, to include corrective actions for any failure; • Records of dispensing or transfer of all compounded preparations; and • Any other information required by the pharmacy's policies and procedures		
16	How does the pharmacy retain the identity of all personnel involved in each step of the compounding process?	OAR 855-045-0270	Compounding record
17	How does the pharmacy retain documentation of the proper weight/measurement of each ingredient of a compounded product?	OAR 855-045-0270	Printed scale weights attached to compounding worksheet CO reviewed 3
18	Does the pharmacist document verification of compounded product accuracy, including correct formula, calculations, and use of correct drugs and measurements?	OAR 855-045-0270 ORS 689.486(6)	yes
19	Does the pharmacy have policies and procedures for adverse event reporting and recalls, to include notification to the Board within 10	OAR 855-045-0220 OAR 855-045-0270	SOP handbook

1579

		Rule Reference	Observations
	working days in the event of a patient-level recall of a compounded drug? Where are the policies and procedures and records located?		
20	Does the pharmacy have policies and procedures for continuous quality assurance/quality controls? Where are documentation records located?	OAR 855-045-0200 OAR 855-045-0270	QA binder

1580

Compounded Sterile Products (CSP's)

		Rule Reference	Observations
21	Are CSP's prepared in an ISO 5 certified Primary Engineering Control (PEC)?	OAR 855-045-0200	Microtechnology- October 2022
22	Are all ISO classified areas checked and certified per USP guidelines every 6 months and whenever a PEC is relocated, or the physical structure of the buffer room or anteroom has been altered?	OAR 855-045-0220	yes
23	Is ISO determination taken under dynamic conditions while simulated compounding is occurring?	OAR 855-045-0200	yes
24	Are surfaces and equipment in buffer room and anteroom nonporous, smooth, non-shedding, impermeable, cleanable and resistant to disinfectants?	OAR 855-045-0200	yes

		Rule Reference	Observations
25	Does the pharmacy have policies and procedures that routinely monitor the compounding environment for microbial or fungal growth? Where are the policies and procedures and records located?	OAR 855-045-0220 OAR 855-045-0270	Yes, Policies and procedures. No growth in new compounding rooms yet
26	Does the pharmacy perform surface sampling? How often?	OAR 855-045-0220 OAR 855-045-0270	Yes, every other month
27	How often does the pharmacy test **all** compounding personnel, including verifying pharmacists, in aseptic manipulative skills, gowning and garbing and gloved fingertip sampling?	OAR 855-045-0220 OAR 855-045-0270	Q 6 months CO reviewed for techs J, S and T CO reviewed for RPh J and S
28	Do compounding procedures include requirements for use of gowns, shoe covers, hair covers, sterile gloves and masks?	OAR 855-045-0220 OAR 855-045-0200	CO observed garb, gloves and respirators. No makeup or jewelry
29	Does the pharmacy document environmental monitoring to ensure that the compounding environment is properly maintained, including temperature, humidity and pressure differential?	OAR 855-045-0270	yes
30	In addition to regular labeling requirements, does a CSP label include?	OAR 855-045-0240	CO reviewed tacrolimus

1581

		Rule Reference	Observations
	• The generic or official name of each active ingredient; • The strength or concentration of each active ingredient, to include primary solution for a sterile parenteral preparation; • The dosage form and route of administration; • Rate of infusion, for a sterile parenteral preparation; • The total quantity of the drug product; • A BUD, compliant with current USP standards; and • Handling, storage or drug specific instructions, cautionary information, and warnings as necessary or appropriate for proper use and patient safety.		
31	How does the pharmacy retain documentation of the pharmacist's verification of finished CSP's? Note: There is a 3-year requirement for record retention.	OAR 855-045-0270	Paper worksheet
32	In ISO 7 and 8 areas, are floors and work surface areas cleaned daily and are walls, ceilings and shelving cleaned at least monthly? Where are the records kept?	OAR 855-045-0200	CO reviewed Oct, Sept and Aug 2022

1582

		Rule Reference	Observations
33	Are staff, including nonpharmacy personnel, that perform cleaning and disinfecting in ISO classified areas trained in accordance with USP? Where are these training records kept?	OAR 855-045-0220 OAR 855-045-0270	Training binder
34	What products are used to clean and disinfect? How often? Is the disinfectant a germicidal detergent? What sporicidal is used?	OAR 855-045-0220 OAR 855-045-0270	Sterile 70%, IPA, peridox Daily/weekly and in between compounds All in date

Public Health Emergency (PHE) and COVID

		Rule Reference	Observations
3	Are staff wearing masks or appropriate face coverings per current OHA requirements?	OAR 855-007-0088 OAR 333-019-1011 OAR 333-019-1025	☒Pharmacy staff is wearing masks appropriately ☐Pharmacy staff is **not** wearing masks appropriately Details: Not open to public, staff wear masks when compounding and working the front desk

1585

General Requirements

		Rule Reference	Observations
5	How many hours (weekly average) does the PIC work on site?	OAR 855-041-1010(1)	PIC documented on self-inspection form that they work 40 hours per week
6.	How many pharmacies is the PIC responsible for?	OAR 855-019-0300	PIC documented on self-inspection form they are PIC of 1 location ☐Quarterly report form required and reviewed ☒Quarterly report not required Details:
7	Are the current pharmacy license(s), DEA registration, pharmacist license(s), intern license(s), preceptor license(s) and technician license(s) posted?	ORS 689.615	☒Licenses and registrations information accurate and up to date ☐Licenses and registration information missing Details: Idaho, Alaska and Washington

Minimum Equipment, Procedures and Records

		Rule Reference	Observations
12	Are Drug Outlet Procedures compliant with Oregon laws and rules, and do they reflect the current practice at the outlet?	OAR 855-041-1040	PIC documented on self-inspection form they reviewed with staff on 2/1/22 date ☒Policies and Procedures reviewed annually ☐Policies and Procedures **NOT** reviewed with in past year Details:
13	Is the pharmacy clean (refrigerator, sink, reconstitution	OAR 855-041-1015(2)	☒Pharmacy is clean ☐Pharmacy is **NOT** clean

		Rule Reference	Observations
	equipment, ventilation ducts, etc.)?		Details and Images:
14	Does the pharmacy quarantine outdated, adulterated, misbranded, and suspect product?	OAR 855-041-1025 OAR 855-041-1036(1)(d)	☒None observed ☐Observed outdated, adulterated, misbranded or suspect drug product Details:
16	Is the pharmacy registered with the DEA as an authorized collector for drug take back disposal?	OAR 855-041-1046	☒N/A do not have drug take back disposal ☐Have drug take back disposal and **no** observations made ☐Have drug take back disposal and observations are made (see details) Details:
19	Is the pharmacy providing nonprescription pseudoephedrine and ephedrine to patients over the counter?	OAR 855-080-0026	☒N/A do not sell OTC pseudoephedrine ☐ Sell OTC pseudoephedrine and **no** observations made ☐ Sell OTC pseudoephedrine and observations are made (see details) Details and images:
20	Are prescription labels available in all of the 14 languages required, if requested by the patient or patient's agent? If not, what is the anticipated date of compliance? Note: The prescription must bear a label in **both** English and the language requested.	OAR 855-041-1132 ORS 689.564	☒ **No** observations made ☐ Observations are made (see details) Details and images: No patients have requested this service yet
21	Does the pharmacy have signage that provide patient notification in each of the languages required in OAR 855-041-1132 of the right to free, competent oral interpretation and translation services,	OAR 855- 041-1035 (1)(e)(B)	☒ **No** observations made ☐ Observations are made (see details) Details and images:

1586

		Rule Reference	Observations
	including translated prescription labels?		
22	How is the public notified that prescription readers are available at the pharmacy? How does the pharmacy provide prescription readers for visually impaired patients?	ORS 689.561	☒ **No** observations made ☐ Observations are made (see details) Details and images: PIC still working on P&P for this. No patients have requested this service yet.

Controlled Substances

		Rule Reference	Observations
24	Is the pharmacy identifying and CLEARLY DOCUMENTING AND EXPLAINING ALL VARIANCES on CII reconciliations? Note: The Board considers a reconciliation to be an accurate accounting of the outlet's true inventory, performed at least quarterly. **Note**: Providing the count at the time of the reconciliation is not sufficient to meet this requirement. **Working copies or documentation** showing the audit **and all variance explanations** for all CIIs must be kept and will be requested for review at time of inspection.	OAR 855-019-0300(5)(e)(h)	☒ **No** observations made ☐ Observations are made (see details) Details and images: CO reviewed morphine powder and hydroco/homatropine Reviewed May and August
27	Was the controlled substance (CII-V) inventory performed on one day, within 12 months (367 days) of the last inventory?	OAR 855-080-0070	☒ **No** observations made ☐ Observations are made (see details) Details and images: Annual May, moved in Oct.

		Rule Reference	Observations
29	How does the PIC/pharmacy maintain the security of controlled substances that have been quarantined (outdated, adulterated, misbranded or is a suspect product)?	OAR 855-041-1020	☒ **No** observations made ☐ Observations are made (see details) Details and images:

1588

Security

		Rule Reference	Observations
30	When no pharmacist is physically present in the pharmacy, are computers, records and medications properly secured to prevent entry and access to records by non-pharmacist employees?	OAR 855-041-1020(3) OAR 855-041-2100 OAR 855-041-1015(1)	☒ **No** observations made ☐ Observations are made (see details) Details and images:

Support Personnel

		Rule Reference	Observations
32	Are pharmacists, interns, technicians, and clerks clearly identified as such to the public?	OAR 855-025-0025(3)	☒ **No** observations made ☐ Observations are made (see details) Details and images:
33	Is there documentation of initial and ongoing technician training? Where are the records located? Be prepared to retrieve documentation of training for ALL technicians when requested by a Board Compliance Officer.	OAR 855-025-0025(6)	☒ **No** observations made ☐ Observations are made (see details) Details and images: CO reviewed M and S
34	Do technicians know they cannot communicate with patients in terms of drug class	OAR 855-025-0040(3)(e)	☒ **No** observations made ☐ Observations are made (see details)

	or indication/use (such as when a patient asks for a refill of their "diabetes medication")? Note: Technicians can only communicate in terms of drug name and prescription number. **Pharmacists may not allow technicians to counsel, answer a patient's medication related questions, or allow a technician to relay information on their behalf.**	OAR 855-019-0200(2)(3) OAR 855-019-0230	Details and images: CO talked with Natasha- She stated she gets an RPh for anything clinical such as side effects or how to give with food. But will point out things like refills and expiration date on the bottle when asked.
35	Is each technician under the supervision, direction and control of a pharmacist and does the pharmacist verify work performed by technicians and document this verification?	ORS 689.486(6) OAR 855-025-0025(4)	☒ **No** observations made ☐ Observations are made (see details) Details and images:

Pharmacists

		Rule Reference	Observations
36	Does the pharmacist perform a DUR for all prescriptions (new and refilled) prior to dispensing or preparing for administration? How is a DUR performed? Please provide the following details: At which point in the process does a pharmacist perform a DUR? Does this process vary depending on the type of fill (new vs refill)? How is a DUR documented?	OAR 855-019-0220(3)	☒ **No** observations made ☐ Observations are made (see details) Details and images: Done during rx processing

1589

		Rule Reference	Observations
	Note: A Pharmacist must perform a DUR on each fill (the computer may assist but does not replace RPH)		
38	Does the pharmacist capture and maintain allergies and chronic medical conditions for new and existing patients?	OAR 855-019-0220(1) OAR 855-041-1165	☒ **No** observations made ☐ Observations are made (see details) Details and images: 5/5
39	Does the PIC ensure that policies and procedures are followed to ensure that prescriptions are correctly dispensed?	OAR 855-041-1105	☒ **No** observations made ☐ Observations are made (see details) Details and images: 5/5
41	Does the pharmacist document verification of '**return to stock**' medications **re-labeled** by a technician or intern?	OAR 855-025-0025(4) OAR 855-019-0200	☒ **No** observations made ☐ Observations are made (see details) Details and images:
42	Is a pharmacist verifying the expiration date on the prescription label is not greater than the manufacturer's expiration date?	OAR 855-019-0200(2) OAR 855-041-1130(10)	☐ **No** observations made ☒ Observations are made (see details) Details and images: CO observed 1 magic mouthwash with 35 day BUD. (photos) Rx 513357

1590

		Rule Reference	Observations
			Prepared 10/20/22, BUD 11/24/22  
45	How is a new prescription identified as requiring counseling?	OAR 855-019-0230	☒ **No** observations made ☐ Observations are made (see details) Details and images:
47	Is the pharmacist/intern (not a patient/clerk/technician or point-of-sale keypad) personally documenting whether counseling is provided or declined on prescriptions that require counseling **at the time** of the counseling?	OAR 855-019-0230(1)(c)	☒ **No** observations made ☐ Observations are made (see details) Details and images:

Drug Storage

		Inspection Review	Rule Reference	Observations
48	Does each active cold storage system maintain the temperature of refrigerated products between 2-8°C (35-46°F) and frozen products between -25 to -10°C (-		OAR 855-041-1036 (2)(a)(A)	☐ **No** observations made ☒ Observations are made (see details) Details and images:

1591

		Inspection Review	Rule Reference	Observations
	13 to 14°F) **or as specified by the manufacturer?** Note: An excursion is **any** temperature outside of these specified parameters. **Each excursion requires a detailed written explanation in accordance with the requirements of this rule.**			March- no excursions June16th Lab fridge 1 8.26 degrees June 3 and 4 = 9.1 peak conf fridge Sept- 20th lab 1 fridge excursion 20th 8.57 Sept 12th lab 1 fridge max 8.43 Excursions: 4/25- min 0.8 conf fridge 6/4- max 9.1 conf fridge 7/11-15- lab fridge- max 8.95 7/19-conf fridge max 9.8 8/5-conf fridge max 9.3 8/23 and 24- lab 1 fridge max 9.5 10/4-6- lab 1 fridge max 9.06 10/6- will call freezer max 0.2 C (sheet states temps to be between negative 25C to negative10 C) 0.2 C= 32.36 F
49	Are the thermometers/probes centrally placed, accurate and calibrated? When is the next calibration (to ensure temperature readings are correct) due?		OAR 855-041-1036(2)	☒ **No** observations made ☐ Observations are made (see details) Details and images: CO saw calibration docs in date
51	**Explanation and documentation of ALL drug storage excursions must include at least all the following:** • The event date & time frame; • The name of person(s) involved in response; • How long drug(s)/vaccine(s) were out of range; • Temperature variances;		OAR 855-041-1036(2)(b) (D-E)	☐ **No** observations made ☒ Observations are made (see details) Details and images: June16th Lab fridge 1 8.26 degrees June 3 and 4 = 9.1 peak conf fridge Sept- 20th lab 1 fridge excursion 20th 8.57, Sept 12th lab 1 fridge max 8.43 Excursions: 6/4, 7/11-15, 7/19, 8/5, 8/23-24, 10/4-6.

1592

		Inspection Review	Rule Reference	Observations
	• Pharmacist review of duration and variance; • The decision to quarantine for destruction each drug/vaccine affected or that each drug/vaccine affected is safe for continued use; • Which pharmacist made the final decision; • The information resource used to determine whether drug/vaccine is safe for continued use.			PIC response 10/21/2022 9/12/22- less than 12 hours 0.57 degrees- form completed 6/16/22- less than 12 hours 0.26 degrees C- form completed 6/3/22- less than 12 hours, 1.1 degrees. 1593

Vaccine Drug Storage ☒ N/A

		Rule Reference	Observations
53	Does the pharmacy store vaccines in the temperature stable sections of the refrigerator?	OAR 855-041-1036(3) (a)(A)	☐ **No** observations made ☐ Observations are made (see details) Details and images:
55	Does the pharmacy conduct quarterly **validations** of **EACH** *vaccine* storage unit and their monitoring equipment?	OAR 855-041-1036(3) (a)(D)	☐ **No** observations made ☐ Observations are made (see details) Details and images:

Vaccine Administration ☒ N/A

Prescriptive Authority is per OHA vaccine protocol

Rule Reference	Observations

56	Do all immunizing pharmacists/interns have a current CPR card intended for healthcare providers? Is the CPR training applicable for the age of patient's staff are vaccinating?	OAR 855-019-0270 OAR 855-019-0290(3)	☒ **No** observations made ☐ Observations are made (see details) Details and images:
57	Does the pharmacy have required equipment and supplies for managing adverse events and are reviews done to ensure all supplies are readily retrievable and that no medication will expire before the next review?	OAR 855-019-0270	☒ **No** observations made ☐ Observations are made (see details) Details and images:
58	Does each pharmacist have access to ALERT and utilize it to perform a DUR and forecast potential immunizations?	OAR 855-019-0290	☒ **No** observations made ☐ Observations are made (see details) Details and images
59	Is the pharmacist/intern who administers any vaccine/immunization recording and maintaining the required information?	OAR 855-019-0290	☒ **No** observations made ☐ Observations are made (see details) Details and images

Collaborative Drug Therapy Management (CDTM) ☒ N/A

		Rule Reference	Observations
60	Do pharmacists participate in Collaborative Drug Therapy Management (CDTM) agreements?	OAR 855-019-0260	no
61	Does the written CDTM agreement contain the required details?	OAR 855-019-0260 (2)(a-g) and (3)	☒ **No** observations made ☐ Observations are made (see details) Details and images

Pharmacist Prescriptive Authority: (Public Health & Pharmacy Formulary Advisory Committee) ☒N/A

1594

		Rule Reference	Observations
64	Do pharmacists at this location prescribe and dispense FDA approved drugs and devices included on either the Formulary or Protocol Compendia?	OAR 855-020-0200 OAR 855-020-0300 OAR 855-020-0120	☒ **No** observations made ☐ Observations are made (see details) Details and images

Pharmacist Prescriptive Authority: Contraceptive: ☒N/A

		Rule Reference	Observations
67	Do pharmacists at this location prescribe hormonal contraceptives?	OAR 855-019-0425 OAR 855-019-0430 OAR 855-019-0435	☒ **No** observations made ☐ Observations are made (see details) Details and images

Pharmacist Prescriptive Authority: Naloxone ☒ N/A

		Rule Reference	Observations
69	Do pharmacists at this location prescribe naloxone?	OAR 855-019-0460 OAR 855-041-2340	☒ **No** observations made ☐ Observations are made (see details) Details and images

Pharmacist Prescriptive Authority: Emergency Insulin and Supplies ☒ N/A

		Rule Reference	Observations
70	Have any pharmacists completed a Board approved ACPE accredited training program to prescribe and dispense emergency refills of insulin and associated insulin-related devices and supplies, not including insulin pump devices?	OAR 855-019-0470	☒ **No** observations made ☐ Observations are made (see details) Details and images

Telework ☒N/A

1595

		Rule Reference	Observations
71	Do pharmacy staff (Pharmacists, Interns or COPT) work from a location physically outside of the pharmacy (i.e., their home)?	OAR 855-041-3205	no
73	How does the PIC and Pharmacists ensure the supervision, direction, and control of COPTs? And that No drugs or Devices are permitted at telework sites?	OAR 855-041-3215 OAR 855-041-3220	☒ **No** observations made ☐ Observations are made (see details) Details and images
75	Does the pharmacy maintain a continuously updated list of all licensees engaged in telework and the Telework Sites that includes all of the following: • Address and phone number where telework is performed for each Telework Site? • Functions being performed by licensees engaged in telework? • The Pharmacist providing supervision, direction, and control for each non-pharmacist licensee?	OAR 855-041-3215 OAR 855-041-3250	☒ **No** observations made ☐ Observations are made (see details) Details and images
76	Are all of the supervision requirements met?	OAR 855-041-3220	☒ **No** observations made ☐ Observations are made (see details)
77	Are all of the supervision requirements met by the Pharmacist?	OAR 855-041-3220	
78	How does the pharmacy ensure patient confidentiality?	OAR 855-041-3225 OAR 855-041-3240	☒ **No** observations made ☐ Observations are made (see details) Details and images
79	Is a COPT or Intern able to access the pharmacy and patient information when a pharmacist is not actively supervising?	OAR 855-041-3240	☒ **No** observations made ☐ Observations are made (see details) Details and images
80	Are the technology requirements met?	OAR 855-041-3230	☒ **No** observations made ☐ Observations are made (see details) Details and images
81	If a pharmacist is performing verification via telework, are all of the requirements met?	OAR 855-041-3230(1)	☒ **No** observations made ☐ Observations are made (see details) Details and images

1596

		Rule Reference	Observations
82	Does each Pharmacist determine and document how many licensed individuals they are capable of supervising, directing, and controlling?	OAR 855-041-3235	☒ **No** observations made ☐ Observations are made (see details) Details and images

Long Term Care (LTC) / Community Based Care (CBC) Services ☒ N/A

		Rule Reference	Observations
86	Is the pharmacy ensuring that only a licensed nurse is accessing the emergency drug kit or on-site pharmacy pursuant to OAR 855-041-6310 AND that there is a practitioner's order to authorize the removal of medications?	OAR 855-041-7060(2)(b) OAR 855-041-7060(5)	☐ **No** observations made ☐ Observations are made (see details) Details and images
87	If the pharmacy accepts the return of previously dispensed prescriptions, is the facility in compliance with OAR 855-041-1045?	OAR 855-041-1045	☐ **No** observations made ☐ Observations are made (see details) Details and images
90	Are all partially dispensed CII prescriptions (Note: Valid for up to a maximum of 60 days from the date written) documented with the required information?	21 CFR 1306.13	☐ **No** observations made ☐ Observations are made (see details) Details and images

☒Pharmacy Performs Compounding: please see completed pharmacy Compounding Inspection Report

June 15, 2022

The undersigned, being (i) the managing member, sole member or sole shareholder (as the case may be), (ii) the managers and (iii) all the members of the board of directors (each, a "**Governing Body**" and together, the "**Governing Bodies**") of the above-named entities (as applicable) (each, a "**Company**" and together, the "**Companies**"), hereby waive notice and consent, pursuant to the applicable statutes and the organizational documents of each such Company, to the adoption of, and do hereby adopt, the following resolutions and agree that said resolutions shall have the same effect as if duly adopted at a meeting of the governing body of such Company held for the purpose:

Board Size Increase

WHEREAS, the authorized number of directors constituting the board of directors or board of managers (as applicable) for each of the Companies managed by a board of directors or board of managers (as applicable) (each a "**Board Managed Company**" and collectively the "**Board Managed Companies**") is currently set at four (4); and

WHEREAS, the Governing Bodies (as applicable) of each Board Managed Company (each, a "**Board**" and collectively, the "**Boards**") have determined that it is in the best interests of the Board Managed Companies (as applicable) to increase the authorized number of directors constituting the board of directors or board of managers (as applicable) from four (4) to five (5).

NOW THEREFORE, BE IT RESOLVED, that the Boards (as applicable) hereby approve the increase in the authorized number of directors constituting the board of directors or board of managers (as applicable) from four (4) to five (5) members.

Appointment of Director

RESOLVED, that the Boards desire to appoint Matthew Beer to serve as a director or manager (as applicable) of the Board Managed Companies, until his successor is duly chosen and qualified or until his earlier death, resignation, removal or disqualification.

RESOLVED FURTHER, that Matthew Beer is hereby elected to the Board of each Board Managed Company, to hold such office until the appointment and qualification of his successor or until his earlier death, resignation, removal or disqualification.

Appointment of Authorized Signatories

RESOLVED, that Jessica Comstock is hereby appointed as an authorized signatory of the Companies (except PL Topco, LLC, a Delaware limited liability company, PL Holding, Inc., a Delaware corporation and PL Midco, Inc., a Delaware corporation (each an "**Authorized Signatory Company**" and collectively the "**Authorized Signatory Companies**")) with respect to matters relating to the completion and submission of pharmacy licenses and no other matters, and that Jessica Comstock be, and hereby is, authorized and empowered from time to time to execute such pharmacy license-related documents and other instruments, in the name and on behalf of the Authorized Signatory Companies, as may be necessary or desirable in order to carry out the day-to-day pharmacy license-related operations of the Authorized Signatory Companies.

RESOLVED, that Ashley Mishoe is hereby appointed as an authorized signatory of each Authorized Signatory Company with respect to matters relating to the completion and submission of regulatory filings and other instruments with the United States Food and Drug Administration ("**FDA**") and no other matters, and that Ashley Mishoe be, and hereby is, authorized and empowered from time to time to execute such FDA-related regulatory filings and other instruments, in the name and on behalf of the Authorized Signatory Companies, as may

IN WITNESS WHEREOF, the undersigned have duly executed this written consent as of the date first set forth above.

be necessary or desirable in order to carry out FDA-related regulatory filings and other instruments for the Authorized Signatory Companies.

General

RESOLVED, to authorize, empower and direct the Authorized Officers, as applicable, and each of them acting singly (i) to execute, enseal and deliver in the name of and on behalf of the applicable Company any and all documents, agreements and instruments to effectuate any of the foregoing resolutions, all with such changes therein as any of such Authorized Officers may deem necessary or desirable, and (ii) to take such action (including without limitation the filing of any and all applications and the payment of any and all filing fees and expenses), or to cause the applicable Company or any other person to take such action as may in the judgment of such Authorized Officer so acting be necessary or desirable in connection with, or in furtherance of, any of the foregoing resolutions, and the execution and delivery of any such document, agreement or instrument or the taking of any such action shall be conclusive evidence of such Authorized Officer's authority hereunder to so act.

RESOLVED FURTHER, to ratify, confirm and approve all actions taken by the directors and/or the officers of each Company, as applicable, in connection with any and all of the transactions referred to in or contemplated by any of the foregoing resolutions.

RESOLVED FURTHER, that this consent may be signed in multiple counterparts, including by facsimile or other electronic transmission, each of which shall be deemed to be an original, but all of which taken together shall constitute one and the same instrument.

RESOLVED FURTHER, to direct that this consent be filed with the records of the applicable Governing Body.

[Remainder of Page Intentionally Left Blank]

IN WITNESS WHEREOF, the undersigned have duly executed this written consent as of the date first set forth above.

INSPECTION

	YES	NO	
1	☑	☐	Class B pharmacy means a pharmacy located in Utah that is authorized to provide pharmaceutical care for patients in an institutional setting; and whose primary purpose is to provide a physical environment for patients to obtain health care services; and includes closed-door, hospital, clinic, nuclear, and branch pharmacies; and pharmaceutical administration and sterile product preparation facilities. [UCA 58-17b-102 (11)(a)(i-ii)(b)(i-ii)]
2	☐	☑	The facility shall maintain a current list of licensed employees involved in the practice of pharmacy at the facility. The list shall include individual licensee names, license classifications, license numbers, and license expiration dates. The list shall be readily retrievable. The list may be maintained in paper or electronic form. [UAC R156-17b-614a (5)(a)(i-iv)(b)]
3	☑	☐	Notification has been provided to the Division in regards to the unique email address used in self audits or alerts for the pharmacy. The pharmacy will notify the Division of any change in the email address within seven days of the change. [UAC R156-17b-603(3)(t) (i-ii)]
4	☑	☐	Notification has been provided to the Division in regards to the assignment of the PIC at the above stated pharmacy. The Division is notified of a change in PIC within 30 days of the change. [UAC R156-17b-603 (3) (s)]
5	☐	☐	If the facility has a pharmacy technician training program, the program and curriculum of education and training, meets standards established by Division rule made in collaboration with the Board. [UAC R156-17b-303a (3)] ☑ N/A
6	☑	☐	A pharmacy technician trainee shall practice only under the direct supervision of a pharmacist, and in a ratio not to exceed one pharmacy technician trainee to one pharmacist or two pharmacy technician trainees to one pharmacist, if a licensed pharmacy technician or intern is working during the same shift [UAC R156-17b-601(4)(a)(i-ii)]
7	☑	☐	Pharmacy technicians shall have general supervision by a pharmacist. [UCA 58-17b-102 (57)]
8	☑	☐	The operating standards for a Pharmacist acting as a preceptor includes meeting the following criteria by providing direct, on-site supervision to no more than two pharmacy interns during a working shift. [UAC R156-17b-606(3)(a)]
9	☑	☐	In accordance with Subsecton 58-17b-102(72)(b) all supportive personnel shall be under the supervision of a licensed pharmacist or DMP. The licensed pharmacist or DMP shall be present in the area where the person being supervised is performing services and shall be immediately available to assist the person being supervised in the serivces being performed except for the delivery of pre-filled prescriptions as provided in Subsection (1)(g) above. [UAC R156-17b-607 (3)]
10	☑	☐	In accordance with Subsection 58-17b-102(72)(a), supportive personnel may assist in any tasks not related to drug preparation or processing including: stock ordering and restocking; cashiering; billing; filing; receiving a written prescription and delivering it to the pharmacist, pharmacy intern, pharmacy technician, pharmacy technician trainee, DMP, or DMP desigenee; housekeeping; and delivering a pre-filled prescription to a patient. [UAC R156-17b-607 (1)(a-g)]

11 ☑ ☐ The pharmacist-in-charge (PIC) is responsible for assuring that no pharmacy or pharmacist operates the pharmacy or allows operation of the pharmacy with a ratio of pharmacist to pharmacy personnel which, under the circumstances of the particular practice setting, results in, or reasonably would be expected to result in, an unreasonable risk of harm to public health, safety, and welfare. [UAC R156-17b-603 (3) (r)]

12 ☑ ☐ All individuals employed in a pharmacy facility having any contact with the public or patients receiving services from that pharmacy facility does wear on their person a clearly visible and readable identification showing the individual's name and position. [UCA 58-17b-603 (1)]

13 ☑ ☐ When communicating by any means, written, verbal, or electronic, pharmacy personnel do identify themselves as to licensure classification. [UCA 58-17b-603 (2)]

14 ☑ ☐ The facility or parent company does maintain a record for not less than five years of the initials or identification codes that identify each dispensing pharmacist by name. The initials or identification codes shall be unique to ensure that each pharmacist can be identified; therefore identical initials or identification codes shall not be used. [UAC R156-17b-614a (8)]

15 ☑ ☐ The facility does have current and retrievable editions of the following reference publications in print or electronic format and readily available and retrievable to facility personnel: [UAC R156-17b-614a (4) (a-k)]

- ☑ UCA 58-1 (DOPL Licensing Act)
- ☑ UAC R156-1 (General Rules of DOPL)
- ☑ UCA 58-17b (Pharmacy Practice Act)
- ☑ UAC R156-17b(Pharmacy Practice Act Rules)
- ☑ UCA 58-37 (Controlled Substance Act)
- ☑ UAC R156-37(Controlled Substance Act Rules)
- ☑ UCA 58-37f (Controlled Substance Database Act)
- ☑ UAC R156-37f (Controlled Substance Database Act Rule)
- ☑ Code of Federal Regulations Title 21 parts 1300 to end
- ☑ FDA Approved Drug Product(Orange Book)
- ☑ General Drug References

16 ☑ ☐ The facility is well lighted, ventilated, clean and sanitary. [UAC R156-17b-614a (1) (a)]

17 ☑ ☐ If transferring a drug from a manufacturer's or distributor's original container to another container, the dispensing area, shall have a sink with hot and cold culinary water separate and apart from restroom facilities. All required equipment shall be clean and in good operating condition. [UAC R156-17b-614a (1) (b)(c)]

18 ☑ ☐ The facility is equipped to permit the orderly storage of prescription drugs and durable medical equipment in a manner to permit clear identification, separation and easy retrieval of products and an environment necessary to maintain the integrity of the product inventory. [UAC R156-17b-614a (1)(d)(ii)(ii)]

19 ☑ ☐ The facility is equipped to permit practice within the standards and ethics of the profession as dictated by the usual and ordinary scope of practice to be conducted within that facility. [UAC R156-17b-614a (1) (e)]

20 ☑ ☐ All out of date legend drugs and controlled substances shall be removed from the inventory at regular intervals and in correlation to the beyond use date imprinted on the label. [UAC R156-17b-605 (1)]

21 ☑ ☐ The facility is stocked with the quality and quantity of product necessary for the facility to meet its scope of practice in a manner consistent with the public health, safety and welfare. [UAC R156-17b-614a (1) (f)]

22 ☐ ☐ n/a If dispensing controlled substances, the facility is equipped with a security system to permit detection of entry at all times when the facility is closed, and provide notice of unauthorized entry to an individual, and be equipped with a lock on any entrances to the facility where drugs are stored. [UAC R156-17b-614a (1)(g)(i-ii)(h)(i-ii)]

23 ☑ ☐ If the pharmacy does not store drugs in a locked cabinet and has a drop/false ceiling, the pharmacy's perimeter walls shall extend to the hard deck, or other measures shall be taken to prevent unauthorized entry into the pharmacy. [UAC R156-17b-614a (15)] ☐ N/A

24 ☑ ☐ Only a licensed Utah pharmacist or authorized pharmacy personnel does have access to the pharmacy when the pharmacy is closed. [UAC R156-17b-614a (7)]

25 ☑ ☐ A pharmacy shall not dispense a prescription drug or device to a patient unless a pharmacist is physically present and immediately available in the facility. [UAC R156-17b-614a(6)]

26 ☑ ☐ The temperature of the pharmacy is maintained within a range compatible with the proper storage of the drugs. [UAC R156-17b-614a (3)]

27 ☑ ☐ The temperature of the refrigerator and freezer is maintained within a range compatible with the proper storage of drugs requiring refrigeration or freezing. The pharmacy shall keep a daily written or electronic log of the temperature of the refrigerator or freezer on days of operation. The pharmacy shall retain the log entry for three years. [UAC R156-17b-614a (3)]

28 ☑ ☐ For the purpose of promoting therapeutic appropriateness, a pharmacist shall at the time of dispensing a prescription, or a prescription drug order, review the patient's medication record. Such review shall at a minimum identify clinically significant conditions, situations or items, such as: [UAC R156-17b-611 (2) (a-g)]

- ☑ Inappropriate drug utilization
- ☑ Therapeutic duplications
- ☑ Drug-disease contraindications
- ☑ Drug-drug interactions
- ☑ Incorrect drug dosage
- ☑ Incorrect duration of drug treatment
- ☑ Drug-allergy interactions
- ☑ Clinical abuse or misuse

29 ☑ ☐ Patient counseling shall not be required for inpatients of a hospital or institution where other licensed health care professionals are authorized to administer the patient's drugs. [R156-17b-610 (7)]

30 ☐ ☐ Every pharmacy shall verbally offer to counsel a patient or a patient's agent in a personal face-to-face discussion regarding each prescription drug dispensed. If the patient's agent delivers the prescription in person to the pharmacist or pharmacy intern; or receives the drug in person at the time it is dispensed at the facility. [UCA 58-17b-613 (1)]

n/a

31 ☐ ☐ A pharmacist or pharmacy intern that receives a prescription from a patient by means other than personal delivery, and that dispenses prescription drugs to the patient by means other than personal delivery shall provide patient counseling to a patient regarding each prescription drug the pharmacy dispenses and provide each patient with a toll-free telephone number by which the patient can contact the pharmacist or pharmacy intern at the pharmacy for counseling. [UCA 58-17b-613(2)]

n/a

32 ☐ ☐ If a prescription drug order is delivered to the patient or the patient's agent at the patient's or other designated location, the following is applicable: [UCA R156-17b-610(6)(a-c)

n/a

☐ the pharmacy shall provide the information specified in R156-17b-610(3) be delivered with the dispensed prescription in writing:
(a) the name and description of the prescription drug;
(b) the dosage form, dose, route of administration and duration of drug therapy;
(c) intended use of the drug, when known, and expected action;
(d) special directions and precautions for preparation, administration and use by the patient;
(e) common severe side or adverse effects or interactions and therapeutic contraindications that may be encountered,
including their avoidance, and the action required if they occur;
(f) techniques for self-monitoring drug therapy;
(g) proper storage;
(h) prescription refill information;
(i) action to be taken in the event of a missed dose;
(j) pharmacist comments relevant to the individual's drug therapy, including any other information specific to the patient or
drug; and
(k) the date after which the prescription should not be taken or used, or the beyond use date.

☐ if prescriptions are routinely delivered outside the area covered by the pharmacy's local telephone service, the pharmacist shall place on the prescription container or on a separate sheet delivered with the prescription container, the telephone number of the pharmacy and the statement "Written information about this prescription has been provided for you. Please read this information before you take this medication. If you have questions concerning this prescription, a pharmacist is available during normal business hours to answer these questions."

☐ written information provided in Subsection (b) of this section shall be in the form of patient information leaflets similar to USP-NF patient information monographs or equivalent information

n/a **33** ☐ ☐ Counseling shall be offered orally in person unless the patient or patient's agent is not at the pharmacy or a specific communication barrier prohibits oral communication [UAC R156-17b-610(1)]

n/a **34** ☐ ☐ A pharmacy facility shall orally offer to counsel but shall not be required to counsel a patient or patient's agent when the patient or patient's agent refuses counseling. [UAC R156-17b-610(2)]

n/a **35** ☐ ☐ The offer to counsel is documented and said documentation shall be available to the Division. These records must be maintained for a period of five years and be available for inspection within 7-10 business days. [UAC R156-17b-610 (4)]

36 ☑ ☐ A pharmacy may only deliver a prescription drug to a patient or a patient's agent in person at the pharmacy or via the United States Postal Service, a licensed common carrier, or supportive personnel, if the pharmacy takes reasonable precautions to ensure the prescription drug is delivered to the patient or patient's agent or return to the pharmacy. [UCA 58-17b-602 (9)(a)(b)(i-ii)]

n/a **37** ☐ ☐ A pharmacy that employs the United States Postal Service or other common carrier to deliver a filled prescription directly to a patient shall, under the direction of the PIC, or other responsible employee: [UAC R156-17b-608(1)(a-e)(2)(a-c)]

☐ Use adequate storage or shipping containers and shipping processes to ensure drug stability and potency. The shipping processes shall include the use of appropriate packing material and devices, according to the recommendations of the manufacturer or the United States Pharmacopeia Chapter 1079, in order to ensure that the drug is kept at appropriate storage temperatures throughout the delivery process to maintain the integrity of the medication.

☐ Use shipping containers that are sealed in a manner to detect evidence of opening or tampering.

☐ Develop and implement policies and procedures to ensure accountability, safe delivery, and compliance with temperature requirements. The policies and procedures shall address when drugs do not arrive at their destination in a timely manner or when there is evidence that the integrity of a drug was compromised during shipment. In these instances, the pharmacy shall make provisions for the replacement of the drug.

☐ Provide for an electronic, telephonic, or written communication mechanism for a pharmacy to offer counseling to the patient as defined in section 58-17b-613; and provide documentation of such counseling.

☐ Provide information to the patient indicating what the patient should do if the integrity of the package or drug was compromised during shipment.

38 ☑ ☐ Each drug dispensed from the pharmacy does have a label securely affixed to the container indicating the required minimum information, including: [UCA 58-17b-602 (5) (a) (i-viii)]

- ☑ name, address, & phone number of pharmacy
- ☑ filling date or last dispensing date
- ☑ name of the prescriber
- ☑ trade, generic or chemical name
- *(Unless Otherwise Indicated by Prescriber)*
- ☑ serial number of prescription
- ☑ name of the patient or animal owner/species
- ☑ directions for use & cautionary statements
- ☑ amount dispensed & strength of dosage form
- ☑ beyond use date

39 ☑ ☐ Unless otherwise requested, child-resistant containers will be used for dispensing medications to patients. [UAC 58-1-502(6)& 16 CFR 1700.14]

40 ☑ ☐ Controlled substances are not accepted back for destruction unless allowed for by state and federal law. [UAC R156-37-606 (1-2) & 21 CFR 1307.21]

41 ☑ ☐ The registered pharmacy does only processes electronically signed prescriptions for controlled substances under the following conditions: the pharmacy uses a pharmacy application that meets all the applicable requirements; the prescription is otherwise in conformity with the requirements of the Code of Federal Regulations; and Certification Authority (CA) has been obtained. The electronic prescription must be transmitted from the practitioner to the pharmacy in its electronic form and at no time may the prescription be converted to another form *(i.e. facsimile)* for transmission. [UAC R156-17b-613(1) & CFR, Title 21, Chapter 11, Section 1311]

42 ☑ ☐ Prescription files, including refill information, are maintained for a minimum of five years and should be immediately retrievable in written or electronic format. [UAC R156-17b-612 (4)]

43 ☑ ☐ Prescription records may be maintained electronically so long as the original of each prescription, including telephone prescriptions, is maintained in a physical file and contains all of the information required by federal and state law; and an automated data processing system is used for the storage and immediate retrieval of refill information for prescription orders.
[UAC R156-37-602 (4) (a-b)]

44 ☐ ☐ All records relating to Schedule II controlled substances received, purchased, administered or dispensed by the practitioner shall be maintained separately from all other records of the pharmacy or practice. Records shall be maintained by the licensee for a period of five years.
n/a [UAC R156-37-602(3) (5)]

45 ☐ ☐ All records relating to Schedule III, IV, V controlled substances received, purchased, administered or dispensed by the practitioner shall be maintained separately from all other records of the pharmacy or practice. Records shall be maintained by the licensee for a period of five years.
n/a [UAC R156-37-602(3) (6)]

n/a **46** ☐ ☐ Requirement for annual controlled substances inventory shall be within 12 months following the inventory date of each year and may be taken within four days of the specified inventory date and shall include all stocks including out-of-date drugs and drugs in automated pharmacy systems. [UAC R156-17b-605 (4)]

n/a **47** ☐ ☐ Requirements for taking the initial controlled substances inventory shall include the following: all pharmacies shall take an inventory on the opening day of business. Such inventory shall include all controlled substances including any out-of-date drugs and drugs in automated pharmacy systems. In the event a pharmacy commences business with no controlled substances on hand, the pharmacy shall record this fact as the initial inventory. An inventory reporting no Schedule I and II controlled substances shall be listed separately from an inventory reporting no Schedule III, IV, and V controlled substances. The initial inventory shall serve as the pharmacy's inventory until the next completed inventory as specified in Subsection(4) of this section. [UAC R156-17b-605 (3)(a-c)]

☐ N/A

n/a **48** ☐ ☐ General Requirements for inventory of a pharmacy shall include: [UAC R156-17b-605(2)(a)(b)(c)(f)(g)(h)(k)(l)]

☐ the PIC shall be responsible for taking all required inventories, but may delegate the performance of the inventory to another person or persons;

☐ the inventory records shall be maintained for a period of five years and be readily available for inspection

☐ the inventory shall be filed separately from all records

☐ the inventory may be taken either as the opening of the business or the close of business on the inventory date;

☐ the person taking the inventory and the PIC shall indicate the time the inventory was taken and shall sign and date the inventory with the date the inventory was taken. The signature of the PIC and the date of the inventory shall be documented within 72 hours or three working days of the completed initial, annual, change of ownership and closing inventory.

☐ the inventory of Schedule I and II controlled substances shall be listed separately from the inventory of Schedule III, IV and V controlled substances;

☐ if the pharmacy maintains a perpetual inventory of any of the drugs required to be inventories, the perpetual inventory shall be reconciled on the date of the inventory.

n/a **49** ☐ ☐ All pharmacies shall maintain a perpetual inventory of all Schedule II controlled substances. [UAC R156-17b-605(6)]

n/a **50** ☐ ☐ The pharmacy does reconcile its controlled substance inventory to account for shortages of controlled substances. [UAC R156-17b-603 (3) (k) & R156-37-502(4)]

n/a **51** ☐ ☐ Any facility who experiences any theft, including diversion, or significant loss of controlled substances shall immediately file the appropriate forms with the Drug Enforcement Administration, with a copy to the Division directed to the attention of the Investigation Bureau Division; and report the incident to the local law enforcement agency. [UAC R156-37-602 (2)]

n/a **52** ☐ ☐ Pharmacists or other responsible individuals do verify that the suppliers' invoices of controlled substances, listed on the invoices were actually received by clearly recording their initials and the actual date of receipt of the controlled substances. [UAC R156-17b-614a (11)]

n/a **53** ☐ ☐ The facility does maintain a record of suppliers' credit memos for controlled substances. [UAC R156-17b-614a (12)]

n/a **54** ☐ ☐ The facility does maintain a copy 3 of DEA order form (form 222) which has been properly dated, initialed, and filed and all copies of each unaccepted or defective order form and any attached statements or other documents. [UAC R156-17b-614a (9)(a-c)]

55	☑	☐	The Division shall implement on a statewide basis, including non-resident pharmacies as defined in Section 58-17b-102, the following two options for a pharmacist to submit information: real-time submission of the information required to be submitted under this part of the controlled substance database; and 24-hour daily or next business day, whichever is later, batch submission of the information required to be submitted under this part to the controlled substance database. [UCA 58-37f-203(1)(a)(i,ii)]
56	☑	☐	In accordance with 58-37f-203(6), the pharmacist-in-charge and the pharmacist identified in Subsections 58-37f-203(2) and (3) shall provide the following data fields to the Division: the state that issued identification, type of identification used, identification number used, and first and last name of the individual picking up dispensed drug. [UCA R156-37f-203 (4) (bb-ff)]
57	☐	☑	The pharmacy maintains emergency kits in nursing homes, long-term care facilities, or other entities (such as hospice, EMT's, ambulances)? If the answer is "yes", note name(s) of facilities or entities.
58	☐	☑	The pharmacy maintains automated prescription dispensing devices outside the pharmacy such as Pyxis in a nursing home? If the answer is "yes", note type and location.
59	☐	☑	The pharmacy utilizes an Automated Pharmacy System? If the answer is "yes" to this question, a automation questionnaire must be completed. [UAC R156-17b-620]
60	☐	☑	Does the pharmacy purchase any compound products from other entities for dispensing to patients? [UAC 58-17b-102(18)(b)(i)]
61	☐	☑	The facility is engaged in compounding with hazardous drugs as defined by USP-NF Chapter 800. If you answer "yes" to this question, a compounding questionnaire must be completed.
62	☐	☑	The facility is engaged in simple, medium, or complex compounding activities as defined by USP 35 Chapter 795. If you answer "yes" to this question, a compounding questionnaire must be completed. [(UAC R156-17b-614a (2)]
63	☑	☐	The facility is engaged in low, medium, or high risk *sterile* compounding as defined by USP 35 Chapter 797. If you answer "yes" to this question, a compounding questionnaire must be completed. [UAC R156-17b-614a (2)]

COMMENTS

Assisted by Tyrel Einfeldt.

Pharmacy needs a list of licensed pharmacy employees.

Nuclear pharmacy that will be serving IHC hospitals.

No controlled substances or Controlled Substance license.

Utah Radioactive Materials License # UT1800645. Expires on 07/31/2028.

☑ By checking this box it is indicated that the undersigned Division Investigator has reviewed the above inspection report and comments made with the undersigned "Responsible Party."

INFORMATION

Pharmacy Name: PharmaLogic Salt Lake City, LLC Date: 12/11/23

Pharmacy License Number: 13665759-1704 Expiration Date: 9/30/25

Controlled Substance License Number: n/a Expiration Date:

DEA Registration Number: n/a Expiration Date:

Pharmacist-in-Charge (PIC): Tyrel Rick Einfeldt

Pharmacist-in-Charge License Number: 7053291-1701 Expiration Date: 9/30/25

Compounding Facilities engaged in simple, moderate or complex non-sterile or any level of sterile compounding activities shall be required to maintain proper records and procedure manuals and establish quality control measures to ensure stability, equivalency where applicable and sterility. The following requirements shall be met:(a)Shall follow USP-NF Chapter 795, compounding of non-sterile preparations, and USP-NF Chapter 797 if compounding sterile preparations [UAC R156-17b-614a (3)]

	Yes	No	**GENERAL OPERATIONS AND INFORMATION**
			Which categories of compounding does the facility perform?
1.	☑	☐	The pharmacy does perform compounding identified as **low-risk** [USP-NF Chapter 797- *USP Microbial Contamination Risk Levels- Low-Risk Level CSPs]* ☑ The CSPs are compounded with aseptic manipulations entirely within ISO Class 5 or better air quality using only sterile ingredients, products, components, and devices. ☑ The compounding involves only transfer, measuring, and mixing manipulations using not more than three commercially manufactured packages of sterile products and not more than two entries into any one sterile container or package (e.g., bag, vial) of sterile product or administration container/ device to prepare the CSP. ☑ Manipulations are limited to aseptically opening ampules, penetrating disinfected stoppers on vials with sterile needles and syringes, and transferring sterile liquids in sterile syringes to sterile administration devices, package containers of other sterile products, and containers for storage and dispensing. ☑ For a low-risk level preparation, in the absence of passing a sterility teste (see Sterility Tests <71>) the storage periods cannot exceed the following time periods: before administration, the CSPs are properly stored and are exposed for not more than 48 hours at controlled room temperature (see General Notices and Requirements), and for 45 days in solid frozen state between -25°and -10°.
	☐	☑	The pharmacy does perform compounding identified as **medium-risk**. When CSPs are compounded aseptically under Low-Risk Conditions and one or more of the following conditions exist, such CSPs are at a medium risk of contamination. [USP-NF Chapter 797- *USP Microbial Contamination Risk Levels- Medium-Risk Levels CSPs]* ☐ Multiple individual or small doses of sterile products are combined or pooled to prepare a CSP that will be administered to either multiple patients or to one patient on multiple occasions. ☐ The compounding process includes complex aseptic manipulations other than the single-volume transfer. ☐ The compounding process requires unusually long duration, such as that required to compete dissolution or homogenous mixing. ☐ For a medium-risk preparation, in the absence of passing a sterility test (see Sterility Tests <71>0, the storage periods cannot exceed the following time periods: before administration, the CSPs are properly stored and are exposed for not more than 30 hours at controlled room temperature (see Generals Notices and Requirements), and for 45 days in solid frozen state between 25°and -10°.

☐ ☑ The pharmacy does perform compounding identified as **high-risk** [USP-NF Chapter 797- *USP Microbial Contamination Risk Levels- High-Risk Levels CSPs]*
☐ Non sterile ingredients, including manufactured products not intended for sterile routes of administration (e.g. oral), are incorporated or a non-sterile device is employed before terminal sterilization.
☐ Any of the following are exposed to air quality worse than ISO 5 for more than 1 hour (see *Immediate-Use CSPs*):
☐ Sterile contents of commercially manufactured products,
☐ CSPs that lack effective antimicrobial preservative, and
☐ Sterile surfaces of devices and containers for the preparation, transfer, sterilization, and packaging of CSPs

☐ Compounding personnel are improperly garbed and gloved (see *Personnel Cleansing and Use of Barrier Protective Equipment).*
☐ Nonsterile water-containing preparations are stored for more than 6 hours before being sterilized.
☐ It is assumed, and not verified by examination of labeling and documentation from suppliers or by direct determination, that the chemical purity and content strength of ingredients meet their original or compendia specifications in unopened or in opened packages of bulk ingredients (see *Ingredient Selection under Pharmaceutical Compounding- Non-Sterile Preparations <795>).*
☐ In the absence of passing a sterility test, the storage periods cannot exceed the following time periods: before administration, the CSPs are properly stored and are exposed for not more than 24 hours at controlled room temperature (see *General Notices and Requirements),* for not more than 3 days at a cold temperature (*see General Notices and Requirements),* and for 45 days in a solid frozen state between 25°and -10°.

☑ ☐ **Immediate-use provision in intended only for those situation where there is a need for emergency or immediate patient administration of a CSP.** Such situations may include cardiopulmonary resuscitation, emergency room treatment, preparation of diagnostic agents, or critical therapy where the preparation of the CSP under conditions described for Low-Risk Level CSPs subjects the patient to additional risk due to delays in therapy. Immediate-use CSPs are not intended for storage for anticipated needs or batch compounding. Preparations that are medium-risk level and high-risk level CSPs shall not be prepared as immediate-use CSPs. [USP-NF Chapter 797- *Immediate-use CSPs*]

☑ ☐ **Immediate-use CSPs** are exempt from the requirements described for Low-Risk Label CSPs only when all of the following are met: [USP-NF Chapter 797- *Immediate-use CSPs]*
☐ The compounding process involves simple transfer of not more than three commercially manufactured packages of sterile nonhazardous products or diagnostic radiopharmaceutical products from the manufacturer's' original containers and not more than two entries into any one container or package (e.g., bag, vial) of sterile infusion solution or administration container/device. For example, anti-neoplastics shall not be prepared as immediate-use CSPs because they are hazardous drugs.
☐ Unless required for the preparation, the compounding procedure is a continuous process not to exceed 1 hour.
☐ During preparation, aseptic technique is followed and, if not immediately administered, the finished CSP is under continuous supervision to minimize the potential for contact with nonsterile surfaces, introduction of particulate matter or biological fluids, mixups with other CSPs, and direct contact of outside surfaces.
☐ Administration begins not later than 1 hour following the start of the preparation of the CSP.
☐ Unless immediately and completely administered by the person who prepared it or immediate and complete administration is witnessed by the preparer, the CSP shall bear a label listing patient identification information, the names and amounts of all ingredients, the name or initials of the person who prepared the CSP, and the exact 1-hour BUD and time.
☐ If administration has not begun within 1 hour following the start of preparing the CSP, the CSP shall be promptly, properly, and safely discarded.

2. ☑ ☐ Does the facility dispense sterile compounded preparations pursuant to a prescription?

3. ☑ ☐ Does the facility make sterile compounded preparations that are delivered to a practitioner for administration to a patient in an office, clinic, or facility?

4. ☐ ☑ A pharmacy licensed under this chapter may, subject to rules established by the Division, repackage or compound a prescription drug for sale to a practitioner if: the prescription drug: does not include a compounded drug; or includes a compounded drug; and is not a controlled substance; the pharmacy labels the prescription drug "for office use only"; the practitioner administers the drug to a patient in the practitioner's office or facility; and except in accordance with Title 58, Chapter 17b, Part 8, Dispensing Medical Practitioner and Dispensing Medical

Practitioner Clinic Pharmacy, the practitioner does not dispense the drug to the patient. [UCA 58-17b-624(1)(a)(i)(ii)(A)(B)(b)(c)(d)] Pursuant to Section 58-17b-624, a pharmacy may repackage or compound a prescription drug for sale to a practitioner for office use provided that it is in compliance with all applicable federal and state laws and regulations regarding the practice of pharmacy, including, but not limited to the Food, Drug, and Cosmetic Act, 21 U.S.C A § 301 et seq. [R156-17b-624]

5. ☑ ☐ Does the facility distribute sterile compounded preparations to hospitals, clinics, or surgery centers?

6. ☐ ☑ Does the facility have a sales force that distributes samples containing active ingredients? If so, list samples on separate sheet.

7. ☐ ☑ Does the facility compound sterile preparations for veterinary use?

8. ☐ ☑ Is the facility registered with the FDA as an "Outsourcing Facility"?

9. ☑ ☐ The facility does compound:

☐ allergen extracts	☐ baths and soaks for live organs and tissues
☑ parental solutions	oral or nasal inhalation preparations
☐ parenteral suspensions	irrigations for wounds and body cavities
☐ preservative-free parenterals	ophthalmic preparations

10. ☐ ☑ Does the facility compound investigational drugs? If so, list on separate sheet.

11. ☑ ☐ The facility does not prepare a prescription drug in a dosage form which is regularly and commonly available from a manufacturer in quantities and strengths prescribed by a practitioner. [UAC 58-17b-102(18)(b)(ii)]

12. ☑ ☐ The facility does not prepare a prescription drug for sale to another pharmacist or pharmaceutical facility. [UAC 58-17b-102 (18)(b)(i)]

13. ☑ ☐ The facility does not prepare a prescription drug, sterile product, or device which has been withdrawn from the market for safety reasons. [UAC 58-17b-102 (18)(b)(iii)

14. ☐ ☑ Does the pharmacy makes sterile compounded preparations using bulk powder Active Pharmaceutical Ingredients?

15. ☐ ☑ Bulk active ingredients must be procured from a facility registered with the federal Food and Drug Administration and must not be listed on the federal Food and Drug Administration list of drug products withdrawn or removed from the market for reasons of safety or effectiveness. [UAC R156-17b-614a (3)(c)(i)(ii)]

16. ☐ ☑ Does the facility have a lyophilizer?

17. ☐ ☐ **The compounding facility shall have written, properly approved SOPs** designed to ensure the quality of the environment in which a CSP is prepared. [USP-NF Chapter 797-*Responsibility of Compounding Personnel-Suggested Standard Operating Procedures (SOPs)]*

a. ☑ Procedures for **measuring, mixing, dilution, purification, sterilization, packaging, and labeling** conform to the correct sequence and quality established for the specified CSP. [USP-NF Chapter 797- *Responsibility of Compounding Personnel*]

b. ☑ All **cleaning and disinfecting** practices and policies for the compounding of CSPs shall be included in written SOPs and shall be followed by all compounding personnel. [USP-NF Chapter 797- *Environmental Quality and Control and Disinfecting the Compounding Area*]

- ☑ ISO Class 5 PEC (e.g. LAFW, BSC, CAI, CACI)
- ☑ Counters and easily cleanable work surfaces
- ☑ Floors
- ☑ Walls
- ☑ Ceiling
- ☑ Storage Shelving

c. ☑ It is necessary that **equipment, apparatus, and devices** used to compound a CSP be consistently capable of operating properly and within acceptable tolerance limits. [USP-NF Chapter 797- *Element of Quality Control, Equipment]*

- ☑ Equipment calibration
- ☑ Annual maintenance
- ☑ Monitoring for proper function and controlled procedures for use of the equipment and specified time frames for these activities
- ☑ Routine maintenance and frequencies

d. ☑ The principles of HEPA-filtered unidirectional airflow in the work environment shall be understood and practiced in the compounding process in order to achieve the desired environmental conditions. Policies and procedures for **maintaining and working within the PEC** area shall be written and followed. The policies and procedure will be determined by the scope and risk levels of the aseptic compounding activities utilized during the preparation of the CSPs. [USP-NF Chapter 797- *Environmental Quality and Control, Facility Design and Environmental Control]*

e. ☐ When compounding activities require **the manipulation of a patient's blood-derived or other biological material (e.g., radiolabeling a patient's or donor's white blood cells), the manipulations shall be clearly separated from routine material-handling** procedures and equipment used in CSP preparation activities, and they shall be controlled by specific SOPs in order to avoid any cross contamination. [USP-NF Chapter 797- *Environmental Quality and Control- Additional Personnel Requirements*] n/a

f. ☑ **Double-checking compounding** accuracy shall be followed for every CSP during preparation and immediately prior to release. [USP-NF Chapter 797- *Preparation Release Checks and Tests, Compounding Accuracy Checks*]

g. ☐ When **high-risk level CSPs are dispensed before receiving the results of their sterility tests**, there shall be a written procedure requiring daily observations of the incubating test specimens and immediate recall of the dispensed CSPs when there is any evidence of microbial growth in the test specimens. [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests, Sterility Testing*] n/a

h. ☑ **Verifying the correct identity and quality** of CSPs before they are dispensed and administered: [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests, Identify and Strength Verification of Ingredients*]

- ☑ Labels of CSPs bear correct names and amounts or concentrations of ingredients, the total volume, the BUD, the appropriate route(s) of administration, the storage conditions, and other information for safe use.
- ☑ That there are correct identities, purities, and amounts of ingredients by comparing the original written order with the written compounding record for the CSP.
- ☑ That correct fill volumes in CSPs and correct quantities of filled units of the CSPs were obtained. When the strength of finished CSPs cannot be confirmed to be accurate, based on the above three inspections, the CSPs shall be assayed by methods that are specific for the active ingredients.

i. ☑ To ensure consistent practices in determining and assigning BUDs, the compounding facility should have written policies and procedures governing the **determination of the BUDs** for all compounded products. The SOP manual of the compounding facility and each specific CSP formula record shall describe the general basis used to assign the BUD and storage conditions. [USP-NF Chapter 797- *Storage and Beyond-Use Dating*]

j. ☑ The **compounding procedures and sterilization methods** for CSPs correspond to correctly designed and verified written documentation in the compounding facility. Verification requires planned testing, monitoring, and documentation to demonstrate adherence to environmental quality requirements, personnel practices, and procedures critical to achieving and maintaining sterility, accuracy, and purity of finished CSPs. [USP-NF Chapter 797- *Verification of Compounding Accuracy and Stability*]

k. ☑ Commercially available sterile drug products, sterile ready-to-use containers, and devices are examples of sterile components. A written procedure for **unit-by-unit physical inspection preparatory to use** is followed to ensure that these components are sterile, free from defects, and otherwise suitable for their intended use. [USP-NF Chapter 797- *Elements of Quality Control- Ingredients and Devices- Sterile Ingredients and Devices*]

l. ☑ Compounding personnel shall ensure proper storage and security of CSPs prepared by or dispensed from the compounding facility until either their BUDs are reached or they are administered to patients. In fulfilling this general responsibility, the compounding facility is responsible for the proper **packaging, handling, transport, and storage of CSPs prepared by or dispensed from it, including the appropriate education, training, and supervision of compounding personnel assigned to these functions**. The compounding facility should assist in the education and training of noncompounding personnel responsible for carrying out any aspect of these functions. Establishing, maintaining, and ensuring compliance with comprehensive written policies and procedures encompassing these responsibilities is a further responsibility of the compounding facility. Where noncompounding personnel are assigned tasks involving any of these responsibilities, the policies and procedures encompassing those tasks should be developed by compounding supervisors. [USP-NF Chapter 797- Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs]

m. ☑ Inappropriate processes or techniques involved with packaging, handling, and transport can adversely affect quality and package integrity of CSPs. Although compounding personnel routinely perform many of the tasks associated with these functions, some tasks, such as **transport, handling, and placement into storage, may be fulfilled by noncompounding personnel** who are not under the direct administrative control of the compounding facility. Under these circumstances, appropriate SOPs shall be established by the compounding facility with the involvement of other departments or services whose personnel are responsible for carrying out those CSP-related functions for which the compounding facility has a direct interest. The performance of the noncompounding personnel is monitored for compliance to established policies and procedures. [USP- NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packaging, Handling, and Transport*]

n. ☑ **When CSPs are distributed to locations outside the premises** in which they are compounded, compounding personnel select packing containers and materials that are **expected to maintain physical integrity, sterility, and stability of CSPs during transit.** Packing is selected that simultaneously protects CSPs from damage, leakage, contamination, and degradation, and protects personnel who transport packed CSPs from harm. The SOP manual of the compounding facility specifically describes appropriate packing containers and insulating and stuffing materials, based on information from product specifications, vendors, and experience of compounding personnel. Written instructions that clearly explain how to safely open containers of packed CSPs are provided to patients and other recipients. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs- Packing CSPs for Transit*]

o. ☑ SOPs must exist to ensure that **storage conditions in the patient-care setting** are suitable for the CSP-specific storage requirements. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs, Use and Storage*]

- ☑ Procedures include daily monitoring and documentation of drug storage refrigerators to ensure temperatures between 2° and 8°
- ☑ and the monthly inspection of all drug storage locations by compounding personnel.

p. ☑ The SOP manuals of compounding facilities shall describe **specific instructions for receiving, acknowledging, and dating receipts, and for recording, or filing, and evaluating reports of adverse events and of the quality of preparation** claimed to be associated with CSPs. Reports of adverse events with CSPs shall be reviewed promptly and thoroughly by compounding supervisors to correct and prevent future occurrences. Compounding personnel are encouraged to participate in adverse event reporting and product defects programs of the FDA and USP. [USP-NF Chapter 797- *Patient Monitoring and Adverse Events Reporting*]

Personnel Training and Requirements

18. ☑ ☐ A written description of specific training and performance evaluation program for individuals involved in the use of aseptic techniques for the preparation of sterile products shall be developed for each site. This program equips personnel with the appropriate knowledge and trains them in the required skills necessary to perform the assigned tasks. **Each person assigned to the aseptic area in the preparation of sterile products shall successfully complete specialized training in aseptic techniques and aseptic area practices prior to preparing CSPs** (see Personnel Training and Evaluation in Aseptic Manipulation Skills and Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices and Cleaning/Disinfection Procedures). [USP-NF Chapter 797 - *Elements of Quality Control*]

19. ☑ ☐ **Personnel who prepare CSPs shall be trained** conscientiously and skillfully **by expert personnel, multi-media instructional sources, and professional publications** in the theoretical principles and practical skills of **garbing procedures, aseptic work practices, achieving and maintaining ISO Class 5 environmental conditions, and cleaning and disinfection procedures.** [USP-NF Chapter 797- *Appendix I-Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices and Cleaning/Disinfection Procedures*]

20. ☑ ☐ Compounding personnel shall complete: [USP-NF Chapter 797- *Appendices- Appendix I-Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices and Cleaning/Disinfection Procedures*]

- ☑ didactic training,
- ☑ undergo skill assessment using observational audit tools,
- ☑ pass written competence assessments,
- ☑ and media-fill testing.

21. ☑ ☐ **Compounding personnel shall be visually observed during the process of performing hand hygiene and garbing procedures** (see *Personnel Cleansing* and *Garbing* under *Personnel Training and Evaluation in Aseptic Manipulation Skills* above). **The visual observation shall be documented** on a form such as the Sample Form for Assessing Hand Hygiene and Garbing Related Practices of Compounding Personnel (see Appendix III) and maintained to provide a permanent record and long-term assessment of personnel competency. [USP-NF Chapter

797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

22. ☑ ☐ **Sampling of compounding personnel glove fingertips shall be performed for all CSP risk level compounding** because direct touch contamination is the most likely source of introducing microorganisms into CSPs prepared by humans. Glove fingertip sampling **shall be used to evaluate the competency of personnel in performing hand hygiene and garbing procedures in addition to educating compounding personnel on proper work practices, which include frequent and repeated glove disinfection using sterile 70% IPA during actual compounding of CSPs.** All personnel shall demonstrate competency in proper hand hygiene and garbing procedures and in aseptic work practices (e.g., disinfection of component surfaces, routine disinfection of gloved hands). [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

23. ☑ ☐ **Sterile contact agar plates shall be used to sample the gloved fingertips** of compounding personnel **after garbing** in order to assess garbing competency and **after completing the media-fill preparation** (without applying sterile 70% IPA) in order to assess the adequacy of aseptic work practices prior to being initially allowed to prepare CSPs for human use and for more experienced personnel to maintain their qualifications to prepare CSPs for human use. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

24. ☑ ☐ **All compounding personnel shall successfully complete an initial competency evaluation and gloved fingertip/thumb sampling procedure (zero cfu) no less than three times before initially being allowed to compound CSPs for human use.** Immediately after the compounding employee completes the hand hygiene and garbing procedure (e.g., donning of sterile gloves prior to any disinfection with sterile 70% IPA), the evaluator will collect a gloved fingertip and thumb sample from both hands of the compounding employee onto appropriate agar plates by lightly pressing each fingertip into the agar. The plates will be incubated for the appropriate incubation period and at the appropriate temperature (see Incubation Period). **After completing the initial gowning and gloving competency evaluation, re-evaluation of all compounding personnel for this competency shall occur at least annually for personnel who compound low- and medium-risk level CSPs and semi-annually for personnel who compound high-risk level CSPs** using one or more sample collections during any media-fill test procedure before they are allowed to continue compounding CSPs for human use. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

25. ☑ ☐ **After successful completion of an initial Hand Hygiene and Garbing Competency Evaluation, all compounding personnel shall have their aseptic technique and related practice competency evaluated initially during the Media-Fill Test Procedure and subsequent annual or semi-annual Media-Fill Test Procedures.** Records of these evaluations will be maintained using a form such as the Sample Form for Assessing Aseptic Technique and Related Practices of Compounding Personnel (see Appendix IV) and maintained to provide a permanent record of and long-term assessment of personnel competency. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Competency Evaluation of Garbing and Aseptic Work Practice*]

26. ☑ ☐ **Compounding personnel shall perform didactic review and pass written and media-fill testing of aseptic manipulative skills initially, at least annually thereafter for low- and medium-risk level compounding, and semiannually for high-risk level compounding.** Compounding personnel who fail written tests or whose media-fill test vials result in gross microbial colonization shall be immediately re-instructed and re-evaluated by expert compounding personnel to ensure correction of all aseptic practice deficiencies. [USP-NF Chapter 797- *Personnel Training and Evaluation in Aseptic Manipulation Skills*]

27. ☑ ☐ **Compounding personnel and other personnel responsible for cleaning shall he visually observed during** the process of performing **cleaning and disinfecting procedures**, during **initial personnel training** on cleaning procedures, during **changes in cleaning staff**, and at the **completion of any media-fill test procedure** (see Cleaning and Disinfecting of Compounding Areas). [USP-NF Chapter 797- Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/ Disinfection-Procedures, Surface Cleaning and Disinfection Sampling and Assessment]

28. ☑ ☐ **In the event that cleaning and disinfecting procedures are also performed by other support personnel** (e.g., institutional environmental services, housekeeping), thorough training of proper hand hygiene, garbing, and cleaning and disinfection procedures shall be done by a qualified aseptic compounding expert. After completion of training, support **personnel shall routinely undergo performance evaluation of proper hand hygiene, garbing, and all applicable cleaning and disinfecting procedures conducted by a qualified aseptic compounding expert.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures*]

29. ☐ ☐ **Compounding personnel of reproductive capability shall confirm in writing that they understand the risks of handling hazardous drugs.** The **training shall include** at least the following: [USP- NF Chapter 797- *Hazardous Drugs as CSPs*]

n/a
- ☐ safe aseptic manipulation practices;
- ☐ negative pressure techniques when utilizing a BSC or CACI;
- ☐ correct use of CSTD devices;
- ☐ containment, cleanup, and disposal procedures for breakages and spills; and
- ☐ treatment of personnel contact and inhalation exposure.

Handwashing and Garbing

30. ☑ ☐ **When individuals are experiencing rashes, sunburn, weeping sores, conjunctivitis, active respiratory infection, as well as when they wear cosmetics, they shed these particles at even higher rates.** Particles shed from compounding personnel pose an increased risk of microbial contamination of critical sites of CSPs. **Therefore, compounding personnel with such conditions as mentioned above shall be excluded from working in ISO Class 5 (see Table 1) and ISO Class 7 (see Table 1) compounding areas until their conditions are remedied.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

31. ☑ ☐ **Before entering the buffer area or segregated compounding area** (see Low-Risk Level CSPs with 12-Hour or Less BUD), **compounding personnel shall remove personal outer garments** (e.g., bandannas, coats, hats, jackets, scarves, sweaters, vests); **all cosmetics, because they shed flakes and particles; and all hand, wrist, and other visible jewelry or piercings** (e.g., earrings, lip or eyebrow piercings) that can interfere with the effectiveness of PPE (e.g., fit of gloves and cuffs of sleeves). **The wearing of artificial nails or extenders is prohibited** while working in the sterile compounding environment. **Natural nails shall be kept neat and trimmed.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

32. ☑ ☐ **Personnel shall don the following PPE in an order that proceeds from those activities considered the dirtiest to those considered the cleanest.** Garbing activities considered the dirtiest include donning of ☑ dedicated shoes or shoe covers, ☑ head and facial hair covers (e.g., beard covers in addition to face masks), and ☑ face masks/eye shields. Eye shields are optional unless working with irritants such as germicidal disinfecting agents or when preparing hazardous drugs. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

33. ☑ ☐ **After donning dedicated shoes or shoe covers, head and facial hair covers, and face masks, a hand cleansing procedure shall be performed by removing debris from underneath fingernails using a nail cleaner under running warm water followed by vigorous hand washing. Hands and forearms shall be washed to the elbows for at least 30 seconds with soap (either nonantimicrobial or antimicrobial) and water while in the ante-area.** The use of antimicrobial scrub brushes is not recommended because they can cause skin irritation and skin damage. Hands and forearms to the elbows will be completely dried using either lintfree disposable towels or an electronic hand dryer. ☑ **After completion of hand washing, a nonshedding gown with sleeves that fit snugly around the wrists and enclosed at the neck is donned.** Gowns designated for buffer area use shall be worn, and **preferably they should be disposable. If reusable gowns are worn, they should be laundered appropriately for buffer area use.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

34. ☐ ☐ **Once inside the buffer area or segregated compounding area** (see Low-Risk Level CSPs with 12-Hour or Less BUD), and **prior to donning sterile powder-free gloves, antiseptic hand cleansing shall be performed using a waterless alcohol-based surgical hand scrub with persistent activity following manufacturers' recommendations. Hands are allowed to dry thoroughly before donning sterile gloves. [USP-NF Chapter 797- Environmental Quality and Control - Personnel Cleansing and Garbing]**

35. ☑ ☐ **Sterile gloves shall be the last item donned before compounding begins.** Gloves become contaminated when they contact nonsterile surfaces during compounding activities. Disinfection of contaminated gloved hands may be accomplished by wiping or rubbing sterile 70% IPA to all contact surface areas of the gloves and letting the gloved hands dry thoroughly. Only use gloves that have been tested for compatibility with alcohol disinfection by the manufacturer. **Routine application of sterile 70% IPA shall occur throughout the compounding process** and whenever nonsterile surfaces (e.g. vials, counter tops, chairs, carts) are touched. **Gloves on hands shall also be routinely inspected for holes, punctures, or tears and replaced immediately if such are detected.** Antiseptic hand cleansing shall be performed as indicated above. Compounding personnel. [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

36. ☑ ☐ **When compounding personnel exit the compounding area** during a work shift, the exterior gown may be removed and retained in the compounding area if not visibly soiled, to be re-donned during that same work shift only. However, **shoe covers, hair and facial hair covers, face masks/eye shields, and gloves shall be replaced with new ones before re-entering the compounding area, and proper hand hygiene shall be performed.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

37. ☐ ☐ n/a **During high-risk compounding activities that precede terminal sterilization, such as weighing and mixing of nonsterile ingredients, compounding personnel shall be garbed and gloved the same as when performing compounding in an ISO Class 5** (see Table 1) environment. Properly garbed and gloved **compounding personnel who are exposed to air quality that is either known or suspected to be worse than ISO Class 7 (see Table 1) shall re-garb PPE along with washing their hands properly, performing antiseptic hand cleansing with a waterless alcohol-based surgical hand scrub, and donning sterile gloves upon reentering the ISO Class 7 (see Table 1) buffer area. When CAIs and CACIs are the source of the ISO Class 5 (see Table 1) environment, the garbing and gloving requirements for compounding personnel should be as described above, unless the isolator manufacturer can provide written documentation based on validated environmental testing that any component(s) of PPE or personnel cleansing are not required.** [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Cleansing and Garbing*]

38. ☑ ☐ **Cleaning and disinfecting shall occur before compounding is performed.** Items shall be removed from all areas to be cleaned, and surfaces shall be cleaned by removing loose material and residue from spills; for example, water soluble solid residues are removed with sterile water (for injection or irrigation) and lowshedding wipes. This shall be followed by wiping with a residue-free disinfecting agent such as sterile 70% IPA, which is allowed to dry before compounding begins. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

39. ☑ ☐ **Cleaning Requirements**

Cleaning and disinfecting surfaces in the **LAFWs, BSCs, CAIs, and CACIs** are the most critical practices before the preparation of CSPs. Consequently, such **surfaces shall be cleaned and disinfected frequently, including at the beginning of each work shift, before each batch preparation is started, every 30 minutes during continuous compounding periods of individual CSPs, when there are spills, and when surface contamination is known or suspected from procedural breaches.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

40. ☑ ☐ **Work surfaces in the ISO Class 7 (see Table 1) buffer areas and ISO Class 8 (see Table 1) ante-areas as well as segregated compounding areas shall be cleaned and disinfected at least daily**, and dust and debris shall be removed when necessary from storage sites for compounding ingredients and supplies using a method that does not degrade the ISO Class 7 or 8 (see Table 1) air quality (see Disinfectants and Antiseptics <1072>). [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

41. ☑ ☐ **Floors in the buffer or clean area, ante-area, and segregated compounding area are cleaned by mopping with a cleaning and disinfecting agent once daily at a time when no aseptic operations are in progress.** Mopping shall be performed by trained personnel using approved agents and procedures described in the

written SOPs. It is incumbent on compounding personnel to ensure that such cleaning is performed properly. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

42. ☑ ☐ In the buffer or clean area, ante-area, and segregated compounding area, walls, ceilings, and shelving shall be cleaned and disinfected monthly. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

43. ☑ ☐ **Cleaning and disinfecting agents** are to be used with careful consideration of compatibilities, effectiveness, and inappropriate or toxic residues (see Appendix II). Their **schedules of use and methods of application shall be in accordance with written SOPs and followed by custodial or compounding personnel.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

44. ☑ ☐ All **cleaning materials, such as wipers, sponges, and mops, shall be nonshedding**, preferably composed of synthetic micro fibers, and **dedicated to use in the buffer or clean area, ante-area, and segregated compounding areas and shall not be removed from these areas except for disposal.** Floor mops may be used in both the buffer or clean area and ante-area, but only in that order. Ideally, all cleaning tools are discarded after one use by collection in suitable plastic bags and removed with minimal agitation. If cleaning materials (e.g., mops) are reused, procedures shall be developed (based on manufacturers' recommendations) that ensure that the effectiveness of the cleaning device is maintained and that repeated use does not add to the bioburden of the area being cleaned. [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

45. ☑ ☐ **Supplies and equipment removed from shipping cartons shall be wiped with a suitable disinfecting agent** (e.g., sterile 70% IPA) delivered from a spray bottle or other suitable delivery method. After the disinfectant is sprayed or wiped on a surface to be disinfected, the disinfectant **shall be allowed to dry, during which time the item shall not be used for compounding purposes.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

Facilities and Environmental Monitoring

46. ☑ ☐ Surface sampling is an important component of the maintenance of a suitable microbially controlled environment for compounding CSPs, especially since transfer of microbial contamination from improperly disinfected work surfaces via inadvertent touch contact by compounding personnel can be a potential source of contamination into CSPs. It is useful for evaluating facility and work surface cleaning and disinfecting procedures and employee competency in work practices such as disinfection of component/vial surface cleaning. **Surface sampling shall be performed in all ISO classified areas on a periodic basis.** Sampling can be accomplished using contact plates or swabs, and it **shall be done at the conclusion of compounding. Locations to be sampled shall be defined in a sample plan or on a form.** The size of the plate to be used for each sampled location usually ranges from 24 to 30 cm2. Contact plates are filled with general solid agar growth medium and neutralizing agents above the rim of the plate, and they are used for sampling regular or flat surfaces. Swabs may be used for sampling irregular surfaces, especially for equipment (see Microbiological Control and Monitoring of Aseptic Processing Environments <1116>). [USP-NF Chapter 797- *Environmental Quality and Control - Personnel Training and Competency Evaluation of Garbing, Aseptic Work Practices, and Cleaning/Disinfection Procedures- Surface Cleaning and Disinfection Sampling and Assessment*]

47. ☑ ☐ The value of viable microbial monitoring of gloved fingertips and surfaces of components and the compounding environment are realized when the data are used to identify and correct an unacceptable work practice. **Sampling data shall be collected and reviewed on a routine basis as a means of evaluating the overall control of the compounding environment. If an activity consistently shows elevated levels of microbial growth, competent microbiology personnel shall be consulted.** [USP-NF Chapter 797- *Environmental Quality and Control - Action Levels, Documentation, and Data Evaluation*]

48. ☑ ☐ Food, drinks, and materials exposed in patient care and treatment areas shall not enter ante-areas, buffer areas, or segregated compounding areas where components and ingredients of CSPs are present. [USP-NF Chapter 797- Environmental Quality and Control- Additional Personnel Requirements]

49. ☑ ☐ **Compounding facilities shall have an adequate space that is specifically designated for compounding of prescriptions. This space shall provide for the orderly placement of equipment and materials to prevent mixups** among ingredients, containers, labels, in-process materials, and finished preparations and is designed, arranged, and used to prevent adventitious cross-contamination. Areas used for sterile preparations shall be separated and distinct from the nonsterile compounding area (see Pharmaceutical Compounding—Sterile Preparations <797>, Environmental Quality and Control). [USP-NF Chapter 795- Compounding Facilities]

50. ☑ ☐ The surfaces of ceilings, walls, floors, fixtures, shelving, counters, and cabinets in the buffer area shall be smooth, impervious, free from cracks and crevices, and nonshedding, thereby promoting cleanability, and minimizing spaces in which microorganisms and other contaminants may accumulate. The surfaces shall be resistant to damage by disinfectant agents. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls]*

51. ☑ ☐ Junctures of ceilings to walls shall be coved or caulked to avoid cracks and crevices where dirt can accumulate. If ceilings consist of inlaid panels, the panels shall be impregnated with a polymer to render them impervious and hydrophobic, and they shall be caulked around each perimeter to seal them to the support frame. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

52. ☑ ☐ Any other penetrations through the ceiling or walls shall be sealed. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

53. ☑ ☐ The buffer area shall not contain sources of water (sinks) or floor drains. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

54. ☑ ☐ Work surfaces shall be constructed of smooth, impervious materials, such as stainless steel or molded plastic, so that they are easily cleaned and disinfected. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

55. ☑ ☐ Storage shelving, counters, and cabinets shall be smooth, impervious, free from cracks and crevices, nonshedding, cleanable, and disinfectable; their number, design, and manner of installation shall promote effective cleaning and disinfection. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

56. ☑ ☐ There shall be some demarcation designation that separates the ante-area from the buffer area. [USP-NF Chapter 797-Environmental Quality and Control- Additional Personnel Requirements]

57. ☑ ☐ **To ensure that product potency is retained through the manufacturer's labeled expiration date, compounding personnel shall monitor the drug storage areas within the compounding facility.** Controlled temperature areas in compounding facilities include controlled room temperature, 20° to 25° with mean kinetic temperature 25°; controlled cold temperature, 2° to 8° with mean kinetic temperature 8°; cold temperature, 2° to 8°; freezing temperature, –25° and –10° (see General Notices and Requirements) if needed to achieve freezing, and the media-specific temperature range for microbial culture media. **A controlled temperature area shall be monitored at least once daily and the results documented on a temperature log. Additionally, compounding personnel shall note the storage temperature when placing the product into or removing the product from the storage unit in order to monitor any temperature aberrations.** Suitable temperature recording devices may include a calibrated continuous recording device or a National Institute of Standards and Technology (NIST) calibrated thermometer that has adequate accuracy and sensitivity for the intended purpose, and it shall be properly calibrated at suitable intervals. **If the compounding facility uses a continuous temperature recording device, compounding personnel shall verify at least once daily that the recording device itself is functioning properly.** [USP-NF Chapter 797- *Storage and Beyond Use Dating- Monitoring Controlled Storage Areas*]

58. ☑ ☐ **Certification that each ISO classified area, for example, ISO Class 5, 7, and 8 (see Table 1), is within established guidelines shall be performed no less than every 6 months and whenever the LAFW, BSC, CAI, or CACI is relocated or the physical structure of the buffer area or ante-area has been altered.** Testing shall be performed by qualified operators using current, state-of-the-art electronic equipment with results of the following: [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Total Particle Counts*]

- ☑ ISO Class 5: not more than 3520 particles 0.5 mm and larger size per cubic meter of air for any LAFW, BSC, CAI, and CACI;
- ☑ ISO Class 7: not more than 352,000 particles of 0.5 mm size and larger per cubic meter of air for any buffer area;
- ☑ ISO Class 8: not more than 3,520,000 particles or 0.5 mm size and larger per cubic meter of air for any ante-area.

59. ☑ ☐ **All certification records shall be maintained and reviewed by supervising personnel or other designated employees** to ensure that the controlled environments comply with the proper air cleanliness, room pressures, and ACPHs. [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Total Particle Counts*]

60. ☑ ☐ A **pressure gauge or velocity meter shall be installed to monitor the pressure** differential or airflow between the buffer area and the ante-area and between the ante-area and the general environment outside the compounding area. [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Pressure Differential Monitaring*]

61. ☑ ☐ **The results shall be reviewed and documented on a log at least every work shift** (minimum frequency shall be at least daily) or by a continuous recording device. [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Pressure Differential Monitoring*]

62. ☑ ☐ **The pressure between the ISO Class 7 (see Table 1) and the general pharmacy area shall not be less than 5 Pa (0.02 inch water column). In facilities where low- and medium-risk level CSPs are prepared, differential airflow shall maintain a minimum velocity of 0.2 meters per second (40 feet per minute) between buffer area and ante-area.** [USP-NF Chapter 797- *Environmental Quality and Control- Viable and Nonviable Environmental Sampling (ES) Testing- Pressure Differential Monitoring*]

63. ☑ ☐ **The buffer area shall maintain at least ISO Class 7 (see Table 1) conditions for 0.5-mm and larger particles under dynamic operating conditions.** The room shall be segregated from surrounding, unclassified spaces to reduce the risk of contaminants being blown, dragged, or otherwise introduced into the filtered unidirectional airflow environment, and this segregation shall be continuously monitored. [USP-NF Chapter 797 - *Environmental Quality and Control- Facility Design and Environmental Controls*]

64. ☑ ☐ For rooms providing a physical separation through the use of walls, doors, and pass-throughs, a minimum differential positive pressure of 0.02- to 0.05- inch water column is required. [USP-NF Chapter 797 - *Environmental Quality and Control- Facility Design and Environmental Controls*]

65. ☑ ☐ For buffer areas not physically separated from the ante-areas, the principle of displacement airflow shall be employed. This concept utilizes a low pressure differential, high airflow principle. Using displacement airflow typically requires an air velocity of 40 ft per minute or more from the buffer area across the line of demarcation into the ante-area. [USP-NF Chapter 797 - *Environmental Quality and Control- Facility Design and Environmental Controls*]

66. ☑ ☐ **An ISO Class 7 (see Table 1) buffer area and ante-area supplied with HEPA-filtered air shall receive an ACPH of not less than 30.** The PEC is a good augmentation to generating air changes in the air supply of an area but cannot be the sole source of HEPA-filtered air. If the area has an ISO Class 5 (see Table 1) recirculating device, a minimum of 15 ACPHs through the area supply HEPA filters is adequate, providing the combined ACPH is not less than 30. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

67. ☑ ☐ **HEPA-filtered supply air shall be introduced at the ceiling, and returns should be mounted low on the wall,** creating a general top-down dilution of area air with HEPA-filtered make-up air. Ceiling-mounted returns are not recommended. [USP-NF Chapter 797- *Environmental Quality and Control- Facility Design and Environmental Controls*]

68. ☑ ☐ **Activities and tasks carried out within the buffer area shall be limited to only those necessary when working within a controlled environment.** Only the **furniture, equipment, supplies, and other material required for the compounding activities to be performed shall be brought into the area, and they shall be nonpermeable, nonshedding, cleanable, and resistant to disinfectants.** Whenever such items are **brought into the area, they shall first be cleaned and disinfected.** Whenever possible, **equipment and other items used in the buffer area shall not be taken out of the area except for calibration, servicing, or other activities associated with the proper maintenance of the item.** [USP-NF Chapter 797- Environmental Quality and Control- Facility Design and Environmental Controls]

69. ☑ ☐ Secondary engineering controls such as buffer areas and ante-areas generally serve as a core for the location of the PEC. **Buffer areas are designed to maintain at least ISO Class 7 (see Table 1) conditions for 0.5-mm particles under dynamic conditions and ISO Class 8 (see Table 1) conditions for 0.5-mm and larger particles under dynamic conditions for the ante-areas.** [USP-NF Chapter 797 *Environmental Quality and Control, Facility Design and Environmental Controls*]

70. ☑ ☐ **PECs (LAFWs, BSCs, CAIs, and CACIs) and secondary engineering controls (buffer and ante-areas)** are essential components of the overall contamination control strategy for aseptic compounding. As such, it is imperative that they perform as designed and that the resulting levels of contamination be within acceptable limits. **Certification procedures such as those outlined in Certification Guide for Sterile Compounding Facilities (CAG-003-2006) shall be performed by a qualified individual no less than every 6 months and whenever the device or room is relocated or altered or major service to the facility is performed.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Nonviable Particle Testing Program*]

71. ☑ ☐ PECs typically include, but are not limited to, LAFWs, BSCs, CAIs, and CACIs, which provide an ISO Class 5 (see Table 1) environment for the exposure of critical sites. **PECs shall maintain ISO Class 5 (see Table 1) or better conditions for 0.5-mm particles (dynamic operating conditions) while compounding CSPs.** [USP-NF Chapter 797 -*Environmental Quality and Control, Facility Design and Environmental Controls*]

72. ☑ ☐ **The PEC shall be placed within a buffer area in such a manner as to avoid conditions that could adversely affect their operation.** For example, strong air currents from opened doors, personnel traffic, or air streams from the HVAC systems can disrupt the unidirectional airflow in open-faced workbenches. [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]

73. ☑ ☐ **PECs (LAFWs, BSCs, CAIs, and CACIs) shall be located within a restricted access ISO Class 7 (see Table 1) buffer area (see Figure 1),** with the following CAI/CACI exceptions below: [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]
☑ Only authorized personnel and materials required for compounding and cleaning shall be permitted in the buffer area.
☑ Presterilization procedures for high-risk level CSPs, such as weighing and mixing, shall be completed in no worse than an ISO Class 8 (see Table 1) environment.
☑ PECs shall be located out of traffic patterns and away from room air currents that could disrupt the intended airflow patterns.

74. ☐ ☐ **CAIs and CACIs shall be placed in an ISO Class 7 (see Table 1) buffer area unless they meet all of the following conditions:** [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]
n/a
☐ The isolator shall provide isolation from the room and maintain ISO Class 5 (see Table 1) during dynamic operating conditions, including transferring ingredients, components, and devices into and out of the isolator and during preparation of CSPs.
☐ Particle counts sampled approximately 6 to 12 inches upstream of the critical exposure site shall maintain ISO Class 5 (see Table 1) levels during compounding operations.
☐ Not more than 3520 particles (0.5 mm and larger) per m3 shall be counted during material transfer, with the particle counter probe located as near to the transfer door as possible without obstructing the transfer.

75. ☐ ☐ **If the PEC is a CAI or CACI that does not meet the requirements above or is a LAFW or BSC that cannot be located within an ISO Class 7 (see Table 1) buffer area,** then only low-risk level nonhazardous and radiopharmaceutical CSPs pursuant to a physician order for a specific patient may be prepared, and administration of the CSP shall commence within 12 hours of preparation or as recommended in the manufacturer's package insert, whichever is less. [USP-NF Chapter 797 - *Environmental Quality and Control, Facility Design and Environmental Controls*]
n/a

76. ☐ ☐ When isolators are used for sterile compounding, the recovery time to achieve ISO Class 5 (see Table 1) air quality shall be documented and internal procedures developed to ensure that adequate recovery time is allowed after material transfer before and during compounding operations. [USP-NF Chapter 797 - Environmental Quality and Control, Facility Design and Environmental Controls]
n/a

77. ☐ ☐ n/a

Airborne contamination control is achieved in the PEC through the use of HEPA filters. **The airflow in the PEC shall be unidirectional (laminar flow),** and because of the particle collection efficiency of the filter, the "first air" at the face of the filter is, for the purposes of aseptic compounding, **free from airborne particulate contamination. HEPA-filtered air shall be supplied in critical areas (ISO Class 5, see Table 1) at a velocity sufficient to sweep particles away from the compounding area and maintain unidirectional airflow during operations.** Proper design and control prevents turbulence and stagnant air in the critical area. [USP-NF Chapter 797- *Environmental Quality and Control, Facility Design and Environmental Controls*]

78. ☑ ☐

In situ air pattern analysis via smoke studies shall be conducted at the critical area to demonstrate unidirectional airflow and sweeping action over and away from the product under dynamic conditions. [USP-NF Chapter 797- *Environmental Quality and Control, Facility Design and Environmental Controls*]

79. ☑ ☐

Environmental sampling shall occur as part a comprehensive quality management program and shall occur minimally under any of the following conditions: [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing*]

☑ as part of the commissioning and certification of new facilities and equipment;
☑ following any servicing of facilities and equipment;
☑ as part of the re-certification of facilities and equipment (i.e., every 6 months);
☑ in response to identified problems with end products or staff technique; or
☑ in response to issues with CSPs, observed compounding personnel work practices, or patient-related infections (where the CSP is being considered as a potential source of the infection).

80. ☑ ☐

Sampling Plan—**An appropriate environmental sampling plan shall be developed for airborne viable particles based on a risk assessment of compounding activities performed. Selected sampling sites shall include locations within each ISO Class 5 (see Table 1) environment and in the ISO Class 7 and 8 (see Table 1) areas and in the segregated compounding areas at greatest risk of contamination** (e.g., work areas near the ISO Class 5 [see Table 1] environment, counters near doors, pass-through boxes). **The plan shall include sample location, method of collection, frequency of sampling, volume of air sampled, and time of day as related to activity in the compounding area and action levels.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program, Sampling Plan*]

81. ☑ ☐

Growth Medium—**A general microbiological growth medium such as Soybean–Casein Digest Medium shall be used to support the growth of bacteria. Malt extract agar or some other media that supports the growth of fungi shall be used in highrisk level compounding environments.** Media used for surface sampling must be supplemented with additives to neutralize the effects of disinfecting agents (e.g., TSA with lecithin and polysorbate 80). [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program, Sampling Plan*]

82. ☑ ☐

Viable Air Sampling—**Evaluation of airborne microorganisms using volumetric collection methods in the controlled air environments** (LAFWs, CAIs, clean room or buffer areas, and ante-areas) **shall be performed by properly trained individuals for all compounding risk levels. Impaction shall he the preferred method of volumetric air sampling.** Use of settling plates for qualitative air sampling may not be able to determine adequately the quality of air in the controlled environment. [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

83. ☑ ☐

For low-, medium-, and high-risk level compounding, air sampling shall be performed at locations that are prone to contamination during compounding activities and during other activities such as staging, labeling, gowning, and cleaning. Locations shall include zones of air backwash turbulence within LAFW and other areas where air backwash turbulence may enter the compounding area (doorways, in and around ISO Class 5 [see Table 1] PEC and environments). [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

84. ☑ ☐

For low-risk level CSPs with 12-hour or less BUD prepared in a PEC (LAFWs, BSCs, CAIs) **that maintains an**

ISO Class 5 (see Table 1), **air sampling shall be performed at locations inside the ISO Class 5** (see Table 1) **environment and other areas that are in close proximity to the ISO Class 5** (see Table 1) **environment during the certification of the PEC.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

85. ☑ ☐ Air Sampling Devices—There are a number of manufacturers of electronic air sampling equipment. It is important that personnel refer to the manufacturer's recommended procedures when using the equipment to perform volumetric air sampling procedures. The instructions in the manufacturer's user's manual for verification and use of electric air samplers that actively collect volumes of air for evaluation must be followed. **A sufficient volume of air (400 to 1000 liters) shall be tested at each location in order to maximize sensitivity. The volumetric air sampling devices need to be serviced and calibrated as recommended by the manufacturer.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

86. ☑ ☐ Air Sampling Frequency and Process—**Air sampling shall be performed at least semiannnally (i.e., every 6 months) as part of the re-certification of facilities and equipment.** If compounding occurs in multiple locations within an institution (e.g., main pharmacy, satellites), environmental sampling is required for each individual compounding area. A sufficient volume of air shall be sampled and the manufacturer's guidelines for use of the electronic air sampling equipment followed. Any facility construction or equipment servicing may require that air sampling be performed during these events. [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

87. ☑ ☐ Action Levels, Documentation, and Data Evaluation—The value of viable microbial sampling of the air in the compounding environment is realized when the data are used to identify and correct an unacceptable situation. **Sampling data shall be collected and reviewed on a periodic basis as a means of evaluating the overall control of the compounding environment. If an activity consistently shows elevated levels of microbial growth, competent microbiology personnel shall be consulted.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

88. ☑ ☐ **Any cfu count that exceeds its respective action level (see Table 2) should prompt a re-evaluation of the adequacy of personnel work practices, cleaning procedures, operational procedures, and air filtration efficiency within the aseptic compounding location. An investigation into the source of the contamination shall be conducted.** Sources could include HVAC systems, damaged HEPA filters, and changes in personnel garbing or work practices. **The source of the problem shall be eliminated, the affected area cleaned, and resampling performed.** [USP-NF Chapter 797 - *Environmental Quality and Control, Viable and Nonviable Environmental Sampling (ES) Testing, Environmental Viable Airborne Particle Testing Program*]

89. ☑ ☐ The intermediate precision of the **ACD** can be determined on the basis of the day-to-day variations in performance of the accuracy measures. Thus, **compounding personnel shall keep a daily record of the above-described accuracy assessments and review the results over time. This review shall occur at least at weekly intervals to avoid potentially clinically significant cumulative errors over time.** [USP-NF Chapter 797 - *Elements of Quality Control- Verification of Automated Compounding Devices (ACDs) for Parenteral Nutrition Compounding- Precision*]

90. ☑ ☐ **Compounding personnel shall ensure proper storage and security of CSPs prepared by or dispensed from the compounding facility until either their BUDs are reached or they are administered to patients.** In fulfilling this general responsibility, the compounding facility is responsible for the proper packaging, handling, transport, and storage of CSPs prepared by or dispensed from it, including the appropriate education, training, and supervision of compounding personnel assigned to these functions. The compounding facility should assist in the education and training of noncompounding personnel responsible for carrying out any aspect of these functions. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs*]

91. ☑ ☐ CSPs, as well as all other drug products, shall be stored in the patient-care area in such a way as to secure them from unauthorized personnel, visitors, and patients. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Use and Storage*]

Documentation

All facilities that dispense prescriptions must comply with the record keeping requirements of their State Boards of Pharmacy. When a facility compounds a preparation according to the manufacturer's labeling instructions, then further documentation is not required. All other compounded preparations require further documentation as described in this section. [UAC R 156-17b-614a (3)(d)]

92. ☐ ☐ n/a

A master formulation record shall be approved by a pharmacist or DMP for each batch of sterile or non-sterile pharmaceuticals to be prepared. Once approved, a duplicate of the master formulation record shall be used as the compounding record from which each batch is prepared and on which all documentation for that batch occurs. The master worksheet sheet may be stored electronically and shall contain at a minimum: [UAC R156-17b-614a(3)(e)(i-xiii)]

☐ official or assigned name
☐ strength
☐ dosage form of the preparation
☐ calculations needed to determine and verify quantities of components and doses of active pharmaceutical ingredients dosage form of the preparation
☐ description of ingredients and their quantities
☐ compatibility and stability information, including references when available
☐ equipment needed to prepare the preparation
☐ container used in dispensing
☐ packaging and storage requirements
☐ description of final preparation
☐ quality control procedures and expected results;
☐ mixing instructions, which shall include: ☐order of mixing ☐ mixing temperatures or other environmental controls ☐ duration of mixing ☐ other factors pertinent to the replication of the preparation as compounded
☐ sample labeling information, which shall contain, in addition to legally required information: ☐ generic name and quantity or concentration of each active ingredient ☐ assigned beyond use date ☐ storage conditions ☐ prescription or control number, whichever is applicable

93. ☐ ☐ n/a

A compounding record for each batch of sterile or non-sterile pharmaceuticals shall document the following: [UAC R156-17b-614a(3)(f) (i-xix)]

☐ official or assigned name;
☐ strength and dosage of the preparation;
☐ Master Formulation Record reference for the preparation;
☐ names and quantities of all components
☐ sources, lot numbers, and expiration dates of components;
☐ total quantity compounded;
☐ name of the person who prepared the preparation
☐ name of the compounder who approved the preparation
☐ name of the person who performed the quality control procedures
☐ date of preparation
☐ assigned control, if for anticipation of use or prescription number, if patient specific, whichever is applicable
☐ duplicate label as described in the Master Formulation Record means the sample labeling information that is dispensed on the final product given to the patient and shall at minimum contain: ☐ active ingredients ☐ beyond use date ☐ storage conditions and ☐ lot number;
☐ proof of the duplicate labeling information, which proof shall: ☐ be kept at the pharmacy ☐ be immediately retrievable ☐ include an audit trail for any altered form; and ☐ be reproduced in: the original format that was dispensed, an electronic format, or a scanned electronic version
☐ description of final preparation
☐ results of quality control procedures (e.g. weight range of filled capsules, pH of aqueous liquids); and
☐ documentation of any quality control issues and any adverse reactions or preparation problems reported by the patient or caregiver.

94. ☑ ☐ Compounding records including the master worksheet, preparation worksheet, and MSDS files shall be kept for a minimum of five years and should be immediately retrievable in written or electronic format. [UAC R156-17b-612 (4)]

95. ☑ ☐ The facility maintains documentation regarding an ongoing quality control program that monitors and evaluates personnel performance, equipment and facility's compliance with following the USP-NF Chapters 795 and 797 standards. [UAC R156-17b-614a(3)(h)]

96. ☑ ☐ Results from the equipment calibration, annual maintenance reports, and routine maintenance are kept on file for the lifetime of the equipment. [USP-NF Chapter 797- *Elements of Quality Control- Equipment*]

Compounding Procedures

97. ☑ ☐ **Opened or needle-punctured single-dose containers,** such as bags, bottles, syringes, and vials of sterile products and CSPs **shall be used within 1 hour if opened in worse than ISO Class 5** (see Table 1) air quality (see Immediate-Use CSPs), **and any remaining contents must be discarded.** [USP-NF Chapter 797- *Single-Dose and Multiple-Dose Containers]*

98. ☑ ☐ ☑**Single-dose vials exposed to ISO Class 5** (see Table 1) **or cleaner air may be used up to 6 hours after initial needle puncture.** ☑**Opened single-dose ampuls shall not be stored for any time period.** ☑**Multiple-dose containers** (e.g., vials) **are formulated for removal of portions on multiple occasions because they usually contain antimicrobial preservatives.** The ☑**BUD after initially entering or opening (e.g., needle-punctured) multiple-dose containers is 28 days** (see Antimicrobial Effectiveness Testing <51>) unless otherwise specified by the manufacturer. [USP-NF Chapter 797- *Single-Dose and Multiple-Dose Containers]*

99. ☑ ☐ Wiping with small sterile 70% IPA swabs that are commercially available in individual foil-sealed packages (or a comparable method) is preferred for disinfecting entry points on bags and vials, allowing the IPA to dry before piercing stoppers with sterile needles and breaking necks of ampuls. **The surface of the sterile 70% IPA swabs used for disinfecting entry points of sterile packages and devices shall not contact any other object before contacting the surface of the entry point. Sterile 70% IPA wetted gauze pads or other particle-generating material shall not be used to disinfect the sterile entry points of packages and devices.** [USP-NF Chapter 797- *Environmental Quality and Control - Cleaning and Disinfecting the Compounding Area*]

100. ☑ ☐ Pharmacy Bulk Package (see Containers for Injections under Injections <1>)—A container of a sterile preparation for parenteral use that contains many single doses. The contents are intended for use in a pharmacy admixture program and are restricted to the preparation of admixtures for infusion or, through a sterile transfer device, for the filling of empty sterile syringes. **The closure shall be penetrated ouly one time after constitution with a suitable sterile transfer device or dispensing set, which allows measured dispensing of the contents.** The pharmacy bulk package is to be used only in a suitable work area such as a laminar flow hood (or an equivalent clean air compounding area). **Where a container is offered as a pharmacy bulk package, the label sball (a) state prominently "Pharmacy Bulk Package—Not for Direct Infusion," (b) contain or refer to information on proper techniques to help ensure safe use of the product, and (c) bear a statement limiting the time frame in which the container may be used once it has heen entered, provided it is held under the labeled storage conditions.** [USP-NF Chapter 797- *Definitions*]

101. ☑ ☐ **The licensed healthcare professionals who snpervise compounding shall be responsihle for determining that the selected sterilization method** (see Methods of Sterilization under Sterilization and Sterility Assurance of Compendial Articles <1211>) both sterilizes and maintains the strength, purity, quality, and packaging integrity of CSPs. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility, Sterilization Methods*]

102. ☑ ☐ Critical sites are locations that include any component or fluid pathway surfaces (e.g., vial septa, injection ports, beakers) or openings (e.g., opened ampuls, needle hubs) exposed and at risk of direct contact with air (e.g., ambient room or HEPA filtered), moisture (e.g., oral and mucosal secretions), or touch contamination. Protection of critical sites by precluding physical contact and airborne contamination shall be given the highest priority in sterile compounding practice. [USP-NF Chapter 797 - Exposure of Critical Sites]

103. ☐ ☐ **All high-risk level CSPs that are prepared in groups of more than 25 identical individual single-dose packages** (e.g., ampuls, bags, syringes, vials) **or in multiple-dose vials (MDVs) for administration to multiple patients or that are exposed longer than 12 hours at 2° to 8° and longer than 6 hours at warmer than 8° before they are sterilized shall meet the sterility test** (see Sterility Tests <71>) **before they are dispensed or administered.** [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests- Sterility Testing*]

N/a

104. ☐ ☐ **All high-risk level CSPs, except those for inhalation and ophthalmic administration, that are prepared in groups of more than 25 identical individual single-dose packages (e.g., ampuls, bags, syringes, vials) or in MDVs for administration to multiple patients or that are exposed longer than 12 hours at 2° to 8° and longer than 6 hours at warmer than 8° before they are sterilized shall be tested to ensure that they do not contain excessive bacterial endotoxins** (see Bacterial Endotoxins Test <85> and Pyrogen Test <151>). In the absence of a bacterial endotoxins limit in the official monograph or other CSP formula source, the CSP shall not exceed the amount of USP Endotoxin Units (per hour per kilogram of body weight or square meters of body surface area) specified in Bacterial Endotoxins Test <85> referenced above for the appropriate route of administration. [USP-NF Chapter 797- *Finished Preparation Release Checks and Tests- Bacterial Endotoxin (Pyrogen) Testing*]

n/a

105. ☑ ☐ **Does the facility participate in the following** (check all applicable):
☐ Hazardous Drugs ☑ Radiopharmaceuticals ☐ Allergen Extracts as CSPs

Hazardous Drugs

106. ☐ ☐ **All personnel who compound hazardous drugs shall be fully trained** in the **storage, handling, and disposal** of these drugs. This training **shall occur prior to preparing or handling hazardous CSPs**, and **its effectiveness shall be verified by testing specific hazardous drugs preparation techniques**. Such verification **shall be documented for each person at least annually.** This **training shall include didactic overview** of hazardous drugs, including mutagenic, teratogenic, and carcinogenic properties, and it **shall include ongoing training for each new hazardous drug that enters the marketplace.** [USP- NF Chapter 797- *Hazardous Drugs as CSPs*]

107. ☐ ☐ **Compounding personnel of reproductive capability shall confirm in writing that they understand the risks of handling hazardous drugs.** The training **shall include** at least the following: [USP- NF Chapter 797- *Hazardous Drugs as CSPs*]
- ☐ safe aseptic manipulation practices;
- ☐ negative pressure techniques when utilizing a BSC or CACI;
- ☐ correct use of CSTD devices;
- ☐ containment, cleanup, and disposal procedures for breakages and spills; and
- ☐ treatment of personnel contact and inhalation exposure.

108. ☐ ☐ Hazardous drugs shall be prepared for administration only under conditions that protect the healthcare workers and other personnel in the preparation and storage areas. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

109. ☐ ☐ Hazardous drugs shall be stored separately from other inventory in a manner to prevent contamination and personnel exposure. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

110. ☐ ☐ Hazardous drugs shall be handled with caution at all times using appropriate chemotherapy gloves during receiving, distribution, stocking, inventorying, preparation for administration, and disposal. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

111. ☐ ☐ Hazardous drugs shall be prepared in an ISO Class 5 (see Table 1) environment with protective engineering controls in place and following aseptic practices specified for the appropriate contamination risk levels defined in this chapter. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

112. ☐ ☐ Access shall be limited to areas where drugs are stored and prepared to protect persons not involved in drug preparation. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

113. ☐ ☐ **All hazardous drugs shall be prepared in a BSC or a CACI that meets or exceeds the standards for CACI in this chapter. The ISO Class 5** (see Table 1) **BSC or CACI shall be placed in an ISO Class 7** (see Table 1) **area that is physically separated** (i.e., a different area from other preparation areas) **and optimally has not less than 0.01-inch water column negative pressure to adjacent positive pressure ISO Class 7** (see Table 1) **or better ante-areas, thus providing inward airflow to contain any airborne drug. A pressure indicator shall be installed that can be readily monitored for correct room pressurization.** [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

114. ☐ ☐ If a CACI that meets the requirements of this chapter is used outside of a buffer area, the compounding area shall maintain a minimum negative pressure of 0.01-inch water column and have a minimum of 12 ACPHs. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

115. ☐ ☐ **When closed-system vial-transfer devices** (CSTDs) (i.e., vial-transfer systems that allow no venting or exposure of hazardous substance to the environment) **are used, they shall be used within the ISO Class 5 (see Table 1) environment of a BSC or CACI.** The use of a CSTD is preferred because of their inherent closed system process. In facilities that prepare a low volume of hazardous drugs, the use of two tiers of containment (e.g., CSTD within a BSC or CACI that is located in a non-negative pressure room) is acceptable. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

116. ☐ ☐ **Appropriate personnel protective equipment (PPE) shall be worn when compounding in a BSC or CACI and when using CSTD devices.** PPE should include gowns, face masks, eye protection, hair covers, shoe covers or dedicated shoes, double gloving with sterile chemo-type gloves, and compliance with manufacturers' recommendations when using a CACI. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

117. ☐ ☐ Compounding personnel of reproductive capability shall confirm in writing that they understand the risks of handling hazardous drugs. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

118. ☐ ☐ All personnel who compound hazardous drugs shall be fully trained in the storage, handling, and disposal of these drugs. This training shall occur prior to preparing or handling hazardous CSPs, and its effectiveness shall be verified by testing specific hazardous drugs preparation techniques. Such verification shall be documented for each person at least annually. This training shall include didactic overview of hazardous drugs, including mutagenic, teratogenic, and carcinogenic properties, and it shall include ongoing training for each new hazardous drug that enters the marketplace. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

119. ☐ ☐ **Disposal of all hazardous drug wastes shall comply with all applicable federal and state regulations.** All **personnel** who perform routine custodial waste removal and cleaning activities in storage and preparation areas for hazardous drugs **shall be trained** in appropriate procedures to protect themselves and prevent contamination. [USP-NF Chapter 797- *Hazardous Drugs as CSPs*]

Radiopharmaceuticals

120. ☑ ☐ For the purposes of this chapter, **radiopharmaceuticals compounded from sterile components in closed sterile containers and with a volume of 100 mL or less for a single-dose injection or not more than 30 mL taken from a multiple-dose container (see Injections <1>) shall be designated as, and conform to, the standards for Low-Risk Level CSPs.** These radiopharmaceuticals **shall be compounded using appropriately shielded vials and syringes in a properly functioning and certified ISO Class 5 (see Table 1) PEC located in an ISO Class 8 (see Table 1) or cleaner air environment to permit compliance with special handling, shielding, and negative air flow requirements.** [USP-NF Chapter 797- *Radiopharmaceuticals as CSPs*]

121. ☑ ☐ **Radiopharmaceuticals prepared as Low-Risk Level CSPs with 12-Hour or Less BUD shall be prepared in a segregated compounding area.** A line of demarcation defining the segregated compounding area shall be established. Materials and garb exposed in a patient care and treatment area shall not cross a line of demarcation into the segregated compounding area. [USP-NF Chapter 797- *Radiopharmaceuticals as CSPs*]

Allergen Extracts as CSPs

122. ☐ ☐ Allergen extracts as CSPs are single-dose and multiple-dose intradermal or subcutaneous injections that are prepared by specially trained physicians and personnel under their direct supervision. **Allergen extracts as CSPs are not subject to the personnel, environmental, and storage requirements for all CSP Microbial Contamination Risk Levels in this chapter only when all of the following criteria are met:** [USP-NF Chapter 797- Allergen Extracts as CSPs]

☐ The compounding process involves simple transfer via sterile needles and syringes of commercial sterile allergen products and appropriate sterile added substances (e.g., glycerin, phenol in sodium chloride injection).
☐ All allergen extracts as CSPs shall contain appropriate substances in effective concentrations to prevent the growth of microorganisms. Nonpreserved allergen extracts shall comply with the appropriate CSP risk level requirements in the chapter.
☐ Before beginning compounding activities, personnel perform a thorough hand-cleansing procedure by removing debris from under fingernails using a nail cleaner under running warm water followed by vigorous hand and arm washing to the elbows for at least 30 seconds with either nonantimicrobial or antimicrobial soap and water.
☐ Compounding personnel don hair covers, facial hair covers, gowns, and face masks.
☐ Compounding personnel perform antiseptic hand cleansing with an alcohol-based surgical hand scrub with persistent activity.
☐ Compounding personnel don powder-free sterile gloves that are compatible with sterile 70% isopropyl alcohol (IPA) before beginning compounding manipulations.
☐ Compounding personnel disinfect their gloves intermittently with sterile 70% IPA when preparing multiple allergen extracts as CSPs.
☐ Ampul necks and vial stoppers on packages of manufactured sterile ingredients are disinfected by careful wiping with sterile 70% IPA swabs to ensure that the critical sites are wet for at least 10 seconds and allowed to dry before they are used to compound allergen extracts as CSPs.
☐ The aseptic compounding manipulations minimize direct contact contamination (e.g., from glove fingertips, blood, nasal and oral secretions, shed skin and cosmetics, other nonsterile materials) of critical sites (e.g., needles, opened ampuls, vial stoppers).
☐ The label of each multiple-dose vial (MDV) of allergen extracts as CSPs lists the name of one specific patient and a BUD and storage temperature range that is assigned based on manufacturers' recommendations or peer-reviewed publications.
☐ Single-dose allergen extracts as CSPs shall not be stored for subsequent additional use.

Sterilization

123. ☐ ☑ Does the facility participate in the following (check all applicable):
☐ Filter Sterilization in an ISO class 5 ☐ Steam Sterilization ☐ Dry Heat Sterilization

124. ☐ ☐ **(Filter Sterilization in an ISO class 5)**
Commercially available sterile filters shall be approved for human-use applications in sterilizing pharmaceutical fluids. **Sterile filters used to sterilize CSPs shall be pyrogen free and have a nominal pore size of 0.2 or 0.22 mm.** They shall be certified by the manufacturer to retain at least 107 microorganisms of a strain of Brevundimonas (Pseudomonas) diminuta on each square centimeter of upstream filter surface area under conditions similar to those in which the CSPs will be sterilized (see High-Risk Conditions in High-Risk Level CSPs). [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

125. ☐ ☐ **The compounding supervisor shall ensure**, directly or from appropriate documentation, that **the filters** are chemically and physically stable at the pressure and temperature conditions to be used, that they have enough capacity to filter the required volumes, and that they will achieve sterility and maintain prefiltration pharmaceutical quality, including strength of ingredients of the specific CSP. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

126. ☐ ☐ The filter dimensions and liquid material to be sterile-filtered shall permit the sterilization process to be completed rapidly, without the replacement of the filter during the process. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

127. ☐ ☐ Filter units used to sterilize CSPs shall also be subjected to manufacturers' recommended integrity test, such as the bubble point test. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

128. ☐ ☐ Compounding personnel shall ascertain that selected filters will achieve sterilization of the particular CSPs being sterilized. [USP-NF Chapter 797 - *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Filtration*]

129. ☐ ☐ **(Steam Sterilization)**
The process of thermal sterilization employing saturated steam under pressure, or autoclaving, is the preferred method to terminally sterilize aqueous preparations that have been verified to maintain their full chemical and physical stability under the conditions employed (see Steam Sterilization under Sterilization and Sterility Assurance of Compendial Articles <1211>).**To achieve sterility, all materials are to be exposed to steam at 121° under a pressure of about 1 atmospbere or 15 psi for the duration verified by testing to achieve sterility of the items, which is usually 20 to 60 minutes for CSPs.** An allowance shall be made for the time required for the material to reach 121° before the sterilization exposure duration is timed. [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Steam*]

130. ☐ ☐ Not directly exposing items to pressurized steam may result in survival of microbial organisms and spores. Before their sterilization, plastic, glass, and metal devices are tightly wrapped in low-particle-shedding paper or fabrics or sealed in envelopes that prevent poststerilization microbial penetration. **Immediately before filling ampuls and vials that will be steam sterilized, solutious are passed through a filter having a nominal pore size not larger than 1.2 mm for removal of particulate matter. Sealed containers shall be able to generate steam internally; thus, stoppered and crimped empty vials shall contain a small amount of moisture to generate steam.** [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Steam*]

131. ☐ ☐ The description of steam sterilization conditions and duration for specific CSPs shall be included in written documentation in the compounding facility. The effectiveness of steam sterilization shall be verified using appropriate BIs of Bacillus stearothermophilus (see Biological Indicators <1035>) and other confirmation methods such as temperature-sensing devices (see Sterilization and Sterility Assurance of Compendial Articles <1211> and Sterility Tests <71>). [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility- Sterilization Methods- Sterilization of High-Risk Level CSPs by Steam*]

132. ☐ ☐ **(Dry Heat Sterilization)**
Dry heat sterilization is usually done as a batch process in an oven designed for sterilization. **Heated filtered air shall be evenly distributed throughout the chamber by a blower device.** [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

133. ☐ ☐ **Dry heat shall be used only for those materials that cannot he sterilized by steam,** when either the moisture would damage the material or the material is impermeable. [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility-, Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

134. ☐ ☐ During sterilization, sufficient space shall be left between materials to allow for good circulation of the hot air. [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

135. ☐ ☐ The description of dry heat sterilization conditions and duration for specific CSPs shall be included in written documentation in the compounding facility. [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

136. ☐ ☐ The effectiveness of dry heat sterilization shall be verified using appropriate BIs of Bacillus subtilis (see Biological Indicators <1035>) and other confirmation methods such as temperature- sensing devices (see Sterilization and Sterility Assurance of Compendial Articles <1211> and Sterility Tests <71>). [USP-NF Chapters 797- *Verification of Compounding Accuracy and Sterility- Sterilization Method- Sterilization of High-Risk Level CSPs by Dry Heat*]

Finished Preparation Release Checks and Tests

137. ☑ ☐ **All CSPs that are intended to be solutions shall be visually examined for the presence of particulate matter and not administered or dispensed when such matter is observed.** The prescription orders, written compounding procedure, preparation records, and expended materials used to make CSPs at all contamination risk levels are inspected for accuracy of correct identities and amounts of ingredients, aseptic mixing and sterilization, packaging, labeling, and expected physical appearance before they are administered or dispensed. [USP- NF Chapter 797- Finished Preparation Release Checks and Tests- Inspection of Solution Dosage Forms and Review of Compounding Procedures

138. ☑ ☐ **The accuracy of identities, concentrations, amounts, and purities of ingredients in CSPs shall be confirmed by reviewing labels on packages, observing and documenting correct measurements with approved and correctly standardized devices, and reviewing information in labeling and certificates of analysis provided by suppliers.** When the correct identity, purity, strength, and sterility of ingredients and components of CSPs cannot be confirmed (in cases of, for example, unlabeled syringes, opened ampuls, punctured stoppers of vials and bags, containers of ingredients with incomplete labeling), such ingredients and components shall be discarded immediately. [USP-NF Chapter 797- *Verification of Compounding Accuracy and Sterility*]

139. ☐ ☐ The label of each batch prepared of sterile or non-sterile pharmaceuticals shall bear at a minimum: [UAC R156-17b-614a (3)(g)(i-vi)

n/a

☐ the unique lot number assigned to the batch;
☐ all active solution and ingredient names, amounts strengths and concentrations, where applicable
☐ quantity
☐ beyond use date and time, when applicable
☐ appropriate ancillary instructions, such as storage instructions or cautionary statements, including cytotoxic warning labels where appropriate; and
☐ device-specific instructions, where appropriate.

140. ☑ ☐ All prescription labels for compounded sterile and non-sterile medications when dispensed to the ultimate user or agent shall bear at a minimum in addition to what is required in Section 58-17b-602 the following: [R156-17b-614a (3)(h)(i)(ii)(iii)
☑ generic name a quantity or concentration of each active ingredient. In the instance of a sterile preparation for parenteral use, labeling shall include the name and base solution for infusion preparation;
☑ assigned compounding record or lot number; and
☑ "this is a compounded preparation" or similar language

Packaging and Storage

141. ☑ ☐ Compounding facilities that ship CSPs to locations outside their own premises shall select modes of transport that are expected to deliver properly packed CSPs in undamaged, sterile, and stable condition to recipients. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs- Transit of CSPs*]

142. ☑ ☐ Compounding personnel should ascertain that temperatures of CSPs during transit by the selected mode will not exceed the warmest temperature specified on the storage temperature range on CSP labels. It is recommended that compounding personnel communicate directly with the couriers to learn shipping durations and exposure conditions that CSPs may encounter. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Packing and Transporting CSPs- Transit of CSPs*]

143. ☑ ☐ Compounding facilities that ship CSPs to patients and other recipients outside their own premises shall ascertain or provide, whichever is appropriate, the following assurances: [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSP- Storage in Locations Outside Compounding Facilities*]
☑ Labels and accessory labeling for CSPs include clearly readable BUDs, storage instructions, and disposal instructions for out-of-date units.
☑ Each patient or other recipient is able to store the CSPs properly, including the use of a properly functioning refrigerator and freezer if CSPs are labeled for such storage.

144. ☑ ☐ **Inspections shall confirm compliance with appropriate storage conditions, separation of drugs and food, proper use of MDVs, and the avoidance of using single-dose products as MDVs.** CSPs, as well as all other drug products, shall be stored in the patient-care area in such a way as to secure them from unauthorized personnel, visitors, and patients. [USP- NF Chapter 797- *Finished Preparation Release Checks and Tests- Monitoring Controlled Storage Areas*]

145. ☑ ☐ Personnel who prepare, dispense, and administer CSPs shall store them strictly in accordance with the conditions stated on the label of ingredient products and finished CSPs. [USP-NF Chapter 797- Storage and Beyond-use Dating]

Quality Assurance Program

146. ☑ ☐ The assurance of CSPs' quality and packaging integrity is highly dependent on the proper adherence of all personnel to the pertinent SOPs. **Compounding personnel shall design, implement, and maintain a formal education, training, and competency assessment program that encompasses all the functions and tasks addressed in the foregoing sections and all personnel to whom such functions and tasks are assigned.** This program includes the assessment and documentation of procedural breaches, administration mishaps, side effects, allergic reactions, and complications associated with dosage or administration, such as extravasation. This program should be coordinated with the institution's adverse-events and incident reporting programs. [USP-NF Chapter 797- *Maintaining Sterility, Purity, and Stability of Dispensed and Distributed CSPs- Education and Training*]

147. ☑ ☐ **A provider of CSPs shall have in place a formal QA program intended to provide a mechanism for monitoring, evaluating, correcting, and improving the activities and processes described in this chapter.** Emphasis in the QA program is placed on maintaining and improving the quality of systems and the provision of patient care. In addition, the QA program ensures that any plan aimed at correcting identified problems also includes appropriate follow-up to make certain that effective corrective actions were performed. Characteristics of a QA program include the following: [USP-NF Chapter 797- *Quality Assurance (QA) Program*]

☑ Formalization in writing;
☑ Consideration of all aspects of the preparations and dispensing of products as described in this chapter, including environmental testing and verification results;
☑ Description of specific monitoring and evaluation activities;
☑ Specification of how results are to be reported and evaluated;
☑ Identification of appropriate follow-up mechanisms when action limits or thresholds are exceeded; and
☐ Delineation of the individuals responsible for each aspect of the QA program.

148. ☑ ☐ A written quality assurance procedure includes the following in-process checks that are applied, as appropriate, to specific CSPs: [USP-NF Chapter 797- *Responsibilities of Compounding Personnel*]

☑ accuracy and precision of measuring and weighing;
☑ the requirement for sterility;
☑ methods of sterilization and purification;
☑ safe limits and ranges for strength of ingredients, bacterial endotoxins, and particulate matter;
☑ pH;
☑ labeling accuracy and completeness;
☑ BUD assignment;
☑ and packaging and storage requirements.

149. ☑ ☐ Compounding facilities shall clinically monitor patients treated with CSPs according to the regulations and guidelines of their respective state healthcare practitioner licensure boards or of accepted standards of practice. **Compounding facilities shall provide patients and other recipients of CSPs with a way to address their questions and report any concerns that they may have with CSPs and their administration devices.** [USP-NF Chapter 797- *Patient Monitoring and Adverse Events Reporting*]

COMMENTS
(Use an additional sheet if necessary.)

Assisted by PIC Tyrel Einfeldt.

Pharmacy only prepares low-risk radio pharmaceuticals.

Labels for compounded preparations are compliant.

ISO 8 ante-room and ISO 7 buffer room.

Certification records show no concerns.

Cleaning, temperature, and pressure logs are up to date and done daily.

Pharmacy needs to use alcohol based hand scrub prior to donning gloves. Currently using alcohol spray.

☑ By checking this box it is indicated that the undersigned Division Investigator has reviewed the above inspection report and comments made with the undersigned "Responsible Party."

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✔
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy? N/A		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✔
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✔
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✔
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✔
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✔
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✔
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✔
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✔

I, Tyrel Einfeldt, **certify that as the designated representative for**

PharmaLogic Salt Lake City, LLC,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. TE I am at least 21 years of age;
3. TE I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. TE I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. TE I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. TE I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. TE I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

DEA Explanation

PharmaLogic Salt Lake City, LLC (UT resident license application pending) is a closed-door nuclear pharmacy that does not order, store, compound, dispense, or otherwise handle controlled substances, therefore a DEA registration is not required for operation of this facility.

NEVADA STATE BOARD OF PHARMACY

985 Damonte Ranch Parkway, Suite 206 - Reno, NV 89521 - (775) 850-1440

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: PharmaLogic Salt Lake City, LLC

NV Pharmacy or Outsourcing facility license # (if applicable): N/A; new application

Physical Address: 383 W. Vine Street, Suite 100

City: Salt Lake City State: UT Zip: 84123

Mailing Address (if different from physical address): same as physical

City: State: Zip:

Telephone: 385-419-4327 Toll Free # (NAC 639.708, NRS 639.23286): 877-769-1433

Fax: 385-425-3132 Contact Email: SaltLakeCityPharmacy@radiopharmacy.com

Website: www.radiopharmacy.com

Nevada Business License # (if applicable) N/A; new application

Supervising/Managing Pharmacist Name (NRS 639.220): Tyrel Einfeldt

Supervising/Managing Pharmacist NV Pharmacist Registration #: 24064

Name of Person with direct knowledge of compounding procedures: Tyrel Einfeldt

Email of Person with direct knowledge of compounding procedures: teinfeld@radiopharmacy.com

Telephone of Person with direct knowledge of compounding procedures: 801-503-2405

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☑ Low ☐ Medium ☐ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☐ Yes ☑ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:

F-18 FDG - repackaged into unit dose syringes from manufacturer multidose vial
Ga-68 NetSpot - prepared per package insert
Ga-68 Illuccix - prepared per package insert

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☑ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:

N/A

6. What laboratory performs this additional testing?

Name: N/A

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?

All products are inspected before and after preparation for any visible particles, abnormal color, or turbidity. If the product does not pass visual inspection, the product is quarantined and the compounding pharmacist will reach out to the Quality and Regulatory Department for next steps/investigations as needed.

8. How often do you perform glove fingertip and medial fill testing?

In triplicate as part of onboarding process, then annually thereafter.

9. What is your policy if an employee fails a glove fingertip or media-fill test?

If the observer notes any deviations from the acceptance criteria or procedures for glove fingertip or media-fill testing, the employee is considered to be not qualified and must repeat the qualifications.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

Please see SOP 6.02 - Aseptic Qualifications, 6.03 - Gowning, Garbing, and Hand Hygiene, and 7.05 - Network Training for our initial and annual training program for all personnel performing sterile compounding.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

Please see SOP 6.04 - Cleaning of Clean Rooms and SRPAs and 6.05 - Cleaning of Clean LFHs and BSCs for the cleaning of our primary and secondary engineering controls, including frequency and names of approved agents used as cleaners/disinfectants and sporicidals.

12. Who performs the sterile compounding process at your facility?

Authorized nuclear pharmacists (ANPs) perform the sterile compounding process at PharmaLogic Salt Lake City, LLC.

13. Who is responsible and accountable for the sterile compounding process at your facility?

Tyrel Einfeldt, Pharmacist-in-charge

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

All products that are delivered/shipped follow DoT regulations and emergency procedures for handling radioactive materials. The delivery process is either initiated after quality control tests are completed, or delivered under quarantine and only released to the customer upon the successful completion of quality control tests.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.) Not applicable		
1. What type of primary engineering controls will you be using in your facility?		
2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.) Not applicable
1. List the specific high risk sterile products that your facility compounds:
2. What sterilization methods are utilized at your facility?
3. Does your facility utilize biological indicators? ☐ Yes ☐ No
4. If yes, describe how they are utilized:

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. NEVADA STATE BOARD OF PHARMACY

985 Damonte Ranch Parkway, Suite 206 - Reno, NV 89521 - (775) 850-1440

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Precision Compounding Pharmacy and Wellness

NV Pharmacy or Outsourcing facility license # (if applicable): PH04486

Physical Address: 2657 Merrick Road

City: Bellmore State: NY Zip: 11710

Mailing Address (if different from physical address):

City: State: Zip:

Telephone: 516-833-6262 Toll Free # (NAC 639.708, NRS 639.23286): 855-277-9610

Fax: 516-222-0605 Contact Email: licensingNY@mypcphealth.com

Website: mypcphealth.com

Nevada Business License # (if applicable) N/A

Supervising/Managing Pharmacist Name (NRS 639.220): Jeriann Stella

Supervising/Managing Pharmacist NV Pharmacist Registration #: 24122

Name of Person with direct knowledge of compounding procedures: Jeriann Stella

Email of Person with direct knowledge of compounding procedures: [redacted]@gmail.com

Telephone of Person with direct knowledge of compounding procedures: 516-833-6262

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ■ Low ■ Medium ■ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ■ Yes ☐ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Testosterone Cypionate 200mg/mL Grapseed Oil Injection Solution - #5mL Vial & #10mL Vial

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ■ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:

6. What laboratory performs this additional testing?

Name: _____

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?

Vials are inspected against a blacklight box and inspected for visual particulates, etc.

8. How often do you perform glove fingertip and medial fill testing?

Initially and every 6 months thereafter.

9. What is your policy if an employee fails a glove fingertip or media-fill test?

They are to undergo retraining for an additional 2 weeks, then retest. If they fail a second time, they will not be given a third chance and will not be deemed competent to engage in sterile compounding.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

See attached SOP 8.025 Sterile Compounding Personnel Training and Education.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

See attached SOP 8.019 Sterile Compounding Area Cleaning Log.

12. Who performs the sterile compounding process at your facility?

Sterile Compounding Pharmacists and sterile compounding technicians.

13. Who is responsible and accountable for the sterile compounding process at your facility?

The designated person as per USP.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

Please see attached SOP 12.001 Telehealth Compound Drug Shipping.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? LAFW and BSC.		
2. Is your BSC or CACI vented 100% to the outside?	☒ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☒ No
4. Will you be compounding with antineoplastic HDs or HD API?	☒ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☒ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☒ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers? - Safe handling of hazardous drugs including wearing proper PPE, do not crush tablets, do not open capsules, and wear gloves when handling drugs. - Proper disposal via a take-back program or pharmacy. Do not throw medication away or flush it. - Store medication in a safe place, away from light. Keep out of the reach of pets and children. - What to do in the case of a spill. - A toll-free number to call in case of an emergency or for questions.		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs? Please see attached 8.025 Sterile Compounding Personnel Training and Education & SOP 9.003 Hazardous Drug Personnell Training.		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

Medication Name and Dosage Form -- Strength and/or Size
- Sermorelin 2mg/mL Vials -- 5mL
- Testosterone Cypionate (Grapeseed Oil) 200mg/mL Vials -- 5mL|10mL
- Semaglutide 2.5mg Methylcobalamin 100mcg/mL Vials -- 1mL|2mL|3mL|4mL|5mL
- Tirzepatide 5mg/0.5mL Vials -- 1mL|2mL|3mL|4mL|5mL|6mL
- Liraglutide 6 mg Methionine 2mg/mL Vials -- 6mL
- Methionine 15mg Inositol 50mg Choline Chloride 100mg Vials -- 10mL
- Methylcobalamin 1mg/mL Vials -- 10mL
- Glutathione 200mg/mL Vial -- 10mL
- Methylcobalamin 1mg/mL Vial -- 10mL
- Nicotinamide Adenine Dinucleotide (NAD+) 200mg/mL Vial -- 2.5mL|5mL

2. What sterilization methods are utilized at your facility?

Filtration

3. Does your facility utilize biological indicators? ☐ Yes ■ No

4. If yes, describe how they are utilized:

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Title: Sterile Compounding Area Cleaning Log **SOP # 8.019**
Version # 1.0
Written & Reviewed by: Connor Longo, PharmD. ***Date:4/9/2024***
Authorized by: Christian Stella, PharmD. ***Date:4/9/2024***

1) PURPOSE

a) The purpose of this procedure is to document cleaning and disinfection of sterile compounding areas.

2) SCOPE

a) This procedure applies to all compounding personnel that perform cleaning/disinfection.

3) RESPONSIBILITY

a) All personnel making entries in the log are responsible for following the requirements of this SOP.

4) REFERENCES

a) SOP 10.002 "Good Documentation Practices (GDP)"

5) DEFINITIONS

a) LOG- a document describing daily, monthly, or annual cleaning and maintenance of lab equipment, room temp/humidity monitoring or other.

6) FREQUENCY

a) After maintenance and cleaning activities per the appropriate SOP.

7) EQUIPMENT & SUPPLIES

N/A

8) GENERAL INFORMATION

a) Surfaces are non-porous allowing for easier cleaning.

9) PROCEDURE

a) Entries in the log will be made at the time the activity occurred and in chronological order. Entries must include the initials of the person completing the task.

b) All entries made in the log should be in compliance with "Good Documentation Practices (GDP)".

c) The Pharmacist-in-charge or their designee shall review logs at *least* monthly.

i) The Pharmacist-in-charge or designee will sign and date the log certifying that the review was performed, and any deficiencies encountered were corrected.

ii) If any blanks are found, all personnel are to be contacted. All are to be retrained in the importance of proper documentation. All logs will be reviewed by the PIC *daily* for the next month to ensure proper documentation and that personnel have been adequately retrained.

d) Entries made in the log must be in compliance with all applicable SOPs for the task being performed.

e) To note: there is a hazardous and a non-hazardous sterile compounding laboratory.

i) In the non-hazardous laboratory there is a Laminar Air Flow Workstation. Drug powders and materials are stored in the ante room.

ii) In the hazardous laboratory there is a Class II A2 Biological Safety Cabinet. Designated hazardous drugs are stored in the hazardous laboratory with a designated powder containment hood, scale, and hot plate/mixer.

f) When cleaning the following PPE is to be used:

i) Hair/beard covers

ii) Face mask

iii) Shoe covers (two pairs if going into the hazardous laboratory)

iv) Disposable gown

v) Gloves (two pairs if going into the hazardous laboratory)

vi) Goggles

vii) Powered air purifying respirator (PAPR) mask

g) The EPA Registered one-step cleaning and disinfecting agent is PeridoxRTU

h) The Sporicidal Agent is PeridoxRTU

i) Hard copy logs should be returned to the Pharmacist-in-charge or their designee for archiving.

j) Any essential materials that are particle shedding (i.e. a refrigerator) are to be placed near returns to avoid any particles from shedding into the clean room.

k) If any contamination is noticeably visible in the lab, all compounding is to stop until the lab undergoes cleaning, deactivation, decontamination, and sterilization and is deemed by the PIC as acceptable for active compounding use.

l) The above is to occur if there is any constriction being done in the lab or directly outside the lab.

Attachment 5: Cleaning Checklist and Log

Date	Daily			Weekly			Monthly
	ISO 5 Workstations	Compounders	Floors	Walls & Windows	Shelving & Bins	Carts & Chairs	Ceilings

Daily Compound Start ISO 5 Cleanroom Cleaning Checklist

☐ Mix cleaning and disinfecting agents updating log

☐ Clean ISO Class 5 workstations including compounders with designated agents

☐ Disinfect ISO Class 5 workstations including compounders with designated agents

Daily Compound During Compounding ISO 5 Cleanroom Cleaning Checklist

☐ Clean ISO Class 5 between compounding activities

☐ Clean ISO Class 5 every 30 minutes while compounding

☐ Clean ISO Class 5 after any spills

☐ Clean ISO Class 5 when surface contamination is suspected

Daily Compound Finish ISO 5 Cleanroom Cleaning Checklist

☐ Mix cleaning and disinfecting agents updating log

☐ Empty waste receptacles and replace liners (daily or as often as needed)

☐ Remove hazardous-waste receptacles

☐ Remove biohazardous materials

☐ Clean sinks, countertops, cart tops, stool tops, and sharps containers

☐ Clean ISO Class 5 workstations including compounders with designated agents, noting any rotation of solutions

☐ Disinfect ISO Class 5 workstations including compounders with designated agents, noting any rotation of solutions

☐ Mop floors utilizing a figure 8 pattern to reduce leaving behind particles

Weekly ISO 5 Cleanroom Cleaning Checklist

☐ Mix cleaning and disinfecting agents updating log

☐ Empty waste receptacles and replace liners

☐ Remove hazardous-waste receptacles

☐ Remove biohazardous materials

☐ Clean windows, walls, and all other horizontal surfaces, including doors and side, front, and back of hoods, from top to bottom

☐ Clean sinks, countertops, cart tops, stool tops, and exterior of sharps containers

☐ Clean and sanitize any other non-compounding furniture such as carts, stools, and waste containers

☐ Empty, clean, and sanitize storage shelving and bins

☐ Clean ISO Class 5 workstations including compounders with designated agents, noting any rotation of solutions

☐ Disinfect ISO Class 5 workstations including compounders with designated agents, noting any rotation of solutions

☐ Mop floors utilizing a figure 8 pattern to reduce leaving behind particles ☐ Update cleaning log

Monthly ISO 5 Cleanroom Cleaning Checklist

☐ Mix cleaning and disinfecting agents including a sporicidal agent (alternating Peridex and Decon-Spore 200 Plus) for the monthly cycle updating log

☐ Empty waste receptacles and replace liners

☐ Remove hazardous-waste receptacles

☐ Remove biohazardous materials

☐ Clean sinks, countertops, cart tops, stool tops, and exterior of sharps containers

☐ Empty, clean and sanitize storage shelving and bins

☐ Clean ceilings of all controlled environments

☐ Clean windows, walls, and all other horizontal surfaces, including doors and side, front, and back of hoods, from top to bottom

☐ Clean and sanitize any other non-compounding furniture such as carts, stools, and waste containers

☐ Clean and sanitize interior and exterior of refrigerators and incubators (not kept in controlled environments)

☐ Clean ISO Class 5 workstations (including compounders residing in the workstations)

☐ Disinfect ISO Class 5 workstations including compounders with designated agents, noting any rotation of solutions

☐ Mop floors utilizing a figure 8 pattern to reduce leaving behind particles

Date Reviewed

Title: Sterile Compounding Personnel Training and Evaluation **SOP # 8.025**
Version # 1.1
Written & Reviewed by: Connor Longo, PharmD. ***Date: 12/11/2023***
Authorized by: Christian Stella, PharmD. ***Date: 12/11/2023***

1) PURPOSE

a) To establish a training and evaluation program for sterile compounding personnel.

2) SCOPE

a) This SOP applies to all sterile compounding personnel.

3) RESPONSIBILITY

a) The pharmacist in charge or their designee will be responsible for implementation of this procedure.

4) REFERENCES

a) USP Current Version <797> "Pharmaceutical Compounding – Sterile Preparations"

5) DEFINITIONS

a) N/A

6) FREQUENCY

a) Personnel must receive training and competency assessments as required by this SOP prior to independently preparing sterile compounded. Note that certain requirements in this SOP must be completed annually and others every six months.

7) EQUIPMENT & SUPPLIES

a) N/A

8) GENERAL INFORMATION

a) This training and evaluation program is designed to ensure personnel:
   i) Read and understand USP<797> and other applicable standards and relevant literature
   ii) Understand and know how to interpret Safety Data Sheets (SDS) and if applicable, Certificates of Analysis.
   iii) Read and understand procedures related to their compounding duties.
   iv) Ensure personnel are trained and competent in the following compounding skills:
      (1) Hand hygiene

(2) Garbing

(3) Cleaning and disinfecting

(4) Calculations, measuring and mixing

(5) Aseptic technique

(6) Achieving and/or maintaining sterility and pyrogenicity

(7) Use of equipment

(8) Documentation of the compounding process (e.g. master formulation and compounding records)

(9) Principles of high efficiency particular air (HEPA)-filtered unidirectional airflow within the ISO-Class 5 Area.

(10) Proper use of primary engineering controls

(11) Principles of movement of materials and personnel within the compounding area

(12) Measuring and mixing

v) For personnel that handle or compound with hazardous drugs, training and evaluation as required by SOP 9.003 Hazardous Drug Personnel Training

vi) Personnel must complete this training program and demonstrate proficiency before compounding independently.

vii) Personnel involved in the compounding process will be evaluated on their physical ability to perform the assigned compounding responsibility without compromising the integrity of the compound. This will include handicaps that may affect the ability to aseptically compound, along with appropriate dexterity skills, and any illness or injury.

9) PROCEDURE

a) Upon the start of employment all sterile compounding, personnel will receive:

i) An introduction to management and compounding laboratory staff

ii) Tour of facility including but not limited to:

(1) Break areas and restrooms

(2) Operation of phones and other telecommunications equipment

iii) Orientation to designated compounding area and compounding equipment

iv) Review the goals of the compounding laboratory

v) Daily job responsibilities

b) Sterile compounding personnel must complete the following requirements at the start of employment and annually thereafter:

i) Narcotics and controlled substances - Drug Diversion Training by reviewing SOP 1.005 and watching the required video.

ii) Training requirements:

(a) Watch OSHA video on reading SDS: Watch SDS Video https://www.youtube.com/watch?v=vCI7XXExs7s

(b) Read and understand all SOPs related to their duties. Review of applicable SOPs will be documented on Attachment F, "SOP and USP<797> Acknowledgement".

(c) Read and understand USP Chapter <797> "Pharmaceutical Compounding – Sterile Preparations". Review of applicable SOPs will be documented on Attachment F, "SOP and USP<797> Acknowledgement".

(d) Trainer will explain HD list, location of HD list, and how to access the HD list

(e) Trainer will demonstrate location and use of eye washes and/or showers and spill kits

(f) Trainer will demonstrate location and use of the autoclave and dry heat oven as well as the specific biological indicators that confirm each machine's proper functioning.
(i) SOP 5.018 Equipment and Facility Maintenance is to be used to document quality assurance checks and accuracy of the machinery.
(ii) If the biological indicator shows failure of the machine, a work order (found in SOP 5.018) is to be initiated and presented to the Chief Compliance Officer (CCO). The CCO is to determine if this can be fixed internally or externally. The machine must be functioning properly before being used.

(g) Trainer will demonstrate identify proper reusable tools, I.e. what tools are to be reused, of what material they are to be composed of in order to be reusable, how to properly clean and sterilize in order to be reused, how to identify proper condition to be reused (I.e. no cracks or chips).
(i) Any tool that does not identify to be proper in order to be reusable are to be discarded of.

(h) If applicable to their job duties, education related interpretation and use of Certificates of Analysis (COAs)

(i) Trainer(s) will observe and guide personnel throughout the training process related to their job duties. The trainer or an experienced employee will serve as the instructor using hands-on training, SOPs, and other documents as appropriate.
(i) The trainer will observe and guide the employee throughout the training process using the Attachment E – Sterile Training Documentation
(ii) The trainer will require the employee to repeat procedures independently under direct supervision.
(iii) Personnel may perform procedures without direct supervision only after demonstrating understanding and competency.

(j) Training related to the above requirements will be documented on Attachment C - Sterile Training Documentation.

(k) Prior to entering sterile compounding areas: In order to ensure personnel can enter sterile compounding areas in a manner that reduces the risk that they will contaminate surfaces and compounded sterile preparations during training, the first two training and competency tests to be performed are:
(i) Hand washing per the established procedure
(ii) Garbing and gowning per the established procedure
(iii) Competency in performing these two procedures will be assessed by:
a. Attachment A - Gloved Fingertip and Thumb Sampling Procedures – Initial and Annual
b. Initial sampling - initial competency evaluation, including visual observation and gloved fingertip and thumb sampling on both hands, three separate times. Each fingertip and thumb evaluation must occur after performing a separate and complete hand hygiene and full garbing procedure. Failure of this test is indicated by a CFU count (total number of CFU from both hands) of >0.
c. Ongoing-every six months: gloved fingertip and thumb sampling after performing a media fill test.
d. Hand Hygiene and Garbing Observational Competency: completing an acceptable observational competency per Attachment B
e. If the evaluator determines that the employee's performance is deficient, or if gloved fingertip testing fails (>0 CFU) the evaluator and the employee will develop a written action plan for correction.

(l) Following on the job training in aseptic compounding, aseptic technique observational competency per Attachment C, Aseptic Technique Observational Competency.
(m) Media fill testing in accordance with SOP 18.021, Sterile Compounding Media Fill Test
(n) Cleaning and disinfection of sterile compounding areas in accordance with the appropriate SOPs in section 6. Competency assessment in accordance with "Performance Audit - Sterile Cleaning & Disinfecting Lab Procedures"
(o) Sterilization and depyrogenation procedures in accordance with the appropriate SOPs in Section 8. Competency assessment in accordance with "Performance Audit - Sterilization & Depyrogenation."

c) Sterile compounding personnel must complete the following requirements initially every six months:
i) Media fill testing in accordance with SOP 18.021, Sterile Compounding Media Fill Test
ii) Post media fill gloved fingertip testing per Attachment D - Post Media Fill Gloved Fingertip Testing
iii) If Media Fill Testing or gloved fingertip testing fails (>3 CFU) the evaluator and the employee

will develop a written action plan for correction.

d) **Sterile compounding personnel must complete the following requirements annually:**
   i) Aseptic Technique Observational Competency
   ii) Performance Audit - Sterile Cleaning & Disinfecting Lab Procedures
e) Personnel who do not meet all training requirements and pass the appropriate competency assessments will not compound independently until they do so. A written action plan for correction will be developed and documented in the employee's profile.
f) The above stated will also occur if any serious gaps have been identified in personnel's aseptic techniques in addition to complete retraining of all aspects of compounding.
g) Viable testing will occur monthly which includes air and surface sampling.

10) ATTACHMENTS

Attachment A: Performance Audit of Hand Hygiene and Garbing for Sterile Compounding

Attachment B: Aseptic Technique Observational Competency

Attachment C: Sterile Training Documentation

Attachment D: Viable Air and Surface Testing

Attachment E: SOP AND USP<795> Acknowledgement

Attachment A:

Performance Audit of Hand Hygiene and Garbing for Sterile Compounding - Initial and Annual

Employee Name:
Position:

Directions: A qualified evaluator will check each space for which the person being assessed has acceptably completed the described activity, prints N/A if not applicable or N/O if activity was not observed. The person assessed is immediately informed of all unacceptable activities and shown specific corrections.

Entering Compounding Area

Item	Yes	No
Presents in a clean appropriate attire and manner. Remove personal outer garments (e.g., bandanas, coats, hats, jackets, sweaters, vests, jewelry). Does not enter if sick or exposed to illness.		
Removes all cosmetics because they shed flakes and particles.		
Keep nails clean and neatly trimmed to minimize particle shedding and avoid glove punctures. Nail products (e.g., polish, artificial nails and extenders) must not be worn.		
Wipes eyeglasses if worn.		
Does not wear earbuds or headphones. Does not bring electronic devices that are not necessary for compounding or other required tasks into the compounding area.		
Brings no food of drinks into ante-area or buffer areas		
Is aware of the line of demarcation separating clean and dirty sides and observes required activities.		
Dons shoe covers one at a time, placing the covered or designated show on the clean side of the line of demarcation as appropriate.		
Dons beard cover if necessary.		
Dons head cover assuring that all hair is covered.		
Performs hand hygiene procedure by wetting hands and forearms and washing using soap and warm water for at least 30 seconds.		
Dries hands and forearms using lint-free towel		
Selects appropriately sized gown examining for tears or other defects		
Dons gown and ensures full closure		
Gown sleeves do not contact floor or other surfaces during donning		
Enters buffer room without contaminating hands		
Disinfects hands again using waterless alcohol-based hand rub and allows hands to dry thoroughly without waving or blowing prior to donning sterile gloves		
Dons appropriately sized sterile gloves ensuring that there is a tight fit with no excess glove material at the fingertips		
Examines gloves to ensure that there are no defects, holes, or tears.		

Leaving the Buffer Room

Item	Yes	No
Removes personal protective equipment on the dirty side of the ante area		
Removes gloves and performs hand hygiene		
Removes gown and discards it, or hangs it on hook if it is clean and can be used the same shift		
Removes and discards mask, head cover, and beard cover prior to leaving compounding lab.		
Removes shoe covers when leaving the compounding lab

Attachment B:

Aseptic Technique Observational Competency - Initial and Annual

Employee Name:
Position:

Presterilization Operations

Item	Yes	No
Removes all materials to be used in the Cleanroom from shipping containers that may generate particles, e.g., cardboard or other particulate generating materials.		
Disinfects all items as they cross the line of demarcation or are placed in pass through.		
Ensures that the cart or conveyance that is used to transport components into the cleanroom do not cross the line of demarcation separating the "Clean" side of the Ante area from the "Dirty" side		
Ensures that Immediately before any item is introduced into the clean side of the anteroom or placed into pass-throughs, that the supplies are decontaminated wiping with a non-linting wipe saturated in a sporicidal agent, EPA-registered disinfectant or SIPA. Ensures minimum contact time of the disinfectant according to the manufacturers' directions, validation studies or published data.		
Verifies all necessary supplies for completing the compounding operation are available in the compounding area.		
Verifies all ingredient quantities and expiration dates.		
Performs all presterilization operations in a minimum ISO-8 environment		
Transfers all required materials to primary engineering control in a manner that prevents contamination.		

Sterile Compounding

Disinfects primary engineering control (PEC) and surfaces and equipment per SOPs prior to compounding		
Properly sterilizes all reusable materials prior to compounding in the autoclave. Once sterilized, items are to be properly protected from contamination (i.e., saran wrap open lids) for transportation into the PEC. Uses a biological indicator to ensure properly functioning of the machine used to sterilize all reusable equipment.		
Immediately before any item is introduced into the PEC, wipes items with SIPA using low lint wipers and allows to dry.		
While sterile compounding, routinely disinfects gloves with sterile 70% IPA after touching items or surfaces that may contaminate them, an after re-entering the PEC with hands.		
Verifies amounts/volumes to add using the compounding record.		
Works neatly with all materials in a proper arrangement in the PEC. Does not block first air.		
Ensures syringes, needles, tubing and other sterile disposables remain in their individual packaging and are only opened in the PEC.		
Selects the smallest syringe that can hold a desired amount of solution shall be used in order to maximize accuracy.		
Never be touches: (1) the tip and (2) in inside of the plunger of syringes, or (1) hub or (2) needle.		
Performs sterile manipulations only in the DCA.		

Maintains critical sites in first air. Does not block first air during compounding operations		
Avoids: (a) Leaning into or over the work area (b) Blocking "First Air" between sanitized and/or open containers. (c) Resting hands or forearms on the work area. (d) Coughing over the work area. (e) Rapid movement in the direct compounding area (DCA). (g) Using a PEC as a storage space when not in use. (i) Performing any activities unrelated to compounding		
Disinfects stoppers, injection ports and ampoules with sterile 70% IPA and allows sufficient time to dry.		
Attaches needles to syringe without contact contamination. Avoids touching syringe barrel.		
Does not pick up items any items dropped on floor until sterile compounding operations are complete.		
Punctures vial stoppers and spikes infusion ports without contact contamination. Performs needle punctures with bevel up.		
Applies sterile 70% IPA to the horizontal work surface of the PEC at least every 30 minutes if the compounding process takes 30 minutes or less. If the compounding process takes more than 30 minutes, compounding is not be disrupted and the work surface of the PEC is disinfected immediately after compounding.		
Checks the expiration dates and/or color indicators when using autoclaved equipment.		
Disposes of sharps in a medical waste container without risk of needle sticks.		

Exiting the Cleanroom

Ensure that the cart or conveyance that is used to transport components of CSPs or materials from the Buffer areas do not cross the Line of Demarcation separating the "Clean" side of the anteroom from the "Dirty" side.		

Completed Preparations and Quality Control

Visually inspects finished preparations to ensure appearance is as expected, e.g., inappropriate visible particulates, foreign matters, discoloration, or other defects.		
Visually inspects finished preparations to ensure container-closure integrity such as leakage, cracks in the container, or improper seals.		
Performs other quality control checks appropriately per the Master Formulation record		
Labels preparations correctly.		
Performs final check of ingredients used against compounding record.		
Disposes of waste/sharps appropriately		

Evaluator Comments

Signature of Person Assessed Printed Name Date

Signature of Qualified Evaluator Printed Name Date

Attachment C: Sterile Training Documentation - Initial and Annual

Job Description: _____

Technician/Pharmacist: _____

General Training Requirements

Requirement	Date Completed	Employee Initials
Read and understand USP<797> and other applicable standards and relevant literature.		
Watch OSHA video on reading SDS		
Read and understand procedures related to compounding duties.		
Trained and understands how to interpret Safety Data Sheets (SDS) and if applicable, Certificates of Analysis.		
Trained and understands how to handle and transport of components and compounded sterile preparations		
Trained and understands how to perform pharmaceutical calculations relevant to their assigned duties		
Trained and understands the HD list, location of HD list, and how to access it		
Trained and understands location and use of eye washes and/or showers and spill kits		
Initial Training: Passes gloved fingertip and thumb sampling test 3 times with a CFU of 0.		
Subsequent Training: Passes a gloved fingertip and thumb sampling test after media fill testing with a CFU count ≤ 3		
Acceptably completes a hand hygiene and garbing practices observational assessment		

Employee Signature _____ Date: _____

Evaluator Signature: _____ Date: _____

Attachment D: Viable Air and Surface Testing

For Monthly Air and Surface Testing:

- Attach appropriate sample contact plates label and Certificate of Quality
- Document media serial number and expiration date
- Perform testing starting on site one and precede testing numerically per map ensuring testing is clean to less clean.
- Label with each plate the ID number and date tested.
- Once plates are sampled, place plates face down in a dedicated tote then transport from the sterile suite to tape the samples.
- Ensure the incubator is stabilized at 30°C to 35°C and it is equipped with a secondary temperature sensor. Where the incubators are tracked with alarms 24/7 a paper log is not necessary.
- Insert the plates in the Incubator face down for a minimum of 48 hours.
- Remove the plates carefully, inspect and note the results above.
- Replace samples to be incubated in house a second incubator set to maintain a range of 26°C to 30°C for 5 to 7 additional Days.
- Remove the plates carefully inspect & photo in such a way to clearly prove growth or no growth.
- When removed, the samples or clear photos of the samples shall be thoroughly inspected by Puritechsolutions, CETA number 00011047, who shall provide witness documentation.
- Samples showing growth shall be shipped via overnight delivery to US Micro to perform identification of the organism(s) genus and species. US Micro will provide a written report showing complete results of the identification testing and number of CFUs per sample.
    - The PIC is to be immediately notified if a sample is to be sent out to US Micro.
    - If the results require action, the Board of Pharmacy shall be immediately notified, and production shall be determined per their guidelines.

Attachment E:

SOP AND USP<797> ACKNOWLEDGEMENT

I _____ am stating that I have read and understand the non-sterile compounding standard operating procedures (SOP'S) and will abide by them. I also acknowledge I have read the current version of USP<797>.

By signing this form, I also understand that I could be randomly questioned on my understanding of the SOP'S and it is my responsibility to be familiar with and have a clear understanding of them, and how and where to access them. I understand that if I do not abide by the SOP'S that further training and review will be necessary. I have been provided with an opportunity to ask questions or clarify items related to this review. If I willfully and intentionally do not abide by the SOP'S set forth, management will take necessary disciplinary measures.

Title: Hazardous Drug Personnel Training **SOP # 9.003**
Version # 1.2
Written & Reviewed by: Connor Longo, PharmD. ***Date: 5/1/2024***
Authorized by: Christian Stella, PharmD. ***Date: 5/3/2024***

1) PURPOSE

a) To establish a training program in regards to identification and handling of hazardous drugs.

2) SCOPE

a) This SOP applies to all pharmacy personnel.

3) RESPONSIBILITY

a) The pharmacist in charge or their designee shall be responsible for implementation of this procedure.

4) REFERENCES

a) USP Current Version <800> "Hazardous Drugs –Handling in Healthcare Settings"

b) USP Current Version <795> "Pharmaceutical Compounding - Nonsterile Preparations"

5) DEFINITIONS

a) N/A

6) FREQUENCY

a) Personnel must receive training and competency assessments as required by this SOP prior to personnel independently working with hazardous drugs, whenever a change to the hazardous drugs list, and annually.

7) EQUIPMENT & SUPPLIES

a) N/A

8) GENERAL INFORMATION

a) The training in this procedure is based upon the particular employees' job description.

9) PROCEDURE

a) All personnel who handle or may be exposed to hazardous drugs shall complete and pass initial and annual training:

i) Training requirements:

(1) Read and understand SOP 9.002 Hazardous Communication Program

(2) Trainer will explain HD list, location of HD list, and how to access the HD list.

(3) Watch OSHA video on reading SDS: Watch SDS Video

(a) https://www.youtube.com/watch?v=vCI7XXExs7s

(4) Read and understand SOP 9.043 Accidental Exposure to Hazardous Drugs

(5) Read and understand SOP 9.015 Emergency Eye Wash

(6) Trainer will demonstrate location and use of eye washes and showers

ii) Competency Assessments:

(1) Complete and pass SOP 9.045 General Hazardous Drug Competency Test

b) All personnel required to wear PPE as part of their job duties:

i) Training requirements:

(1) Read and understand SOP 9.014 Respiratory protection

(2) Read and understand SOP 9.012: PPE For Sterile HD Compounding

(3) Read and understand SOP 9.013: Doffing PPE For Sterile HD Compounding

(4) Read and understand SOP 9.010: PPE For Non-Sterile HD Compounding

(5) Read and understand SOP 9.011: Doffing PPE For Non-Sterile HD Compounding

ii) Competency requirements:

(1) Complete and pass SOP 9.050: Sterile Hazardous Garbing Competency Test

(2) Complete and pass SOP 9.049: Non-Sterile Hazardous Garbing Competency Test

c) All personnel required to wear respiratory protection as part of their job duties:

i) Respiratory fit testing will be performed and documented.

d) All personnel which may have to handle HD spills:

i) Training requirements:

(1) Read and understand SOP 9.041 Cleaning Hazardous Drug Spills

(2) Read and understand SOP 9.042 Hazardous Drug Spill Kits

ii) Competency requirements:

(1) Complete and pass SOP 9.048 Hazardous Drug Spill Performance Audit

e) All personnel which receive HDs, package or ship HDs:

i) Training requirements:

(1) Read and understand SOP 9.016 Receiving Hazardous Drugs

(2) Read and understand SOP 9.017 Storage of Non-Sterile HDs and APIs

(3) Read and understand SOP 9.019 Packaging Hazardous Drugs for Dispensing

(4) Read and understand SOP 9.020 Shipping Hazardous Drugs

(5) Read and understand SOP 9.021 Transporting Hazardous Drugs

(6) Read and understand SOP 9.022 Labeling of HD Stock Containers

(7) Read and understand SOP 9.024 Finished and Exempt Dosage Forms

ii) Competency requirements:

(1) Complete and pass SOP 9.046 Hazardous Drug Compounding Competency Test

f) All personnel who work with engineering controls related to HDs:

i) Training requirements

(1) Read and understand: SOP 9.005 Monitoring Pressures of Sterile Hazardous Drug Compounding Areas

(2) Read and understand SOP 9.006 Monitoring Pressures of Non-Sterile Hazardous Drug Compounding Areas

(3) Read and understand SOP 9.007 Monitoring Pressures of Hazardous Drug Storage Areas

(4) Read and understand SOP 9.029 BSC Safety

ii) Competency requirements:

(1) Complete and pass SOP 9.045 General Hazardous Drug Competency Test

(2) Complete and pass SOP 9.046 Hazardous Drug Compounding Competency Test

(3) Complete and pass SOP 9.051 Engineering Control Competency Assessment

g) All personnel who compound HDs:

i) Training requirements:

(1) Read and understand SOP 9.025 Compounding techniques – Non-sterile Hazardous Drugs

(2) Read and understand SOP 9.026 Compounding techniques – Sterile Hazardous Drugs

(3) Read and understand SOP 9.027 HD Facilities for Non-HD Compounding

(4) Read and understand SOP 9.028 Transporting Hazardous Drugs Through a Non-hazardous Buffer Room (If applicable)

ii) Competency requirements

(1) Complete and pass SOP 9.045 General Hazardous Drug Competency Test

(2) Complete and pass SOP 9.046 Hazardous Drug Compounding Competency Test

(3) Complete and pass SOP 9.052 Non-Sterile HD Compounding Performance Audit

(4) Complete and pass SOP 9.053 Sterile HD Compounding Performance Audit

h) All personnel who receive HDs, compound with HDs or clean and maintain HD compounding facilities:

i) Training requirements:

(1) Read and understand SOP 9.031 Deactivating and Disinfecting Sterile Compounding BSCs

(2) Read and understand SOP 9.032 Deactivating and Disinfecting Sterile Compounding BSC Work Surfaces

(3) Read and understand SOP 9.034 Deactivating and Disinfecting Under Sterile Compounding BSC Work Surfaces

(4) Read and understand SOP 9.037 Deactivating and Disinfecting Sterile HD Compounding Areas

(5) Read and understand SOP 9.038 Deactivating and Cleaning of Non-Sterile BSCs

(6) Read and understand SOP 9.036 Deactivating and Cleaning Non-sterile HD Compounding Areas

(7) Read and understand SOP 9.039 Deactivating & Cleaning HD Receiving Areas

(8) Read and understand SOP 9.040 Deactivating and Cleaning HD Storage Areas

ii) Competency requirements:

(1) Complete and pass SOP 9.047 Deactivation and Decontamination Competency Test

(2) Complete and pass SOP 9.054 Deactivating and Disinfecting Sterile HD Compounding Areas Competency

(3) Complete and pass SOP 9.055 Deactivating and Disinfecting Non-Sterile HD Compounding Areas Competency

i) Upon completion of the above, all personnel are required to take and pass the Hazardous Drugs Exam, found in SOP 9.056, acknowledge Hazard communication and employee training document in SOP 9.002, and to sign the FM-11 Hazardous Drug Handling and Exposure Acknowledgement, to confirm and document their understanding.

Title: Telehealth Company Drug Shipping **SOP #12.001**
Version #1.0
Written & Reviewed by: Connor Longo, PharmD. ***Date: 7/1/24***
Authorized by: Christian Stella, PharmD. ***Date: 7/1/24***

1) PURPOSE

a) To ensure that medications are delivered to the patient or health care facility quickly and in a manner, such that the product integrity, quality, safety, and efficacy are not compromised.

b) To ensure timeliness of shipping prior to administration date

c) Ability to track shipping/delivery

d) Plans to notify patient of shipping delays

e) Processes are in place to ensure continuous supply of medication if package is lost or delayed

2) SCOPE

a) This procedure applies to all employees involved in the shipping and delivery of medication.

3) RESPONSIBILITY

a) The Pharmacist-in-charge or their designee will be responsible for implementation of this procedure.

4) REFERENCES

a) USP Current Version <795> "Pharmaceutical Compounding – Non-Sterile Preparations"

b) Applicable Board of Pharmacy rules and regulations

c) Data/literature regarding stability and storage requirements for the particular product(s) being shipped

5) DEFINITIONS

a) N/A

6) FREQUENCY

a) This procedure shall be followed for each prescription filled for shipment

7) EQUIPMENT & SUPPLIES

a) Compounded preparation(s) and appropriate equipment/devices if necessary

b) Appropriate medication container and label

c) Delivery vehicle, detailed delivery instructions

d) Appropriate shipping containers, ice packs and methods to ensure integrity

e) Signature log sheet or electronic log

f) Shipping tracking instructions

8) GENERAL INFORMATION

a) N/A

9) PROCEDURE

a) The responsible personnel shall assure that the compounded preparation is properly delivered to the patient or health care facility without compromising the product integrity, quality, safety and efficacy.

b) All medications shall be delivered/shipped in appropriate containers that will protect the preparation from wide variations in temperatures, structural damage, or UV light when appropriate.

c) Before any medication for shipping, delivery, or pick up is packaged it is to be checked by a pharmacist to ensure that the right medication is in there (via checking batch/lot numbers for compounding medications), ensure that the quantity is correct, it is for the right patient, contains appropriate informational handouts, that it is going to the correct address, and if the shipment will be going out with overnight shipping if it is requested.

d) For telehealth companies that provide prescriptions for controlled substances of any schedule, the telehealth company provides the pharmacy with their specific requirements when it comes to the option of "signature required" upon shipping.

a) If the telehealth company requires that "signature required" is to be on all of their prescriptions, then the pharmacist checking the prescription will ensure that "signature required" is on all shipping labels for that telehealth company.

b) Controlled substances of any schedule are to be packaged in a way to make the package inconspicuous to prevent diversion as well as having a tamper evident seal. In the case of a troche or rapidly dissolving tablet, they are to be placed inside a child resistant bag prior to being sent out.

c) When checking prescriptions, the pharmacist is to toss the unused portion of the prescription label and dispose of it in a HIPPA compliant bin. This bin is outsourced for shredding and proper disposal in a HIPPA compliant manner.

e) All medications that are being shipped and delivered will have a tracking number attached to the prescriptions electronic page to reference at any time. The tracking numbers will be active on the appropriate third-party website for shipping i.e. FedEx or USPS.

f) Shipping into some states requires special temperature monitoring devices. When required, these will be included in the appropriate packages.

g) The patient or authorized recipient signature shall be recorded on the delivery receipt when the product is delivered, and a copy shall be left with the recipient. (Signature required packages will be sent through UPS only and will NOT be delivered locally)

a) Some patients may prefer to have their packages left at the door or some other location on the premises. In this case the driver will make a notation on the delivery log.

b) When medications are left at the door or other location on the premises, the driver must be cognizant that the medication is relatively secure and not subject to harmful temperatures.

h) The local driver shall check the package for any leakage or damage that may occur during delivery.

i) Instructions for proper inspection of the preparation will be transmitted to the patient or caregiver prior to delivery of the package.

j) When shipping medications and related devices, a packing slip and or receipt listing the contents, charges, and payment type shall be included in the shipping container.

a) Drugs, which must remain at cold temperatures will be shipped in insulated containers with the number/size of cold packs recommended by the vendor or verified in shipping tests performed by the pharmacy.

(1) The winter packing method was determined based on cold chain shipment testing that occurred on March 27, 2024, in which 1 shipment was sent per state to (3 total shipments) Minnesota, Maine, and Idaho. These tests were performed with 2x12oz Frozen ice packs, and 2x6oz ambient ice packs in a metallic mailer. Testing yielded results between 0 and 8 degrees Celcius from 31.5 hours to 46 hours.

b) Utilize time-temperature indicators, both warm and cold, in the package to ensure that the storage conditions have been met throughout the shipment route, when required.

(1) When packages are shipped with temperature monitoring devices written instructions regarding the temperature monitoring device will be included in the package.

(2) Follow up with the receiver to ensure that the package arrived in good condition and within acceptable storage conditions range.

(a) In the event that the shipment was exposed to temperature excursions, the indicator will signal such to the customer, which will render the product as unusable.

c) The shipping log/shipping documentation from USPS, USP, FedEx shall serve as the patient signature and receipt of shipment.

d) Shipping medications in the summer/winter may create special shipping problems. The responsible person should determine if heat or freezing can harm the contents of the shipment.

(1) If so, shipping may require alternate packaging methods (warm packs, ice packs, insulated packaging, etc.).

e) The responsible person should proactively identify weather conditions that may lead to a possible delay by referencing UPS, FedEx, and/or Weather.com.

k) Storage instructions shall be provided to the patient or caregiver to ensure that the product is stored appropriately at the patient's home or at the health care facility. Patients will be reminded not to leave their medication in their car during hot or cold months.

l) In the event of a shipping delay

a) The patient can expect the medication to arrive on time and undamaged. When shipping problems occur due to inclement weather or other natural disaster, the PIC will make every effort to arrange either a second delivery or transfer of the prescription to a pharmacy nearer the patient or to an area unaffected by the weather.

b) The PIC will contact the prescriber and discuss medication therapy management and what problems, if any, the delay in shipping may cause the patient.

(1) If the medication is of a serious nature such as HIV therapy, acute illness or similar, the PIC will make arrangements to have the medication delivered to the patient as soon as possible, including necessary interim doses, via the fastest method, including having the prescription filled at the patient's local pharmacy of choice.

(2) The PIC will follow up with the patient and prescriber and document in the patient's medication record

m) During times of inclement weather, holiday shipping, or pharmacy dispensing problems the patient will be contacted to discuss the potential for a delay.

n) Communications regarding delays will be noted in the patient chart

o) **Lost, Stolen, Delayed, or Diverted Shipments**

a) If it is brought to an employee's attention that a shipment or delivery is lost or delayed the following is to occur;

(1) The tracking number is to be referred to ensure that this is the case

(2) Once confirmed the third party involved is to be contacted and an investigation into the package's whereabouts is to be conducted

(3) If the third party deems the package lost, a claim is to be filed for the lost package

(a) In this instance, the medication is to be remade and sent to the patient

(b) In the case of a controlled substance, the prescribing physician is to be contacted to explain what happened and to receive a new, valid prescription for the medication

(4) If the third-party deems the package is delayed and will be arriving to the patient soon, the patient is to be informed

(5) If the third-party deems that the package is delayed and cannot give a timeframe of when it will reach the patient, the package is to be rerouted to be returned to the pharmacy while a replacement medication is sent to the patient immediately.

(a) In the case of a controlled substance, the pharmacist is to contact the prescribing physician to explain what happened and to receive a new, valid prescription for the medication

b) If it is brought to an employee's attention that a shipment or delivery has been stolen, a police report is to be filed immediately. The report is to be maintained for the pharmacy's records. Once the police report deeming the theft has been obtained, the medication is to be remade and resent to the patient with "signature required"

(1) In the case of a controlled substance, a DEA Form 106 is to be filed as well. A pharmacist is then to contact the prescribing physician to explain what happened and to receive a new, valid prescription for the medication.

p) Returned Medications

a) If a patient wishes to return a medication, they are to be provided with a return label generated via the third party's website that can be mailed or faxed to their home, and documented in the pharmacy software.

(1) In the case of a controlled substance, the return needs to meet the requirements set forth in the DEA Pharmacist's Manual;

(a) the inner container of any parcel containing controlled substances is marked and sealed as required by the provisions of the CSA and its implementing regulations, and is placed in a plain outer container or securely wrapped in plain paper

(b) If the controlled substance consists of prescription medicines, the inner container is also labeled to show the name and address of the pharmacy, practitioner, or other person dispensing the prescription

(c) The outside wrapper or container is free of markings that would indicate the nature of the contents

b) If a medication is returned, the store manager is to obtain the packages and quarantine all drugs as they are no longer suitable for dispensing once they leave the pharmacy even if they are seemingly untouched, as per New York State law. The patient's prescription record is to reflect the return of medication and the prescription is to be reversed.

(1) Returned items are to be properly inventoried to ensure all that was returned has been removed and destroyed. when placed into inventory, all PHI is to be removed from the drugs/devices. The original inventory record is to be maintained on site. Once given to the reverse distributor, the inventory is to be promptly updated.

(2) The Pharmacy will use a third-party reverse distributor to destroy all returned medications and devices.

(a) The reverse distributor used by the pharmacy must be an authorized reverse distributor. The store manager is to ensure this by verifying the reverse distributors' state and federal licenses prior to using them. Records of this are to be maintained and verified quarterly.

(b) Prior to the drugs/devices being given to the reverse distributor, the store manager is to check that all PHI is to be removed from the drugs/devices, which should have been completed prior to going into inventory.

(c) The pharmacy is to provide the reverse distributor with a copy of the inventory record.

(d) The reverse distributor is to send the pharmacy a certificate of destruction, which the pharmacy will maintain for its records.

(i) The certificate of destruction should state the means of destruction and she be provided to the pharmacy no more than three months from the shipment of the return to them

(ii) The store manager is to keep an inventory log and calendar of all items sent to the reverse distributor and monitor that the certificate of destruction has been received. If it has not, the store manager must request the certificate of destruction from the reverse distributor.

Preferably this is to be done two weeks prior to the three-month end date to allow time to receive the certificate before the three months have passed.

Packing Instructions:

Packing Cold or Frozen Items:

- The item goes into either a insulated box or insulated sac
- The box or sac is then packed with ice packs stored in the freezer dedicated for shipping ice packs along with the item as well as any required additional items
    - o i.e an applicator, oral syringes, dedicated instructional sheets, patient information sheets
- The box or sac is appropriately sealed with tape
- The shipping label is affixed to the box or sac
- A international sa fe handling label, "Refrigerate Do Not Freeze," is affixed to the box or sac
- All cold or frozen items are not taken out of the refrigerator/ freezer until the end of the day to ensure that it experiences the least amount of time out of the refrigerator/freezer
- Once removed from the refrigerator/freezer these items are to be packed ASAP to ensure they maintain their required temperature

Packing Normal Temperature Items:

- The item goes into either a box or a bubble mailer
- The box or bubble mailer is then packed with the item as well as any required additional items
    - o i.e an applicator, oral syringes, dedicated instructional sheets, patient information sheets
- The box or bubble mailer is appropriately sealed with tape
- The shipping label is affixed to the box or bubble mailer

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✓
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I, Jeriann Stella, **certify that as the designated representative for**

Precision Compounding Pharmacy and Wellness,

that I (initial that you have read and meet the following requirements) (NAC 639.5005, NAC 639.5935):

1. X I am at least 21 years of age;
3. X I have been employed for at least 6,000 hours in a pharmacy or with a wholesaler in a capacity related to the dispensing and distribution of, and recordkeeping related to, prescription drugs.
4. X I will be actively involved in and aware of the actual daily operations of the pharmacy or wholesaler;
5. X I will be employed full-time in a managerial level position with the pharmacy or wholesaler;
6. X I will be physically present at site of the pharmacy or at the facility of the wholesaler during regular business hours, except when the absence of the representative is authorized, including sick leaves, vacation leaves and other authorized absences; and
7. X I will serve in this representative capacity for only one pharmacy or wholesaler at a time.

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		✓
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?		✓
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?		✓
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Business Licensure Information for State of Residence and Federal

(board of pharmacy, state controlled substance, DEA, FDA, etc)

License/Registration Agency	Business Name on License/Registration	Registration/License Type	Registration/License Number & Expiration Date
New York State Board of Pharmacy	Precision Compounding Pharmacy and Wellness	Pharmacy	39041 Exp: 10/31/2024
Drug Enforcement Administration	Precision Compounding Pharmacy and Wellness	Controlled Substance - Pharmacy	FP0999637 Exp: 3/31/2027

Inspector Notes: Non-resident licenses are held in AK, AZ, CA (NS only), CO, CT, DE, DC, FL, GA, HI, ID, IL, IN, IA, KS, LA, ME, MD, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, OH, OK, OR, PA, RI, SD, TN, TX, UT, VT, VA, WA, WV, WI, and WY. This pharmacy compounds non-sterile, non-sterile hazardous and non-hazardous sterile products in multidose vials and ships via UPS and USPS to the states noted above and within NY. The pharmacy ceased sterile hazardous compounding approximately 8 weeks ago, and has no plans to resume at this time. While the pharmacy does not participate in primary telepharmacy, prescriptions filled may be provided by patients and prescribers participating in telemedicine processes. Please see Doc01_PI for a list of telepharmacy partners which include the following: Advitam, Better U Care, CHOOSE KETAMINE, Innerwell, Journey Clinical, Mindbloom, VikingMan, Aspect, Wittmer Rejuvenation Clinic, Brittany Kelly NP Family Health PLLC, Corrective Wellness, Dynamic Health Solutions, Evolved Science, Ketadash/Synergy Health, Moment Health, TCT, Algo, Bask Health, BMI MD, EDEN, IvyRX, AgelessRX, Huge Rx, Matrix Hormones, SAFERPHARM, VeriNew, Weight Loss Ventures(Kinlife), LLC, EVVY, Hone Health, LifeForce, Male MD, Midi, WISP, and Maximus Tribe. The due diligence for the pharmacy includes using BulaLaw to verify state laws related to telepharmacy and Verifiable to review the license status of all providers on a monthly basis. All telemedicine companies are required to complete an account set-up form which includes a list of all providers to be reviewed, their license information, and the telemedicine compliance structure which is vetted including all investors in the company. The PIC stated they have only a 20% acceptance rate for telemedicine companies applying for partnership. A Zoom call is also required for account set-up. Please see Doc02_PI for the due diligence requirements for telehealth companies, Approximately 50% of the ketamine and testosterone prescriptions are from the telemedicine partners. The balance is from NY and NJ prescribers. Prescriber notes may be sent by the prescriber or may be requested by the pharmacy. Sildenafil accounts for approximately 2% of the pharmacy prescription volume, with the major use as a component in vaginal creams. The major use of testosterone is in non-sterile compounding as a component with estriol and estradiol. PharmSaver is not currently used and has not been a source of supply for 18 to 24 months. The only WD used is McKesson. All APIs are purchased from major manufacturers and repackagers as noted in the report. Assessing and trending QREs takes place during the quarterly CQI review. There is no insulin stocked and there was no ReliOn insulin observed. There are no biologicals compounded. Semaglutide is compounded using semaglutide base. Please see Doc03_PI for the MFR, CR, and CoA for a semaglutide compound (SeePhoto01_PI and Photo02_PI for photos of semaglutide base package label). The PIC stated there are no platforms used that are a marketplace for pharmacies to buy, sell and bid on overstock and short date prescription drugs.

Documents collected as part of the inspection.
To obtain a copy of these documents please contact the facility directly. They are not included in the final report.

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
General Pharmacy			
1.00	Is the PIC (or pharmacy manager/director) present for the inspection? *If no, list the pharmacist on duty.*	Yes	
2.00	Is the PIC employed full-time at the pharmacy? *List the number of hours worked per week onsite.*	Yes	The PIC is onsite approximately 45 hours per week.
3.00	Are there any other businesses located at this address? *If yes, note type of business and name.*	No	
4.00	Does the pharmacy have any other websites? *Provide list of other names/URLs.*	No	
4.01	Does the pharmacy hold .pharmacy verification?	No	
5.00	Do any other websites link to the pharmacy website (such as a provider, or other affiliate)? *If yes, list.*	Yes	Vetmedics Compounding Pharmacy in Ronkonkoma, NY and Precision Compounding Pharmacy (South) in Tamarack, FL are affiliates which link to the website.
6.00	Does the pharmacy allow patients to securely enter/update profile and medical information through the website (such as through a secure patient portal)?	No	
7.00	Are patients able to order or refill prescriptions through the website? *If yes, describe.*	Yes	Refill requests may be submitted by completing a form using the prescription number.
8.00	Are photographs allowed during the inspection (no PHI)?	Yes	
9.00	List of additional personnel **interviewed as part of the inspection, including name and title:**		Christian Stella and Lisa Capriola were interviewed.

		Observation	Notes
Types of Practice Additional Questions	**If any part of a question is no, enter "No" and explain the observation.**		
10.00	If the pharmacy mails or delivers filled prescriptions (patient specific, labeled with patient name when it leaves the pharmacy), are any of the deliveries to a provider or facility for administration to the patient? *If yes, indicate volume or percentage of deliveries going to a provider or facility in this state, and volume or percentage of deliveries going to a provider or facility in other states.*	No	
11.00	Does the pharmacy provide prescription products to a provider or facility for "office use" (not pursuant to a prescription received prior to delivery, not patient specific, not labeled with the patient name)? *If yes, indicate volume or percentage provided to a provider or facility within this state, and volume or percentage provided to a provider or facility in other states.*	No	
12.00	Does the pharmacy provide prescription products to providers or facilities (including other pharmacies) as a wholesale distributer (sold to the provider or facility for their use, administration, or providing/dispensing to patients)?	No	
13.00	If yes, is the percentage of product distributed at wholesale to providers or facilities within this state less than 5%? *Indicate actual percentage and if the percentage is based on number of units, number of prescriptions, dollar volume of total sales or dollar volume of prescription sales.*	N/A	
14.00	If yes, is the percentage of product distributed at wholesale to providers or facilities in other states less than 5%? *Indicate actual percentage and if the percentage is based on number of units, number of prescriptions, dollar volume of total sales or dollar volume of prescription sales.*	N/A

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
General Operations and Licensure	**If any part of a question is no, enter "No" and explain the observation.**		
15.00	Are pharmacy licenses, permits, and registrations (state, controlled substance, DEA, etc) posted in customers' view and current? *If no, provide details such as closed-door pharmacy, expired licenses, etc.*	Yes	
16.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	Yes	The last inspection report by NY was dated 3/27/2024. There appear to be no scheduled inspections in NY.
17.00	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	Yes	The HD buffer room was not negative pressure at the time of the inspection. The room was deactivated and has not been used since that time. HVAC, the environmental certification company, came in and adjusted the airflow, however, the room has not been used since the inspection and will likely be converted into a non-hazardous sterile compounding buffer room.
18.00	Does the pharmacy hold ANY wholesale, distributor, or manufacturer licenses? *Document information in the license grid above for Resident State and in the Notes for Non-Resident States.*	No	
19.00	Has this pharmacy been inspected by any other state for which it holds a license? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	No	
20.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the exemption or restriction.*	No	
21.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the waiver or variance.*	No	
22.00	Does the pharmacy have any additional restrictions, limitations, or waivers with regards to any federal licenses or registrations (FDA, DEA, etc)? *If yes, note the agency and additional item.*	No

		Observation	Notes
23.00	Has the pharmacy been inspected or visited by the DEA? *If yes, indicate the inspection/visit date and note any deficiencies. Also note how frequently the pharmacy is inspected/visited by the DEA.*	No	
24.00	Has the pharmacy been inspected by the FDA? *If yes, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	No	
25.00	Does the pharmacy hold any accreditations or certifications? *If yes, indicate which and collect most recent date of survey.*	Yes	NABP Compounding Pharmacy Accredited
26.00	Has the pharmacy held any accreditations or certifications in the past that they no longer hold? *Provide a list and the reasons for such.*	No	
27.00	Does the pharmacy perform patient lab testing such as blood glucose tests, cholesterol tests, etc? *Verify that the lab director is current (usually the PIC is the lab director named). If yes, record the Clinical Laboratory Improvement Amendments (CLIA) waiver information, expiration date, and the name of lab director listed.*	No	
28.00	Does the pharmacy maintain all required records, including but not limited to prescription files and invoices on site? *Record how long records are kept. If not on site, where?*	Yes	Records are maintained for 5 years.
28.01	Are written and verbal prescriptions (reduced to writing) kept on site for the entire retention period? *If not, explain including how long they are stored on site?*	Yes	
28.02	Are electronic prescriptions (such as fax, e-scripts) kept on site for the entire retention period? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	These records are maintained electronically for 5 years or more.
28.03	Are all dispensing records (such as refills, verifications, DUR overrides) kept on site for the entire retention period? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	These records are maintained electronically for 5 years or more.
28.04	Are there systems in place to prevent a pharmacy record from being deleted after the prescription has been dispensed? *Describe how they are kept (electronically or printed and kept in hard copy).*	Yes	These records are maintained electronically for 5 years or more.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
28.05	If record are stored off site are they secure in a HIPAA compliant manner and readily retrievable?	Yes	
29.00	Is there a statement in the P&P, or are other means used to ensure that the most stringent laws/regulations are followed? *Describe system details.*	Yes	This is part of P & P.
	Personnel **If any part of a question is no, enter "No" and explain the observation.**		
30.00	Are all pharmacist, pharmacy intern, and pharmacy technician (if applicable) licenses or registrations with the board current and in good standing? *Describe how this is documented.*	Yes	This is documented in a spreadsheet with the date issued, and the license expiration dates. A physical copy of each license is printed from the primary source verification website and maintained in the personnel file.
31.00	Is there a process for periodic verification of validity of licenses? *Describe the process.*	Yes	Primary source verification is completed annually and documented in the personnel record.
32.00	If pharmacists are providing patient services that require additional training or certification, are they appropriately trained and certified? *(Immunization, CPR, MTM, etc.). Mark NA if no patient services that require additional training/certification. If yes, list certifications and if current?*	N/A	
33.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Mark N/A if not required by resident state. Indicate ratio used and the maximum number of staff who work at the same time.*	Yes	The NY maximum technician ratio is 3:1. The maximum number working at any time in this pharmacy is 10 technicians and 6 pharmacists.
	Facility and Security **If any part of a question is no, enter "No" and explain the observation.**		
34.00	Does the pharmacy have a working security/alarm system in place? *If yes, describe.*	Yes	The security system is managed by Century and consists of magnetic door sensors and motion detections devices. A skylight in the NS area has a glass break sensor. The front door is a hard key lock. The back door requires a hard key and an electronic key fob. A keypad arms and disarms the system. Three pharmacists have a unique PIN to disarm the system. Alarms are sent to the PIC by text, phone call and email. Notifications go to the other two pharmacists and a another shareholder if there is no response from the PIC.

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
35.00	Are Schedule II controlled substances secured in a locked cabinet or safe? *If not, describe how controlled substances are secured or stored.*	Yes	CII drugs (only testosterone, a CII drug in NY) are in a locked cabinet available only to the supervising pharmacist (PIC).
36.00	Are there contingency plans in the event the pharmacy cannot be secured? *Describe how the drug products will be secured and handled.*	Yes	Local police are contacted and a pharmacist would stay on site until security is restored or until drugs can be relocated to one of the affiliate pharmacies.
37.00	Is the pharmacy clean and sanitary, and is there appropriate space for the prescription volume? *Look for clutter, or crowded counters or stacks of prescriptions to be checked. If no, document with photo.*	Yes	
37.01	Is the working area well lit and free of tripping hazards? *If no, document with photo.*	Yes	
37.02	Is there a sink with hot and cold running water?	Yes	
37.03	If the pharmacy destroys prescription products on site (such as expired, damaged, recalled, etc), do they appropriately document the destruction? *View destruction logs. Mark NA if no destruction on site.*	N/A	There are no drugs destroyed onsite.
37.04	Does the pharmacy return prescription products to the manufacturer, distributor, or send to a reverse distributor for destruction? *If yes, indicate name of reverse distributor used.*	Yes	The reverse distributor is Cyntox LLC in NY, NY.
37.05	Does the pharmacy have a hazardous waste handling and collection system? For example, empty bottles that contained chemotherapy medications or warfarin, or hazardous drug compounding waste. *If yes, indicate how often the bin is emptied/collected and the vendor used.*	Yes	Cyntox picks up hazardous waste on an on-call basis.
38.00	Does the pharmacy have a private area for patient counseling and providing patient services? *Describe.*	Yes	The patient lobby is sectioned off with privacy panels for counseling.
39.00	Is temperature in the drug storage area maintained to provide controlled room temperature of 20° to 25°C (68° to 77 °F), or more restrictive if warranted by specific drug product storage requirements? *Describe. Record the temperature at the time of inspection.*	Yes	The temperature is thermostatically controlled by staff. The current temperature is 68 degrees F.

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
39.01	Is temperature monitoring in place to detect any excursions (24/7) by continuous monitoring or retroactive detection using min/max? Temperature records are maintained. *If yes, describe the process*	Yes	A HOBO system electronically monitors and records the CRT area temperature.
39.02	Are excursion action plans in place including evaluating excursion effects on drug product integrity?	Yes	Product is quarantined and sent out for testing if integrity is questionable.
40.00	Are the refrigerator and freezer restricted to drug products only (no food)?	Yes	There is no frozen product.
41.00	Does the pharmacy have a process for how the refrigerator temperature is monitored for excursions 24/7? *If yes, describe the process. Indicate range. How are excursions detected? How long are records maintained?*	Yes	SensoScientific electronically monitors and records the temperatures in the refrigerators. The range is 36 to 46 degrees F. Excursions are sent to the VP of Compliance by a phone app. Records are maintained infinitely.
41.01	Is the temperature in the refrigerator within the USP range (2°-8°C or 36°-46 °F) or as specified by FDA approved labeling for drug product storage? *Record the temperature of the refrigerator at the time of inspection.*	Yes	The refrigerator temperatures are currently 37.4, 37.6, 36.1, 41.5, and 39.4 degrees F.
42.00	Does the pharmacy have a process for how the freezer temperature is monitored for excursions 24/7? *If yes, describe the process. Indicate range. How are excursions detected? How long are records maintained?*	N/A	
42.01	Is the temperature in the freezer within the USP range (between −25° to −10°C or −13° to 14 °F) or as specified by FDA approved labeling for drug product storage? *Record the temperature of the freezer at the time of inspection.*	N/A	
43.00	Are there contingency plans in the event of power outage or refrigerator/freezer failure? *Describe process.*	Yes	There is an onsite portable generator which will power the entire building. There are multiple refrigerators allowing product to be moved to a working appliance.
44.00	Are there contingency plans in the event of heating or air conditioning failure? *Describe processes.*	Yes	There are multiple heating and air-conditioning units which can handle HVAC for the entire facility. Cambridge AC located in Bensonhurst, NY is on call for emergencies.
45.00	Is there a plan of action if there are any temperature or humidity excursions to determine if the integrity of the products has been compromised?	Yes

		Observation	Notes
46.00	Does the pharmacy utilize any automated apparatuses for prescription processing/counting (such as robotics, Baker cells, etc)? *List numbers and types.*	No	
46.01	If yes, do they have and follow policies and procedures addressing cross-contamination and identification of drug products?	N/A	

Product Receipt and Inventory

If any part of a question is no, enter "No" and explain the observation.

47.00	Does the pharmacy have a documented process for establishing sources (vendors) of prescription drugs? *Describe.*	Yes	All vendors must be properly licensed in their home state and New York. State and federal inspections for the vendor are reviewed.
47.01	Does the pharmacy purchase all prescription drugs directly from the manufacturer?	No	
47.02	Does the pharmacy purchase (obtain) prescription drugs from other pharmacies? *If yes, list pharmacy source information, and circumstances leading to the purchase.*	No	
47.03	Does the pharmacy purchase (obtain) prescription drugs from wholesale distributors (non-manufacturer sources)? *List non-manufacturer sources.*	Yes	McKesson, an NABP accredited wholesaler, is the single source of prescription drugs.
47.04	Does the pharmacy require wholesale distributor sources to purchase prescription drugs directly from the manufacturer? *If yes, how is this verified?*	No	The single source of prescription drugs is McKesson, an NABP accredited wholesaler. There is no verification of all McKesson purchases from the manufacturer.
47.05	Does the pharmacy purchase drugs from wholesale distributors that purchased the drug from other wholesale distributors? *If yes, Describe the due diligence steps to determine the source's legitimacy and legitimacy of the drugs sold by the vendor. (For instance, does the pharmacy examine transaction histories and limit the number of movements of drugs between wholesale distributors, and look for pharmacies in the supply chain?)*	No

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
47.06	Does the pharmacy determine that all sources listed on transaction histories have requisite state licensing? *If yes, describe the process.*	Yes	DSCSA drugs are purchased only from McKesson which is an NABP accredited wholesaler.
47.07	Does the pharmacy determine that all sources listed on transaction histories have reported to FDA's Wholesale Distributor database? *If yes, describe the process.*	Yes	DSCSA drugs are purchased only from McKesson which is an NABP accredited wholesaler.
47.08	Does the pharmacy have a process to handle suspect and illegitimate product investigations? *If yes, describe the process.*	Yes	The product is quarantined and the source is contacted for an investigation.
47.09	Has the pharmacy conducted any suspect or illegitimate product investigations? *If yes, describe the details, including the drug, circumstances, outcome, and identification of agencies to whom reported.*	No	None to date.
47.10	Does the pharmacy ensure transaction data (transaction history, transaction information, transaction statement, also known as 3T data) is received at the same time or before the product is received? *Examine recent purchases to determine if the pharmacy is receiving and maintaining 3T data for a minimum of 6 years.*	Yes	McKesson is the sole supplier of prescription drugs, other than APIs, and provides all transaction data electronically.
47.11	Does the pharmacy have a procedure to verify product (suspect or illegitimate) including quarantine of product and reporting?	Yes	
48.00 _	Does the pharmacy utilize paper DEA-222 forms to procure Schedule II substances? *If yes, how are they secured? Who has the authority (Power of Attorney) to sign the DEA-222 forms?*	N/A	The only CII product used is testosterone API which is a CII only in NY. Orders may be placed only by the PIC, but it is not purchased via CSOS or DEA From 222.
49.00	Does the pharmacy utilize CSOS (electronic Schedule II ordering) to procure Schedule II substances? *If yes, who can place orders in CSOS?*	N/A	The only CII product used is testosterone API which is a CII only in NY. Orders may be placed only by the PIC, but it is not purchased via CSOS or DEA From 222.
50.00	Is the receipt of Schedule II orders documented appropriately? *DEA-222 has the quantity and date on each line of product received, the CSOS record (electronic or paper printout) indicates verification of receipt and staff performing verification.*	N/A

		Observation	Notes
51.00	Are invoices for controlled substances (Schedules I-V) that are received filed separately and are the invoices signed/initialed and dated upon receipt and every item checked in?	No	There is no date and signature or initials of the person checking the order.
52.00	Are all orders received when the pharmacy is open? *Verify the orders are brought directly to the pharmacy still sealed and not delivered before the pharmacy is open.*	Yes	
53.00	Does the pharmacy purchase any compounded products from other entities for dispensing to patients? *If so, describe which products and from where they are purchase (collect name and license of other entity).*	No	
54.00	Does the pharmacy have a system in place to track prescription drug products in order to detect diversion or theft? *Describe (for example, inventory or shrink report tools used, perpetual inventory in computer, etc).*	Yes	A perpetual inventory is in place and is reconciled monthly.
54.01	Are incidents of diversion or resignation/termination of personnel for cause reported? *Indicate agencies/law enforcement to whom reports are made.*	Yes	Diversion would be reported to the PIC and the corporate controller. The local police, the board of pharmacy and the DEA may be contacted if appropriate.
55.00	Does the pharmacy keep a perpetual inventory log of all Schedule II controlled substances (including APIs, if applicable)?	Yes	
56.00	Is the Schedule II perpetual inventory log reconciled regularly? *Indicate how often the Schedule II controlled substances are counted. View the perpetual log and verify that reconciliation is taking place.*	Yes	The CII perpetual inventory (testosterone API) is reconciled monthly and quarterly.
57.00	Is the most recent complete controlled substances inventory available for review? *Indicate the date of the last inventory and frequency taken (minimum every two years).*	Yes	The printed copy of the complete CS inventory has no date or signature of the pharmacist taking the inventory. There inventory is completed monthly and quarterly, and maintained for the DEA every two years.
57.01	Does the pharmacy maintain other required inventories (such as change in PIC, theft/loss, etc)?	Yes

		Observation	Notes
58.00	Does the pharmacy stock and sell OTC pseudoephedrine (and/or ephedrine) products? If yes, indicate if the sale is recorded electronically or manually in a logbook.	No	
58.01	Are these products mailed, sent, or delivered into other states? *View logs. If yes, list the other states.*	N/A	
59.00	Does the pharmacy stock and sell other OTC restricted products for which ID is required and a log kept of the sale? *If yes, indicate product types.*	No	
59.01	Are these products mailed, sent, or delivered into other states? *View logs. If yes, list the other states.*	N/A	
60.00	Are outdated, damaged, or recalled products segregated? *If yes, how often does the pharmacy check for out-of-date products? Does it include OTC products?*	Yes	Product is reviewed monthly for expiration dates. There are no OTC products. Short date product is pulled from saleable stock when 30 days from expiration.
60.01	Are all drugs within active-stock within expiration date? *Examine shelves, refrigerator and freezer.*	Yes	
60.02	How often is active-stock examined for drugs past the expiration date?		Stock is examined monthly.
61.00	Does the pharmacy **prepackage** bulk containers of prescription medications into smaller containers for ease of use? *What BUD is used on the prepackaged container?*	No	
62.00	Does the pharmacy **prepack** multiple drugs into a single container for compliance packaging? *What BUD is used on the prepacked containers?*	No	
63.00	Does the pharmacy return to stock prescription drugs that were filled but never picked up?	No	
63.01	If yes, are they maintained in the appropriate container, with PHI removed and BUD adjusted?	N/A

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
Prescription Processing	**If any part of a question is no, enter "No" and explain the observation.**		
64.00	**Patient Profile:** Is patient profile data organized and readily accessible to facilitate consultation with the prescriber, patient, or caregiver? *Indicate who enters patient profile data into the computer system and how often it is updated?*	Yes	Data is entered by a technician and is updated when information is volunteered by the patient or the prescriber.
64.01	If the pharmacy dispenses veterinary prescriptions, does the information gathered and recorded include the species, and name of the animal/owner as required by resident state law? *Describe how it is indicated in the computer system that the patient is an animal? And how is it indicated in the system the prescription is a veterinary prescription?*	N/A	
65.00	**Prescription:** Are adequate processes in place to assure the integrity, legitimacy, and authenticity of prescription orders? *Staff is familiar with detecting fraud in hard copy, faxed, verbal, and electronic prescriptions.*	Yes	
65.01	Is there a procedure to follow when a prescription is suspected of (or actually is) fraudulent? *Describe the steps and reporting process.*	Yes	The prescriber is contacted for verification.
65.02	Are adequate processes in place for assuring that prescription medications are not prescribed or dispensed based on online medical consultations without there being a pre-existing prescriber-patient/client relationship? *Describe. Do the processes include comparing the physical addresses of the patient and prescriber?*	Yes	The pharmacy uses telemedicine platforms for about 90% of their prescriptions. A software system named Verifiable is used to ensure proper licensing for prescribers. BulaLaw is used to ensure the prescription is in compliance with the state laws and regulations for telepharmacy visits for the state to which the prescription is shipped. Please see Doc02_PI for the processes used to ensure prescriptions meet the state requirements.
65.03	Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	Yes	Electronic prescription capability is for controlled and non-controlled substances.
65.04	If the pharmacy accepts electronic prescriptions for controlled substances, are they in compliance with federal regulations?	Yes	
66.00	**Accuracy:** Is the accuracy of the information entered into the computer system verified (patient information and prescription information)? *Indicate how and by whom.*	Yes	A pharmacist verifies data prior to filling and at the time of dispensing using a hard copy or electronic version of the prescription and comparing the information to the data entry.

		Observation	Notes
67.00	**DUR:** Does staff conduct prospective DUR prior to the dispensing of a medication or product? *Describe at what point in the process does the DUR take place?*	Yes	DUR is performed by a pharmacist at the date entry point.
67.01	Does the DUR include: • drug-drug interaction (Prescription and OTC), • drug-allergy interaction, • therapeutic duplication, • under- or over-utilization (including clinical abuse/misuse), • disease state or condition contraindication, • Incorrect dosage or duration of therapy, and • gender or age related contraindications. *Indicate if there are other parameters routinely included in the DUR.*	Yes	There are no other parameters used.
67.02	In addition to the pharmacy DUR software, does the pharmacy staff obtain other information to use in the DUR process? *Describe.*	No	Lexicomp may be used.
67.03	Does the pharmacy have adequate resources/references related to the type of pharmacy practice it operates?	Yes	
67.04	Does the pharmacy report required data to the state PMP (in this state and the other states in which the pharmacy is licensed)? *Describe.*	Yes	
67.05	Does the pharmacy access state PMP/PDMP data for specific patients? *Verify there is a policy regarding access and follow-up or reporting and that pharmacist can access the PMP data.*	Yes	PMP data is accessed when it is felt necessary by the pharmacist or when required by NY law.
67.06	Are DUR overrides/bypasses documented? *Indicate how the override is documented and who has override capability.*	Yes	Only a pharmacist can override a DUR notice. Documentation is in the patient notes or the prescription notes, and using the pharmacist's logon credentials.
67.07	Is the DUR process performed electronically by the computer system? ***Identify integrated drug database used.***	Yes	Medispan is the integrated drug database used.

		Observation	Notes
67.08	If the DUR is manual, is there a system to document: • How manual DUR is performed • Specific issues that were identified • Pharmacist that considered the identified issues and gave the okay to proceed	Yes	
67.09	If the pharmacy dispenses veterinary prescriptions, does it have a veterinary drug database integrated into the computer system for electronic DUR? *List veterinary product electronic database used. If not, list compendia used for performing manual DUR.*	N/A	
68.00	Are filled prescriptions verified for accuracy prior to dispensing? *Indicate process, by whom, and how documented.*	Yes	A pharmacist reviews the patient profile, the filled prescription, and notes in the file at the final verification.
69.00	Are filled prescriptions appropriately labeled? *Describe.*	Yes	The system prints standardized prescription labels based on the most stringent state regulations.
70.00	**Confidentiality:** Does the system have adequate safeguards to prevent a user from performing functions under a different user account or beyond what they are authorized to perform? ***Password protected, access limited by job type, access revoked as appropriate such as upon termination.*** *Record name/brand of pharmacy computer system used.*	Yes	The system is Pharmetika.
70.01	Does the pharmacy destroy PHI including labeled prescription vials?	Yes	There are no labeled vials used.
71.00	**Mail/Delivery:** If applicable, are packing materials designed to maintain the physical integrity, stability, and purity of prescription medications and compounded preparations in transport?	Yes	
72.00	**Off-Site Processes:** Are any portions of the prescription processing (in the questions below) performed at a different location? ***Note: Please ask each question below to verify.***	No

		Observation	Notes
Patient Counseling and Communication	**If any part of a question is no, enter "No" and explain the observation.**		
75.00	Does the pharmacist provide counseling for all new prescriptions picked up at the pharmacy (proactively, no "offer")?	No	
75.01	Is an "offer" to counsel made for all new prescriptions picked up at the pharmacy? *Indicate who makes the "offer".*	Yes	Pharmacists or technicians
76.00	Does the pharmacist provide counseling for all refilled prescriptions picked up at the pharmacy (proactively, no "offer")?	No	
76.01	Is an "offer" to counsel made for all refilled prescriptions picked up at the pharmacy? *Indicate who makes the "offer".*	Yes	Pharmacists or technicians
77.00	Does the pharmacist provide counseling for refilled prescriptions picked up at the pharmacy when there is a change in therapy or other issue determined by the pharmacist (proactively, no "offer")?	No	
77.01	Is an "offer" to counsel made for all refilled prescriptions picked up at the pharmacy when there is a change in therapy or other issue determined by the pharmacist? *Indicate who makes the "offer".*	Yes	Pharmacists or technicians
78.00	Is patient counseling provided for delivered prescriptions? *Printed information sent to patient, toll-free number for patients to call, pharmacist calls patients directly, etc? Describe how.*	N/A	There are no delivered prescriptions.
79.00	Is patient counseling provided for mailed prescriptions? *Printed information sent to patient, toll-free number for patients to call, pharmacist calls patients directly, etc? Describe how.*	Yes	Printed information is provided for all prescriptions as well as a written offer to counsel, using a toll free phone number.
80.00	Are patient package inserts (PPIs) provided with every fill and refill of medications for which they are required (such as hormone products, inhalers, etc)? *Describe how.*	Yes	PPIs are provided with every required prescription. The PPI is manually printed by a technician and part of the final checking process by a pharmacist.

		Observation	Notes
	Quality Assurance/Quality Improvement Program **If any part of a question is no, enter "No" and explain the observation.**		
87.00	Is there a documented continuous quality improvement (CQI) Program for the purpose of detecting, documenting, assessing, and preventing quality related events (QREs)? *If yes, list who oversees the program.*	Yes	The PIC oversees the CQI program.
87.01	Policies and procedures for the program are maintained in the pharmacy in an immediately retrievable form. *Indicate if hard copy, electronic, or both.*	Yes	P & P are electronic.
87.02	"Quality-Related Event" (QRE) is defined to mean any departure from the appropriate dispensing of a prescribed medication that is or is not corrected prior to the delivery and/or administration of the medication including (but not limited to): 1. a variation from the prescriber's prescription drug order such as incorrect drug, strength, form, or patient; or inadequate or incorrect packaging, labeling, or directions; 2. a failure to identify and manage over-utilization or under-utilization; therapeutic duplication; drug-disease contraindications; drug-drug interactions incorrect drug dosage or duration of drug treatment; drug-allergy interactions; or clinical abuse/misuse. 3. packaging or warnings that fail to meet recognized standards, the delivery of a medication to the wrong patient, or the failure to detect and appropriately manage a significant actual or potential problem with a patient's drug therapy.	No	There is no definition of a QRE. Staff stated they are formulating a definition of a QRE and it will be added to the QRE P & P.
87.03	There is documentation of initial/ongoing (at least yearly) review and training of all pharmacy employees on the CQI program and processes. *For example, may be formal training or reviewed at a yearly meeting.*	Yes	Initial training includes a review of all P & P including CQI with an assessment of understanding. The annual review is also a review of the P & P and assessment.
88.00	**Documentation of QREs** starts as soon as possible, but no more than three days, after determining their occurrence. *Indicate if documentation/forms are hard copy or electronic.*	Yes	Documentation is electronic.

		Observation	Notes
88.01	Documentation includes all the pertinent data about the prescription involved including personnel involved at each step.	Yes	
88.02	Documentation includes documenting the type of QRE details and how/who discovered the QRE.	Yes	
88.03	Documentation incudes possible contributing factors such as day and time the QRE occurred, number of pharmacists and technicians on duty, prescription volume that day, equipment failure, or other factors affecting work-flow at the time.	Yes	
88.04	Documentation includes steps taken to remediate including communications with the patient and the provider, and if the medication was ingested, disposition of the patient.	Yes	
89.00	**QRE data** collected is analyzed to assess causes and any contributing factors (root cause). *Indicate who performs the analysis and frequency (with each event, weekly, monthly, quarterly, etc.).*	Yes	The VP of Compliance, with the PIC or another pharmacist analyzes every event, with a quarterly review of all events.
89.01	The pharmacy uses the findings of the analysis to formulate an appropriate response and develop pharmacy systems and workflow processes designed to prevent QREs and increase good outcomes for patients.	Yes	Findings are reviewed as part of the quarterly review
89.02	For pharmacies utilizing a drug formulary, a periodic review of such formulary is undertaken to ensure that appropriate medications are being offered/selected in the best interest of patients.	N/A	There is no formulary used.
90.00	**Quality meetings** are held at least annually by staff members of the pharmacy to consider the effects on quality of the pharmacy system due to staffing levels, workflow, and technological support.	Yes	
90.01	The meeting reviews data showing evidence of the quality of care for patients and develops plans for improvements to increase good outcomes for patients.	Yes

Verified Pharmacy Program® Inspection Form

General Pharmacy Inspection

The information and comments obtained in the Nonsterile Compounding, Sterile Compounding Inspections, and Hazardous Drug Compounding are based on USP Chapters <795>, <797>, and <800>.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Notes
90.02	Improvements or changes made are evaluated for performance to measure the effectiveness of the CQI program.	Yes	
91.00	**Reporting:** Incidents of QREs are reported to a nationally recognized error reporting program, an outside peer review committee, or a patient safety organization. *Indicate which organizations are reported including if the pharmacy reports QREs to the board of pharmacy.*	No	QREs are reported to the board of pharmacy if appropriate.
91.01	Adverse events are reported to the appropriate entities such as the board of pharmacy, MedWatch, FDA, VAERS, etc.?	Yes	
91.02	Incidents involving malfunctioning or defective medical equipment or devices (blood glucose meters, DME, injection devices, etc.) are documented and reported to the manufacturer or distributor.	Yes	
92.00	**Quality Self-Audits** are performed by the pharmacy at least quarterly (and upon change in PIC) to determine whether the occurrence of QREs has decreased and whether there has been compliance with preventative procedures, and to develop a plan for improved adherence with the CQI program in the future.	Yes	
93.00	**Consumer Surveys** are conducted at least yearly of patients who receive pharmaceutical products and services at the pharmacy. A statistically valid sampling technique may be used in lieu of surveying every patient. Each pharmacy should use the results of its consumer survey to evaluate its own performance at a particular time and over a period of time.	No	
94.00	**Patient Complaints** are documented, tracked, and investigated as appropriate and the information is used as part of the CQI program.	Yes

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
	Standard Operating Procedures for Compounded Nonsterile Preparations (CNSPs)		**Please note NABP did not review each SOP for alignment on USP <795>. The SOP(s) described below is/are a reflection of any self-assessment completed by the pharmacy and/or shared with the inspector during the onsite inspection.**	
1.0	Does the pharmacy have standard operating procedures (SOPs) on all aspects of the compounding operation that cover the minimum topic requirements in USP <795> standards? ***If no, document "missing" in Inspector Notes*** ***If yes, document the name, number, and version of each SOP in the Inspector Notes.***	Yes		11
1.1	**Buildings and Facilities:** The pharmacy has an SOP for the compounding facility. ***Inspector note: Per USP <795>, there is a written SOP for "the method of designation" for the area designated specifically for nonsterile compounding and processes for maintaining, cleaning, and sanitizing the compounding area and equipment.***		SOP 6.001 Non-sterile Compounding Area Requirements Version 1.0; SOP 6.002 Cleaning and Maintenance Log of the Non-sterile Compounding Area Version 1.0; SOP 6.009 Monitoring of Compounding Area Version 1.0	4.1, 5, 11
1.2	**Personnel Training and Evaluation:** The pharmacy has an SOP describing the training program, the frequency of training, and the process for evaluating the competency of personnel. ***Inspector note: Per USP <795>, "Facility SOPs must describe procedures for monitoring and observing of compounding activities and personnel."***		SOP 2.003 Non-sterile Personal Training and Evaluation Version 1.0; P & P 1.04 Training Program SOP Version 0	2, 11

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
1.3	**Personal Hygiene and Garbing:** The pharmacy has an SOP regarding personal hygiene, glove, and garbing requirements consistent with compounding activities. ***Inspector note: Per USP <795>, "Garbing requirements and frequency of changing garb must be determined by the facility and documented in the facility's SOPs."***		SOP 7.004 Required Garb for Non-sterile Compounding Area Version 1.0	3.3, 11
1.4	**Components:** The pharmacy has an SOP describing selection, handling, storage, and inventory control of all components used in compounding. ***Inspector note: Per USP <795>, "The compounding facility must have written SOPs for the selection and inventory control of all components from receipt to use in a CNSP."***		SOP 8.014 Component Selection Version 1.0; SOP 8.015 Component Receipt and Evaluation Version 1.0	6.2, 11
1.5	**Temperature Monitoring:** The pharmacy has an SOP regarding temperature monitoring and handling of excursions. ***Inspector note: Per USP <795>, "The compounding facility must adhere to SOPs to detect and reduce the risk of temperature excursions within the storage area(s)."***		SOP 6.009 Monitoring of Compounding Area Version 1.0	4.2, 11
1.6	**Equipment:** The pharmacy has an SOP for assessment of need for closed system processing devices (based on the types of CNSPs prepared). ***Inspector note: Per USP <795>, "Weighing, measuring, or otherwise manipulating components that could generate airborne chemical particles (e.g., active pharmaceutical ingredients [APIs], added substances, and conventionally manufactured products) must be evaluated to determine if these activities must be performed in a closed-system processing device to reduce the potential exposure to personnel or contamination of the facility or CNSPs. Examples of closed-system processing devices include containment ventilated enclosures (CVEs), biological safety cabinets (BSCs), and single-use containment glove bags. The process evaluation must be carried out in accordance with the facility's SOPs, and the assessment must be documented."***		SOP 7.001 General Compounding Technique Non-sterile Version 1.1	6.1, 11

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
10.4	Pharmacy has a process to evaluate temperature excursions. ***Inspector note: Per USP, "When it is known that a CNSP or component has been exposed to temperatures either below or above the storage temperature limits for the CNSP or component, personnel must determine whether the CNSP or component integrity or quality has been compromised and if so, the CNSP or component must be discarded."***	Yes		4.2
10.5	CNSPs, components, equipment, and containers are stored off the floor.	Yes		4.2
10.6	CNSPs, components, equipment, and containers are stored in a manner that permits inspection and cleaning of the storage area(s).	Yes		4.2
10.7	CNSPs, components, equipment, and containers are stored in a clean environment (free of dirt, dust, and debris, and rodent/pest/insect free) to prevent contamination.	Yes		4.2
11.0	What is the current temperature of the nonsterile compounding storage area? ***Record in the Inspector Notes.***			4.2
12.0	Are plumbing fixtures, water sources, and cleanliness of sink in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		4.3
12.1	The pharmacy staff can easily access a sink within or nearby the nonsterile compounding area.	Yes		4.3
12.2	There is hot and cold running water available at the sink within or nearby the nonsterile compounding area.	Yes		4.3

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
12.3	The sink is emptied of all items unrelated to compounding and before being used to clean any equipment used in nonsterile compounding.	Yes		4.3
12.4	The sink is cleaned when visibly soiled (before being used to clean equipment used in nonsterile compounding).	Yes		4.3
12.5	The plumbing system is free of any defects that may contribute to contamination of CNSPs.	Yes		4.3
13.0	Is purified water, distilled water, or reverse osmosis water used for rinsing equipment and utensils used in nonsterile compounding? ***Inspector note: This is a USP recommendation.***	Yes	Distilled water is used for rinsing equipment.	4.3 USP <1231>
	Cleaning and Sanitizing			
14.0	What agent(s) are used for cleaning and sanitizing the nonsterile compounding area? ***Inspector note: Per USP <795>, "agents must be selected and used with consideration of compatibilities, effectiveness, and minimal potential to leave residues."*** ***List the agents in the Inspector Notes.***	[redacted]	70% isopropyl alcohol is used.	5
15.0	Does the pharmacy perform cleaning and sanitizing activities on all surfaces at the minimum frequency per Table 1 and documented in a log or other record in compliance with USP <795> standards? ***Review compounding cleaning logs.*** ***If no, go to compliance statements.***	Yes		5 Table 1
15.1	All work surfaces are cleaned and sanitized at the **beginning of each shift** on days when compounding occurs.	Yes		5 Table 1
15.2	All work surfaces are cleaned and sanitized at the **end of each shift** on days when compounding occurs.	Yes		5 Table 1

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
15.3	All work surfaces are cleaned and sanitized **between compounding CNSPs with different components**.	Yes		5 Table 1
15.4	Floors are cleaned and sanitized daily on days when compounding occurs.	Yes		5 Table 1
15.5	Walls and ceilings are cleaned and sanitized when visibly soiled. ***Inspector note: No specific frequency is specified by USP. View compounding area walls and ceilings. If inspector observes soiled walls or ceilings, inspector should answer statement as no.***	Yes		5 Table 1
15.6	All work surfaces, floors, walls, ceilings and storage shelving are cleaned and sanitized when surface contamination (eg, splashes) or spills are known or suspected.	Yes		5 Table 1
15.7	Storage shelving is cleaned and sanitized at least every three months.	Yes		5 Table 1
16.0	Are floors in the compounding area easily cleanable, non-porous, and non-particle generating? ***Inspector note: This is a USP recommendation. Per USP, "Surfaces should be resistant to damage by cleaning and sanitizing agents."***	Yes		5

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
	Equipment and Components			
17.0	Does the pharmacy use a closed-system processing device (eg, CVE, BSC, and single-use containment glove bags)? ***Inspector note: Per USP, examples of closed-system processing devices include: containment ventilated enclosures (CVEs), biological safety cabinets (BSCs), and single-use containment glove bags.*** ***If yes, list the type(s) in the Inspector Notes.***	Yes	The PECs are double filtered HEPA CVEs.	6.1
18.0	Does the pharmacy select, store, clean, and maintain equipment in compliance with USP <795> standards? ***Inspector note: Per USP <795>, "Equipment surfaces that contact components are not reactive, additive, or sportive, and must not alter the quality of CNSPs."*** ***Review certification reports, calibration records, and cleaning logs.*** ***If no, go to compliance statements.***	Yes		6.1
18.1	Equipment and supplies are readily available at the pharmacy for the types of CNSPs prepared. ***Inspector note: For example, if the pharmacy compounds with API as a component, which must be weighed, a scale or balance would be expected.***	Yes		6.1

Verified Pharmacy Program Inspection Form

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
18.2	Pharmacy has evaluated and documented the nonsterile compounding pharmacy activities for weighing, measuring, and otherwise manipulating for an assessment of risk. ***Inspector note: Per USP, "components that could generate airborne chemical particles (eg, active pharmaceutical ingredients [APIs], added substances, and conventionally manufactured products) must be evaluated to determine if these activities must be performed in a closed-system processing device to reduce the potential exposure to personnel or contamination of the facility or CNSPs."*** ***If no, inspector should describe observations.***	Yes		6.1
18.3	The equipment and devices used for compounding CNSPs are clean and stored in a manner and frequency that minimizes the risk of contamination. ***Inspector note: Per USP <795>, "After compounding, the equipment must be cleaned to prevent cross contamination of the next preparation." Additionally, per Table 2:*** ***- CVE/BSC are cleaned and sanitized at the beginning and end of each shift when compounding occurs, after spills, and when surface contamination (e.g., from splashes) is known or suspected;*** ***- CVE/BSC horizontal surfaces are cleaned and sanitized between compounding of different components;*** ***- Under the work surface of a BSC is cleaned and sanitized at least monthly; and*** ***- Other devices and equipment used in compounding are cleaned before initial use, in between compounding CNSPs with different components, and following manufacturer recommendations.*** ***If no, inspector should describe observations.***	Yes		6.1 Table 2
18.4	Equipment and devices used in compounding or testing of CNSPs are inspected prior to use (to ensure they are in good working order). ***Inspector note: For example, the pharmacy may need to tare a scale and/or balance prior to use.***	Yes		6.1

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
18.5	Equipment and devices are verified for accuracy as recommended by the manufacturer (at the frequency recommended by the manufacturer or at least every 12 months, whichever is more frequent). ***If the pharmacy does not compound CNSPs that require equipment or devices that must be calibrated for accuracy (such as ones needed for weighing or measuring), the inspector should answer this statement as N/A.***	Yes		6.1
18.6	If a CVE or BSC is used by the pharmacy, it is certified at least every 12 months, according to the manufacturer specifications or regulations of the applicable regulatory jurisdiction. ***If the pharmacy does not have the record or documentation of the certification and maintenance of the CVE/BSC, the inspector should answer this statement as no. If the pharmacy does not have a CVE or BSC, the inspector should answer this statement as N/A.***	N/A		6.1
19.0	Does the pharmacy compounding CNSPs use APIs?	Yes		6.2
20.0	Does the pharmacy select APIs that comply with the requirements in USP <795> standards? ***Verify by selecting products from the shelf from different suppliers and ask to see the COAs for those products.*** ***If no, go to compliance statements.***	Yes		6.2.1
20.1	APIs comply with criteria in the USP-NF monograph, if one exists. ***If the pharmacy does not compound any CSPs that have an available USP monograph, the inspector should answer this statement as N/A.***	Yes		6.2.1

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
20.2	All APIs used have a COA that includes the specifications (eg, compendial requirements for quality) and that the test results for the component show the API meets expected quality. ***Inspector note: Per USP, the API should be checked to ensure it is pharmaceutical grade and meets the requirements in the chemical monograph. COA will report an assay has been performed and will include water content (so any corrections/calculations can be performed).***	Yes		6.2.1
20.3	All APIs used are manufactured by an FDA-registered facility. ***Inspector note: This is a Food, Drug, and Cosmetic Act, Section 503A, requirement as well. If the API comes from a repackager, the pharmacy must be able to confirm the manufacturer of the API was registered as an Establishment with FDA.***	Yes		6.2.1
21.0	When formulations indicate the inclusion of water, is purified water or better quality (eg, sterile water for irrigation) used in compliance with USP <795> standards?	Yes		6.2.1
22.0	What type(s) of water is used for compounding CNSP? ***List the type(s) in the Inspector Notes.***	[redacted]	Sterile water is used.	6.2.1
23.0	Do the pharmacy's component receipt processes comply with the requirements in USP <795> standards? ***If no, go to compliance statements.***	Yes		6.2.2

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
23.1	For non-conventionally manufactured components, the COA is reviewed upon receipt. ***Inspector note: Per USP, "the COA must be reviewed to ensure that the component has met the acceptance criteria in an appropriate USP–NF monograph, if one exists." Pharmacy's review should be documented. Alternatively, the pharmacy can demonstrate how it's been reviewed (for example, there are notes to show a water content calculation back to 100% based on the specific COA). Inspector can verify the COA is retrievable.***	Yes		6.2.2
23.2	The pharmacy documents specific information according to the facility's SOP, including: receipt date, quantity received, supplier name, lot number, expiration date, and the results of any testing performed (whether performed in-house or through a third-party).	Yes		6.2.2, 14
23.3	For all components that lack a vendor expiration date, the pharmacy clearly and indelibly marks on each packaging system received the date the component must no longer be used by the pharmacy. ***Inspector note: Per USP, "Packaging systems of components (i.e., API and added substances) that lack a vendor's expiration date must not be used by the compounding facility after 3 years from the date of receipt. A shorter expiration date must be assigned according to Pharmaceutical Compounding—Sterile Preparations 797 , 9.3.2 Component receipt if the same component container is also used in sterile compounding or if the ingredient is known to be susceptible to degradation."***	Yes		6.2.2
23.4	Any component found to be of unacceptable quality upon receipt or reinspection prior to use is promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal.	Yes		6.2.2

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
23.5	Any other lots of that (rejected) component from that vendor are examined to determine whether other lots have the same defect.	Yes		6.2.2
24.0	Does the pharmacy re-inspect all components before use and handle them in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		6.2.3, 6.2.4
24.1	Compounding personnel visually re-inspect each component, including packaging system (any evidence of container breakage, looseness of cap or closure) and deviation from the expected appearance or texture of the contents (that might have changed during storage).	Yes		6.2.3
24.2	Compounding personnel ascertain before use that components are the correct identity based on labeling, that they have been stored under required conditions, and there is no evidence of deterioration or other aspects of unacceptable quality before use of component.	Yes		6.2.3
24.3	Components where correct identity, strength, purity, and quality cannot be confirmed (eg, containers with damaged or incomplete labeling), are immediately rejected and if not immediately discarded, labeled as rejected and segregated from active stock.	Yes		6.2.3
24.4	Compounding personnel handle all components following facility SOPs, manufacturer's instructions/labeling, and laws/regulations of the applicable regulatory jurisdiction.	Yes		1.1.3, 6.2.4
24.5	All components are handled in a manner that minimizes the risk of contamination, mix-ups, and deterioration.	Yes		6.2.4

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
25.0	When components are removed from the original container and not used in compounding (eg, excess after weighing), are they discarded and not returned to the original container (to minimize risk of contamination of the original component container)? ***Inspector note: This is a USP recommendation.***	Yes		6.2.4
26.0	Does the pharmacy maintain a chemical hazard, spill management, and disposal information program in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		6.2.5
26.1	Pharmacy staff have access to safety data sheets (SDS).	Yes	SDS are electronic.	6.2.5
26.2	Pharmacy staff have documented, annual training for those who might have to clean up a spill.	Yes		6.2.5, 14
26.3	The pharmacy has a readily accessible spill kit in the compounding area.	Yes		6.2.5
26.4	The pharmacy has a process to manage and document any nonhazardous spills and disposal.	Yes		6.2.5
26.5	Waste of any component is disposed of in accordance with laws and regulations of the applicable regulatory jurisdiction.	Yes		1.1.3, 6.2.5

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
	Master Formulation Records (MFR) and Compounding Records (CR) **Inspector should review a minimum of five (5) MFRs and five (5) CRs.**			
27.0	Is an MFR created for each unique formulation of a CNSP in compliance with USP <795> standards? ***Inspector note: Per USP, an MFR is a detailed record of procedures that describes how the CNSP is to be prepared.*** ***If no, go to compliance statements.***	Yes		7.1
27.1	An MFR is created for each unique formulation.	Yes		7.1 Box2
27.2	Any changes or alterations to the MFR are approved and documented.	Yes		7.1
27.3	Does the designated person(s) or designee evaluate CNSP's characteristics when considering the assigned BUD for an MFR? ***Inspector note: Per USP, "When establishing a BUD for a CNSP, compounders must consider parameters that may affect quality, including but not limited to the following:*** ***- Chemical and physical stability properties of the API and any added substances in the preparation (e.g., if the API and added substances in the preparation are known to rapidly degrade over time and/or under certain storage conditions, reduce the strength of the preparation, or produce harmful impurities)*** ***- Compatibility of the container closure system with the finished preparation (e.g., leachables, interactions, adsorption, and storage conditions)*** ***- Degradation of the container closure system, which can lead to a reduction in integrity of the CNSP*** ***- Potential for microbial proliferation in the CNSP (and)*** ***- Significant deviations from essential compounding steps and procedures; changes to essential compounding steps may have an impact on the stability of the formulation."***	Yes		7.1, 10.2 Table 4

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
28.0	Does the pharmacy's MFRs contain all requirements in compliance with USP <795> standards? ***If no, go to compliance statements. Additionally, collect a copy of the MFR and include as an attachment.***	No		7.1
28.1	MFR includes the name, strength or activity, and dosage form of the CNSP.	Yes		7.1
28.2	MFR identifies the identities and amounts of all components and, if applicable, relevant characteristics of components (eg, particle size, salt form, purity grade, solubility).	Yes		7.1
28.3	MFR includes the type of container–closure system(s).	Yes		7.1
28.4	MFR has complete instructions for preparing the CNSP, including equipment, supplies, and a description of the compounding steps. ***Inspector note: Per USP, the MFR will also include, "Other information needed to describe the compounding process and ensure repeatability (e.g., adjusting pH, temperature)." MFRs will include the detailed instructions necessary for an experienced compounder. Some examples of other details to ensure repeatability include, but are not limited to: speed duration, settings on equipment, and specific order of mixing (if applicable).*** ***Inspector should review several MFRs for completeness of instructions.***	Yes		7.1
28.5	MFR has a physical description of the final CNSP.	Yes		7.1
28.6	MFR includes the assigned beyond-use date (BUD) and storage requirements.	Yes		7.1

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
28.7	MFR contains the reference source to support the assigned BUD.	No	Staff plans to attach the USP reference to the MFR.	7.1
28.8	Labeling requirements (eg, shake well) are described on the MFR.	Yes		7.1
28.9	If applicable, the MFR contains the calculations to determine and verify quantities and/or concentrations of components and strength or activity of APIs.	Yes		7.1
28.10	An MFR has QC procedures (eg, pH testing, visual inspection) and expected results.	Yes	Pharmacist must validate the prescription prior to moving forward.	7.1
29.0	Does the pharmacy complete a Compounding Record (CR) for all CNSPs in compliance with USP <795> standards? ***If no, go to compliance statements. Additionally, collect a copy of the MFR and the CR (no PHI or PII is to be collected).***	Yes	Please see Doc04_NS_29.0.	7.2, 14
29.1	A CR is completed for each CNSP prepared.	Yes		7.2, 14
29.2	The CR includes the name, strength or activity, and dosage form of the CNSP.	Yes		7.2, 14
29.3	The CR includes the date (or date and time) the CNSP was prepared.	Yes		7.2, 14
29.4	The CR includes the assigned internal identification number (eg, prescription, order, or lot number).	Yes		7.2, 14
29.5	The CR has a method to identify the individuals involved in the compounding process of the CNSP.	Yes		7.2, 14
29.6	The CR has a method to identify the individual who completed the review and verified the final CNSP.	Yes		7.2, 14

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
30.0	Are there procedures for in-process checks performed by a pharmacist? ***Inspector note: In-process checks are safety steps for complex, multi-step compounding processes. These checks indicate that appropriate procedures for measuring/mixing are followed for each step, including pharmacist verification of steps performed by non-pharmacists and visual inspection of preparation. Inspector should describe their observations in the Inspector Notes.***	Yes	All review is completed by a pharmacist at the end of the compounding process. Weights are transferred electronically to the CR. Measurements for components such as liquids are captured by a photograph and reviewed by a pharmacist. The final product is reviewed by the pharmacist for physical properties and characteristics.	2, 7.2, 8
	Labeling			
31.0	Are the pharmacy's labels for CNSPs in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		9
31.1	Information on the label is prominently and legibly displayed. ***Inspector note: Per USP, labeling includes other accompanying materials along with the CSP, which is defined as "All labels and other written, printed, or graphic matter on the immediate container or on or inside any packaging system or wrapper in which the article is enclosed, except for any outer shipping container."***	Yes		9
31.2	The labeling meets any state or federal regulatory requirements.	Yes		1.1.3, 9
31.3	The label on the immediate container includes an assigned internal identification number (eg, barcode, prescription, order, or lot number).	Yes		9
31.4	The label on the immediate container includes the active ingredients and their amount(s), activity(ies), or concentration(s).	Yes		9
31.5	The label on the immediate container includes the storage conditions, if other than controlled room temperature.	Yes		9

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
31.6	The label on the immediate container includes the BUD. ***If no, please describe whether the pharmacy instead used the term "expiration date" or similar language or if this information was not included on the label.***	Yes		9
31.7	The label on the immediate container includes the dosage form.	Yes		9
31.8	The label on the immediate container includes the total amount or volume, if it is not obvious from the container.	Yes		9
32.0	Does the labeling on the dispensed CNSP include the route of administration? ***Inspector note: This is a USP recommendation.***	Yes		9
33.0	Does the labeling contain information identifying the CNSP as a compounded preparation? ***Inspector note: Per USP, this is a recommendation.***	Yes		9 USP <7>
34.0	Does the labeling on the dispensed CNSP display any applicable special handling instructions or warning statements? ***Inspector note: This is a USP recommendation.***	Yes		9
35.0	Does the labeling on the dispensed CNSP display the name of the compounding facility and contact information if the CNSP was to be sent outside of the facility or health care system? ***Inspector note: This is a USP recommendation.*** ***If the pharmacy only compounds CNSPs for patient use onsite (eg, a health care facility), inspector should answer this question as N/A.***	Yes		9

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
	Establishing Beyond Use Dating (BUDs)			
36.0	Is each CNSP assigned and labeled with a BUD in compliance with USP <795> standards? ***Inspector note: Per USP, the BUD is defined as, "The date, or hour and date, after which a CNSP must not be used, stored, or transported. The date is determined from the date or time the preparation is compounded." This is not the same term as "expiration date." If no, go to compliance statements.***	Yes		10 USP <7>
36.1	CNSP label has a BUD that specifies the date, or the hour and date, beyond which the preparation cannot be used and must be discarded.	Yes		10.1
36.2	CNSP labels do not list an "expiration date" or equivalent language.	Yes		10.1
36.3	BUDs are assigned from the date (and time) of preparation.	Yes		10.1
36.4	BUDs are assigned based on dispensing in tight, light resistant containers/overpacks. ***Inspector note: Per USP, the Table 4 maximum limits for BUD are, "based on the ability of the CNSP to maintain chemical and physical stability and to suppress microbial growth. These BUDs represent the limit for CNSPs that are packaged in tight, light-resistant containers unless conditions in 10.4 CNSPs Requiring Shorter BUDs or 10.5 Extending BUDs for CNSPs apply."***	Yes		10.3
36.5	The BUD assigned to the CNSP does not exceed the shortest remaining expiration date of any of the commercially available starting components.	Yes		10.4

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
37.0	Does the pharmacy ensure the assigned BUD does not exceed the shortest BUD of any individual compounded components? ***Inspector note: Per USP, "For CNSPs prepared from one or more compounded components, the BUD should generally not exceed the shortest BUD of any of the individual compounded components. However, there may be acceptable instances when the BUD of the final CNSP exceeds the BUD assigned to compounded components (e.g., pH-altering solutions). If the assigned BUD of the final CNSP exceeds the BUD of the compounded components, the physical, chemical, and microbiological quality of the final CNSP must not be negatively impacted." Another example of these "acceptable instances" (similar to pH-altering components mentioned above) inspectors may see are stock solutions (and other formulas within a formula) such as methocel 1%.*** ***If no, inspector should describe the observations, including the name of the component whose BUD was shorter than the assigned BUD of the final CSP.***	Yes		10.4
38.0	Does the designated person(s) evaluate a CNSP formulation to establish the maximum BUD? ***If no, who establishes the maximum BUD for a MFR?***	Yes		7.1, 10.2, 10.3
39.0	Does the pharmacy compound CNSPs with a USP monograph?	Yes		10.5
40.0	Does the pharmacy compound CNSPs following the USP monograph precisely? ***If no, go to compliance statements.***	Yes		10.5
40.1	Pharmacy staff have access to the USP monograph for reference.	Yes		10.5
40.2	CNSPs are prepared in accordance with the USP monographs. ***If no, inspector to collect a copy of the compounding record, label; and describe what specific steps of the monograph were not followed.***	Yes		10.5

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
40.3	Components used by the compounder match those listed in the monograph. ***If no, describe the source of the component in monograph and the source that the pharmacy used.***	Yes		10.5
40.4	The maximum BUD specified in the USP monograph is not exceeded. ***If no, identify the drug, monograph-stated BUD, and the BUD used by the pharmacy.***	Yes		10.5
41.0	Does the pharmacy compound CNSPs that are not available from a USP monograph?	No		10.4
42.0	Does the pharmacy adhere to the BUD (maximum) limits established in Table 4 for CNSPs in compliance with USP <795> standards? ***Inspector note: This question is for the CNSPs compounded that are <u>not</u> following a USP monograph or those CNSPs where extending BUD requirements were applied (where pharmacy has completed or has access to CNSP-Specific Stability Information). Per USP, the pharmacy is not required to measure water activity (A_w) for a CNSP.*** ***If no, go to compliance statements.*** ***If <u>all</u> CNSPs compounded at the pharmacy are following a USP monograph or the pharmacy is following a stability study that used a stability-indicating assay analytical method for the API, CNSP formulation, and material of composition of the container closure system, then the inspector should answer this question as N/A.***	Yes		10.4

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
44.7	Aqueous CNSPs whose labeled BUDs are extended beyond Table 4, have: - been tested for antimicrobial effectiveness at least once for each formulation in the type of (with the same material composition of the) container closure system that will be used; - received study results from an FDA-registered facility (for the same CNSP formulation using the same material composition of the container closure system); or - a study published from peer-reviewed literature (for the same CNSP formulation using the same material composition of the container closure system). ***Inspector note: Pharmacy may rely on a bracketed study from the above options as long as the bracketed study information includes the low and high concentration of each active ingredient in the formulation. Per USP, this is "to establish preservative effectiveness across various strengths of the same formulation (e.g., bracketing). The concentration of all other ingredients (including preservatives) must fall within the bracketed range."***	N/A		10.5
	Quality Assurance (QA), Quality Control (QC), and Quality Management (QM) Inspector to review at least one complaint, one adverse event, and one recall (if applicable).			
45.0	Does the pharmacy have a QA/QC program to ensure that CNSPs are prepared per the requirements in USP <795> standards and any applicable regulatory requirements? ***If no, go to compliance statements.***	Yes		1.1.3, 12
45.1	The pharmacy has a formal QA/QC program with documented activities. ***Inspector note: Per USP, "A facility's QA and QC programs must be formally established and documented in the facility's SOPs that ensure that all aspects of the preparation of CNSPs are conducted in accordance with the requirements in this chapter (<795>) and the laws and regulations of the applicable regulatory jurisdiction."***	Yes		12
45.2	The QA/QC programs address adherence to procedures.	Yes		12

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes.	USP Reference(s)
45.3	The QA/QC programs address prevention and detection of errors and other quality problems.	Yes		12
45.4	The QA/QC programs address evaluation of complaints and adverse events. ***Review at least one complaint and one adverse event. If there are no complaints or adverse events, review the process that the pharmacy would follow in the event of a complaint or adverse event.***	Yes		12
45.5	The QA/QC programs address appropriate investigations and corrective actions.	Yes		12
46.0	Has the pharmacy received any complaints related to CNSPs within the past year?	Yes		12
47.0	Does the pharmacy follow complaint handling requirements in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		12.2
47.1	The pharmacy has a complete written or electronic record of each complaint made. ***Inspector note: Per USP, "The record must contain the name of the complainant or other unique identifier, the date the complaint was received, the nature of the complaint, and the response to the complaint. In addition, to the extent that the information is known, the following should be recorded: the name and strength of the CNSP and the assigned internal identification number (e.g., prescription, order, or lot number). The record must also include the findings of any investigation and any follow-up. Records of complaints must be easily retrievable for review and evaluation for possible trends and must be retained."***	Yes	The record is initially hard copy, then digitized, and maintained infinitely.	12.2
47.2	Complaints are reviewed in accordance with SOPs by the designated person for the QA program.	Yes		12.2

54.1	All personnel who enter the compounding area to compound performed hand hygiene.	Yes		3.2 Box 1
54.2	Personnel wash hands with soap and water for at least 30 seconds.	Yes		3.2
54.3	Personnel dry their hands completely with disposable towels or wipers.	Yes		3.2
54.4	Personnel do not solely rely on the use of alcohol hand sanitizers.	Yes		3.2
55.0	***Garbing Observation:*** Were compounding personnel observed following the appropriate garbing procedures in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		3.3 Box 1
55.1	All personnel entering the compounding area are fully garbed (with the required garb as determined by the facility SOPs).	Yes		3.3 Box 1
55.2	All personnel who perform compounding activities don gloves. ***Inspector note: Per USP, "Gloves must be worn for all compounding activities."***	Yes		3.2, 3.3 Box 1
55.3	Gloves are inspected periodically for holes, punctures, or tears and replaced immediately if a defect is detected.	Yes		3.3 Box 1
56.0	Are gloves wiped or replaced before beginning compounding a CNSP with a different component or when other objects were touched (eg, pens, keyboards) to minimize risk of cross contamination with other CNSPs? ***Inspector note: This is a USP recommendation.***	Yes		3.3
57.0	List the name(s) of the CNSPs observed by the inspector as part of live compounding demonstration:

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
58.0	**Compounding Observation:** Are compounding personnel using appropriate nonsterile compounding techniques for CNSPs in compliance with USP <795> standards? ***If no, go to compliance statements.***	Yes		2 Box 3
58.1	The compounding personnel enter the nonsterile compounding area in accordance with the SOPs.	Yes		3.1, 4.1
58.2	The compounding personnel started with a clean compounding area for CNSPs.	Yes		4.1, 4.3, 5 Table 1
58.3	The compounding personnel selected the correct MFR for the CNSP to be prepared.	Yes		7, 7.1 Box 2
58.4	The compounding personnel performed hand hygiene. ***Inspector note: Per USP <795>, Box 1, personnel are to: wash hands with soap and water for at least 30 seconds, dry hands completely with disposable towels or wipers, and then don gloves.***	Yes		3.2 Box 1
58.5	The compounding personnel are appropriately garbed for the type of CNSP prepared.	Yes		3.3
58.6	The compounding personnel obtained the proper ingredients (APIs and/or components). ***Inspector note: All ingredients must be within date and match what is listed in the MFR. If the ingredient is an API, the COA must have already been reviewed and approved for use.***	Yes		6.2 (6.2.1 - 6.2.5)
58.7	The compounding personnel gathered all necessary materials, equipment, and supplies necessary and/or specified in the MFR and is in good working order prior to use for the CNSP. ***Inspector note: All items must be clean prior to use. If equipment requires calibration and/or certification, compounder must ensure the equipment or device is within proper specifications (eg, tare scales and/or balances).***	Yes		6.1 Table 2

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
58.8	The compounding personnel have knowledge of and access to any SDS.	Yes		6.2
58.9	The compounding personnel only compound one CNSP at a time (to proactively prevent mix-ups, errors, and cross contamination).	Yes		1.1.3
58.10	The compounding personnel compound the CNSP according to the MFR. ***If no, inspector needs to describe in detail their observations in the Inspector Notes and collect a copy of the MFR and CR (no PHI or PII to be collected).***	Yes		7.1, 7.2 Box 2
58.11	The compounding personnel document any required steps listed in the MFR on the CR. ***Inspector note: This would include any weights, volume, and any in-process checks needed.***	Yes		7.2, 14 Box 3
58.12	Documentation in the CR is legible. ***If no, collect copy of record that is illegible. Redact any PHI on record.***	Yes		14
58.13	The compounding personnel verify the correct BUD in accordance with the MFR requirements in USP <795>.	Yes		10 Table 3, Table 4
58.14	The compounding personnel performed any quality control steps specified in the MFR. ***Inspector note: Examples of this include, but are not limited to: testing of pH for a suspension, weighing of capsules, and visual inspection against product description specifications.*** ***If no, describe observations in Inspector Notes.***	Yes		7.2, 8, 8.1, 12 Box 3
58.15	The compounding personnel placed the CNSP into the proper container closure system.	Yes		8.1 Box 2

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
58.16	The compounding personnel labeled the CNSP. ***Inspector note: Storage requirements must be included on the label if refrigerated or frozen (so patient can identify the storage temperature requirements).***	Yes		9
58.17	The compounding personnel completed any documentation on the CR. ***If no, describe observations of what was missing or omitted in Inspector Notes.***	Yes		7.2, 8, 14 Box 3
58.18	The compounding personnel cleaned and sanitized the compounding area before the next CNSP (with differing ingredients) is prepared.	Yes		5
59.0	**Final CNSP check observation:** Does the visual inspection of the CNSP by the pharmacist confirm all USP <795> requirements? ***Observe a pharmacist check several CNSP prescriptions. List the name of CNSPs release inspection observed in the Inspector Notes.*** ***If no, go to compliance statements.***	Yes		8, 8.1, 9
59.1	CNSP was visually inspected to determine the physical appearance of the CNSP is as expected (eg, color, texture, physical uniformity), including any special characteristics listed in the MFR (eg, emulsions must be checked for phase separation).	Yes		8, 8.1
59.2	Visual inspection included checking for container closure integrity (eg, leakage, cracks, improper seals).	Yes		8, 8.1
59.3	CNSP label was verified against the prescription or medication order.	Yes		8, 8.1, 9
59.4	CNSP label was verified against the MFR.	Yes		8, 8.1, 9
59.5	CNSP label was verified against the CR.	Yes		8, 8.1, 9

Nonsterile Compounding Inspection for USP <795>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
59.6	If a CNSP will not be released or dispensed on the day the preparation was made, a visual inspection was conducted immediately before it is released or dispensed to make sure the CNSP did not develop any defects during storage.	Yes		8, 8.1
59.7	All checks and inspection that are performed are properly documented.	Yes		8.1, 14
59.8	CNSP that do not meet requirements, are promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before disposal	Yes		8.1
60.0	Inspect several different finished compounded nonsterile preparations. Are all the finished compounded preparations free from any evidence of signs of contamination? ***Inspector note: If found, request the compounded preparation to be quarantined and notify NABP immediately.*** ***Additionally, list the name(s) of the compounded preparation(s) observed; description of type of contamination suspected (eg, particulates, dirt/debris/(suspected) mold within container closure); number of preparations affected (eg, two of the five containers on the shelf); lot or batch information; BUD assigned; and collect photographs, copy of MFR, and CR.***	Yes	CNSPs reviewed were Diltiazem 2% and Lidocaine HCl 5% in Petrolatum, Naltrexone 1 mg tablets, and Ketamine RDT 100 mg tablets. All CNSPs inspected met expectations.	12

Nonsterile <795> Employee File Records Review

Select the PIC, designated person, a staff pharmacist that checks compounded preparations, and two to three compounding pharmacy technicians. *Do not record the employee name, list only their title or position.
From the drop-down List:
*Mark as "Yes" if the document is present in the records and the competency evaluation was conducted in compliance with USP <795> requirements.
*Mark as "No" if the document is present in the records but is not in compliance with USP <795> requirements.
*Mark as "Missing" if any part of the record is missing and explain in Notes column.
*Mark as "N/A" if the training does not apply (eg, long-term employee may not have initial training available). Document further in the Notes column.

		Employee Records #1	Employee Records #2	Employee Records #3	Employee Records #4	Employee Records #5

Glossary & References	USP <795>
Active Pharmaceutical Ingredient (API)	Any substance or mixture of substances intended to be used in the compounding of a preparation, thereby becoming the active ingredient in that preparation and furnishing pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals or affecting the structure and function of the body. Also referred to as a bulk drug substance. A conventionally manufactured drug product is not an API but is typically manufactured from an API(s).
Added Substance	An ingredient that is necessary to compound a preparation but is not intended or expected to cause a pharmacologic response if administered alone in the amount or concentration contained in a single dose of the compounded preparation. The term is used synonymously with inactive ingredient, excipient, and pharmaceutical ingredient.
Administration	The preparation of a nonsterile pharmacologic or other therapeutic agent for ingesting, inserting, applying, or otherwise providing a nonsterile medication in its final form to a single patient. This includes crushing a tablet(s) or opening a capsule(s) to mix with food or liquids to facilitate patient dosing.
Alcohol-based hand rub	An alcohol-containing preparation (liquid, gel, or foam) designed for application to the hands of health care personnel to inactivate microorganisms and/or temporarily suppress their growth. Such preparations may contain one or more types of alcohol, other active ingredients, excipients, and humectants.
Assigned trainer	One or more individuals assigned by the designated person(s) to be responsible and accountable for directly providing the training, observation, and/or evaluation of personnel for the preparation of CNSPs.
Beyond-use date (BUD)	The date, or hour and date, after which a CNSP must not be used, stored, or transported. The date is determined from the date or time the preparation is compounded.
Biological Safety Cabinet (BSC)	A ventilated cabinet that may be used for compounding. These cabinets are divided into three general classes (Class I, Class II, and Class III). Class II BSCs are further divided into types (Type A1, Type A2, Type B1, Type B2, and Type C1).
Bulk drug substance	See the entry for Active Pharmaceutical Ingredient.
Certificate of analysis (COA)	A report from the supplier of a component, container, or closure that accompanies the supplier's material and contains the specifications and results of all analyses and a description of the material.
Cleaning	The process of removing substances (eg, organic and inorganic material) from objects and surfaces, normally accomplished by manually or mechanically using water with detergents or enzymatic products.
Cleaning agent	An agent, usually containing a surfactant, used for the removal of substances (eg, dirt, debris, microbes, and residual drugs or chemicals) from surfaces.
Closed-system processing device	A device designed to reduce the potential exposure to personnel or contamination of the facility or CNSPs. Examples include CVEs, BSCs, or single-use containment glove bags.

Glossary & References	USP <795>
Component	Any ingredient used in the compounding of a preparation, including any API, added substance, or conventionally manufactured product.
Compounded nonsterile preparation (CNSP)	A preparation not intended to be sterile that is created by combining, admixing, diluting, pooling, reconstituting other than as provided in the manufacturer's labeling, or otherwise altering a drug product or bulk drug substance.
Compounding	The process of combining, admixing, diluting, pooling, reconstituting other than as provided in the manufacturer's labeling, or otherwise altering a drug product or bulk drug substance to create a nonsterile preparation.
Compounding area	An area that is specifically designated for nonsterile compounding.
Compounding personnel	Personnel trained to compound or oversee compounding of preparations.
Compounding record (CR)	Documents the compounding of each CNSP.
Container closure system	Packaging system components that together contain and protect the dosage form. This includes primary packaging system components and secondary packaging system components if the latter are intended to provide additional protection.
Containment glove bag	A single-use disposable glove bag that is capable of containing airborne chemical particles.
Containment ventilated enclosure (CVE)	A full or partial enclosure that uses ventilation principles to capture, contain, and remove airborne contaminants through high-efficiency particulate air (HEPA) filtration and to prevent their release into the work environment.
Conventionally manufactured product	A pharmaceutical dosage form, usually the subject of an application approved by the applicable national regulatory agency, that is manufactured under current good manufacturing practice conditions.
Designated person(s)	One or more individuals assigned to be responsible and accountable for the performance and operation of the facility and personnel as related to the preparation of CNSPs.
FDA	US Food and Drug Administration
Formulation	The specific qualitative and quantitative composition of the final CNSP.
Hazardous Drug (HD)	Any drug identified by at least one of the following criteria: carcinogenicity, teratogenicity or developmental toxicity; reproductive toxicity in humans; organ toxicity at low dose in humans or animals; genotoxicity or new drugs that mimic existing HDs in structure or toxicity. See <800>.
Label	The part of the labeling on the immediate container.
Labeling	All labels and other written, printed, or graphic matter on the immediate container or on or inside any packaging system or wrapper in which the article is enclosed, except for any outer shipping container.

Glossary & References	USP <795>
Master formulation record (MFR)	A detailed record of procedures that describes how the CNSP is to be prepared.
Monograph	A quality documentary standard within USP–NF that articulates the quality expectations for a medicine including for its identity, strength, purity, and performance. It also describes the tests to validate that a medicine and its ingredients meet these criteria.
Oversight	The review, monitoring, and supervision of actions taken by personnel; bearing responsibility for those actions; and being available if and when needed for consultation, even if not physically present.
Preservative	A substance added to inhibit microbial growth.
Purified water	The minimal quality of source water for the production of Purified Water is drinking water whose attributes are prescribed by the US Environmental Protection Agency (EPA), the European Union, Japan, or the World Health Organization (WHO). This source water may be purified using unit operations that include deionization, distillation, ion exchange, reverse osmosis, filtration, or other suitable purification procedures. (See <1231>, 3.1.1 Purified Water.)
Quality Assurance (QA)	A system of procedures, activities, and oversight that ensures that the compounding process consistently meets quality standards.
Quality Control (QC)	The sampling, testing, and documentation of results that, taken together, ensure that specifications have been met for the CNSP.
Reconstitution	The process of adding a diluent to a conventionally manufactured product to prepare a solution or suspension.
Release inspection and testing	Visual inspection and testing performed to ensure that a preparation meets appropriate quality characteristics.
Sanitizing agent	An agent for reducing, on inanimate surfaces, the number of microorganisms (eg, 70% isopropyl alcohol).
SDS	Safety data sheet.
SOP	Standard operating procedure.
Specification	The tests, analytical methods, and acceptance criteria to which any components, CNSP, container closure system, equipment, or other material used in the compounding of CNSPs must conform to be considered acceptable for its intended use.
Stability	The extent to which a product or preparation retains physical and chemical properties and characteristics within specified limits throughout its expiration or BUD.
Verify	To confirm that a method, process, system, or equipment will perform as expected under the conditions of actual use.
Water activity (a_w)	A measure of the fraction of total water that is unbound and freely available to participate in chemical, biochemical, or physicochemical reactions or provide an environment that can support microbial growth. Note that a_w is not water content.

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
2.1	**Scope of Practice:** Types of CSPs that are prepared (eg, immediate use, allergenic extracts, Category 1, Category 2, Category 3). Roles and responsibilities of the designated person(s).		SOP 3.37 Designated Person Job Description Version 0; SOP 8.011 Beyond Use Dating of Sterile Compounded Preparations Version 1	1.5
2.2	**Personnel Training and Evaluation:** Description of initial and ongoing training and competency for the designated person(s), compounding personnel, personnel with direct oversight of compounding personnel, and personnel who only perform restocking or cleaning, and disinfecting duties outside of the primary engineering control (PEC). Description of media-fill testing procedures, hand hygiene and garbing competency, and aseptic manipulation competency. Training and competency assessment of personnel on all sterilization methods and equipment used by the facility. Frequency of training is defined.		SOP 8.025 Sterile Compounding Personnel Training and Evaluation Version 1.1; SOP 8.022 Sterile Compounding Media Fill Test Procedure Version 1.0; SOP 8.003 Required Garb for Cleanroom Facility Access Version 1.0; SOP 8.001 General Aseptic Technique Version 1.1; SOP 8.002 Hand Hygiene-Sterile Compounding Version 1.0	2, 2.2, 10 Box 1, Box 2, Table 2, Table 3
2.3	**Personal Hygiene and Garbing:** Description of the required garb, manner of storage, and order of garbing, including disinfection procedures for reusing goggles, respirators, and other reusable equipment. ***Inspector note: Per USP, the RABS (or pharmaceutical isolator) sleeve and glove changes should (not required) be changed per the manufacturer's recommendations and defined in the facility's SOPs.***		SOP 8.003 Required Garb for Cleanroom Facility Access Version 1.0	3, 3.3

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
9.3	The SCA is located away from unsealed windows, doors that connect to outdoors, and traffic flow. ***Inspector note: Per USP, "strong air currents from opened doors, personnel traffic, or air streams from the HVAC system can disrupt the unidirectional airflow of an open-faced PEC."***	N/A		4.2.1
9.4	The SCA is located away from environmental control challenges and separate from areas not related to compounding (ie, restrooms, warehouses, food preparation areas).	N/A		4.2.1
9.5	A visible perimeter establishes the boundaries of the SCA. ***Inspector note: Per USP, the SCA is defined as "a designated space, area, or room that is not required to be classified and is defined with a visible perimeter. The SCA must contain a PEC and is suitable for preparation of Category 1 CSPs only." USP further defines a perimeter as "a visible demarcation (such as a door, walls, or visible marking on the floor) that defines the SCA or AECA." The perimeter will be defined in the pharmacy's SOPs. Tape or an alternative method may be used to define this visible perimeter, since this is not a classified space.***	N/A		4.2.1 Glossary

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
	Establishing BUDs			14
73.0	**Category 1 and Category 2 CSPs:** Does the pharmacy assign BUDs for Category 1 and Category 2 CSPs in compliance with USP <797> standards? ***If no, go to compliance statements.***	Yes		14, 14.1, 14.2
73.1	The assigned BUD does not exceed the shortest expiration date of any of the individual commercially available starting components.	Yes		14.3
73.2	When assigning BUDs, the pharmacy ensures that the CSP formulation remains chemically and physically stable and that its packaging maintains its integrity for the duration of the assigned BUD.	Yes		14.3
73.3	**Category 1 CSPs:** BUDs for **Category 1 CSPs** prepared in an SCA do not exceed the limits established in Table 12. ***Inspector note: Per USP <797> Table 12, BUD maximum limits for Category 1 CSPs are defined as 12 hours at controlled room temperature (CRT 20°C-25°C) or 24 hours refrigerated (2°C-8°C). If no Category 1 CSPs are prepared, inspector should answer statement as N/A.***	N/A		14.3, Table 12

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
65.4	Confirmation of filter integrity (bubble testing) is performed and documented for each filter used with each batch sterilized by filtration. ***Inspector note: If multiple filters are required for the compounding process, each of the filters must be tested.*** ***If no, collect a copy of the master formulation record and compounding record.***	Yes		10.2
65.5	A prefiltration step is performed for any CSPs that are known to contain excessive particulate matter. ***Inspector note: The prefiltration step consists of using a filter with a larger nominal pore size (eg, 1.2 micron) or a separate filter of larger nominal pore size should be placed upstream of (ie, prior to) the sterilizing filter to remove gross particulate contaminants before the CSP is passed through the sterilizing-grade filter.***	N/A		10.2
65.6	CSPs that are prepared using a filter that failed integrity tests are either discarded or, after investigating the cause of the failure and selection of an appropriate filter, refiltered for sterilization not more than one additional time. ***If no, collect a copy of the master formulation record and compounding record.***	Yes	CSPs failing the integrity test are discarded.	10.2
65.7	Single-use filters are only used once.	Yes		4.1.2, 10.2

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
65.1	Sterilization by filtration is performed in an ISO 5 environment.	Yes		4.1.2, 10.2
65.2	Filters used have enough capacity to filter the required volumes. ***Inspector note: Per USP, "The filter dimensions and the CSP to be sterilized by filtration should permit the sterilization process to be completed without the need for replacement of the filter during the process."***	Yes		10.2
65.3	The 0.2 micron sterile micro-porous membrane filter used to sterilize CSP solutions is chemically and physically compatible with the CSP. Inspector note: Per USP <797>, sterilizing filters must be appropriate for pharmaceutical use. Sterilizing filters labeled "for laboratory use" or equivalent must not be used. "Sterilizing filters must be certified by the manufacturer to retain at least 107 microorganisms of a strain of Brevundimonas diminuta per square centimeter of upstream filter surface area under conditions similar to those in which the CSPs will be filtered (ie, pressure, flow rate, and volume filtered)."	Yes		10.2

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
64.0	Are injectable compounded preparations that contain nonsterile components or that come into contact with nonsterile devices (eg, containers, tubing) during any phase of the compounding procedure, sterilized within six hours after completing the preparation? ***If no, describe observations and collect a copy of the master formulation record, a copy of the compounding record, and a copy of the process for sterilization.*** ***If the pharmacy does not compound with nonsterile components or devices, or they only compound sterile ophthalmic and/or sterile drugs administered by inhalation, inspector should answer question as N/A.***	Yes		10
65.0	**Filter Sterilization:** Does the pharmacy use the appropriate type of sterilization method, equipment, documentation, and testing in compliance with USP <797> standards? ***View compounding records for CSPs sterilized by filtration to verify.*** ***Inspector note: The sterilization method used must sterilize the CSP without degrading its physical and chemical stability (eg, affecting its strength, purity, or quality) or the packaging integrity.*** ***If no, go to compliance statements.*** ***If the pharmacy does not use this sterilization method, inspector should answer question as N/A.***	Yes		10.2 USP <1229.4>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
62.8	Compounding personnel are using the appropriate cleaning and disinfecting procedures and techniques within the PEC. ***Inspector note: Per USP, "All cleaning, disinfecting, and application of sporicidal disinfectants must be documented according to the facility's SOPs"; "Cleaning must be performed in the direction of clean to dirty areas"; and when 70% sterile IPA is used, it is used last and allowed to dry. There are differing opinions on the best order of cleaning. Procedure includes using a sterile low-lint wiper to all surfaces. Allow surfaces to dry completely before beginning compounding.***	Yes		7.1.2 Box 7, Box 8
62.9	The manufacturer's directions or published data for the minimum contact time is followed for each of the cleaning, disinfecting, and sporicidal disinfectant used. ***Per USP, contact times should be included in the SOP based on the agent used.***	Yes		7.1.1 Box 7, Box 8

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
61.0	Are there procedures for in-process checks performed by a pharmacist? ***Inspector note: In-process checks are safety steps for complex, multi-step compounding processes or high risk drugs or high risk populations (eg, neonates).*** ***These checks indicate that appropriate procedures and packaging are followed for each step, including addressing pharmacist verification of steps performed by non-pharmacists and visual inspection of product. Documentation of the compounding accuracy is recommended to be performed by someone other than the compounder to ensure proper measurement, reconstitution, and component usage. Some checks may be done retrospectively and with the assistance of technology.***	Yes		2 Table 2, Table 3
62.0	**Cleaning and Disinfection Observation:** Does the pharmacy perform cleaning and disinfection activities in compliance with USP <797> standards? ***If inspector is unable to observe cleaning activities (due to timing of compounding activities observed), inspector should interview compounder(s) to have them walk through their normal process. If this occurs, inspector should record in notes column "process only."*** ***If no, go to compliance statements.***	Yes		7
62.1	All cleaning and disinfection activities are performed by appropriately garbed personnel.	Yes		7

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
59.1	Single dose containers (entered or punctured only in an ISO Class 5 air or cleaner air) are not used beyond 12 hours after initial puncture or entry or assigned BUD, whichever is shorter. ***Inspector note: This applies to conventionally manufactured single-dose vials, compounded single-dose CSPs used as components, and CSP stock solutions. The labeled storage requirements during that 12-hour period must be maintained. Additionally, per USP, "This time limit for entering or puncturing (a single-dose CSP or CSP stock solution) is not intended to restrict the BUD of the final CSP."***	N/A	Conventionally manufactured single dose vials are not used.	15.1, 16.2
59.2	Multiple-use containers are not used for more than 28 days after initial puncture or entry, manufacturer specifications, or assigned BUD, whichever is shorter. ***Inspector note: This applies to conventionally manufactured multiple-dose vials and compounded multiple-dose CSPs used as components. Multiple-dose CSPs are required to meet the criteria for antimicrobial effectiveness testing (USP <51>) and must be stored under the conditions upon which its BUD is based (eg, refrigerator or controlled room temperature).***	Yes		14.5, 15.2, 16.1

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
58.7	All critical sites (eg, vial stoppers, ampule necks, and IV bag septums) are wiped with sterile 70% IPA in the PEC and allowed to dry before puncturing.	Yes		7, 8.3
58.8	Gloves are disinfected with sterile 70% IPA immediately before compounding and regularly throughout the compounding process. ***Inspector note: Per USP, best practice is to re-sanitize each time hands re-enter the PEC. This may not occur when compounder is staging the next batch.***	Yes		3.3
58.9	Gloves are regularly inspected for holes, punctures, or tears, and are replaced immediately if such defects are detected.	Yes		3.3
59.0	Do compounding personnel adhere to the USP established time limits for components after initial puncture or entry in compliance with USP <797> standards? ***Look at punctured, stored containers and confirm if puncture time or BUD is noted on the container and stored within time limits. If no, go to the compliance statements.***	Yes		15

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
58.5	Before any item is introduced into the PEC, it is wiped with sterile 70% IPA using sterile low-lint wipers and allowed to dry before use. ***Inspector note: Per USP, "When sterile items are received in sealed containers designed to keep them sterile until opening, the sterile items may be removed from the covering as the supplies are introduced into the ISO Class 5 PEC without the need to wipe the individual sterile supply items with sterile 70% IPA. The wiping procedure must not render the product label unreadable."***	No	The compounder failed to disinfect the forceps, which are used to remove the septum from the vial, before they were introduced into the PEC. Forceps were disinfected inside the PEC with an alcohol swab before use. The tip for the syringe used to transfer the compound into the vial was packed in sterile packaging and wiped down before introduction into the SEC, however, the packaging was not wiped before introduction into the PEC.	8.2
58.6	Aseptic processes and manipulations are performed in a manner intended to minimize the risk of contamination. ***Inspector note: Observe the compounder's technique to ensure proper aseptic technique is utilized such as: preparation occurs in the direct compounding area (DCA); the compounder does not interrupt first air during the compounding process; proper set up of equipment, supplies, and components that ensure first air is not interrupted; the compounder handles the syringe in a manner that does not introduce contaminates (touch contamination on the plunger rod); proper entry and exit of materials in ISO Class 5 PEC; and frequent sanitization of gloves.***	Yes		2.3

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
54.1	All outer garments such as hats, scarves, sweaters, bandanas, vests, coats, and jackets are removed.	Yes		3.1
54.2	Makeup and/or cosmetics are removed.	Yes		3.1
54.3	All hand, wrist, and other exposed jewelry, including piercings such as earrings, lip or eyebrow piercings, etc, are removed and any jewelry that cannot be removed is covered.	Yes		3.1
54.4	Earbuds or headphones are removed.	Yes		3.1
54.5	Electronic devices that are not necessary for compounding or other required tasks are prohibited from entering the compounding areas.	Yes		3.1
54.6	Nails are kept clean and neatly trimmed.	Yes		3.1
54.7	Any nail polish, artificial nails, or extenders are removed.	Yes		3.1
54.8	If worn, eyeglasses are wiped. ***If none of the pharmacy staff wear glasses, inspector should answer statement as N/A.***	Yes		3.1

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
53.4	Incubators used for environmental and personnel monitoring are monitored for temperature during incubation periods either manually or by use of a continuous recording device. ***Inspector note: Incubators store media at 20˚C-25˚C and 30˚C-35˚C. If the pharmacy has more than one incubator, review records for both incubators.*** ***View incubator temperature records to verify. Evaluate the size of the incubator and volume of media it can store. If the pharmacy does not incubate samples and/or media-fills in-house, inspector should answer statement as N/A.***	Yes	Manual monitoring is performed and recorded.	6.2.2, 6.3.2 Box 5
	Compounding Personnel Observation - Inspector ***must*** observe personnel performing compounding and related activities. This section will require the inspector to observe the staff while performing compounding and related activities. If the inspector is unable to view activities from a window or other observation area, it is expected they will gown/garb into compounding area. It is acceptable for pharmacy staff to perform mock compounding activities (with sterile saline or other drug) as long as all observations can be viewed.			
54.0	**Personnel Preparation Observation:** Before entering the compounding area, do compounding personnel remove any items that are not easily cleanable or are not necessary for compounding in compliance with USP <797> standards? ***If no, go to compliance statements.***	Yes		3.1

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
53.2	Automated compounding devices (ACDs) and other similar equipment (single channel or multi-channel) are assessed for accuracy and calibrated daily, prior to initial use, and a daily record is maintained. ***Inspector note: Per USP, "The precision of the equipment can be monitored based on an assessment of day-to-day variations in its accuracy measures. Compounding personnel must maintain a daily record of the accuracy measurements on the days the equipment is in use. Corrective actions must be implemented if accuracy measurements are outside the manufacturer's specification."***	Yes		9.1
53.3	Incubators used for environmental and personnel monitoring are placed in a location outside of the sterile compounding area and calibrated in accordance with manufacturer's instructions. ***If the pharmacy does not incubate samples and or/media-fills in-house, inspector should answer statement as N/A.***	Yes		6.1, 6.2.2, 6.3.2

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
52.4	When nonsterile ingredients, products, components, or devices (eg, non-sterile APIs and nonsterile vials and closures) are used for compounding, the pharmacy has the appropriate equipment to sterilize the finished product. Per USP, "Injectable compounded preparations that contain nonsterile components or that come into contact with nonsterile devices (eg, containers, tubing) during any phase of the compounding procedure must be sterilized within 6 hours after completing the preparation to minimize the generation of bacterial endotoxins in CSPs." ***If the pharmacy does not perform compounding that requires sterilization, inspector should answer statement as N/A.***	Yes		9.1, 9.3.1, 10
53.0	Does the pharmacy operate and maintain records for all equipment used for compounding in accordance with manufacturer specifications and USP <797> standards? ***If no, go to compliance statements.***	Yes		9.1, 20
53.1	Automated, mechanical, or electronic equipment (monitoring equipment, autoclaves, ovens, etc) are periodically inspected and calibrated yearly or in accordance with the equipment manufacturer guidelines.	yes		9.1, 9.3.4

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
51.4	The date of receipt by the pharmacy is clearly marked on each API or component package that lacks a vendor expiration date and are assigned and labeled with an expiration date not to exceed one year after receipt by the pharmacy.	Yes		9.3.2, 9.3.3
51.5	All components are reinspected before use. ***Inspector note: Per USP <797>, all packages must be inspected to detect container breaks, looseness of the cap or closure, and deviation from the expected appearance, aroma, and/or texture of the contents that might have occurred during storage. Sterile container closures are visually reinspected to ensure that they are free from defects that could compromise sterility and that they are otherwise suitable for their intended use.***	Yes		9.3.2, 9.3.3
51.6	Any component found to be of unacceptable quality upon receipt or reinspection prior to use is promptly rejected, clearly labeled as rejected, and segregated from active stock to prevent use before appropriate disposal.	Yes		9.3.2, 9.3.3
51.7	Any other lots of that component from that vendor are examined to determine whether other lots have the same defect.	Yes		9.3.2, 9.3.3

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
51.1	APIs or other components have been evaluated for use in sterile drug preparation. ***Inspector note: Per USP <797>, "Components labeled with 'not for pharmaceutical use,' 'not for injectable use,' 'not for human use' or an equivalent statement must not be used to compound for these purposes." If no, photograph and describe in the notes column. Request copies of the invoices for products with these types of labels.***	Yes		9.3.2, 9.3.3
51.2	Upon receipt of each lot of a component, personnel verify the labeling and condition of each component and examine the external packaging for evidence of deterioration and other aspects of unacceptable quality (eg, outer packaging is damaged, temperature-sensing indicators show that the component has been exposed to excessive temperatures).	Yes		9.3.2, 9.3.3
51.3	Each lot of commercially available sterile, depyrogenated containers and container-closure systems are accompanied by a COA or other documentation showing conformance with established specifications for sterility and depyrogenation requirements.	Yes		9.3.1, 9.3.2, 9.3.3

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
46.2	Reusable cleaning tools are made of cleanable materials (no wood handles or any other porous material).	Yes	Only handles are reusable and are stainless steel.	7.1.2
46.3	Reusable cleaning tools are dedicated for use in the classified areas or SCA and are not removed from these areas except for disposal.	Yes	Only handles are reusable and are stainless steel.	7.1.2
46.4	The pharmacy has the appropriate cleaners **EPA-registered disinfecting agent(s)** to adequately perform cleaning and disinfection. ***Inspector note: Examples of EPA-registered disinfectants include, but are not limited to: phenolics; oxidizers, such as peroxyacetic acid and sodium hypochlorite; quaternary ammonium; and hydrogen peroxide. If the agent is EPA-registered, a registration number will be on the label. Compounding personnel should have access to SDS and information/knowledge on dwell times. Per USP, Box 7, the pharmacy is to ensure the contact time specified by the manufacturer is achieved.***	Yes	Sterile Peridox RTU is used.	7.1.1 Box 7 <1072>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
41.3	The pharmacy uses an appropriate microbiological growth media for sampling. ***Inspector note: An appropriate microbiological growth media means a surface sampling device with a raised convex surface for sampling flat surfaces is used that contain general microbial growth media that supports the growth of bacteria and fungi (eg, TSA supplemented with additives that neutralize effects of any disinfecting agent, eg, lecithin and polysorbate 80), accompanied by a COA that verifies that the media meets expected growth promotion, pH, and sterilization requirements. Per USP, "sterile swabs wetted with sterile water or a sterile neutralizing buffer may be used when sampling irregular surfaces and difficult-to-reach locations such as crevices, corners, and spaces between surfaces."***	Yes		6.3.2 Box 6
41.4	The pharmacy incubates all surface samples in compliance with USP <797> following the one media device method. ***Inspector notes: Per USP <797>, when using the one media device method, sampling media is to be covered, inverted, and incubated at 30°C-35°C for no less than 48 hours. Then, after examination and recording of results, further incubated at 20°C-25°C for no less than five additional days.*** ***If the pharmacy does not utilize this method or sends offsite, Inspector should answer statement as N/A.***	Yes		6.3.2 Box 6

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
36.0	Is surface sampling performed at the end of a compounding activity or shift but before the area has been cleaned and disinfected (to obtain a sample that is representative of the typical compounding conditions at the pharmacy)? ***Inspector note: this is a USP recommendation.***	Yes		6.1, 6.3
37.0	Does the pharmacy send out all air quality for viable airborne samples to an external lab (third party) for incubation and processing? ***If pharmacy exclusively does internal incubation and results processing, inspector should answer statement as N/A.***	N/A	All sampling is incubated and processed internally.	6.2.2
38.0	Does the pharmacy send out all surfaces for viable particle samples to an external lab (third party) for incubation and processing? ***If pharmacy exclusively does internal incubation and results processing, inspector should answer statement as N/A.***	N/A	All sampling is incubated and processed internally.	6.3

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
35.6	Results from the environmental monitoring program (eg, viable air and/or surface monitoring) are reviewed in response to changes that could impact the sterile compounding environment (eg, change in cleaning agents) and in conjunction with personnel data (ie, training records, visual observations, competency assessments) to assess the state of control and to identify potential risks of contamination. ***Inspector note: Per USP, the program is reviewed to "assess risks for contamination, potential routes of contamination, and the adequacy of cleaning and disinfecting agents and procedures. Regular review of the sampling data must be performed to detect trends and the results of the review must be documented."***	Yes		6, 6.1, 6.2, 20 Table 4, Table 7, Table 8
35.7	The pharmacy ensures that viable air and surface sampling is performed by a trained and competent individual who is familiar with the methods and procedures for air sampling and surface testing. ***If sampling is conducted by internal personnel, inspector should verify that documented training and competencies are located in the employee file.***	Yes	Sampling is performed by internal trained personnel with competencies retained in the employee's file.	6, 6.1, 6.2
35.8	Environmental monitoring program (eg, viable air and/or surface monitoring) describes/identifies corrective actions to minimize the risk of CSP contamination and that these corrective actions are documented.	Yes		6, 20

		Observation	Inspector Notes	USP Reference(s)
35.2	Environmental monitoring program (eg, viable air and/or surface monitoring) is performed in conjunction with the certification of new facilities and equipment.	Yes		6, 6.1, 6.2
35.3	Environmental monitoring program (eg, viable air and/or surface monitoring) is performed after any servicing of facilities or equipment.	Yes		6, 6.1, 6.2
35.4	Environmental monitoring program (eg, viable air and/or surface monitoring) is performed in response to identified problems (eg, positive growth in sterility tests of sterile compounded preparation).	Yes		6, 6.1, 6.2
35.5	Environmental monitoring program (eg, viable air and/or surface monitoring) is performed in response to identified trends (eg, repeated positive gloved fingertip and thumb sampling results, failed media fill testing, or repeated observations of air or surface contamination).	Yes		6, 6.1, 6.2

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
34.0	Was smoke testing performed in SEC to confirm all particle generating equipment (eg, computers, printers, refrigerators, PECs) do not disrupt airflow? ***Inspector note: This question will be N/A unless the pharmacy is new, has recently completed construction, or equipment has been moved within SEC since last certification.***	Yes		5
35.0	Does the pharmacy have an established environmental monitoring (eg, microbiological air and surface monitoring) program in compliance with USP <797> standards? ***Inspector note: Per USP, "The goals of a microbiological air and surface monitoring program are to determine whether contamination is present at unacceptable levels and to assess whether proper personnel practices are being followed, cleaning and disinfecting agents are effective, and environmental quality is maintained."*** ***If no, go to compliance statements.***	Yes		6, 6.1, 6.2
35.1	Environmental monitoring program (eg, viable air and/or surface monitoring) is performed initially in the selected sampling sites to establish a baseline level of environmental quality for each classified area, ie, each ISO Class 5 PEC, each ISO Class 7, and ISO Class 8 room.	Yes		6, 6.1, 6.2

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
33.17	**PEC-IVLFZ:** Pharmacy's integrated vertical laminar flow zone (IVLFZ) meets design, functional requirements, and certification requirements under USP <797>. ***Inspector note: Per USP <797>, "Strategic location of air returns in addition to full coverage of HEPA-filters above the work surface is required. Both static and dynamic smoke studies of air returns in addition to full coverage of HEPA-filtered air void of turbulence, dead air zones, and refluxing from the HEPA filters to and across the entire work area and to the air returns must be documented (eg, with video):"*** ***If pharmacy does not use an IVLFZ, inspector should answer statement as N/A.***	N/A		4.2.3
33.18	If a **robotic enclosure is used as the PEC**, or placed within the PEC, a dynamic airflow smoke pattern test must be performed initially and at least every 6 months thereafter to ensure that: 1) it is properly integrated into the facility, 2) there is no turbulence or refluxing at any critical site(s), 3) room air does not enter the PEC where sterile products and/or preparations may be exposed, and 4) all processes can be performed without introducing contamination to the direct compounding area(s). ***If pharmacy does not use a robotic enclosure, inspector should answer statement as N/A.***	N/A		4.2.3

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
33.14	**PEC: Total (nonviable) particle count** testing was performed under dynamic operating conditions using calibrated electronic equipment. ***Inspector note: Per USP, "Measurements of total airborne particles must be taken in each PEC at locations where there is greatest risk to the exposed CSPs, containers, and closures...Measurements of total airborne particles in other classified areas, including the buffer room(s) and anteroom(s), should be taken at representative locations that reflect the quality of air in the room(s)."***	Yes		5, 5.1
33.15	**PEC:** All PEC HEPA filters were leak tested (to confirm **HEPA filter integrity**). ***Inspector note: The certification report for each PEC should show air velocities within the PEC.***	Yes		5
33.16	**PEC:** All PEC HEPA filters with leaks identified were repaired. ***If leaks were not repaired, describe what actions pharmacy took (example: PEC taken out of service until HEPA filter could be replaced).*** ***If no repairs were needed, inspector should answer statement as N/A.***	N/A		5

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
33.12	**PEC: (Dynamic airflow) Smoke pattern tests** are performed for each PEC during dynamic operating conditions to demonstrate unidirectional airflow and sweeping action over and away from the CSPs. ***Inspector note: Per USP, "HEPA-filtered air must be supplied by the PEC at a velocity sufficient to sweep particles away from critical sites and maintain unidirectional airflow during operations. Proper design, control, and use minimizes turbulence and creation of eddies or stagnant air in the PEC."*** ***Describe if smoke pattern testing of PEC was documented thoroughly in the report or through video.***	Yes	A video was provided as part of the environmental report.	4.2.2, 4.2.3, 5
33.13	**PEC: Dynamic airflow smoke pattern** confirms equipment and supplies necessary for performing compounding activities in the PEC do not disrupt unidirectional airflow. ***Inspector note: Per USP, "Proper placement of equipment in a PEC must be initially verified by a dynamic airflow smoke pattern test to demonstrate minimal disruption in airflow. The dynamic airflow smoke pattern test must be repeated if equipment is placed in a different location."***	Yes		4.2.2, 4.2.3, 4.5, 5, 9.1

		Observation	Inspector Notes	USP Reference(s)
33.8	**SEC: Airflow testing** is performed and documented on the certification report to determine acceptability of the **room pressure differential** in doorways between adjacent rooms.	Yes		4.2.5, 5
33.9	**SEC:** The differential pressure measured was at least 0.020 inch water column positive from the cleanroom to the anteroom and between the anteroom and all adjacent spaces with the doors closed. ***Inspector note: No pressure differential is required between the SCA and the surrounding area.***	Yes		4.2.1, 4.2.5, 5
33.10	**SEC:** All SEC HEPA filters were leak tested (to confirm **HEPA filter integrity**).	Yes		5
33.11	**SEC:** All SEC HEPA filters with leaks were repaired. ***If leaks were not repaired, describe what actions pharmacy took (eg, pharmacy implemented mitigation strategies such as reduced BUD or used alternative pharmacy location).*** ***If no repairs were needed, inspector should answer statement as N/A.***	N/A		5

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
33.5	**SEC:** All of the following ACPH required elements were documented on the certification report: the ACPH from HVAC, the ACPH contributed from the PEC, and the total ACPH. ***If pharmacy only compounds in an SCA, inspector should answer statement as N/A.***	Yes		4.2.4, 5
33.6	**The ISO Class 8 anteroom** is certified and documented as having a minimum of 20 ACPH with at least 15 ACPH of the total air change rate coming from HVAC through HEPA filters located in the ceiling. ***If the pharmacy has an ISO Class 7 anteroom, Inspector should mark as N/A.***	N/A		4.2.4, 5 Table 6
33.7	**The ISO Class 7 buffer room and ISO Class 7 anteroom (if required)** is certified and documented as having a minimum of 30 ACPH with at least 15 ACPH of the total air change rate in a room coming from the HVAC through HEPA filters located in the ceiling. ***Inspector note: If the PEC is used to meet the minimum total ACPH requirements, the PEC must not be turned off, except for maintenance.***	Yes		4.2.4, 5 Table 6

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
33.2	The certification report includes the name of the certifier. ***Inspector note: Per USP <797>, a qualified certifier may have received training and education from professional organizations such as the American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) and Controlled Environment Testing Association (CETA). Both organizations provide certification (Registered Certification Professional – Sterile Compounding Facilities), education, and resources.***	Yes		5
33.3	The certification report describes the "dynamic conditions" including the number of personnel in the cleanroom suite. ***Inspector note: Compounders can perform mock compounding activities and/or performing media-fill while the certifier is conducting testing. Number of personnel present in the SEC must be documented.***	Yes		5, 20
33.4	**SEC: Airflow testing** is performed and documented on the certification report to determine acceptability of the **air volume and room air exchange rate (ACPH).** ***Inspector note: Per USP <797>, unclassified SCAs have no ACPH requirement.*** ***If pharmacy only compounds in an SCA, inspector should answer statement as N/A.***	Yes		4.2.4, 5 Table 6

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
24.2	The facility has a system in place to continuously monitor pressure differentials (eg, magnehelic gauge). ***Per USP, pressure differentials need to be monitored continuously, but personnel are not specifically required to visually monitor pressure during compounding activities.***	Yes		4.2.1, 4.2.5, 5
24.3	The facility has a record system to record pressure differentials on days when compounding occurs. ***Inspector note: Per USP, the quantitative results from the pressure monitoring device must be reviewed and documented at least dally on the days when compounding is occurs.***	Yes		4.2.1, 4.2.5, 5
24.4	The differential positive pressure between unclassified and the first space in the compounding suite is at least 0.020 inch water column. ***Inspector note: Per USP, certifiers should confirm (this is a USP recommendation) positive pressure around doorways, pass-throughs and any opening in the cleanroom suite with smoke testing (to confirm positive pressure is maintained) with initial certification of the cleanroom suite.*** ***If no, record the observed pressure differential between the two identified spaces (eg, ISO Class 8 anteroom and the general pharmacy area).***	Yes		4.2.1, 4.2.5, 5

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
23.0	Is the humidity maintained at less than 60% relative humidity (RH) in the compounding area to minimize risk of microbial proliferation?	Yes		4.2, 9.3.4, 19.1
24.0	Is differential positive pressure maintained in compliance with USP <797> standards? ***Inspector note: Per USP <797>, no pressure differential is required between the SCA and the surrounding area.*** ***If no, go to compliance statements.*** ***Inspector should view logs and current status (while observing compounding) to verify.*** ***If the pharmacy uses an SCA for sterile compounding environment, inspector should answer statement as N/A.***	Yes		4.2.1, 4.2.5, 5
24.1	The facility design creates room separation to allow positive pressure differentials between spaces (rooms) for movement of air from higher quality air to lower quality air. ***Inspector should review a graphic of the airflow contained in the certification report.***	Yes		4.2.1, 4.2.5, 5

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
18.9	Humidity monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. ***Inspector note: Monitoring devices are typically calibrated or replaced.***	Yes		4.2, 9.3.4
19.0	Does the pharmacy store drugs in the cleanroom suite overnight and/or for long periods of time? ***Inspector note: Long periods of time is not defined as pre-compounding preparation right before compounding activities are commenced.***	Yes		4.2, 9.3.4, 19.1
20.0	If the pharmacy is storing drugs inside the cleanroom suite overnight and/or long periods of time, are any of the drugs stored unable to tolerate temperature excursions?	No		4.2, 9.3.4, 19.1
21.0	What is the current temperature of the cleanroom suite/SCA? ***Record in the Inspector Notes.***	[redacted]	The current temperature is 68.06 degrees F.	4.2, 9.3.4, 19.1
22.0	What is the current relative humidity percentage of the cleanroom suite/SCA? ***Record in the Inspector Notes.***	[redacted]	The current humidity is 52.7%.	4.2, 9.3.4, 19.1

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
18.6	The pharmacy controls temperature and humidity to maintain appropriate working conditions if no overnight drug storage occurs and/or is following the most restrictive drug label. ***Inspector note: Per USP <797>, the cleanroom suite should be maintained at a temperature of 20°C or cooler and a relative humidity of 60% or below to minimize the risk of microbial proliferation and to provide comfortable conditions for compounding personnel attired in the required garb. CRT is defined as 20°C-25°C per USP <659>.***	Yes		4.2, 9.3.4, 19.1
18.7	The placement of the HVAC unit does not cause cross contamination or interfere with the functioning of the classified area. ***Inspector note: Air streams from the HVAC system(s) can disrupt the unidirectional airflow of an open faced PEC such as a laminar airflow workbench (LAFW).***	Yes		4, 4.2
18.8	Temperature monitoring devices are verified for accuracy at least every 12 months or as required by the manufacturer. ***Inspector note: Monitoring devices are typically calibrated or replaced.***	Yes		4.2, 9.3.4

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
18.3	The pharmacy records the humidity of the cleanroom suite on days when sterile compounding occurs. ***If pharmacy does not use a continuous recording system, describe the frequency of humidity recording in the notes.***	Yes	An electronic continuous monitoring and recording device is used.	4.2, 9.3.4, 19.1
18.4	The pharmacy maintains records of temperature and humidity that are specific to the cleanroom suite. ***Temperature and humidity for drug storage areas will be documented in the general pharmacy module.*** ***If the pharmacy only uses an SCA, inspector should answer statement as N/A.***	Yes		4.2, 9.3.4, 19.1
18.5	The pharmacy can readily retrieve temperature and humidity records. ***If the electronic monitoring system is only capable of providing text message alerts for excursions alone (eg, a report cannot be generated for ongoing temperature conditions), inspector should answer statement as "No."***	Yes		4.2, 9.3.4, 19.1

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
18.0	Does the pharmacy's facility design for maintaining (eg, recording, monitoring, and controlling) temperature and humidity (eg, HVAC) comply with USP <797> standards? ***Inspector note: Compounded preparations that are finished and stored will be addressed in the general pharmacy module. Inspector should be aware that USP cleanroom temperature recommendations may not be harmonized with USP, FDA, or manufacturer/supplier temperature requirements for drug storage.*** ***If no, go to compliance statements.***	Yes		4.2, 19.1 USP <659>
18.1	The compounding area temperature and humidity is maintained by a heating, ventilation, and air conditioning (HVAC) system. ***If inspector finds a free-standing air conditioner, humidifier, or dehumidifier within the classified area or the SCA, the inspector should answer statement as "No." Additionally, inspector should describe what they observed, where the equipment was located, and collect/submit photographs.***	Yes		4.2, 9.3.4, 19.1
18.2	The pharmacy records the temperature of the cleanroom suite on days when sterile compounding occurs. ***If pharmacy does not use a continuous recording system, describe the frequency of temperature recording in the notes.***	Yes	An electronic continuous monitoring and recording device is used.	4.2, 9.3.4, 19.1

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
17.5	Only furniture, equipment, and other materials necessary for performing compounding activities are permitted in a classified area or SCA. ***Inspector note: Per USP, items necessary for performing compounding activities are low-shedding and can be easily cleaned and disinfected. If no, describe the types of items that are observed. If appropriate, submit a photograph with inspection report.***	Yes		4.5, 9.1
17.6	Tacky mats are not used in the classified areas. ***Inspector note: Per USP <797>, "Tacky mats must not be placed within ISO-classified areas."***	Yes		4.2.1
17.7	Shipping cartons or other corrugated or uncoated cardboard are not permitted in the classified areas.	Yes		4.5
17.8	Carts used to transport components or equipment into classified areas are constructed from nonporous materials with cleanable casters and wheels.	N/A	No carts are used.	4.5
17.9	Carts (including casters) are cleaned and disinfected prior to moving from the dirty side to the clean side of the anteroom.	N/A	No carts are used.	4.5

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
17.2	The sink used for hand hygiene, located inside of the anteroom, is placed in an appropriate area to minimize the risk of bringing contaminants into the buffer room. ***Inspector note: Inspector should evaluate the sink location in relation to the doors and compounding activities. For example, the sink is where compounders perform hand hygiene close to where garb is stored (where it can easily get wet/splashed).*** ***If the sink is located outside the anteroom, inspector should answer statement as N/A.***	Yes		4.4
17.3	The doors into the anteroom from the general pharmacy area and from the anteroom into the clean/buffer room are prevented from both being open at the same time (eg, by interlocking, training of personnel, or signage).	Yes	This is prevented by signage and training.	4.2.1
17.4	The inside and outside doors of a pass-through are prevented from both being open at the same time (eg, by interlocking, training of personnel, or signage).	Yes	This is prevented by an interlock.	4.2.1

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
15.3	Sterile gloves are worn over the gloves attached to the CAI/CACI sleeve. ***Inspector note: Per USP, if using a RABS (ie, a CAI or CACI), disposable gloves should be (not required) worn inside the gloves attached to the RABS sleeves.***	N/A		3.3
16.0	Are there controls in place to minimize the influx of contaminants from materials (supplies and equipment) and personnel as they move from areas of lower quality to those of higher quality in compliance with USP <797> standards? ***Inspector note: An example of material movement from lower quality air to higher quality air includes movement from a non-classified area to an ISO Class 8 anteroom, ISO Class 8 anteroom to an ISO Class 7 buffer room, or from an ISO Class 7 buffer room to an ISO Class 5 PEC. If no, go to compliance statements.***	Yes		4.5
16.1	Before any item is introduced into the SEC, placed into the pass-through chamber, or brought into the SCA (providing that packaging integrity will not be compromised), it is wiped with a sporicidal disinfectant, EPA-registered disinfectant, or sterile 70% isopropyl alcohol (IPA) using low-lint wipers by personnel wearing gloves.	Yes	Sterile 70% IPA is used.	4.5

PI Measure/Activity	Frequency	Person Responsible	Data Source	Threshold	Corrective Actions
Capsule weight variance testing is performed for each batch of capsules prepared by the pharmacy. For the records selected above, the auditor will verify the procedure was performed per USP<1163>.	Quarterly Quarterly		5% or 50 compounding records, whichever is less.	95% of CRs for capsules have documented weight variation testing results 100% of the CRs have weight variation testing performed per USP<1163>	PI Team to evaluate and develop a written plan of correction.
Patient satisfaction survey results	Quarterly		100% of returned patient satisfaction surveys	75% of patient report a satisfactory experience	PI Team to evaluate and develop a written plan of correction.
DMEPOS Billing & Coding Errors Audit	Quarterly		100% of Denied claims	0% denied claims	PI Team to evaluate and develop a written plan of correction.
DMEPOS Patient Records	Quarterly		5% of patient records or 50 records, whichever is greater.	95% of patient records are properly documented	PI Team to evaluate and develop a written plan of correction.

As appropriate, each indicator must include and/or address any activities required under state or federal laws or regulations.

Sample PI Activity Schedule
See next page

Establish Thresholds

For each indicator, a threshold for evaluation will be established. A threshold for evaluation should be set to reflect a reasonable level of performance that the company wishes to achieve. For example, for the data element "Adult patients' weights are documented monthly", the threshold 80% may be reasonable. On the other hand, for the data element "Patients receiving penicillin and related antibiotics have medication allergies documented" the threshold should be set at 100%, as even a single omission could prove serious or even fatal.

Note that some measures may not have a threshold at all. Progress on these indicators may be evaluated against a baseline. The company may strive to improve its' performance in a given area by comparing its performance against itself over time.

Plans to Re-evaluate

Each indicator should address plans to re-evaluate if findings fail to meet acceptable thresholds. However, even if an indicator meets acceptable thresholds, the PI team may elect to continue monitoring the indicator, to assure the process remains within acceptable limits.

Documentation of PI Indicators

PI indicators will be documented on the PI Activity Schedule

Corrective Actions

The PI will create a written plan of correction to address any findings that do not meet acceptable thresholds. Each written plan of correction must address:

- An analysis of possible causes the threshold was not met
- The specific corrective actions taken to address the finding(s)
- A time frame for re-evaluation

Corrective Actions will be documented on the PI Plan of Correction Form and will be peer-reviewed for accuracy, sufficiency of information, and improvement.

In the case of a medication error, there shall be both internal and external reporting of the event and the information must be analyzed for trends and patterns.

Any other activities required under state or federal laws or regulation

In this step, the frequency of data collection activities for the indicator must be determined. Consideration must be given to:

- The frequency of PI committee meetings

- How frequently the data is generated:
  - A large quantity of compounding records is generated monthly.
  - Personnel training occurs annually or biannually.

  Whereas an indicator requiring monthly review of compounding records may generate significant data to identify a trend, a monthly review of personnel training records may not.

Assign Responsibility

Each performance improvement will be assigned to one or more individuals. This individual(s) may be responsible for collecting data, organizing data, and/or analyzing data.

Determine Methods of Data Collection

In this step, the methods of data for each data element must be identified. Data collection may include reviews of

- annual patient satisfaction surveys (FM-04 Complaint or Quality Related Event (QRE) Report),
- clinical record
- master formulation records/compounding records
- incident reports,
- equipment maintenance records, etc.

The data collection source should also be carefully considered in defining an indicator. Methods of data collection should allow retrievability of the needed information. For example, an indicator that requires an entire chart review as its' collection source may force the PI committee to expend much of its resources on data collection rather than analysis and improvement.

Ideally, some data collection for improving organizational performance may be incorporated into already existing processes. For example, it may be possible for a computer system to gather PI information in the normal course of business or clinical care.

Care should also be taken to select a collection methodology and sample size which provides the needed information yet does not force the majority of the PI effort to be spent on data collection rather than analysis. If a data element requires excessive or burdensome data collection activities, it may be necessary to modify it or redefine it.

Sample structure indicator: Every prescription bottle has a label.	Sample process indicator: Every prescription has a label stating directions for use consistent with the physicians' orders.	Sample outcome indicator: Patients can clearly understand directions for use of their medication by reading the label.

In select for the PI plan process and outcome measures will be used whenever possible.

Care must be taken to develop performance measures that are objective and measurable. An example of a poor performance measure is "As noted by documentation, all injections meet standards". This measure is not objective, as clearly the results would vary depending on the individual reviewing the record. The example is also not measurable, as it is difficult if not impossible to quantify "meets standards". In this example, the objective may be better measured by focusing on a more easily measurable aspect of injection testing, such as "injections pass a USP<71> compliant sterility test."

Determine Data Elements

Once the PI committee chooses a performance measure, data elements must be selected to allow data collection. The design of the data elements must allow objective and measurable data collection while achieving the intent of the performance measure.

For example, the PI Indicator "Master formulation records contain all required data" can contain the following elements:

- Name, strength and dosage form
- Ingredients and their quantities
- Pertinent calculations
- Equipment and equipment settings used to produce the preparation
- Mixing and/or other pertinent instructions
- Quality control procedures and expected results
- Compatibility and stability information including references when available
- Beyond use date (BUD)
- Container and packaging used for dispensing
- Packaging and storage requirements
- Labeling information including generic name and quantity/concentration of each active ingredient
- A description of the final preparation

Determine Frequency of Activities

- To address a regulatory finding

Indicator Structure

Performance measurement is a critical activity of the PI plan. Using information gathered through this function, the company can make judgments about existing processes, identify opportunities for incremental improvements, identify the need to redesign processes, and decide if improvements or redesigns meet PI objectives.

Each performance measurement activity will contain the following elements:

- A description of indicators to be monitored/activities to be conducted.
- Frequency of activities
- Designation of who is responsible for conducting the activities
- Methods of data collection
- Acceptable limits for the findings (Thresholds)
- Who will receive the reports
- Plans to reevaluate if findings failed to meet acceptable limits
- Any other activities required under state or federal laws or regulations

The PI committee may identify many different opportunities for improvement. Because there will probably not be enough time to measure all of them a decision must be made to prioritize which opportunities have the highest priority at the present time. The reason for selecting a particular indicator should be identifiable and rational. The basis for the decision should be consistent with priorities, strategic planning, high volume, high risk or problem prone activities, important functions and the needs of patients, employees, and the company. Documentation of meetings where the PI committee selects indicators should include notes regarding the strategy and rationale for selecting which opportunities are pursued.

Developing Indicators

The company will attempt to develop performance measures to evaluate its progress towards a particular goal. Indicators generally fall into three categories:

- Structure indicators reflect specific characteristics of the organization and define inputs into care or service.
- Process indicators encompass the activities that go into producing an outcome.
- An outcome indicator describes the product of one or more processes.

Examples:

Sentinel events
Benchmarking with external databases and other organizations when information is available
Review of medication errors and adverse drug reactions
Billing and coding errors
Comparison with other measurement resources that may be available such as practice guidelines or standards of care.

PI Committee Activities

Routine Quarterly Activities

Review and as appropriate take action on:

- Patient satisfaction survey results
- Complaints/Complaint log
- Incidents/accidents & adverse events
- Infection log

Review of specific PI indicators as described in the PI schedule attached to this document.

On an ongoing basis, at least one indicator will address one or more of the following important aspects of care:

- An important aspect of care related to the non-sterile compounding process
- An important aspect of care related to the sterile compounding process

Routine Annual Activities

The PI committee will produce an annual written report which includes an evaluation of:

- The effectiveness, quality and appropriateness of care/service provided to clients/patients
- The effectiveness of the overall administrative and fiscal operations
- The effectiveness of all programs including care/service provided under contractual arrangements
- Utilization of personnel
- A summary of the review and revision of policies and procedures and forms used by the organization
- An annual performance improvement report

Unscheduled & As Needed Activities

The PI committee may meet on an as needed basis to perform PI activities, for example:

- To investigate an adverse event

Program Design

Information regarding the results of all mandatory quality assurance and quality control activities will be reported to the PI committee. The PI committee will review these results and use the findings and conclusions of the review to take appropriate action when necessary, including developing indicators to monitor or correct findings on an ongoing basis.

Quality assurance activities and data sources include but are not limited to:

Personnel competency activities and documentation
Routine equipment maintenance and calibration
Documentation of Infections

A quality related event is defined as an event that does not conform to what should normally be or occur with regards to prescriptions medications regardless if it is corrected prior to delivery to the patient or not. Some examples include:

- a dispensing error - wrong drug, wrong strength, script was filled incorrectly
- compounding issues - tablet integrity is lacking, cream is gritty, solution crystallized
- shipping error - shipped to the wrong patient, ice is not included, inserts are missing, incorrect inserts are included

Most of the SOPs in this manual relate to quality assurance activities designed to ensure the quality and safety of compounded preparations.

Quality control activities and data sources include but are not limited to:

Results of finished preparation tests
Reports of Incidents, accidents, infections, unusual occurrences related to the quality of finished preparations
Results of regulatory inspections or insurance audits
Complaint logs
Patient satisfaction survey results
Patient records

Many of the SOPs in this manual relate to assessing and documenting the quality of finished preparations.

Priorities for the PI program to study and improve may be established from a number of sources or combination of sources. Sources may include:

Patient, staff and customer's ideas, needs and expectations
Data from process and outcome measures
Data from quality control measures.
Design and re-design of existing and new processes

Performance Improvement Program

Purpose

This plan outlines a framework for systematically improving organizational performance in regard to the quality of pharmacy services provided by the company.

Priorities

The Performance Improvement (PI) program aims to improve the quality of service to the patient, the working environment for our employees, and the company's financial performance. It is a priority of this program to ensure that all disciplines participate collaboratively in the goal of improving organizational performance.

PI Team

All employees are expected to participate in PI activities when requested, and annually at a minimum. In addition, all management staff must be actively involved in the PI process. Christian Stella, PharmD, ABAAHP, FAAMM is the designated person in charge of overseeing this program

All personnel will receive training related to PI activities and their role. This training will include:

- The purpose of PI activities
- The individual's role in PI activities
- Personnel or person responsible for coordinating PI activities
- Previous and ongoing PI activities

Confidentiality

Everyone participating on the PI committee or otherwise having access to data gathered for PI will adhere to the company's policies and procedures regarding confidentiality of patient information. With the exception of incident reports, which may identify a specific patient, all patient data collected and analyzed will be presented in such a way as to prevent direct identification of the specific patient(s) from which the data was collected.

Use of PI Data for Personnel Evaluations

When PI results or data are relevant to the performance of an individual, they may be used as a component of the evaluation of the individual's competencies.

Attachment E:

SOP AND USP<797> ACKNOWLEDGEMENT

I Sookdeo Ugasir am stating that I have read and understand the non-sterile compounding standard operating procedures (SOP'S) and will abide by them. I also acknowledge I have read the current version of USP<797>.

By signing this form, I also understand that I could be randomly questioned on my understanding of the SOP'S and it is my responsibility to be familiar with and have a clear understanding of them, and how and where to access them. I understand that if I do not abide by the SOP'S that further training and review will be necessary. I have been provided with an opportunity to ask questions or clarify items related to this review. If I willfully and intentionally do not abide by the SOP'S set forth, management will take necessary disciplinary measures.

Employee Signature: _____ Date: 5/31/2024

Witness Signature: _____ Date: 5/31/2024

Attachment D: Viable Air and Surface Testing

For Monthly Air and Surface Testing:

- Attach appropriate sample contact plates label and Certificate of Quality
- Document media serial number and expiration date
- Perform testing starting on site one and precede testing numerically per map ensuring testing is clean to less clean.
- Label with each plate the ID number and date tested.
- Once plates are sampled, place plates face down in a dedicated tote then transport from the sterile suite to tape the samples.
- Ensure the incubator is stabilized at 30°C to 35°C and it is equipped with a secondary temperature sensor. Where the incubators are tracked with alarms 24/7 a paper log is not necessary.
- Insert the plates in the Incubator face down for a minimum of 48 hours.
- Remove the plates carefully, inspect and note the results above.
- Replace samples to be incubated in house a second incubator set to maintain a range of 26°C to 30°C for 5 to 7 additional Days.
- Remove the plates carefully inspect & photo in such a way to clearly prove growth or no growth.
- When removed, the samples or clear photos of the samples shall be thoroughly inspected by Puritechsolutions, CETA number 00011047, who shall provide witness documentation.
- Samples showing growth shall be shipped via overnight delivery to US Micro to perform identification of the organism(s) genus and species. US Micro will provide a written report showing complete results of the identification testing and number of CFUs per sample.
    - The PIC is to be immediately notified if a sample is to be sent out to US Micro.
    - If the results require action, the Board of Pharmacy shall be immediately notified, and production shall be determined per their guidelines.

Attachment C: Sterile Training Documentation - Initial and Annual

Job Description: Sterile Compounding Technician

Technician/Pharmacist: Sookyeo Chagil

General Training Requirements

Requirement	Date Completed	Employee Initials
Read and understand USP<797> and other applicable standards and relevant literature.	5/31/24	S.C.
Watch OSHA video on reading SDS	5/31/24	S.C
Read and understand procedures related to compounding duties.	5/31/24	S.C.
Trained and understands how to interpret Safety Data Sheets (SDS) and if applicable, Certificates of Analysis.	5/31/24	S.C-
Trained and understands how to handle and transport of components and compounded sterile preparations	5/31/24	S.C
Trained and understands how to perform pharmaceutical calculations relevant to their assigned duties	5/31/24	S.C.
Trained and understands the HD list, location of HD list, and how to access it	5/31/24	S.C-
Trained and understands location and use of eye washes and/or showers and spill kits	5/31/24	S.C..
Initial Training: Passes gloved fingertip and thumb sampling test 3 times with a CFU of 0.	5/31/24	S.C
Subsequent Training: Passes a gloved fingertip and thumb sampling test after media fill testing with a CFU count ≤3	5/31/24	S.C.
Acceptably completes a hand hygiene and garbing practices observational assessment	5/31/24	S.C

Employee Signature S.C Date: 5/31/2024

Evaluator Signature: [signature] Date: 5/31/24

Maintains critical sites in first air. Does not block first air during compounding operations	✓	
Avoids: (a) Leaning into or over the work area (b) Blocking "First Air" between sanitized and/or open containers. (c) Resting hands or forearms on the work area. (d) Coughing over the work area. (e) Rapid movement in the direct compounding area (DCA). (g) Using a PEC as a storage space when not in use. (i) Performing any activities unrelated to compounding	✓	
Disinfects stoppers, injection ports and ampoules with sterile 70% IPA and allows sufficient time to dry.	✓	
Attaches needles to syringe without contact contamination. Avoids touching syringe barrel.	✓	
Does not pick up items any items dropped on floor until sterile compounding operations are complete.	✓	
Punctures vial stoppers and spikes infusion ports without contact contamination. Performs needle punctures with bevel up.	✓	
Applies sterile 70% IPA to the horizontal work surface of the PEC at least every 30 minutes if the compounding process takes 30 minutes or less. If the compounding process takes more than 30 minutes, compounding is not be disrupted and the work surface of the PEC is disinfected immediately after compounding.	✓	
Checks the expiration dates and/or color indicators when using autoclaved equipment.	✓	
Disposes of sharps in a medical waste container without risk of needle sticks.	✓	

Exiting the Cleanroom

Ensure that the cart or conveyance that is used to transport components of CSPs or materials from the Buffer areas do not cross the Line of Demarcation separating the "Clean" side of the anteroom from the "Dirty" side.	✓	

Completed Preparations and Quality Control

Visually inspects finished preparations to ensure appearance is as expected, e.g., inappropriate visible particulates, foreign matters, discoloration, or other defects.	✓	
Visually inspects finished preparations to ensure container-closure integrity such as leakage, cracks in the container, or improper seals.	✓	
Performs other quality control checks appropriately per the Master Formulation record	✓	
Labels preparations correctly.	✓	
Performs final check of ingredients used against compounding record.	✓	
Disposes of waste/sharps appropriately	✓	

Leaving the Buffer Room

Item	Yes	No
Removes personal protective equipment on the dirty side of the ante area	✓	
Removes gloves and performs hand hygiene	✓	
Removes gown and discards it, or hangs it on hook if it is clean and can be used the same shift	✓	
Removes and discards mask, head cover, and beard cover prior to leaving compounding lab.	✓	
Removes shoe covers when leaving the compounding lab	✓	

Evaluator Comments

Attachment A:

Performance Audit of Hand Hygiene and Garbing for Sterile Compounding - Initial and Annual

Employee Name:	Sookdeo Ojagir
Position:	Sterile Compounding Technician

Directions: A qualified evaluator will check each space for which the person being assessed has acceptably completed the described activity, prints N/A if not applicable or N/O if activity was not observed. The person assessed is immediately informed of all unacceptable activities and shown specific corrections.

Entering Compounding Area

Item	Yes	No
Presents in a clean appropriate attire and manner. Remove personal outer garments (e.g., bandanas, coats, hats, jackets, sweaters, vests, jewelry). Does not enter if sick or exposed to illness.	✓	
Removes all cosmetics because they shed flakes and particles.	✓	
Keep nails clean and neatly trimmed to minimize particle shedding and avoid glove punctures. Nail products (e.g., polish, artificial nails and extenders) must not be worn.	✓	
Wipes eyeglasses if worn.	✓	
Does not wear earbuds or headphones. Does not bring electronic devices that are not necessary for compounding or other required tasks into the compounding area.	✓	
Brings no food of drinks into ante-area or buffer areas	✓	
Is aware of the line of demarcation separating clean and dirty sides and observes required activities.	✓	
Dons shoe covers one at a time, placing the covered or designated show on the clean side of the line of demarcation as appropriate.	✓	
Dons beard cover if necessary.	✓	
Dons head cover assuring that all hair is covered.	✓	
Performs hand hygiene procedure by wetting hands and forearms and washing using soap and warm water for at least 30 seconds.	✓	
Dries hands and forearms using lint-free towel	✓	
Selects appropriately sized gown examining for tears or other defects	✓	
Dons gown and ensures full closure	✓	
Gown sleeves do not contact floor or other surfaces during donning	✓	
Enters buffer room without contaminating hands	✓	
Disinfects hands again using waterless alcohol-based hand rub and allows hands to dry thoroughly without waving or blowing prior to donning sterile gloves	✓	
Dons appropriately sized sterile gloves ensuring that there is a tight fit with no excess glove material at the fingertips	✓	
Examines gloves to ensure that there are no defects, holes, or tears.	✓

Prep Room Gowning	
Observed Action	**Compliant (Y/N)**
Steps on tacky mat before entering prep room	Y
Dons hair net and beard cover if applicable	Y
Dons face mask	Y
Dons shoe covers on shoe at a time while crossing the line of demarcation	Y
On clean side of Anteroom	Y

Anteroom Gowning	
Observed Action	**Compliant (Y/N)**
Wash hands (soap with water)	Y
Dry hands (lint-free wipes)	Y
Dons disposable lab coat	Y

Buffer Room Gowning	
Observed Action	**Compliant (Y/N)**
Disinfect Hands (alcohol-based surgical hand scrub)	Y
Allow hands to dry	Y
Don sterile gloves	Y
Disinfect gloves (sterile 70% IPA)	Y

Observational Checklist: Sterile HD Compounding Performance Audit

Job Description: Sterile Compounding Technician

Technician/Pharmacist: Sookhoo Chagi-J Date: 5/31/2024

Employees will demonstrate the following prior to compounding independent from the trainer or PIC.

Employees are to be retested annually.

Check Yes/No	General Sterile HD Compounding Knowledge
✓	Wears appropriate PPE.
✓	Compounds HDs only in an appropriate PEC.
✓	If the ISO-5 PEC is co-located with a PEC for presterilization procedures, sterile compounding is not performed at the same time as particle generating activities.
✓	Covers work surface with a sterile plastic backed preparation mat.
✓	Only introduces the materials for one patient or batch into the PEC at a time.
✓	Disinfects exteriors of containers, vials supply etc. with SIPA prior to introducing into PEC.
✓	If hands are removed from PEC during compounding, gloves are disinfected with SIPA and allowed to dry prior to re-entry.
✓	Works with equipment and materials as far back in the cabinet as practical.
✓	Follows best practices for compounding in a vertical air flow device. Does not block first air. Disinfect hands with SIPA every 30 minutes while compounding.
✓	Syringes used to measure HDs are no more than ¾ full. • Expels bubbles in a manner that prevents aerosolization. Uses syringes with luer lock fittings.
✓	Compounding technique is adjusted to prevent aerosolization and volatilization.
✓	Deactivates and decontaminates the exterior of finished compounded preparations prior to removing them from the PEC.
✓	Deactivates and decontaminates all glassware, equipment and utensils per the established procedure prior to removing from PEC.

Controlled Substance Inventory

Name of Drug (Strength and Dosage Form If Applicable)	Raw Material?	Finished Product?	Total Number of Containers	Total Count of Individual Units	Lot Number	Date

6.1 This inventory is to also be conducted when there is a change of Pharmacist-in-Charge, change of address, any moving or construction, suspected theft or loss, natural disaster, at the request of a regulatory agency, or any other time the Pharmacist-in-Charge or owner(s) deems necessary.

VI. References:

- US Dept. of Justice, Drug Enforcement Administration Office of Diversion Control-Pharmacist Manual Section I-VIII
- SOP 5.03 - Controlled Substance Prescription Monitoring Program
- SOP 5.04 - DEA Form 222 Ordering/ Processing/ Receiving

VI. Attachments:

1.0 Attachment 1: Controlled Substance Inventory Template

- A file for all other drugs dispensed (non-controlled and those in Schedules III, IV, and V). If this method is used, a prescription for a Schedule III, IV, or V drug must be made readily retrievable by use of a red "C" stamp not less than one inch high. If the Pharmacy has an electronic recordkeeping system for prescriptions which permits identification by prescription number and retrieval of original documents by prescriber's name, patient's name, drug dispensed, and date filled, the requirement to mark the hard copy with a red "C" is waived.

- Electronic Prescription Records

  - If a prescription is created, signed, transmitted, and received electronically, all records related to that prescription must be retained electronically.

  - Electronic records must be maintained electronically for two years from the date of their creation or receipt. However, this record retention requirement shall not pre-empt any longer period of retention which may be required now or in the future, by any other federal or state law or regulation applicable to pharmacists or pharmacies.

  - Records regarding controlled substances must be readily retrievable from all other records. Electronic records must be easily readable or easily rendered into a format that a person can read.

4.0 Records of electronic prescriptions for controlled substances shall be maintained in an application that meets the requirements of 21 CFR 1311. The computers on which the records are maintained may be located at another location, but the records must be readily retrievable at the registered location if requested by DEA or other law enforcement agent. The electronic application must be capable of printing out or transferring the records in a format that is readily understandable to an Administration or other law enforcement agent at the registered location. Electronic copies of prescription records must be sortable by prescriber name, patient name, drug dispensed, and date filled.

5.0 Invoices/Receipts: All receipts and/or invoices for controlled substances whether they are for raw materials or finished products are to be signed by the person accepting the package and dated. These receipts will be furnished to the pharmacy's controller and maintained for record keeping purposes.

6.0 An annual inventory of all controlled substances is to be conducted during the month of May of each calendar year. The inventory is to be conducted by the Pharmacist-in-Charge. The inventory shall include raw materials as well as finish products. Attachment 1 is to be completed. Each inventory is to be filed and maintained for record keeping purposes.

3.0 Records and inventories of Schedule II controlled substances must be maintained separately from all other records of the registrant. All records and inventories of Schedules III, IV, and V controlled substances must be maintained either separately from all other records or in such a form that the information required is readily retrievable from the ordinary business records.

Retrievable Records

1.0 Readily retrievable records are defined as:

- Records kept by automatic data processing systems or other electronic or mechanized recordkeeping systems in such a manner that they can be separated out from all other records in a reasonable time.
- Records kept in such a manner that certain items are asterisked, redlined, or in some other manner visually identifiable apart from other items appearing on the records.

2.0 Central Recordkeeping: A registrant desiring to maintain shipping and financial records (but not executed official order forms) at a central location rather than the registered location must submit written notification of his/ her intention by registered or certified mail, return receipt requested, in triplicate, to the Special Agent in Charge of the local DEA Diversion Field Office in which the registrant is located (Appendix K). Unless the registrant is informed by the DEA that the permission to keep central records is denied, the registrant may begin maintaining central records 14 days after DEA receives this notification. Central recordkeeping requirements are described in 21 CFR 1304.04. Central recordkeeping permits are no longer issued by the DEA.

3.0 Prescription Records: Pharmacies have two options for filing prescription records under the C.F.R. If there is a conflict between federal and state requirements for filing prescriptions, DEA recognizes that the Pharmacy must choose a filing system that would comply with both federal and state law. All prescription records must be readily retrievable for DEA inspection. Controlled substance prescriptions must be filed in one of the following ways:

- Paper Prescriptions Records Option 1 (Two separate files):
  - A file for Schedule II controlled substances dispensed
  - A file for Schedules III, IV and V controlled substances dispensed
- Paper Prescriptions Records Option 2 (Two separate files):
  - A file for all Schedule II controlled substances dispensed

Pharmacy	Standard Operating Procedure		
Title	Controlled Substance – Records Retention		
Policy No.	8.04	Revision	1

Prepared by/Date: Connor Longo, PharmD. 6/13/2024	Approved by/Date: Lisa Capriola, PharmD. 6/13/2024

8.04 Controlled Substance - Records Retention

I. **Purpose:** This procedure describes the Pharmacy's record retention requirements for any Pharmacy Controlled Substance, records, reports, or forms.

II. **Scope:** This procedure applies to all Pharmacy personnel responsible for record retention of controlled substance records and compliance with state and federal regulations.

III. **Definitions:**

Controlled Substance Records: For this procedure, include the following:

- Executed and unexecuted official order forms: DEA Form 222 or the electronic equivalent
- Power of Attorney authorization to sign order forms (See Section 13.0, FM-8)
- Receipts and/ or invoices for Schedules III, IV, and V controlled substances
- All inventory records of controlled substances, including the initial and biennial inventories, dated as of beginning or close of business
- Records of controlled substances distributed (i.e., sales to other registrants, returns to vendors, distributions to reverse distributors)
- Records of controlled substances dispensed (i.e., prescriptions, Schedule V logbook)
- Reports of Theft or Significant Loss (DEA Form 106), if applicable
- Inventory of Drugs Surrendered for Disposal (DEA Form 41), if applicable
- Records of transfers of controlled substances between pharmacies
- DEA registration certificate
- Self-certification certificate and logbook (or electronic equivalent) as required under the Combat Methamphetamine Epidemic Act of 2005
- Controlled Substance Program Monitoring records

IV. **Procedure:**

General Requirements

1.0 The Pharmacy must maintain complete and accurate records on a current basis for each controlled substance purchased, received, stored, distributed, dispensed, or otherwise disposed of. These records are required to provide accountability of all controlled substances from the manufacturing process through the Pharmacy and to the ultimate user. The closed system reduces the potential for diversion of controlled substances.

2.0 All required records concerning controlled substances must be maintained for at least 2 years for inspection and copying by duly authorized DEA officials.

- Dissatisfied ____

- Very dissatisfied ____

4. Prescription Information

- Did the pharmacist provide clear instructions and information about your medication?

  - Yes, very clear ____

  - Somewhat clear ____

  - Not very clear ____

  - Not clear at all ____

5. Recommendation

- How likely are you to recommend our pharmacy?

  - Very likely ____

  - Likely ____

  - Neutral ____

  - Unlikely ____

  - Very unlikely ____

6. Additional Comments

- Please share any additional comments, suggestions, or concerns you have about our pharmacy:

Customer Service Survey

Thank you for choosing Precision Compounding Pharmacy & Wellness Inc. for your healthcare needs. Your feedback is valuable to us as we strive to provide excellent service. Please take a moment to complete this survey.

1. Overall Experience

  - Poor ____
  - Very poor ____

3. Wait Time

- How satisfied were you with the time you had to wait for assistance or to receive your prescription?
  - Very satisfied ____
  - Satisfied ____
  - Neutral ____

When the pharmacy's number is dialed, there are two prompts to direct the caller to the proper line. One prompt is to reach our call center and the other is for verbal prescriptions. If the improper line is dialed, the pharmacy staff can transfer the call to the proper line needed. The ending of the menu prompt directs the caller to "hang up and dial 911," in the case of a severe medical emergency where urgent assistance is required, such as hospitalization.

The website also provides the pharmacies email that is accessible even after hours of operations.

Attachment 1.0: Customer Service Survey will be sent out to every email or phone in the pharmacies database that belongs to a patient of which the pharmacy has filled a prescription for in the previous calendar year. The responses will be gathered and interpreted by the compliance team. The compliance team will analyze the data and create trends, identify problems, implement corrective actions, etc. with the goal in mind of creating a better patient experience and to identify and resolve any problems. If an employee needs to be evaluated, documentation of such is to go in their employee profile.

The pharmacy's website does have information/education about the business operation. The pharmacy declares that all online prescription drug/device advertising complies with federal law, the FD&C Act, as well as both federal and state regulations.

1.0 Customer Service Survey

Pharmacy	Standard Operating Procedure		
Title	Customer Service		
Policy No.	4.01	Revision	1

Prepared by/Date: Connor Longo, PharmD. 6/13/2024	Approved by/Date: Lisa Capriola, PharmD. 6/13/2024

4.0 Relations Customer Service

4.01 Customer Service

I. Purpose: This procedure describes how Pharmacy personnel can create an excellent customer service relationship with patients and partners.

II. Scope: This procedure applies to all personnel.

III. Definitions: N/A

IV. Procedure: Establishing an excellent customer service relationship between patients/partners and Pharmacy personnel is essential to providing optimal pharmaceutical care, which is the cornerstone of the Pharmacy. To provide optimal pharmaceutical care, Pharmacy personnel must create a feeling of trust, confidence, and support with patients/ customers that extends far beyond prescription dispensing.

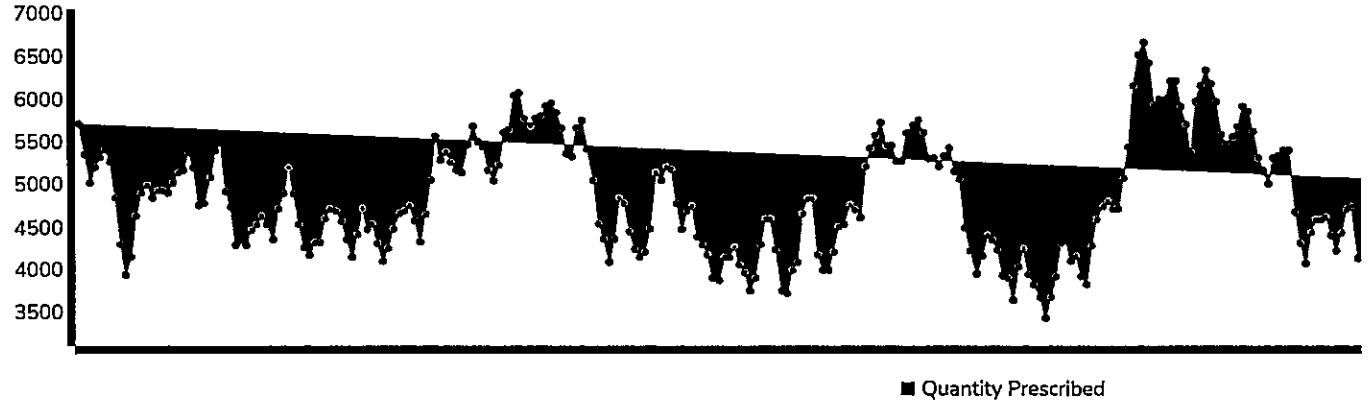
Pharmacy personnel are responsible for the quality of customer service, which includes:

- Adhering to both state and federal pharmacy regulations
- Ensuring accuracy and quality in prescription receipt, processing, and dispensing
- Maintaining confidentiality of electronic Protected Health Information (ePHI) and Individual Identifiable Health Information (IIHI)
- Complying with Pharmacy policy and procedure
- Listening before responding to questions and communications from customers, Pharmacy personnel, and health care professionals
- Responding, always, in a professional and courteous manner
- Treating customers with respect and courtesy
- Resolving customer complaints quickly and efficiently
- Working to support Pharmacy team goals
- Establishing trust and confidence with all Pharmacy personnel

The pharmacy makes their hours of operation known on its website, https://mypcphealth.com/, and verbally at request. Pharmacists' availability is only guaranteed during hours of operation unless in an emergency. As stated on the website, the pharmacy is available 24/7 for emergencies only via texting the pharmacies text-able number.

- Disperse an equal portion of the homogenous powder mixture into the tablet machine
- Utilize the capsule machine to properly place and press the tablets
- Label appropriately with batch label and bring the completed product to the appropriate validation bin
- Clean the hood and all used materials when finished compounding
- Weigh 3 tablets separately. The final weight of each suppository shall not be less than 90% and not more than 110% of the theoretically calcu
- Visually inspect compounds before validating

› Details



Stability Supporting Documentation
Chemical Compatibility
Packaging
Storage Instructions
Store in the original container, tightly sealed, protected from direct sunlight and moisture. Store at room temperature. (20° to 23°C (68° to 77°F))
Final Appearance
Homogenous orange solid dispersion tablet. The final weight of each capsule should fall between 90 and 110% of theoretically calculated weight

Hazardous Drugs Handling in Health Care Settings

The information and comments obtained in the Hazardous Drugs Handling in Health Care Settings Inspection is based on USP Chapter <800>.

Any items marked "Recommendation" are considered "best practices" and are not considered requirements for compliance with USP standards, but the information is collected as it may be a requirement under state law.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
81.00	Areas, other than the work surface of the C PEC, where contamination can build up (such as areas under the work tray), are deactivated, decontaminated, and cleaned at least monthly.	Yes	
82.00	Additional PPE (eg, respirator) is used in accordance with SOPs, to protect the worker if containment airflows are compromised by opening the cabinets to get to these areas.	Yes	
	Spill Control		
83.00	Spills are contained and cleaned immediately.	Yes	
84.00	Trained/qualified personnel are always available during operation with HDs to handle spills.	Yes	
85.00	Only trained/qualified personnel engage in spill containment and cleanup.	Yes	
86.00	There are signs available to restrict access to spill areas.	Yes	
87.00	Spill kits, containing all ingredients necessary to clean HD spills, are readily available in all areas where HDs are routinely handled.	Yes	
88.00	Spill materials are disposed of as hazardous waste.	Yes	
89.00	The circumstances and management of all spills are documented. ***Review documentation for spills for the last year and list the most recent date.***	Yes	There have been no spills in the last year.

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
52.03	Is the C PEC decontaminated, cleaned, and disinfected prior to resuming sterile compounding?	N/A	
53.00	The C SEC has at least 12 ACPH. *Verify documentation and monitoring.*	Yes	
54.00	The ceilings, walls, floors, fixtures, shelving, counters, and cabinets are smooth, impervious, free from cracks and crevices, and non shedding. *If non-compliant describe.*	Yes	
55.00	Does the pharmacy engage in **sterile HD compounding?** If yes, complete 55.01 61.02.03. If no, skip to 62.	No	
55.01	Select the type(s) of containment primary engineering control(s) used for **sterile HD compounding:**		Sterile HD compounding has been discontinued.
55.01.01	CACI	N/A	Sterile HD compounding has been discontinued.
55.01.02	Class II BSC, Type A1 (formerly Type A and not suitable for volatile toxic chemicals and volatile radionuclides)	N/A	Sterile HD compounding has been discontinued.
55.01.03	Class II BSC, Type A2 (formerly Type B3)	N/A	Sterile HD compounding has been discontinued.
55.01.04	Class II BSC, Type B1	N/A	Sterile HD compounding has been discontinued.
55.01.05	Class II BSC, Type B2 (total exhaust for volatile components)	N/A	Sterile HD compounding has been discontinued.
55.01.06	Class III BSC	N/A	Sterile HD compounding has been discontinued.

Hazardous Drugs Handling in Health Care Settings

The information and comments obtained in the Hazardous Drugs Handling in Health Care Settings Inspection is based on USP Chapter <800>.

Any items marked "Recommendation" are considered "best practices" and are not considered requirements for compliance with USP standards, but the information is collected as it may be a requirement under state law.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
50.02	Select the type(s) of containment primary engineering control(s) used for **nonsterile HD compounding:**		
50.02.01	Class I biological safety cabinet (BSC)	N/A	
50.02.02	Class II BSC	N/A	
50.02.03	Containment ventilated enclosure (CVE)	Yes	The PECs are double filtered HEPA CVEs.
50.02.04	Compounding aseptic containment isolator (CACI)	N/A	
50.02.05	Other, describe	N/A	
51.00	Indicate if the C-PEC used for **nonsterile HD compounding** (must be one of two below in order to be compliant):		
51.01	Is externally vented *(preferred)* ; **and/or**	No	
51.02	Has redundant High Efficiency Particulate Air (HEPA) filters in series	Yes	
52.00	Does the pharmacy use the same C PEC (Class II BSC or CACI) used for sterile HD compounding and nonsterile HD compounding?	No	
52.01	Is **nonsterile HD compounding** only "occasional"? / *If yes, please describe frequency and quantity.*	N/A	
52.02	Is the **nonsterile HD compounding** activity only occurring when sterile HD compounding is not being performed?	N/A

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
47.01.03	Is able to meet (12) or exceed ACPH requirements;	Yes	
47.01.04	Is physically separated (ie, a different room) from other preparation areas; and	Yes	
47.01.05	Has a negative pressure differential of between 0.01 inches and 0.03 inches of water column relative to all adjacent areas.	Yes	
48.00	The C PEC operates continuously if it supplies some or all of the negative pressure in the C SEC or if it is used for sterile compounding.	Yes	
49.00	There is a sink readily available for handwashing on the hazardous side.	Yes	
49.01	There is an eyewash station readily available.	Yes	
49.02	Water sources and drains are a minimum of 1 meter away from the C PEC.	Yes	
50.00	Does the pharmacy engage in **nonsterile HD compounding**? If yes, complete 50.01 54. If no, skip to 55:	Yes	
50.01	Select the location where **nonsterile HD compounding** is performed type(s):		
50.01.01	C-PECs used for sterile HD compounding are located in a different room than C-PECs used for nonsterile HD compounding	N/A	
50.01.02	C-PECs used for sterile HD compounding are located in the same room as C-PECs used for nonsterile HD compounding.	N/A

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
44.03	Refrigerated antineoplastic HDs are stored in a dedicated refrigerator in a negative pressure area with at least 12 ACPH (eg, storage room, buffer room, or containment segregated compounding area [C SCA]).	N/A	
44.04	**Recommendation**: *If the refrigerator is located in a buffer room, is an exhaust located adjacent to the refrigerator's compressor and behind the refrigerator?*	N/A	
45.00	If non antineoplastic, reproductive risk only, and final dosage forms of antineoplastics are stored with other non HD inventory, there is a written policy/SOP addressing it.	N/A	
46.00	**Compounding**: There are appropriate engineering controls to protect the HD preparation from cross contamination, and if sterile compounding, from microbial contamination, during all phases of the compounding process.	Yes	
47.00	All HD compounding are performed within a C PEC located in a C-SEC room.	Yes	
47.01	The C SEC for both sterile and nonsterile HD compounding has all of the following:		
47.01.01	Has fixed walls;	Yes	
47.01.02	Is externally vented;	Yes

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
42.00	HDs are not unpacked in a sterile compounding area (eg, no external containers are brought into C SEC).	Yes	
43.00	**Storage:** Are HDs stored in a manner to minimize accidental exposure? *Describe.*	Yes	Storage is off the floor and on shelves with a raised lip to help prevent a fall and package breakage.
43.01	HDs are not stored on the floor.	Yes	
43.02	HDs are stored in a manner to minimize breakage and spillage.	Yes	
43.03	If facility is in an area prone to specific types of natural disasters, appropriate precautions are taken (eg, raised front lips on shelving in earthquake prone areas).	N/A	
44.00	Antineoplastic HDs that require manipulation (other than counting and repackaging final dosage forms) and HD API are stored separately from non HDs.	Yes	
44.01	These HDs are stored in an externally ventilated, negative pressure room.	Yes	
44.02	The HD storage room has at least 12 air changes per hour (ACPH).	Yes

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
39.02	Storage of HDs	Yes	
39.03	Nonsterile HD compounding (if performed by the pharmacy)	Yes	
39.04	Sterile HD compounding (if performed by the pharmacy)	N/A	
40.00	***Recommendation:*** *If there is a requirement for certain designated areas to have negative pressure from surrounding areas, is there an uninterrupted power source (UPS) to the ventilation systems in order to maintain negative pressure in the case of power loss?*	No	There is an available onsite generator, however, in the event of a power loss, the negative pressure non-sterile area would lose status before the generator is operable
41.00	**Receipt:** Are HDs received and unpacked (removed from external shipping containers) in an appropriate environment? *Describe.*	Yes	HD drugs are unpacked in the hazardous drug storage area.
41.01	Antineoplastics and HD APIs are unpacked in an area with air pressure relative to surrounding areas that is either neutral or negative pressure. *Indicate the type of environment. If the environment is positive pressure, it is non-compliant.*	Yes	The area is negative pressure.
41.01.01	Neutral	No	
41.01.02	Negative	Yes

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
37.01	Worn PPE is placed in an appropriate HD waste container.	Yes	
37.02	The HD waste container is located in reasonable proximity to HD PPE doffing activities.	Yes	
37.03	Chemotherapy gloves, and sleeve covers if worn, are carefully removed and discarded immediately into an approved HD trace waste container inside the C PEC or contained in a sealable bag for discarding outside the C PEC.	Yes	
	Facilities and Engineering Controls		
38.00	There are signs prominently displayed before the entrance to all HD handling areas designating the hazard.	Yes	
38.01	Access to these areas are restricted to authorized personnel who have been appropriately trained.	Yes	
38.02	HD areas are located away from breakrooms/refreshment areas for personnel, patients, and/or visitors.	Yes	
39.00	There are designated HD areas for any of the following:		
39.01	Receiving and unpacking of HDs	Yes

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
31.00	**Head, hair** (beard and moustache, if appropriate), **and shoe and sleeve covers.** The pharmacy is using appropriate head, hair, and shoe and sleeve covers for the type of compounding based on standards or assessment of risk to provide protection from contact with HD residue, if required.	Yes	
31.01	When HD compounding, a second pair of shoe covers are donned before entering the C SEC and doffed when exiting the C SEC.	Yes	
31.02	Shoe covers worn in HD areas are not worn into other areas of the facility.	Yes	
32.00	**Eye and Face Protection**: The pharmacy is using appropriate eye and face PPE protection for the activities conducted (based on assessment of risk that HDs are irritating to the eyes and mucous membranes, where there is risk of spills or splashes when working outside of a C PEC), if required.	Yes	
32.01	If a risk to eyes, goggles (or a full face respirator) are worn. *Eyeglasses or safety glasses with side shields are not substituted for goggles.*	Yes	
32.02	If a risk to face and eyes, goggles plus a face shield (or a full face respirator) are worn.	Yes

		Observatio	Notes
30.00	**Gowns:** The pharmacy is using appropriate gowns for the activities conducted (if required for type of compounding based on standards or assessment of risk).	Yes	
30.01	Gowns are disposable.	Yes	
30.02	Gowns resist permeability of HDs and are not laboratory coats, surgical scrubs, or isolation gowns (selected based on HDs handled).	Yes	
30.03	Gowns close in the back, are long sleeved, and have closed cuffs that are elastic or knit.	Yes	
30.04	Gowns do not have seams or closures that will allow HDs to pass through.	Yes	
30.05	Gowns are changed in accordance with the manufacturer's instructions, or if no permeation information is available, they are changed every two to three hours or immediately after a spill or splash.	Yes	
30.06	Gowns worn in HD areas are not worn to other areas.	Yes

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
19.00	For sterile HD compounding, personnel competency is observed and assessed at least annually for proper sterile compounding aseptic technique, with no concerns identified.	N/A	Sterile HD compounding has been discontinued.
20.00	After initial HD training, personnel are trained prior to introduction of any new HD or new equipment, or prior to any significant change in process or SOP.	Yes	
21.00	All HD training and assessments are documented for each employee who transports, compounds, or administers HDs, and meets Occupational Safety and Health Administration Standard 1910.120 and any other requirements of law or regulation.	Yes	
22.00	All personnel who perform custodial HD waste removal and cleaning in HD handling areas are trained in appropriate procedures to protect themselves and the environment.	Yes	
23.00	HD training, based on employee file review, all of the following are present:		
23.01	Overview of pharmacy's HD list and their risks;	Yes	
23.02	Review of the SOPs related to HDs;	Yes	
23.03	Proper use of PPE;	Yes	
23.04	Proper use of equipment and devices (eg, engineering controls);	Yes

Hazardous Drugs Handling in Health Care Settings

The information and comments obtained in the Hazardous Drugs Handling in Health Care Settings Inspection is based on USP Chapter <800>.

Any items marked "Recommendation" are considered "best practices" and are not considered requirements for compliance with USP standards, but the information is collected as it may be a requirement under state law.

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observatio	Notes
15.03	SDSs are maintained for each hazardous chemical they use (29 CFR 1910.1200);	Yes	
15.04	How SDSs are readily accessible to personnel during each work shift and when they are in their work areas;	Yes	
15.05	Information and training provided to personnel prior to initial assignment to work with a hazardous chemical and whenever the hazard changes; and	Yes	
15.06	Personnel of reproductive capability confirm in writing that they understand the risks of handling HDs.	Yes	
	Personnel Training --*Check four employee files for documentation*		
16.00	All personnel handling HDs are trained based on their job function prior to independently handling HDs.	Yes	
17.00	Personnel file contains the employee's acknowledgement of the risk of handling HD (as part of the hazardous communication program).	Yes	
18.00	For non sterile HD compounding, personnel competency is observed and assessed at least annually for proper compounding technique, with no concerns identified.	Yes

		Observatio	Notes
13.22.07	Use of appropriate full-face, chemical cartridge-type respirator or powered air-purifying respirators (PAPR) if capacity of spill kit is exceeded or known or suspected airborne exposure to vapors/gases; and	Yes	
13.22.08	Medical evaluation/incident reporting/documentation/other handling of persons potentially exposed or with direct skin/eye contact to the HD.	Yes	
13.23	***Recommendation:*** *Does the pharmacy have a medical surveillance program? (a comprehensive control program to monitor and identify potential worker health care issues from HD exposure.)*	Yes	
14.00	The **hazard communication program** SOP has policies and procedures that ensure worker safety in all aspects of HD handling relevant to the pharmacy and ensure effective personnel training in proper labeling, transport, storage, and disposal of HDs, use of Safety Data Sheets (SDSs), based on the Globally Harmonized System of Classification and Labeling of Chemicals (GHS).	Yes	
15.00	The pharmacy's hazard communication program includes, at a minimum, all of the following:		
15.01	A written plan that describes how the standard will be implemented;	Yes	
15.02	How containers of HDs/hazardous chemicals will be labeled, tagged, or marked with the identity of the material and appropriate hazard warnings;	Yes

GLOSSARY USP <797>
Stability: The extent to which a product or preparation retains physical and chemical properties and characteristics within specified limits throughout its expiration or BUD.
Sterility assurance level (SAL): See the entry for *Probability of a nonsterile unit* (PNSU).
Sterility: The absence of viable microorganisms.
Sterilization by filtration: Passage of a gas or liquid through a sterilizing-grade membrane to yield filtrates that are sterile.
Sterilizing-grade filter: Filter membranes that are documented to retain 100% of a culture of 10^7 microorganisms of a strain of *Brevundimonas diminuta* per square centimeters of membrane surface under a pressure of not less than 30 psi. Such filter membranes are nominally 0.22- or 0.2-µm pore size.
Terminal sterilization: The application of a lethal process (eg, steam, dry heat, irradiation) to sealed containers for the purpose of achieving a predetermined PNSU of greater than 10−6 or a probability of less than one in one million of a nonsterile unit.
TSA: Trypticase soy agar.
Unclassified space: A space not required to meet any air cleanliness classification based on the ISO.
Unidirectional airflow: Air within a PEC moving in a single direction in a uniform manner and at sufficient velocity to sweep particles away from the DCA.
Verify: To confirm that a method, process, system, or equipment will perform as expected under the conditions of actual use.
Visual smoke study: A test, used in ISO Class 7 and ISO Class 8 rooms that do not have unidirectional airflow, in which a visible source of smoke, which is neutrally buoyant, is used to verify an absence of stagnant airflow. This test does not need to be performed under dynamic operating conditions and is not appropriate for PECs (see the entry for *Dynamic airflow smoke pattern test*).
Workflow management system: Technology comprised of hardware and/or software that allows for automation to assist in the verification of components of, and preparation of, CSPs and to document components and processes.

Copyright © December 2023 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

GLOSSARY USP <797>
Quality control (QC): The sampling, testing, and documentation of results that, taken together, ensure that specifications have been met before release of the CSP.
Reconstitution: The process of adding a diluent to a conventionally manufactured product to prepare a sterile solution or suspension.
Release inspection and testing: Visual inspection and testing performed to ensure that a preparation meets appropriate quality characteristics.
Repackaging: The act of removing a sterile product or preparation from its original primary container and placing it into another primary container, usually of smaller size without further manipulation.
Restricted-access barrier system (RABS): An enclosure that provides HEPA-filtered ISO Class 5 unidirectional air that allows for the ingress and/or egress of materials through defined openings that have been designed and validated to preclude the transfer of contamination, and that generally are not to be opened during operations. Examples of RABS include CAIs and CACIs.
SDA: Sabouraud dextrose agar.
Secondary engineering control (SEC): The area where the PEC is placed (eg, a cleanroom suite or an SCA). It incorporates specific design and operational parameters required to minimize the risk of contamination within the compounding area.
Segregated compounding area (SCA): A designated space, area, or room that is not required to be classified and is defined with a visible perimeter. The SCA must contain a PEC and is suitable for preparation of Category 1 CSPs only.
Single-dose containers: A container of sterile product for parenteral administration (eg, injection or infusion) that is designed for use with a single patient as a single injection/infusion. A single-dose container usually does not contain a preservative. See <659> Injection Packaging Systems, Single-dose container.
SOP: Standard operating procedure.
Specification: The tests, analytical methods, and acceptance criteria to which any component, CSP, container closure system, equipment, or other material used in compounding CSPs must conform to be considered acceptable for its intended use.
Sporicidal disinfectant: A chemical or physical agent that destroys bacterial and fungal spores when used in sufficient concentration for a specified contact time. It is expected to kill all vegetative microorganisms.

GLOSSARY USP <797>
One-step disinfectant cleaner: A product with an EPA-registered (or equivalent) claim that it can clean and disinfect a nonporous surface in the presence of light to moderate organic soiling without a separate cleaning step.
Oversight: The review, monitoring, and supervision of actions taken by personnel, bearing responsibility for those actions, and being available for consultation if and when needed, even if not physically present.
Pass-through chamber: An enclosure with sealed doors on both sides that should be interlocked. The pass-through chamber is positioned between two spaces for the purpose of minimizing particulate transfer while moving materials from one space to another.
Perimeter: A visible demarcation (such as a door, walls, or visible marking on the floor) that defines the SCA or AECA.
Pharmaceutical isolator: An enclosure that provides HEPA-filtered ISO Class 5 unidirectional air operated at a continuously higher pressure than its surrounding environment and is decontaminated using an automated system. It uses only decontaminated interfaces or rapid transfer ports for materials transfer. [Note—A CAI or CACI is not a pharmaceutical isolator.]
Pharmacy bulk package: A conventionally manufactured sterile product for parenteral use that contains many single doses intended for use in a pharmacy admixture program. A pharmacy bulk package may either be used to prepare admixtures for infusion or, through a sterile transfer device, for filling sterile containers. See <659>*Injection Packaging Systems, Pharmacy bulk package.*
Positive-pressure room: A room that is maintained at higher pressure than the adjacent spaces, and therefore the net airflow is out of the room.
PPE: Personal protective equipment.
Preservative: A substance added to inhibit microbial growth.
Primary engineering control (PEC): A device or zone that provides an ISO Class 5 air quality environment for sterile compounding.
Probability of a nonsterile unit (PNSU): The probability of an item being nonsterile after it has been exposed to a verified sterilization process. A PNSU value can only be applied to terminal sterilization. [Note—This is also called the sterility assurance level (SAL).]
Pyrogen: A substance that induces a febrile reaction in a patient.
Quality assurance (QA): A system of procedures, activities, and oversight that ensures that the compounding process consistently meets quality standards.

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

GLOSSARY USP <797>
ISO class: An air-quality classification from the International Organization for Standardization.
ISO: International Organization for Standardization.
Label: The part of the labeling on the immediate container.
Labeling: All labels and other written, printed, or graphic matter on the immediate container or on or inside any packaging system or wrapper in which the article is enclosed, except any outer shipping container.
Laminar airflow system (LAFS): A device or zone within a buffer room that provides an ISO Class 5 or better air quality environment for sterile compounding. The system provides a unidirectional HEPA-filtered airflow.
Laminar airflow workbench (LAFW): A device that is a type of LAFS that provides an ISO Class 5 or better air quality environment for sterile compounding. The device provides a unidirectional HEPA-filtered airflow.
Line of demarcation: A visible line on the floor that separates the clean and dirty sides of the anteroom.
Low-lint wiper: A wiper exhibiting few, if any, fibers or other contamination, visible without magnification, which is separate from or easily removed from the wiper material in a dry condition.
Master formulation record (MFR): A detailed record of procedures that describes how the CSP is to be prepared.
MEA: Malt extract agar.
Media-fill test: A simulation used to qualify processes and personnel engaged in sterile compounding to ensure that the processes and personnel are able to prepare CSPs without contamination.
Monograph: A quality documentary standard within *USP–NF* that articulates the quality expectations for a medicine including for its identity, strength, purity, and performance. It also describes the tests to validate that a medicine and its ingredients meet these criteria.
Multiple-dose container: A container of sterile product for parenteral administration (eg, injection or infusion) that is designed to contain more than one dose of the sterile product. A multiple-dose container is usually required to meet the antimicrobial effectiveness testing criteria. See <659>Injection Packaging Systems, Multiple-dose container.

GLOSSARY USP <797>
ECV: Endotoxin challenge vial.
EPA: US Environmental Protection Agency.
Excipient: See the entry for *Added substance*.
FDA: US Food and Drug Administration.
Filter integrity test: A test (eg, bubble point test) of the integrity of a sterilizing-grade filter performed after the filtration process to detect whether the integrity of the filter has been compromised.
Final yield: The total number of containers prepared at the end of the compounding process prior to release testing.
First air: The air exiting the HEPA filter in a unidirectional air stream.
Formulation: The specific qualitative and quantitative composition of the final CSP.
Garb: Items such as gloves, garments (eg, gowns), shoe covers, head and facial hair covers, masks, and other items designed to reduce particle shedding from personnel and minimize the risk of contamination of CSP(s).
GFT: Gloved fingertip and thumb testing.
Hazardous drug (HD): Any drug identified by at least one of the following six criteria: carcinogenicity, teratogenicity or developmental toxicity, reproductive toxicity in humans, organ toxicity at low dose in humans or animals, genotoxicity, or new drugs that mimic existing HDs in structure or toxicity.
High-efficiency particulate air (HEPA) filtration: Being, using, or containing a filter designed to remove 99.97% of airborne particles measuring 0.3-micron or greater in diameter passing through it.
HVAC: Heating, ventilation, and air conditioning.
Integrated vertical laminar flow zone (IVLFZ): A designated ISO Class 5 area serving as the PEC within an ISO Class 7 or cleaner buffer room. In the IVLFZ, unidirectional airflow is created by placing HEPA filters over the entire surface of the worktables and by effective placement of air returns.
IPA: Isopropyl alcohol.

Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

GLOSSARY USP <797>
Compounding record (CR): Documents the compounding of each CSP.
Compounding: The process of combining, admixing, diluting, pooling, reconstituting, repackaging, or otherwise altering a drug product or bulk drug substance to create a sterile preparation.
Container closure system: Packaging components that together contain and protect the dosage form. This includes primary packaging components and secondary packaging components, if the latter are intended to provide additional protection.
Containment glove bag: A single-use disposable glove bag that is capable of containing airborne chemical particles.
Containment ventilated enclosure (CVE): A non-ISO classified full or partial enclosure that uses ventilation principles to capture, contain, and remove airborne contaminants through HEPA filtration and prevent their release into the work environment.
Conventionally manufactured product: A pharmaceutical dosage form, usually the subject of an application approved by the applicable national regulatory agency, that is manufactured under current good manufacturing practice conditions.
Critical site: A location that includes any component or fluid pathway surfaces (eg, vial septa, injection ports, and beakers) or openings (eg, opened ampules and needle hubs) that are exposed and at risk of direct contact with air (eg, ambient room or HEPA filtered), moisture (eg, oral and mucosal secretions), or touch contamination.
Designated person(s): One or more individuals assigned to be responsible and accountable for the performance and operation of the facility and personnel as related to the preparation of CSPs.
Direct compounding area (DCA): A critical area within the ISO Class 5 PEC where critical sites are exposed to unidirectional HEPA-filtered air, also known as first air.
Disinfectant: A chemical or physical agent used on inanimate surfaces and objects to destroy fungi, viruses, and bacteria. Sporicidal disinfectants are considered a special class of disinfectants that also are effective against bacterial and fungal spores.
Dynamic airflow smoke pattern test: A PEC test in which a visible source of smoke, which is neutrally buoyant, is used to observe air patterns within the unidirectional space (i.e., the DCA) under dynamic operating conditions (see the entry for *Dynamic operating conditions).* This test is not appropriate for ISO Class 7 or ISO Class 8 cleanrooms that do not have unidirectional airflow (see the entry for *Visual smoke study).*
Dynamic operating conditions: Conditions in the compounding area in which operating personnel are present and simulating or performing compounding. The conditions should reflect the largest number of personnel and highest complexity of compounding expected during routine operations as determined by the designated person(s).

NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

GLOSSARY USP<797>
Category 3 CSP: A CSP that may be assigned a BUD exceeding the limits in *Table 13* for Category 2 CSPs and is compounded in accordance with all applicable requirements for Category 3 CSPs in this chapter.
CDC: Centers for Disease Control and Prevention.
Certificate of analysis (COA): A report from the supplier of a component, container, or closure that accompanies the supplier's material and contains the specifications and results of all analyses and a description of the material.
CFU: Colony-forming units.
Classified area: An area that maintains an air quality classification based on the ISO standards required in this chapter (see also the definition for *ISO class).*
Cleaning agent: An agent, usually containing a surfactant, used for the removal of substances (eg, dirt, debris, microbes, and residual drugs or chemicals) from surfaces.
Cleaning: The process of removing substances (eg, organic and inorganic material) from objects and surfaces, normally accomplished by manually or mechanically using water with detergents or enzymatic products.
Cleanroom suite: A classified area that consists of both an anteroom and buffer room.
Component: Any ingredient used in the compounding of a preparation, including any active ingredient, added substance, or conventionally manufactured product.
Compounded sterile preparation (CSP): A preparation intended to be sterile that is created by combining, admixing, diluting, pooling, reconstituting, repackaging, or otherwise altering a drug product or bulk drug substance.
Compounded stock solution: A sterile mixture of components that is used to compound additional CSPs.
Compounding area: The area where compounding is occurring (ie, a cleanroom suite, inside the perimeter of the SCA, or AECA).
Compounding aseptic containment isolator (CACI): A type of RABS that uses HEPA filtration to provide an ISO Class 5 unidirectional air environment designed for the compounding of sterile HDs.
Compounding aseptic isolator (CAI): A type of RABS that uses HEPA filtration to provide an ISO Class 5 unidirectional air environment designed for compounding of sterile non-HDs.

Copyright © December 2023 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

GLOSSARY USP <797>
Aseptic technique: A set of methods used to keep objects and areas free of microorganisms and thereby minimize infection risk to the patient. It is accomplished through practices that maintain the microbe count at an irreducible minimum.
Assigned trainer: One or more individuals assigned by the designated person(s) to be responsible and accountable for directly providing the training, observation, and/or evaluation of personnel for the preparation of CSPs.
Batch: More than one CSP prepared as described in the MFR in a single, discrete process, and expected to have uniform character and quality, within specified limits.
Beyond-use date (BUD): The date, or the hour and date, after which a CSP must not be used, stored, or transported. The date is determined from the date and time the preparation is compounded.
Biological safety cabinet (BSC), Class II: A ventilated cabinet with an open front and inward and downward unidirectional HEPA-filtered airflow and HEPA-filtered exhaust. A BSC used to prepare a CSP must be capable of providing an ISO Class 5 or better environment for preparation of the CSPs.
Biological safety cabinet (BSC): A ventilated cabinet that may be used for compounding. These cabinets are divided into three general classes (Class I, Class II, and Class III). Class II BSCs are further divided into types (Type A1, Type A2, Type B1, Type B2, and Type C1).
BLA: Biological license application.
Blood components: Any therapeutic constituent of blood separated by physical or mechanical means (eg, white cells, red cells, platelets, plasma, serum). It is not intended to include plasma-derived products (eg, albumin, coagulation factors, immunoglobulins) manufactured under an approved BLA or equivalent.
BMBL: Biosafety in Microbiological and Biomedical Laboratories.
Buffer room: An ISO Class 7 or cleaner room with fixed walls and doors where PEC(s) that generate and maintain an ISO Class 5 environment are physically located. The buffer room may only be accessed through the anteroom or another buffer room.
Bulk drug substance: See the entry for *Active pharmaceutical ingredient.*
Category 1 CSP: A CSP that is assigned a BUD of 12 hours or less at controlled room temperature or 24 hours or less refrigerated that is compounded in accordance with all applicable requirements for Category 1 CSPs in this chapter.
Category 2 CSP: A CSP that may be assigned a BUD of greater than 12 hours at controlled room temperature or greater than 24 hours refrigerated that is compounded in accordance with all applicable requirements for Category 2 CSPs in this chapter.

2062

GLOSSARY USP<797>
ACD: Automated compounding device.
ACPH: Air changes per hour.
Active pharmaceutical ingredient (API): Any substance or mixture of substances intended to be used in the compounding of a preparation, thereby becoming the active ingredient in that preparation and furnishing pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans and animals or affecting the structure and function of the body. Also referred to as *Bulk drug substance*. A conventionally manufactured drug product is not an API but is typically manufactured from an API(s).
Added substance: An ingredient that is necessary to compound a preparation but is not intended or expected to cause a pharmacologic response if administered alone in the amount or concentration contained in a single dose of the compounded preparation. The term is used synonymously with the terms *inactive ingredient, excipient, and pharmaceutical ingredient.*
Administration: The direct application of a sterile product or preparation to a single patient by injecting, infusing, or otherwise providing a sterile product or preparation in its final form.
Airlock: A space with interlocked doors, constructed to maintain air pressure control when items move between two adjoining areas (generally with different air cleanliness standards). The intent of an airlock is to prevent ingress of particulate matter and microbial contamination from a lesser-controlled area.
Alcohol-based hand rub: An alcohol-containing preparation (liquid, gel, or foam) designed for application to the hands of health care personnel to inactivate microorganisms and/or temporarily suppress their growth. Such preparations may contain one or more types of alcohol, other active ingredients, excipients, and humectants.
Allergenic extract compounding area (AECA): A designated space, area, or room that is not required to be classified, with a visible perimeter that is suitable for preparation of allergenic extract prescription sets.
Allergenic extract prescription set: Combinations of licensed allergenic extracts that would be mixed and diluted to provide subcutaneous immunotherapy to an individual patient, even though these allergenic extract combinations are not specified in the approved BLAs for the licensed biological products.
Allergenic extract: A biological substance used for the diagnosis and/or treatment of allergic diseases such as allergic rhinitis, allergic sinusitis, allergic conjunctivitis, bee venom allergy, and food allergy.
Anteroom: An ISO Class 8 or cleaner room with fixed walls and doors where personnel hand hygiene, garbing procedures, and other activities that generate high particulate levels may be performed. The anteroom is the transition room between the unclassified area of the facility and the buffer room.
Aseptic processing: A method by which separate, sterile components (eg, drugs, containers, or closures) are brought together under conditions that maintain their sterility. The components can either be purchased as sterile or, when starting with nonsterile components, can be separately sterilized prior to combining (eg, by membrane filtration or by autoclave).

Inspector Instructions

1. Use the drop-down list and make the appropriate selection for the Employee Title, Personnel Function, and CSP Category Type for the files reviewed. *Do not record the employee name, only the title or position.
2. Review the selected files to verify that the required training and competency records are present in the personnel file and comply with USP <797> standards for training and demonstrated competency.
3. Select the appropriate response for each item reviewed.
-Select "Yes" if the document is present in the records and the competency evaluation was conducted in compliance USP <797> standards.
-Select "No" if the document is present but is not compliant with USP <797> standards (eg, incorrect frequency of test, GFT and surface sample was not conducted after media-fill, failed tests did not include a corrective action, etc). Document the area(s) of non-compliance in the notes column.
-Select "Missing" if the document is not present in the file.
-Select "N/A" if the training does not apply, eg, long-term employees may not have initial training available. Document further in the notes column.
4. Use the notes column to document any pertinent information.
5. Document in notes if initial aseptic manipulation competencies are present in files (*unless long-term employee).

Aseptic Manipulation Competency (Section 2.3)

USP requirements:
1. Media-fill testing procedures simulate the most difficult compounding procedures encountered by personnel.
2. The pharmacy conducts media-fill testing as described in Box 2.
3. The final containers are incubated at 20°C-25°C and 30°C-35°C for a minimum of seven days at each temperature band.
4. Failure is indicated by visible turbidity or other visual manifestations of growth in the media in one or more container closure unit(s) on or before 14 days.
5. Immediately following the media-fill test, GFT is performed on both hands and inside of an ISO Class 5 PEC. Failure is indicated by visual observation of GFT results that exceed defined action levels. Action level after media-fill testing: >3 cfu/total from both hands.
6. Immediately following the GFT, a surface sample of the direct compounding area inside the PEC is performed in accordance with USP standards for surface sample monitoring and action levels. Action level ISO Class 5: >3 cfu/media device.
7. Failure in the media fill, GFT, or surface sampling constitutes an overall failure of the aseptic manipulation competency.
8. Documentation includes, at minimum:
-Name of the person evaluated
-Evaluation date and time
-Media and components used including manufacturer, expiration date, and lot number
-Starting temperature for each interval of incubation
-Dates of incubation
-Results (for GFT, the number of cfu per hand must be recorded and for surface samples, the number of cfu per sample must be recorded. Note: microbial identification of the cfu is not required for media-fill testing)
-Results of the evaluation and any corrective actions
-Name of the observer and personnel reading and documenting the results

Inspector Instructions	Hand Hygiene and Garbing Competency Evaluation (Section 2.2)
1. Use the drop-down list and make the appropriate selection for the Employee Title, Personnel Function, and CSP Category Type for the files reviewed. *Do not record the employee name, only the title or position. 2. Review the selected files to verify that the required training and competency records are present in the personnel file and comply with USP <797> standards for training and demonstrated competency. 3. Select the appropriate response for each item reviewed. -Select "Yes" if the document is present in the records and the competency evaluation was conducted in compliance USP <797> standards. -Select "No" if the document is present but is not compliant with USP <797> standards (eg, incorrect frequency of test, GFT and surface sample was not conducted after media-fill, failed tests did not include a corrective action, etc). Document the area(s) of non-compliance in the notes column. -Select "Missing" if the document is not present in the file. -Select "N/A" if the training does not apply, eg, long-term employees may not have initial training available. Document further in the notes column. 4. Use the notes column to document any pertinent information.	USP requirements: 1. The garbing and hand hygiene competency evaluation consists of a visual observation and gloved fingertip and thumb sampling (GFT) of both hands. 2. The initial competency evaluation consists of three (3) separate and complete hand hygiene observation, followed by a full garbing procedure and a GFT after garbing. The initial three (3) successful completions must be in succession—failure of any of the three (3) initial garbing competency evaluations requires repeat testing until personnel successfully complete three (3) evaluations in a row. 3. The pharmacy uses a microbiological growth media device (eg, plates, paddles, or slides) containing general microbial growth agar (eg, trypticase soy agar [TSA]) supplemented with neutralizing additives (eg, lecithin and polysorbate 80) that supports both bacterial and fungal growth. 4. The media device is incubated at 30°C-35°C for no less than 48h and then at 20°C-25°C for no less than an additional five days. 5. Failure is indicated by visual observation of improper hand hygiene and garbing procedures and/or GFT results that exceed the defined action levels. Action level after garbing: >0 cfu/total from both hands. 6. Documentation includes, at minimum: -Name of the person evaluated -Evaluation date and time -Media and components used including manufacturer, expiration date, and lot number -Starting temperature for each interval of incubation -Dates of incubation -Results (the number of cfu per hand must be recorded; microbial identification of the cfu is not required by the chapter for GFT) -Results of the evaluation and any corrective actions -Name of the observer and personnel reading and documenting the results

Sterile Compounding Personnel Records Review

Select personnel with compounding responsibilities for your records review; preferably select staff performing compounding duties at time of inspection or staff identified during CR review.
- Recommend also pulling supervising personnel file.
- Inspector can consider pulling non-compounder employee file ("Other") who cleans and stocks compounding area but who does not compound (Note: frequency of competency assessment will be defined by pharmacy SOPs).

Review five (5) personnel files and document your observations. (For applicants seeking a Class E-S Non-Resident Sterile Compounding Inspection (Texas Sampling), review a total of 10 personnel records.)
- *Note: long-term employees may not have initial training available, if this is the case, you may select an alternative file. If an alternate file is not available, document length of service of long-term employee.
Inspector Note: soybean casein digest medium and trypticase soy broth are the same media.

Inspector Instructions

1. Use the drop-down list and make the appropriate selection for the Employee Title, Personnel Function, and CSP Category Type for the files reviewed. *Do not record the employee name, only the title or position.
2. Review the selected files to verify that the required training and competency records are present in the personnel file and comply with USP <797> standards for training and demonstrated competency.
3. Select the appropriate response for each item reviewed.
-Select "Yes" if the document is present in the records and the competency evaluation was conducted in compliance USP <797> standards.
-Select "No" if the document is present but is not compliant with USP <797> standards (eg, incorrect frequency of test, GFT and surface sample was not conducted after media-fill, failed tests did not include a corrective action, etc). Document the area(s) of non-compliance in the notes column.
-Select "Missing" if the document is not present in the file.
-Select "N/A" if the training does not apply, eg, long-term employees may not have initial training available. Document further in the notes column.
4. Use the notes column to document any pertinent information.

Demonstrating Knowledge and Competency of Core Skills (Section 2.1)

USP requirements:
1. Personnel who perform or oversee compounding or *support activities* must be trained in the SOPs and trained on maintaining the quality of the environment (See Table 2).
2. Compounding personnel and supervising personnel must complete training needed to demonstrate knowledge of principles and competency of skills for performing sterile manipulations and achieving and maintaining appropriate environmental conditions (See Table 2 and Table 3). This must be completed initially and every 12 months in at least the following areas:
-Hand hygiene
-Garbing
-Cleaning and disinfection
-Calculations, measuring, and mixing
-Aseptic technique
-Achieving and/or maintaining sterility (and apyrogenicity if compounding with nonsterile components)
-Use of equipment
-Documentation of the compounding process (eg, master formulation and compounding records)
-Principles of high-efficiency particulate air (HEPA)-filtered unidirectional airflow within the ISO Class 5 area
-Proper use of PECs
-Principles of movement of materials and personnel within the compounding area
3. Personnel who only perform restocking or cleaning and disinfecting duties outside of the primary engineering control (PEC) must complete ongoing training as required by the facility's SOPs (See Table 3).
4. Personnel compounding only immediate-use CSPs must complete training as required by the facility's SOPs (See Table 3).
5. All training and evaluations must be documented.

Employee Record #	Employee Title	Personnel Function	CSP Category Type	Compounding SOPs	*Initial Training and Competency in Maintaining the Quality of the Environment	*Initial Training and Competency in Sterile Compounding Principles and Practices	Ongoing Training and Competency in Sterile Compounding Principles and Practices	Notes
				Compounders and Supervising Personnel: Initially and at least every 12 months Other Personnel (examples: persons who do not compound but clean/disinfect and restock or who perform in-process checks; persons who only compound immediate use): Initially and as defined by pharmacy SOPs

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
82.6	The pharmacy's QA/QC program includes documentation of steps necessary for completing a recall, including reporting the recall to appropriate regulatory agencies. ***Inspector note: Per USP, "The recall must be reported to appropriate regulatory bodies as required by laws and regulations of the applicable regulatory jurisdiction."***	Yes		18.1, 18.2
83.0	If a CSP is dispensed or administered **before the results of release testing are known**, does the pharmacy ensure procedures for recalls and out-of-specification notifications are conducted and documented in compliance with USP <797> standards? ***Inspector note: Per USP <797>, if a CSP is dispensed or administered before the results of release testing are known, the facility must have procedures in place to notify, recall, and investigate.*** ***If no, go to the compliance statements.***	N/A		18.1, 20
83.1	The pharmacy has a process in place to immediately notify the prescriber of a failure of specifications with the potential to cause patient harm (eg, sterility, strength, purity, bacterial endotoxin, or other quality attributes).	N/A		18.1
83.2	The pharmacy has a process in place to recall any unused dispensed CSPs and quarantine any stock remaining in the pharmacy.	N/A		18.1
83.3	The pharmacy has a process in place to investigate if other lots are affected and recall if necessary.	N/A		18.1

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
78.4	When sterility testing identifies a failure, the pharmacy has processes to investigate and identify any contributing factors. ***Inspector note: Per USP, "Sterility tests resulting in failures must prompt an investigation into the possible causes and must include identification of the microorganism, as well as an evaluation of the sterility testing procedure, compounding facility, process, and/or personnel that may have contributed to the failure. The source(s) of the contamination, if identified, must be corrected, and the facility must determine whether the conditions causing the sterility failure affect other CSPs. The investigation and resulting corrective actions must be documented."*** ***Additionally, some rapid sterility test methods do not allow for the identification of the recovered microorganisms. If one of these methods is used, the pharmacy is not in compliance with the chapter, as the investigation must include identification of the recovered microorganism.***	Yes		12.2

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
75.4	BUDs for **Category 3 CSPs** do not exceed the maximum limits for terminally sterilized established in Table 14. ***Inspector note: Per USP <797> Table 14, BUD maximum limits terminally sterilized Category 3 CSPs where sterility testing (and endotoxin testing, if applicable) had been performed and passed are defined as: 90 days CRT; 120 days refrigerator; and 180 days frozen.***	N/A		14.4.1 Table 14
75.5	**Category 3 CSPs** are supported by stability data obtained using methods described in USP <1225> or a validated noninferior stability-indicating analytical method. ***Inspector note: Per USP <797>, Category 3 CSPs must prepared according to the EXACT formulation (API and other ingredients of identical grade and procedures) from which the stability data is derived. Category 3 CSPs must be packaged and stored in container closure of the same materials of composition as used in study and the facility must have documentation of the stability study.*** ***View records to verify the preparation exactly matches the preparation cited in the documentation including concentration of all active ingredients, excipients, etc.***	N/A		14.4.3 Table 14 USP <1225>
75.6	**Category 3 CSPs** undergo sterility testing. ***Inspector note: Sterility testing is performed on all Category 3 CSPs.***	N/A		14.4.4 Table 14 USP <71>

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
75.0	Are BUDs for **Category 3 CSPs** assigned in compliance with all conditions outlined in USP <797> standards and do not exceed the maximum limits established in Table 14? ***Inspector note: If all of the conditions described for Category 3 CSPs are not met, the applicable BUD must not exceed the established maximum limits in Table 13 for Category 2 CSPs.*** ***If no, go to compliance statements.*** ***If the pharmacy does not prepare Category 3 CSPs, inspector should answer question as N/A.***	N/A		14.3, 14.4., 14.4.1, 14.4.2, 14.4.3, 14.4.4, Table 14
75.1	The assigned BUD does not exceed the shortest expiration date of any of the individual starting components.	N/A		14.3 Table 14
75.2	When assigning BUDs, the pharmacy ensures that the CSP formulation remains chemically and physically stable and its packaging maintains its integrity for the duration of the assigned BUD.	N/A		14.3 Table 15
75.3	BUDs for **Category 3 CSPs** do not exceed the maximum limits for aseptically processed (eg, filtered) established in Table 14. ***Inspector note: Per USP <797> Table 14, BUD maximum limits for aseptically processed Category 3 CSPs where sterility testing (and endotoxin testing, if applicable) had been performed and passed are defined as: 60 days CRT; 90 days refrigerator; and 120 days frozen.***	N/A		14.4.1 Table 14

Sterile Compounding Inspection for USP <797>

Facility Name: Precision Compounding Pharmacy & Wellness Inc. dba Precision Compounding Pharmacy

e-Profile ID: 1642365

Inspection Date: 05/29/2024 - 05/30/2024

		Observation	Inspector Notes	USP Reference(s)
74.0	Does the pharmacy ensure the assigned BUD does not exceed the shortest beyond use date of any individual compounded components? ***Inspector note: Per USP, "the BUD should generally not exceed the shortest BUD of any of the individual compounded components. However, there may be acceptable instances when the BUD of the final CSP exceeds the BUD assigned to compounded components (eg, pH-altering solutions). If the assigned BUD of the final CSP exceeds the BUD of the compounded components, the physical, chemical, and microbiological quality of the final CSP must not be negatively impacted." Other examples where this may occur: formula within a formula, preservative-free compounded component used in a preserved final CSP, "in-use" times for pharmacy bulk packages, and cyclosporine ophthalmic stock solution. If no, inspector should describe the observations, including the name of the component whose BUD was shorter than the assigned BUD of the final CSP.***	Yes		14.3

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: RLS (USA) Inc

NV Pharmacy or Outsourcing facility license # (if applicable): _____

Physical Address: 945 N. Edgewood Ave, Suite A-1

City: Wood Dale State: IL Zip: 60191

Supervising/Managing Pharmacist Name (NRS 639.220): John Perino

Supervising/Managing Pharmacist NV Pharmacist Registration #: N/A

Name of Person with direct knowledge of compounding procedures: John Perino

Email of Person with direct knowledge of compounding procedures: john.perino@rls.bio

Telephone of Person with direct knowledge of compounding procedures: 630-595-6642

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☒ Low ☐ Medium ☐ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☐ Yes ☒ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
Radiopharmaceuticals only prepared or compounded in compliance with USP <825>

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:
N/A

6. What laboratory performs this additional testing?

Name: N/A

Address: _____

City: _____ State: _____ Zip: _____

Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?
Visual inspection of Radiopharmaceuticals in compliance with radiation safety ALARA principals.

8. How often do you perform glove fingertip and medial fill testing?

Every 12 months

9. What is your policy if an employee fails a glove fingertip or media-fill test?

Immediate notification of the PIC, investigation for cause, corrective action(s) identified and taken as needed to prevent re-occurrence, retraining as required, retesting performed and passing results obtained prior to initiating or resuming product preparation or dose drawing duties.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

All new hire personnel performing sterile compounding must be licensed or registered in compliance with local regulations. Initial training is assigned based on job title/duties performed through an electronic platform. Personnel are trained on all policies and procedures associated with their job duties prior to performing those duties. Annual retraining is tracked, completed, and maintained using the electronic platform.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

See attached SOP's 6.4.1, 6.4.1.1 and 6.4.1.2

12. Who performs the sterile compounding process at your facility?

All products are prepared by or under the direct supervision of the licensed, authorized nuclear pharmacist on duty.

13. Who is responsible and accountable for the sterile compounding process at your facility?

The PIC is responsible and accountable for the sterile compounding process.

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

RLS (USA) Inc. is a Nuclear Pharmacy dispensing radiopharmaceuticals in compliance with USP <825>. All transportation of prepared radiopharmaceuticals are completed by trained staff or contracted courier services in climate controlled vehicles in DOT-7A, Type A certified packaging designed and tested to maintain the quality and integrity of the product. Where temperature monitoring is required. RLS (USA) Inc. utilizes appropriate ColdMark Indicators to ensure proper temperature is maintained during shipping.

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)		
1. What type of primary engineering controls will you be using in your facility? N/A		
2. Is your BSC or CACI vented 100% to the outside?	☐ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☐ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☐ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☐ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☐ Yes	☐ No
7. If yes, list the name of the device:		
8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?		
9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?		

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

N/A

2. What sterilization methods are utilized at your facility?

3. Does your facility utilize biological indicators? ☐ Yes ☐ No

4. If yes, describe how they are utilized:

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. RLS (USA) Inc. Ownership Structure

RLS (USA) Inc., a Delaware corporation headquartered in Florida, is owner and operator of 31 radiopharmacies in the United States and was formed through the spin out of General Electric's radiopharmacy in 2020. RLS (USA) Inc. is the owner and operator of the pharmacy subject to this application.

RLS Group, Ltd., is a Bahamas-chartered entity which, since 2020, serves as the holding company for RLS(USA) Inc. As shown on the attached organizational diagram and stock certificate, RLS Group, Ltd. is the 100% owner of RLS (USA) Inc. RLS Group, Ltd. participated in providing initial acquisition financing for the 2020 spin out from General Electric and is otherwise inactive, has no employees, and in particular does not participate in the management of, or control operations in, any RLS (USA) Inc. radiopharmacy, including the radiopharmacy subject to this application. RLS Group, Ltd. has no separate office and receives mail at: RLS Group, Ltd., c/o RLS (USA) Inc., 255 Primera Blvd., Suite 440, Lake Mary, FL 32746. RLS Group, Ltd.'s registered agent (as required by Bahamas law) is: RLS Group, Ltd., c/o King & Co., Second Floor, Olde Towne Marina, Sandy Port, New Providence, P. O. Box N-4825, The Bahamas.

Business Licensure Information for State of Residence and Federal (Board of Pharmacy, State Controlled Substance, State Radiation Control Agency, Drug Enforcement Administration (DEA), Food and Drug Administration (FDA), Nuclear Regulatory Commission (NRC))

License/Registration Agency	Business Name on License/Registration	Registration/License Type	Registration/License Number / Expiration Date
Illinois Department of Financial and Professional Regulation - State Board of Pharmacy	RLS (USA) INC JOHN PERINO	Pharmacy	054.021668 Exp: 3/31/2026
Illinois Department of Financial and Professional Regulation - State Board of Pharmacy	RLS (USA) INC OTHA BRIGHT	Wholesale Drug Distributor	004.004913 Exp: 12/31/2024
Illinois Emergency Management Agency and Office of Homeland Security Office of Nuclear Safety	RLS (USA) Inc.	RAM	IL-01052-01 Exp: 3/31/2028

Inspector Notes: Facility non-resident licenses are held in Indiana and Wisconsin. The wholesale distributor license is maintained and was previously used for the distribution of I-123 Ioflupane, a C-II drug. Per the PIC, the wholesale distribution license was required by the DEA. The WD license is no longer used. There is no wholesale distribution at this time. There is no insulin stocked and no ReliOn insulin was observed. There are no platforms used that are a marketplace for pharmacies to buy, sell, or bid on overstock and short-date prescription drugs. There is no semaglutide compounded.

Documents collected as part of the inspection.
To obtain a copy of these documents please contact the facility directly. They are not included in the final report.

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
	General Pharmacy		
1.00	Is the Designated Person present for the inspection?	Yes	
2.00	Is the PIC (or nuclear pharmacy manager/director) present for the inspection? *If no, list the nuclear pharmacist on duty.*	Yes	
3.00	Are photographs allowed during the inspection (no Protected Health Information (PHI))?	Yes	
	General Operations and Licensure		
4.00	Are pharmacy licenses, permits and registrations (state, controlled substance, DEA, etc.) posted?	Yes	All facility and personnel licenses are posted on a bulletin board in the office area.
5.00	Is the RSO the same as is listed on the radioactive materials (RAM) license?	Yes	
6.00	Is the PIC an Authorized Nuclear Pharmacist (ANP) on the RAM license or other retrievable documentation as confirmed by the NRC or agreement state?	Yes	
7.00	Is the most recent board of pharmacy inspection report available for review? *Record the date of the last inspection and how frequently the pharmacy is routinely inspected by the board.*	N/A	There has been no inspection by the Illinois Board of Pharmacy.
7.01	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	N/A	
8.00	Is the most recent NRC (and/or state radiation control agency) inspection report available for review? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	Yes	The last Illinois Emergency Management Agency inspection was dated 3/21/2023. The PIC is not aware of any regularly scheduled inspections by Illinois or any state.
8.01	Were any deficiencies noted? *Indicate the deficiencies and note whether they were corrected.*	Yes	Please see Doc01_Gen8.01 for the inspection deficiencies and the facility's response to and action plan for the noted deficiencies.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
9.00	Has this pharmacy been inspected by any other state for which it holds a license? *If yes, note the state and the date of the inspection and frequency of inspections by other states.*	No	
10.00	Is the pharmacy operating under an exemption or restriction granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the exemption or restriction.*	No	
11.00	Is the pharmacy operating under a waiver or variance granted by the state in which the pharmacy is located or by any other state in which the pharmacy is licensed? *If yes, note the waiver or variance.*	No	
12.00	Has the pharmacy been inspected or visited by the DEA? *If yes, indicate the inspection/visit date and note any deficiencies. Also note how frequently the pharmacy is inspected/visited by the DEA.*	Yes	The DEA inspected the facility on 8/11/2014 and left a Notice of Inspection Form DEA-82. The DEA does not regularly inspect the facility.
13.00	Has the pharmacy been inspected by the FDA? *If yes, indicate the inspection date and note any deficiencies, significant correspondence, or if a "483" was issued and date, and response and date. Also note how frequently the pharmacy is inspected by the FDA.*	No	
14.00	Has the pharmacy been inspected by the Environmental Protection Agency (EPA), Department of Transportation (DOT) or any other outside agency? *If yes, indicate the inspection date and note any deficiencies related to pharmacy practice.*	Yes	The DOT inspected the facility on 2/9/2006. The deficiency documented as a "Probable Violation" was "Failure to provide security awareness to a new employee. The company has no record of security awareness training for Dorsey Chappelle, hired Sept 2005." The deficiency was corrected.
15.00	Does the pharmacy hold any accreditations or certifications? *If yes, indicate which and collect most recent date of survey.*	Yes	The pharmacy holds an accreditation from The Joint Commission for Home Care Accreditation # 535863. dated 9/9/2022 and valid for 36 months.
16.00	Has the pharmacy held any accreditations or certifications in the past that they no longer hold?	No

2125

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
17.00	Were any deficiencies detected on the last internal audit? *List date of last audit and note any deficiencies found and action plan to correct.*	Yes	The last internal audit was dated 12/14/2023. Please see Doc02_Gen17.00 for the full report including deficiencies and the corrective action plan.
Policy and Management			
18.00	Are policies and procedures for the program maintained in the pharmacy in an immediately retrievable form? *Indicate if hard copy, electronic, or both.*	Yes	P & P are electronic and on the corporate shared drive.
19.00	Are the P&Ps reviewed and updated regularly? *Indicate the review frequency and who performs the reviews.*	Yes	The Management of Change program requires the PIC to review the P & P quarterly and make suggestions for improvement.
20.00	Are systems in place for the ongoing monitoring of state and federal laws/regulations for changes? *Give details of the system and resources, or indicate if it is a corporate process and who is responsible overall as well as at the site.*	Yes	The corporate RSO reviews state and federal regulations and communicates them to the facility. The PIC receives bulletins and emails from the boards of pharmacy for the licensed states.
21.00	Is there a statement in the P&P, or are other means used to ensure that the most stringent laws/regulations are followed? *Describe system details.*	Yes	This is part of the corporate P & P.
22.00	Does the pharmacy maintain all required records, including but not limited to prescription files, on site? *Record how long records are kept. If not on site, where?*	Yes	All records are maintained onsite. Record retention varies with the record type, with prescription records maintained for five years.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
23.00	Does the pharmacy have access to appropriate law references including state and federal regulations (including state regulations for all states in which the facility is licensed and NRC)? *Indicate if they are hard copies or are accessed online (demonstrate access) or both.*	Yes	Access to law references is both hard copy and electronic.
24.00	Does the pharmacy have access to other references as required by state law? (eg appropriate dosage and toxicology references). *Indicate if they are hard copies or are accessed online or both.*	Yes	Dosage and toxicology references are both hard copy and electronic.
25.00	Does the pharmacy have access to appropriate practice specific references? Nuclear, geriatric, pediatric, etc. *List and indicate if hard copy or online or both.*	Yes	Practice-specific references are both electronic and hard copy. The most frequently used are the hard copies of Fundamentals of Nuclear Medicine, by Stabin, and Radiopharmaceuticals in Nuclear Pharmacy and Nuclear Medicine, by Kowalsky.
26.00	Are Safety Data Sheets (SDS) [formerly known as Material Safety Data Sheets (MSDS)] up to date and available to personnel for drugs and chemicals used in the pharmacy (including those for compounding, if applicable)? *Verify that personnel can access them and are familiar with the format.*	Yes	
27.00	Does the pharmacy have a hazardous waste handling and collection system? *Indicate how often waste is collected and the vendor(s) used.*	Yes	Hazardous waste is picked up by Stericycle on as needed basis.
	Product Ordering, Receipt and Inventory		
28.00	Is the pharmacy restricted to buying prescription drugs from certain WDs or manufacturers?	Yes	
28.01	If restricted, does the PIC approve the vendors? *If not, who does approve (corporate)?*	No	
29.00	Are all orders received when the pharmacy is open or placed in a secure area if the pharmacy is closed?	Yes	Orders are received only when the pharmacy is staffed and a pharmacist present.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
30.00	Does the pharmacy purchase any compounded radiopharmaceuticals from other entities for dispensing to patients? *If so, describe which compounded radiopharmaceuticals and from where they are purchase (collect name and license of other entity).*	No	
31.00	Does the pharmacy make any sterile or nonsterile compounded radiopharmaceuticals using bulk powder or liquid (APIs)? *Indicate bulk products and vendors used.*	No	
32.00	Does the pharmacy use active ingredients that are not from an FDA facility? *If so, indicate sources.*	No	
33.00	Does the computer system track on-hand quantities of products? *Who can adjust the on-hand quantities, and are adjustments tracked?*	Yes	Only a pharmacist can adjust quantities and all entries and adjustments are tracked.
34.00	Are orders generated and sent by the computer for prescription products, including controlled substances? *Who can alter the orders before they are sent?*	No	A pharmacist must process the order. There are standing orders for generators.
35.00	Does the pharmacy maintain required inventories (such as change in PIC, theft/loss, etc)? *Indicate which.*	N/A	There are no controlled substances stocked.
36.00	Are incidents of diversion or resignation/termination of personnel for cause reported? *Indicate agencies/law enforcement to whom reports are made.*	Yes	The Board of Pharmacy would be notified and local law enforcement may be contacted dependent on the circumstances.
37.00	Does the pharmacy have a complete physical inventory of products performed at least once yearly? *If cycle counting, indicate the process.*	Yes	There is a monthly inventory and reconciliation with the system records.
38.00	Does the pharmacy have a system in place to track prescription drug products in order to detect diversion or theft? *Describe process (for example, inventory or shrink report tools used, perpetual inventory in computer, etc).*	Yes	There is a perpetual inventory in the pharmacy system.
39.00	Are all products inspected upon receipt to detect any packaging issues, damage, etc.? *Describe what happens if products are damaged.*	Yes	Damaged RAM material requires a notification to the RSO who determines handling. Non-RAM material is quarantined and the source is notified of the issue.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
40.00	How are outdated, damaged, or recalled products segregated? *Indicate how often the pharmacy checks for out-of-date products.*	Yes	The system maintains expiration dates and expiration dates are reviewed at the time of use. There is no regularly scheduled review of expiration dates.
41.00	Are non-RAM expired or damaged products destroyed on site? *View documentation. If "no", note the name of the reverse distributor.*	No	Stericycle is the reverse distributor.
	Prescription/Order Processing		
42.00	Are any portions of the prescription processing performed at a different location? *If so, explain. Indicate whether there is a central fill/central processing agreement in place.*	No	
43.00	Does the pharmacy obtain a copy or verify of the RAM license (of the facility to which the radiopharmaceutical will be delivered) issued by the State Radiation Control Agency or the NRC?	Yes	
44.00	Is there a procedure to obtain a RAM license for the facility when a license cannot be obtained or verified?	Yes	The facility is contacted for license verification or a timely renewal letter. The state may be contacted for validation of the facility RAM license if necessary.
45.00	Does the pharmacy have electronic prescription capability? *Indicate whether it is for non-controlled substances, controlled substances, or both.*	Yes	The facility uses WebOLO for online ordering.
46.00	Is the pharmacy computer system provided routine maintenance and is the information backed up? *Indicate the frequency of backup and if the backup data is stored off site .*	Yes	The system is backed up daily, and maintained on corporate servers and a cloud.
47.00	Is there a continuity plan should the system become inoperable? *Describe how data will be retrieved.*	Yes	There is a local backup system that allows full operation. When the main system is operable, the data from the backup system must be re-entered.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
Patient Profiles and Communication			
48.00	Does the patient information gathered include patient contact information, age or date of birth, and gender, as required by the State Board of Pharmacy?	Yes	Only the patient's name is normally provided. The facility may require and request the patient's weight for some doses.
49.00	For therapy doses, does the pharmacy receive appropriate information to assess correct dosage, such as geriatric or pediatric weight-based doses, as required by the State Board of Pharmacy and/or Radioactive Materials Regulatory Agency?	Yes	
50.00	Does the pharmacist perform an evaluation of the dose, safety, and intended use of the preparation to be compounded?	Yes	The radiologist may be contacted for information if necessary.
51.00	Does the pharmacy take back prescription drugs from customers (eg clinic, prescriber, etc.)? If so, describe.	Yes	Unused doses may be accepted from prescribers or clinics and destroyed.
52.00	Are providers instructed on the signs of product instability or contamination (as appropriate) and to report any changes in the physical characteristics of the product to the pharmacy?	Yes	
Patient Confidentiality			
53.00	Is there a HIPAA policy in place for employees, vendors, and contractors?	Yes	
54.00	Do employees deemed nonessential to patient care have access to confidential patient information, such as delivery personnel, etc.?	No

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
55.00	Is access to the pharmacy system limited to appropriate personnel? *Password protected, access limited by job type, access revoked as appropriate such as upon termination, access to patient information in the computer is tracked.*	Yes	Passwords are assigned by corporate IT with access based on the employee's role. Access is revoked upon termination of employment. All access into the system is tracked.
56.00	Are confidential documents shredded? *Indicate if In-house or by a service and list service in notes if applicable.*	Yes	Shred-It is used.
57.00	Does the pharmacy destroy PHI including labeled prescription vials?	Yes	There are no vials used.
58.00	Does the crisis plan include security of paper and electronic patient information?	Yes	
Prescription Packing and Transporting			
59.00	Does the pharmacy utilize employee drivers to deliver prescriptions to patients and/or facilities?	Yes	
60.00	Does the pharmacy utilize other services/carriers to deliver prescriptions to patients and/or facilities? *Indicate carriers used.*	No	
61.00	Is there is a tracking system in place to verify delivery of prescription products? *Indicate if signatures obtained or how tracked.*	Yes	An Apple Encore GPS tracking system is used with iPhones assigned to each driver. The package barcode is scanned and the barcode at the facility is scanned and must be a match.
62.00	Are deliveries of RAM directly to a secure location at a health care facility?	Yes	
63.00	Is only authorized packaging used?	Yes	
64.00	Is the packaging tamper-evident?	Yes	WBC packages are padlocked. Other deliveries use shrink wrap on the pig and zip ties on the carton.

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
Personnel Qualifications			
65.00	Is there a process for periodic verification of validity of personnel licenses (registrations)? *Describe the process.*	Yes	The PIC maintains a spreadsheet of all personnel licenses and reviews the primary source verification website annually.
66.00	Are all personnel wearing name tags that clearly identify if they are a pharmacist or a technician? *What about other positions?*	Yes	All employees wear a picture ID with name and position held.
67.00	If the pharmacy uses relief personnel from outside agencies to perform sterile compounding, the training and certifications are verified. *View documentation.*	N/A	
68.00	Does the pharmacy have a technician policy that specifies what a technician is allowed and not allowed to do?	Yes	
69.00	Does the pharmacy maintain the proper technician-to-pharmacist ratio? *Indicate ratio used and the maximum number of staff who work at the same time.*	Yes	The maximum number of licensed personnel working at any time is one technician and three pharmacists
70.00	Do employees undergo background checks upon hire? *Indicate if performed periodically for existing employees.*	Yes	Only initial criminal background checks are performed.
71.00	Do employees undergo drug testing upon hire? *Indicate if performed periodically for existing employees and if it is random, for cause, or both.*	Yes	There is a voluntary post-accident drug testing policy.
72.00	Is there a performance review process and is it documented? *If yes, how often?*	Yes	The performance review is an annual process.
73.00	Is a procedure for corrective or disciplinary action in place and documented?	Yes

Nuclear Pharmacy Inspection - General

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes
	Facility and Security		
74.00	Is entry to prescription product storage and processing areas limited to task-critical employees?	Yes	
75.00	Is entry into the handling areas limited to task-critical employees (limited to only the pharmacist(s) and other trained and authorized pharmacy personnel)?	Yes	
76.00	Are drugs secured to prevent unauthorized removal or access?	Yes	
77.00	Does the pharmacy have a working security/alarm system in place? *If yes, describe.*	Yes	ADT manages the security system which consists of magnetic door sensors, motion detection devices, and glass break sensors. The main door is a keyed lock with key pass access for all other doors. Access is based on the employee's job description and role. Alarms are sent by phone call and text message to the PIC, and a phone tree if there is no response.
78.00	Does the pharmacy have cameras? *If yes, record how long images are retained.*	Yes	Images are maintained for 90 days or more.
79.00	Does anyone have access to the pharmacy after hours in the absence of the pharmacist? *Explain.*	No	
80.00	Do pharmacy staff remain in the pharmacy if the pharmacist is absent on a meal break?	Yes	
80.01	If so, is there a policy regarding what activities may or may not be allowed during the pharmacist's absence?	Yes

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Nonsterile Radiopharmaceuticals			1.1
1.00	Does the pharmacy compound nonsterile radiopharmaceuticals? *If so, list which of the following do they compound (eg Oral Capsules, oral solutions, other (if other, list those products in the notes)).*	Yes	Oral capsules and oral solutions are compounded.	1.1
2.00	Does the pharmacy obtain conventionally manufactured nonsterile drug products for dispensing? *If so, list those products in the notes.*	No		1.1
3.00	Does the pharmacy obtain compounded nonsterile preparations from 503B-registered outsourcing facilities for dispensing? *If so, list those products/outsourcers in the notes.*	No		1.1
	Sterile Radiopharmaceuticals			1.2
4.00	Does the pharmacy compound sterile radiopharmaceuticals? *If so, list which of the following do they compound in the notes. (eg, intravenous, intrathecal, intraperitoneal, subcutaneous, intradermal, inhalation, ophthalmics, intra-organ instillations)*	Yes	The pharmacy compounds intravenous and inhalation radiopharmaceuticals.	1.2
5.00	Does the pharmacy obtain conventionally manufactured sterile drug products for dispensing? *If so, list those products in the notes.*	Yes	In111 DTPA	1.2
6.00	Does the pharmacy obtain compounded sterile preparations from 503B-registered outsourcing facilities for dispensing? *If so, list those products/outsourcers in the notes.*	No		1.2
7.00	Does the pharmacy compound sterile preparations involving one or more nonsterile components?	No		1.2
8.00	If the pharmacy compounds sterile preparations requiring a sterilization procedure, is testing (eg filtration with bubble point testing) performed prior to dispensing?	N/A		1.2
9.00	If the pharmacy compounds injectable sterile preparations involving one or more components that are not certified to be pyrogen-free, is pyrogen testing performed prior to dispensing?	N/A		1.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
Immediate Use of Sterile Radiopharmaceuticals				3
10.00	Does the pharmacy prepare and dispense sterile radiopharmaceuticals in a patient care setting as immediate use?	No		3
11.00	Does the pharmacy prepare immediate use sterile radiopharmaceuticals in an ambient environment without primary or secondary engineering controls?	N/A		3
12.00	Does handling for immediate use sterile radiopharmaceuticals in an ambient environment lacking primary and secondary engineering controls when intended for a single patient meet the following requirements? as applicable:	N/A		3
12.01	Are preparations (including minor deviations) and/or dispensing limited to use for a single patient?	N/A		3
12.02	Are preparation (including preparations with minor deviations) components sterile, conventionally manufactured drug products (eg, NDA, ANDA)?	N/A		3
12.03	Are dispensing of drug products produced under an approved IND or RDRC protocol?	N/A		3
12.04	Are manipulations for any unit doses (eg, decreasing the dosage, needle changes) or dispensing for one patient (eg, withdrawing a dose) ?	N/A		3
12.05	Are preparations labeled for administration within 1 hour of the first container puncture or exposure of any critical site involved (eg, syringe tip, needle hub or needle) to ambient air, whichever is first?	N/A		3
12.06	Are all components involved (eg, Tc-99m sodium pertechnetate syringe or vial, final prepared radiopharmaceutical kit vial, diluent vial) discarded within 1 hour of being punctured or after use for a single patient administration, whichever is first?	N/A		3
12.07	Does the pharmacy indicate that dose pooling (combining doses from two or more syringes to meet one patient's need) is performed as immediate use? Is any residual activity that remains is immediately discarded and not utilized for any other patient?	N/A		3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
12.08	Does pharmacy staff follow proper hand hygiene and garbing?	N/A		3
12.09	Does the pharmacy follow 10.4 Preparation of Radiolabeled Red Blood Cells for Immediate Use for red blood cell labeling?	N/A		10.4
12.10	Does the pharmacy follow 12.2 Labeling for labeling?	N/A		12.2
12.11	Is area for sterile preparation and/or dispensing functionally separate from nonsterile compounding area (eg, radiolabeling food) during the time of use?	N/A		
12.12	Does the pharmacy require a segregated radiopharmaceutical processing area (SRPA), classified area, or PEC?	N/A		
12.13	Are the number of steps or punctures limited?	N/A		
12.14	Does the pharmacy require personnel to complete the aseptic qualifications as detailed in 4.1 Aseptic Qualifications (eg, aseptic technique training with documented assessment, media fill challenge, gloved fingertip testing)?	N/A		4.1
12.15	Is adding non-radioactive, sterile and commercially manufactured pharmaceutical(s) only applicable if performing immediate use. *While adding a non-radioactive, sterile and commercially manufactured pharmaceutical (eg, lidocaine) to a unit dose is otherwise considered compounding, it is allowed for immediate use purposes as long as all of the above are adhered to.*	N/A		
12.16	Is dose splitting (splitting a unit dose for administration to more than one patient) performed as immediate use?	N/A

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
12.17	If performed, is dose splitting done in an ISO class 5 PEC in either an SRPA or in an ISO class 8 or better buffer area? *Note where this is performed.*	N/A		
Personnel Qualifications, Training, and Hygiene				4
13.00	Are personnel trained to work with radiopharmaceuticals per policies and standard operating procedures (SOPs) authorized by an ANP or AU (eg physician)?	Yes		4
14.00	Do personnel follow these policies or SOPs of the ANP or AU (eg physician) and work under their supervision?	Yes		4
14.01	Are personnel trained in blood-borne pathogens (as appropriate)?	Yes		4
15.00	Are individuals entering a handling area properly garbed and maintain proper personal hygiene to minimize the risk of contamination to the environment and/or radiopharmaceuticals?	Yes		4
15.01	Are individuals who have a condition that may pose a higher potential of contaminating the radiopharmaceutical and the environment with microorganisms (eg, rashes, sunburn, recent tattoos, oozing sores, conjunctivitis, or active respiratory infection) reported to their supervisor?	Yes		4
15.02	Is the designated person responsible for evaluating whether these individuals should be excluded from working in sterile processing areas before their conditions are resolved?	Yes		4
16.00	Have all personnel of reproductive capability who handle, or compound radiopharmaceuticals/radioactive materials confirmed in writing they understand the risks of handling radiopharmaceuticals/radioactive materials?	Yes		4
17.00	Is there documentation of training for other employees (including drivers, warehouse, receiving, administrative, clerks, etc.) who may have contact with radiopharmaceuticals/radioactive materials on handling the spills associated with these?	Yes		4

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
21.04	Gloved fingertip and thumb sampling	Yes		4.1
21.05	Media-fill testing (not required for non-compounding personnel)	Yes		4.1
	Gloved Fingertip and Thumb Sampling			4.1
22.00	Is gloved fingertip and thumb sampling required for all personnel who enter and perform tasks in an ISO Class 5 PEC (eg, aseptic manipulations, cleaning the PEC)?	Yes		4.1
23.00	Is gloved fingertip and thumb sampling performed initially on both hands, immediately following hand hygiene and garbing?	Yes		4.1
23.01	Is successful completion of initial gloved fingertip and thumb sampling defined as zero colony- forming units (cfu)?	Yes		4.1
24.00	Is subsequent gloved fingertip and thumb sampling after media-fill testing defined as ≤3 cfu (total for both hands)?	Yes		4.1
25.00	Is the gloved fingertip and thumb sampling performed with touch plates or other devices (eg, plates, paddles, or slides) that contain a general microbial growth agar [eg, trypticase soy agar (TSA) soybean–casein digest media] supplemented with neutralizing additives (eg, lecithin and polysorbate 80) which support both bacterial and fungal growth?	Yes		4.1

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
26.00	Per P&P review, gloves are not disinfected immediately before touching the sampling device.	Yes		4.1
27.00	Is a gloved fingertip and thumb sample from both hands collected by rolling finger pads and thumb pad over the agar surface, using a separate sampling device for each hand?	Yes		4.1
28.00	Are the plates incubated in an incubator at 30°–35° C for no less than 48 h, and then at 20°–25° C for no less than 5 additional days?	Yes		4.1
	Media-Fill Testing			4.1
29.00	Is media-fill testing done for all personnel who prepare, compound, dispense, and repackage sterile radiopharmaceuticals?	Yes		4.1
30.00	Is testing reflective of the actual manipulations to be carried out by the individual and simulate the most challenging and stressful conditions to be encountered in the worker's duties?	Yes		4.1
31.00	Are media-fill tests documented as defined by the facility's policies and SOPs?	Yes		4.1
32.00	*Recommendation: Are media-fill tests be performed at the end of a work session in the PEC.*	Yes		4.1
33.00	Are media-fill tests performed with a commercial source of soybean–casein digest medium?	Yes		4.1
34.00	Do those performing sterile-to-sterile processing activities start with sterile media?	Yes		4.1
35.00	Do those performing nonsterile-to-sterile compounding use a nonsterile soybean–casein digest powder to make a solution?	N/A		4.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
35.01	Is dissolved nonsterile commercially available soybean–casein digest medium in nonbacteriostatic water to make a 3% nonsterile solution?	N/A		4.1
35.02	Is the final media manipulated in a manner that simulates nonsterile-to-sterile compounding activities?	N/A		4.1
35.03	Is the final media prepared with at least 1 container as the positive control to demonstrate growth promotion, which is indicated by visible turbidity upon incubation?	N/A		4.1
36.00	Does the certificate of analysis (CoA) include documentation of growth promotion testing for each lot of media used?	Yes		4.1
37.00	Once the media-fill simulation is completed and the final containers are filled with the test medium, are the media filled containers incubated for 7 days at 20°–25° C followed by 7 days at 30°–35° C to detect a broad spectrum of microorganisms? Note: Failure is indicated by visible turbidity or other visual manifestations of growth in the medium in 1 or more container–closure unit(s) on or before 14 days.	Yes		4.1
38.00	In the event of failure, are results of the evaluation and corrective actions documented and the documentation maintained to provide a record and long-term assessment of personnel competency?	Yes		4.1
39.00	Do media and components used include the following?	Yes		4.1
39.01	manufacturer	Yes		4.1
39.02	expiration date	Yes		4.1
39.03	lot number	Yes		4.1
40.00	Does the documentation include at a minimum the following?	Yes		4.1

2140

Nuclear Pharmacy Inspection

**The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging**

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
40.01	starting temperature for each interval of incubation	Yes		4.1
40.02	dates of incubation	Yes		4.1
40.03	results	Yes		4.1
40.04	name of the person evaluated	Yes		4.1
40.05	evaluation date	Yes		4.1
40.06	evaluation time	Yes		4.1
	Reevaluation, Retraining, and Requalification			4.2
41.00	Do personnel who fail visual observation of hand hygiene, garbing, and aseptic technique, gloved fingertip and thumb sampling, or media-fill testing successfully pass reevaluations in the deficient area(s) before they can resume processing of sterile radiopharmaceuticals?	Yes		4.2
42.00	Are all failures, retraining, and re-evaluations documented?	Yes		4.2
43.00	Do personnel successfully complete requalification in the core competencies via demonstrated through observation, written testing, and hands-on demonstration of skills?	Yes		4.2

2141

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Timing of Reevaluation and Requalification			4.2
44.00	**Visual observation:** Are personnel visually observed while performing hand hygiene, garbing SOPs, and aseptic technique procedures both initially, and then at least once every 12 months?	Yes		4.2
45.00	**Gloved fingertip and thumb sampling:** Do personnel perform fingertip and thumb sampling 3 times initially, and then every 12 months (in conjunction with media-fill testing).	Yes		4.2
46.00	**Media-fill testing:** After initial qualification, is a media-fill test of all personnel engaged in sterile radiopharmaceutical processing performed at least every 12 months (in conjunction with gloved fingertip and thumb sampling)?	Yes		4.2
47.00	**Cleaning and disinfecting:** Does the pharmacy retrain and requalify personnel in the cleaning and disinfecting of sterile processing areas every 12 months or in conjunction with any change(s) in cleaning and disinfecting SOPs, whichever is sooner?	Yes		4.2
48.00	**After a pause in sterile radiopharmaceutical processing:** Are personnel that have not performed radiopharmaceutical processing in more than 6 months requalified in all core competencies before resuming duties?	Yes		4.2
49.00	**Sterile compounding using a nonsterile drug substance or components:** Are personnel who perform sterile compounding using a nonsterile drug substance or components requalified in all core competencies every 6 months?	N/A	There are no nonsterile drugs or components used.	4.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Ancillary Personnel			4.3
50.00	Are personnel who are authorized to be within the sterile processing area and do not handle sterile preparations required to complete all training and testing other than training on media-fill testing ?	N/A	There are no personnel authorized to be within the sterile processing area who do not handle sterile preparations.	4.3
51.00	Do other personnel or visitors (eg, auditors, regulators, student observers) comply with garbing and gloving SOPs without the need to prove competency?	Yes		4.3
	Hand Hygiene and Garbing for Immediate Use Preparations			4.4
52.00	**Hand hygiene:** Do personnel wash hands and arms to the wrists with soap and water or use a suitable alcohol-based hand rub with a time based on institution policies to reduce bioburden on the hands?	Yes		4.4
53.00	**Garbing:** Immediately after hand hygiene, do personnel don a clean coat/gown that has not been exposed to a patient or patient care area, and either don sterile gloves or don nonsterile disposable gloves and then disinfect the gloves with sterile 70% IPA?	Yes		4.4
54.00	Is a different lab coat worn to care for a patient than the coat/gown used for radiopharmaceutical preparation?	N/A	There is no patient care area.	4.4
	Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area			4.5
55.00	Before entering the SRPA or buffer area, do personnel remove all the following (as applicable)? *(Radiation dosimetry devices are allowed, as required by the RAM license).*	Yes		4.5
55.01	Outer garments (eg, bandanas, coats, hats, jackets, sweaters, vests)	Yes		4.5
55.02	All cosmetics	Yes		4.5

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
55.03	All hand, wrist, and other exposed jewelry including piercings that could interfere with the effectiveness of the garbing	Yes		4.5
55.04	Nail products (eg, artificial nails, polish, extenders). {Natural nails kept neat and trimmed.}	Yes		4.5
55.05	Ear buds	Yes		4.5
55.06	Headphones	Yes		4.5
56.00	Are electronic devices that are not necessary for compounding or other required tasks banned from the SRPA?	N/A	There is no SRPA.	4.5
57.00	Do personnel don shoe covers, head/hair/facial hair cover(s) and face masks? Note – these items are donned in an order that eliminates the greatest risk of contamination, as defined in facility SOPs.	Yes	Dedicated shoes are used, or shoe covers for visitors.	4.5
58.00	Does the process before entering the buffer area or SRPA include the following?	Yes		4.5
58.01	Remove visible debris from underneath fingernails under warm running water using a disposable nail cleaner	Yes		4.5
58.02	Wash hands and arms up the elbows with soap and water for at least 30 seconds and then dry using low-lint towels	Yes		4.5
58.03	Electronic hand dryers are not permitted	Yes		4.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
58.04	Hand antisepsis cleansing is performed using a suitable alcohol-based hand rub	Yes		4.5
58.05	Don a low-lint gown with sleeves that fit snugly around the wrist and enclosed at the neck. *Note: Disposable gowns are preferred.*	Yes	Gowns are laundered and not disposable.	4.5
58.06	If reusable gowns are used, a clean gown is donned daily.	Yes		4.5
58.07	Aseptically don sterile, powder-free gloves. Gloves completely and snugly cover the ends of the gown cuffs so that skin on the wrists and upper hands is completely enveloped.	Yes		4.5
59.00	Does the routine process include the following?	No		4.5
59.01	Do personnel periodically apply sterile 70% IPA to gloves while balancing the risk of radioactivity contamination; due to touching or handling potentially nonsterile materials?	No	The pharmacist observed during compounding frequently used sterile 70% IPA to sanitize the gloves. However, on one occasion during the observation, the pharmacist used the IPA, made notes on the documents, and then re-entered the hood without further sanitizing.	4.5
59.02	Do personnel inspect the gloves they are wearing for holes, punctures, radioactivity contamination, or tears?	Yes		4.5
59.03	If a defect, radioactivity contamination, or malfunction is detected, do personnel immediately do the following?	Yes		4.5
59.04	Remove the gloves	Yes		4.5
59.05	Repeat antiseptic hand cleansing using an alcohol-based hand rub	Yes		4.5
59.06	Don new sterile gloves	Yes		4.5
59.07	Personnel avoid touch contamination of container septa, needles, syringe and needle hubs, and other critical sites	Yes		4.5

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
60.00	Do exiting processes for buffer area or SRPA include the following?	Yes		4.5
60.01	Shoe covers, head/hair/facial hair cover(s), face masks and gloves are properly disposed of	Yes		4.5
60.02	New PPE is used for each re-entry	Yes		4.5
60.03	Gowns may be re-used within the same shift if maintained to minimize contamination (eg away from sinks)	Yes		4.5
60.04	Gowns are in a classified area or,	Yes		4.5
60.05	Gown are kept in (or immediately outside of) the SRPA	N/A	There is no SRPA.	4.5
	Facility Design and Environmental Controls			5.1
61.00	Is the facility is designed to minimize airborne contamination (for sterile radiopharmaceutical facilities)?	Yes		5.1
62.00	Is the facility is well-lighted?	Yes		5.1
63.00	Are the refrigerator and freezer restricted to drug products only (no food)?	Yes		5.1
64.00	Are the temperatures in classified areas and SRPA continuously maintained at 25 degrees C or cooler?	Yes		5.1

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
65.00	Are the temperatures monitored in the classified areas and SRPA each day that they are used, either manually or by a continuous recording device?	Yes	Temperatures are recorded manually once daily.	5.1
66.00	Are the temperature readings of the classified areas and SRPA documented at least once daily or stored in a continuous recording device and retrievable?	Yes	Temperatures are recorded manually once daily.	5.1
67.00	Are the temperature readings reviewed as described in the facility's SOPs?	Yes		5.1
68.00	Are free-standing air conditioners used within the classified area or SRPA?	No		5.1
69.00	Are temperature monitoring devices calibrated and verified for accuracy at least every 12 months or as required by the manufacturer?	Yes		5.1
70.00	*Recommendation: The humidity in classified areas and SRPA are continuously maintained at a relative humidity (RH) below 60%.*	Yes		5.1
71.00	Is the humidity monitored in the classified areas and SRPA each day that it is used, either manually or by a continuous recording device?	Yes	The humidity is recorded manually once daily.	5.1
72.00	Are the humidity readings of the classified areas and SRPA documented at least once daily or stored in a continuous recording device and retrievable?	Yes	The humidity is recorded manually once daily.	5.1
73.00	Are the humidity readings reviewed as described in the facility's SOPs?	Yes		5.1
74.00	Are free-standing humidifiers/dehumidifier used within the classified area or SRPA?	No		5.1

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
75.00	Are humidity monitoring devices calibrated and verified for accuracy at least every 12 months or as required by the manufacturer?	Yes		5.1
76.00	Is the designated person responsible to ensure the following?	Yes		5.1
76.01	Does each area related to sterile radiopharmaceutical processes meet the classified air quality standard appropriate for the activities to be conducted in that area?	Yes		5.1
76.02	Are ISO Class 5 PECs located, operated, maintained, monitored, and certified to have appropriate air quality?	Yes		5.1
	Types of Secondary Engineering Controls and Design:			5.1
77.00	Were placement of doors, door surfaces, and movement of the door, all of which can affect airflow, considered when designing doors for a sterile radiopharmaceutical processing facility?	Yes		5.1
78.00	Are tacky surfaces not used in ISO-classified areas?	Yes		5.1
79.00	Are the PEC located in a SEC?	Yes		5.1
80.00	When the PEC is located in an SEC which is an ISO-classified buffer room with an ante room, does all of the following apply?	Yes		5.1
80.01	Is the ISO-classified ante-room and buffer area separated from the surrounding unclassified areas of the facility with fixed walls and doors?	Yes		5.1

2148

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
80.02	Are facility design and controls in place to minimize the flow of lower-quality air into the more controlled areas?	Yes		5.1
80.03	Is the air supplied to the classified areas introduced through HEPA filters that are located in the ceiling?	Yes		5.1
80.04	Are returns low on the wall unless a visual smoke study demonstrates an absence of stagnant airflow where particulate will accumulate?	Yes		5.1
80.05	Is a smoke study of the PEC repeated whenever a change to the placement of the PEC within the area is made?	Yes		5.1
80.06	Is the classified areas equipped with a pressure-differential monitoring system?	Yes		5.1
80.07	Does the ante-room have a line of demarcation to separate the clean side from the less clean side?	Yes		5.1
80.08	Is the ante-room entered through the less clean side, and the clean side is the area closest to the buffer area?	Yes		5.1
80.09	Is required garb worn prior to crossing the line of demarcation?	Yes		5.1
81.00	When the PEC is located in an SEC, which is an unclassified area, without an ante room or buffer area (aka SRPA), the following apply:	N/A		5.1
81.01	Only sterile radiopharmaceutical preparation, preparation with minor deviations, dispensing, and repackaging may be performed in an SRPA	N/A		5.1
81.02	The SRPA is located away from unsealed windows, doors that connect to the outdoors, and traffic flow which may adversely affect the air quality in the PEC.	N/A		5.1
81.03	A visible perimeter establishes the boundaries of the SRPA.	N/A		5.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
81.04	Access to the SRPA is restricted to authorized personnel and required materials.	N/A		5.1
81.05	An SRPA is not located adjacent to environmental control challenges	N/A		5.1
81.06	If the SRPA meets ISO Class 8 total airborne particle count specifications, it can also be used for storage and elution of non-direct infusion radionuclide generators (eg, Tc-99m)	N/A		5.1
82.00	If a pass-through is used to prevent influx of contaminants, both doors are never opened at the same time.	Yes		5.1
83.00	*Recommendation: Interlocking mechanisms are used in the pass-through(s).*	Yes		5.1
	The Radiopharmaceutical Processing Environment:			5.1
84.00	Is the PEC certified to meet ISO Class 5 or better conditions (3520 particle count (with limit ≥0.5 µm) per cubic meter) under dynamic operating conditions?	Yes		5.1
85.00	Is the airflow in the PEC unidirectional (laminar flow)?	Yes		5.1
86.00	Is "first air" at the face of the filter free from airborne particulate contamination?	Yes		5.1

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
87.00	Is the HEPA-filtered air supplied in the direct processing area (DPA) at a velocity sufficient to sweep particles away from aseptic processing areas and maintain unidirectional airflow as much as possible during operations, given the limitations added from the radiation shielding in the DPA?	Yes		6.1
88.00	Are in situ air pattern analyses via smoke studies conducted at the critical area to demonstrate unidirectional airflow and sweeping action under dynamic conditions?	Yes		6.1
	Types of PECs and Placement:			6.1
89.00	Does the placement of the PEC allow for cleaning around the PEC?	Yes		6.1
90.00	**Laminar airflow workbench (LAFW):** Does a LAFW used for preparing radiopharmaceuticals provide vertical unidirectional HEPA-filtered airflow?	Yes		6.1
91.00	In cases where the LAFW is located within the segregated containment area of a hot-cell, it is acceptable for a horizontal unidirectional HEPA-filtered airflow pattern to be utilized.	Yes		6.1
92.00	**Placement of PEC:** Is the PEC located out of traffic patterns and away from area air currents that could disrupt the intended airflow patterns inside the PEC?	Yes		6.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
92.01	If used only to prepare, prepare with minor deviations, dispense, or repackage sterile radiopharmaceuticals the ISO Class 5 PEC may be placed in an unclassified SRPA.	N/A	There is no SRPA.	5.1
92.02	If used to compound sterile radiopharmaceuticals, the PEC is located within an ISO Class 7 or better buffer area with an ISO Class 8 or better anteroom.	Yes		5.1
93.00	Is a dynamic airflow smoke pattern test performed initially and at least every 6 months to ensure that the PEC is properly placed into the facility and that workers understand how to utilize the unidirectional airflow to maintain first air as much as possible given the limitations added from the radiation shielding in the DPA?	Yes		5.1
	Air-Exchange Requirements		***Note to Inspector:*** *Airflow is measured in terms of the number of HEPA-filtered air changes per hour (ACPH). SRPA do not have an ACPH requirement.*	
94.00	For ISO-classified rooms, does the total ACPH maintain the ISO class under dynamic operating conditions?	Yes		
95.00	Are at least 15 ACPH of the total air change rate in a room come from the HVAC through HEPA filters located in the ceiling?	Yes		
96.00	Is there a minimum of 30 total HEPA-filtered ACPH supplied to ISO Class 7 areas?	Yes		
96.01	Does HEPA-filtered air from the PEC, added to the HVAC-supplied HEPA-filtered air, increase the total HEPA-filtered ACPH to at least 30 ACPH?	Yes

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
96.02	If the PEC is used to meet the minimum total ACPH requirements, is the PEC not turned off except for maintenance?	Yes		
96.03	Are both the ACPH from HVAC contributed from the PEC, and the total ACPH documented on certification reports?	Yes		
97.00	Is a minimum of 20 ACPH of HEPA-filtered air supplied to ISO Class 8 areas?	Yes		
97.01	Are ante-rooms where activity levels are high, required more HEPA-filtered ACPH to maintain ISO Class 8 under dynamic operating conditions?	Yes		
97.02	Are the total ACPH documented on certification reports?	Yes		
	Creating Areas to Achieve Easily Cleanable Conditions			5.2
	Classified Areas:			5.2
98.00	Are the surfaces of ceilings, walls, floors, doors, door frames, fixtures, shelving, work surfaces, counters, and cabinets in the classified area smooth, impervious, free from cracks and crevices, and non-shedding, so they can be cleaned and disinfected, and to minimize spaces in which microorganisms and other contaminants can accumulate?	Yes		5.2
99.00	*Recommendation: Surfaces are resistant to damage by cleaning agents, disinfectants, and tools used to clean.*	Yes		5.2
100.00	Are junctures between the ceiling and the walls and between the wall and the floor sealed to eliminate cracks and crevices where dirt can accumulate?	Yes		5.2
101.00	If ceilings consist of inlaid panels, are each panel caulked or otherwise sealed and secured to seal them to the support frame?	Yes		5.2
102.00	Are walls constructed of or covered with a durable material (eg, epoxy-painted walls or heavy-gauge polymer) and the integrity of the surface maintained?	Yes		5.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging.

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
103.00	Are panels joined together and sealed to each other and the support structure?	Yes		5.2
104.00	Do floors include coving to the sidewall or the juncture between the floor and wall are caulked?	Yes		5.2
105.00	*Recommendation: Classified areas minimize dust-collecting overhangs such as utility pipes, ledges, and windowsills.*	Yes		5.2
106.00	If overhangs or ledges are present, are they easily cleanable?	Yes		5.2
107.00	Is the exterior lens surface of ceiling light fixtures smooth, mounted flush, and sealed?	Yes		5.2
108.00	Are any other penetrations through the ceiling or walls sealed?	Yes		5.2
	SRPA:			5.2
109.00	Is the SRPA and all surfaces (eg, walls, floors, counters, equipment) within the SRPA clean, uncluttered, and dedicated to sterile radiopharmaceutical processing activities?	N/A		5.2
110.00	*Recommendation: Surfaces in the SRPA are smooth, impervious, free from cracks and crevices, and non-shedding, so they can be easily cleaned and disinfected, and to minimize spaces in which microorganisms and other contaminants can accumulate.*	N/A		5.2
111.00	*Recommendation: Surfaces are be resistant to damage by cleaning agents, disinfectants, and tools used to clean.*	N/A		5.2
112.00	*Recommendation: Dust-collecting overhangs such as utility pipes, ledges, and windowsills are minimized.*	N/A		5.2
113.00	If overhangs or ledges are present, are they easily cleanable?	N/A		5.2

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Water Sources:			5.3
114.00	*Recommendation: Sinks are hands-free use with a closed system of soap (ie, non-refillable).*	Yes		5.3
115.00	In facilities with an ante room and buffer room, is the sink placed inside or outside of the ante room? *Note placement, inside or outside.*	Yes	The sink is outside of the ante room.	5.3
115.01	If the sink is located outside of the ante-room, it is located in a clean space to minimize the risk of bringing in contaminants into the anteroom.	Yes	The sink is located in a clean space and well away from the anteroom door. The sink faucet showed significant signs of rust and deterioration. Please see Photo01_Nuclear115.01	5.3
115.02	If the sink is located inside the ante-room, describe where it is located.	N/A		5.3
115.03	The buffer area does not contain plumbed water sources [eg, sink(s), eyewash(es), shower(s), or floor drain(s)].	Yes		5.3
115.04	The ante room does not contain floor drain(s).	Yes		5.3
116.00	*Recommendation: If installed, sprinkler systems in classified areas are recessed & covered and are easily cleanable.*	Yes		5.3
117.00	In facilities with a SRPA design:		N/A	5.3
117.01	Is the sink accessible but located at least 1 m from the PEC and generators, if present?	N/A		5.3
117.02	Is the sink not located inside the perimeter of the SRPA?	N/A		5.3

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Placement and Movement of Materials:			5.4
118.00	Are only furniture, equipment, and other materials necessary permitted in the classified area or SRPA?	Yes		5.4
118.01	*Recommendation: Are furniture, equipment and materials low-shedding and easily cleaned & disinfected.*	Yes		5.4
118.02	Does the number, design, location, and manner of furniture, equipment and material installation not adversely impact environmental air quality and promote effective cleaning and disinfecting?	Yes		5.4
119.00	Are shipping carton(s) or other corrugated or uncoated cardboard not allowed in the classified area or SRPA?	Yes		5.4
120.00	Are carts used to transport components or equipment into classified areas constructed from nonporous materials with cleanable casters and wheels?	Yes		5.4
121.00	In a classified area, are carts not moved from the dirty side to the clean side of the anteroom unless the entire cart, including casters, is cleaned and disinfected?	N/A	Carts are not used to move materials in the anteroom. Carts are dedicated to the clean room only.	5.4
122.00	Are all items wiped with low-lint wipers and an appropriate disinfectant by personnel wearing gloves before they are brought into the clean side of ante-room(s), pass-through(s), into an SRPA or into an ISO 5 PEC?	Yes		5.4

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Classified Areas:			5.5
123.00	Are activities and tasks carried out within the buffer area limited to only those necessary?	Yes		5.5
124.00	Are food and drinks exposed in patient care and treatment areas not in the ante-rooms or buffer areas?	N/A	There are no patient care and treatment areas.	5.5
125.00	When processing activities require the manipulation of blood-derived or other biological material (eg, radiolabeling patient's or donor's blood cells) do the following occur?	Yes		5.5
125.01	Are the manipulations clearly separated from routine material-handling procedures and equipment used in radiopharmaceutical preparation activities?	Yes		5.5
125.02	Are manipulations controlled by specific SOPs to avoid any cross-contamination?	Yes		5.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Refererence(s)
	Remote Aseptic Processing Involving a Hot-Cell:		*Note to Inspector: In settings where tasks are carried out within the hot-cell enclosure not within an ISO-classified space by remote means (ie, no direct intervention by personnel into the ISO Class 5 space), it is not necessary for personnel to don the garbing described in this chapter for that environment to carry out these aseptic manipulations or to perform other routine tasks in the general area where the hot-cell is located.*	5.6
126.00	Does a hot-cell device provide an inherent physical segregation for the ISO Class 5 aseptic processing area?	N/A	There is no hot cell in this facility.	5.6
127.00	If the hot-cell is located in an ISO-classified space, do personnel garb according to requirements of <825> for that environment?	N/A		5.6
128.00	If hand and arm incursions into the interior of the hot-cell occur causing personnel to stage the required materials and supplies, do personnel garb in relation to the contamination risk associated with the individual hot-cell/ISO Class 5 relationship?	N/A		5.6
129.00	For situations where a PEC device is located within a hot-cell, all the following apply:	N/A		5.6
129.01	Do dynamic airflow smoke pattern tests show that the staging of supplies and materials in the demarcated PEC area does not allow the influx of unclassified air into the PEC?	N/A		5.6
129.02	For interventions that are outside of the PEC, do personnel garb in nonsterile gloves and a low-particulate lab coat?	N/A		5.6
129.03	If the hot-cell has failed the airflow smoke pattern test, are personnel required to garb differently?	N/A		5.6
130.00	For situations where the hot-cell is an integrated HEPA filtration system with a clear demarcated area that is a PEC, the following apply:	N/A		5.6
130.01	Do dynamic airflow smoke pattern tests show that the staging of supplies and materials into the demarcated PEC area does not allow the influx of less than ISO Class 5 quality air into the PEC?	N/A		5.6

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
130.02	If a failure of the airflow smoke pattern test require personnel to garb in accordance with 4.5 Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area for all incursions into the PEC.	N/A		5.6
131.00	For other hot-cell/PEC configurations and technologies that may exist, the following apply:	N/A		5.6
131.01	Does verification (either by airflow smoke pattern tests or other manufacturer specified methods) ensure, upon each certification, that the staging of materials and supplies does not allow for the intrusion of less than ISO Class 5 air into the designated ISO Class 5 space?	N/A		5.6
131.02	Does failure of the airflow smoke pattern test require personnel to garb in accordance with 4.5 Hand Hygiene and Garbing for Buffer Areas and Segregated Radiopharmaceutical Processing Area for all incursions into the hot-cell?	N/A		5.6
	Environmental Controls:			5.7
132.00	Do all RAM users comply with the conditions specified in their approved RAM license application and regulations, and RAM license conditions may supersede the following requirements for environmental controls? Refer to the RAM license for pressure requirements, as applicable.	Yes		5.7
133.00	Do positive pressure environments have a minimum differential positive pressure of 0.02-inch water column between each ISO-classified area (eg, between the buffer area and ante-room)?	Yes		5.7
134.00	Is the pressure differential between the ante-room and the unclassified area no less than a positive 0.02-inch water column?	Yes		5.7
134.01	Is the buffer area, if present, positive pressure compared to the ante-room?	Yes		5.7

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
134.02	Is the ante-room, if present, positive pressure compared to unclassified portions of the restricted area?	Yes		5.7
135.00	Is the restricted area, in the presence of volatile or airborne radiopharmaceuticals, negative pressure compared to the unrestricted area?	Yes		5.7
136.00	Is the SRPA negative pressure compared to unrestricted areas in the presence of volatile or airborne radiopharmaceuticals (eg, I-131 sodium iodide and Xe-133 gas)?	N/A	There is no SRPA.	5.7
	Establishing and Maintaining Pressure Differentials:			5.7
137.00	Any time a pressure differential is required, is there a pressure monitoring device?	Yes		5.7
138.00	In a classified area, is a pressure differential monitoring system used to continuously monitor the pressure differential between the ante-room(s) and buffer area(s) and between the ante- room and the general environment outside the classified area(s) or area(s)?	Yes		5.7
139.00	Are the results from the pressure monitoring system reviewed and documented at least daily on days the area is used?	Yes		5.7
140.00	All pressure monitoring devices are tested for accuracy and required performance at least every 6 months.	Yes		5.7

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
Ambient Atmosphere for Immediate Use Preparations:				5.7
141.00	All of the following requirements met in ambient atmosphere environments:	N/A		5.7
141.01	Is non-patient care space, functionally separate (not necessarily a different area) from the patient care area, such as a radiopharmaceutical handling space, or hot lab, in a hospital, clinic, or mobile coach?	N/A		5.7
141.02	Is there a designated area for medication preparation that is clean and free from clutter?	N/A		5.7
141.03	Is it a low traffic area (ie, limited number of people going in and out or moving around the area during times that radiopharmaceutical processing is being carried out)?	N/A		5.7
SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations:				5.7
142.00	Does the SRPA with Vertical Flow ISO Class 5 PEC(s) for Radiopharmaceutical Preparations meet the following requirements?	N/A		5.7
142.01	Area surrounding the PEC may be ambient (unclassified) atmosphere.	N/A		5.7
142.02	Area is clean, uncluttered, and dedicated to the processing of radiopharmaceuticals.	N/A		5.7
142.03	Appropriate for preparation, preparation with minor deviations, repackaging, and dispensing of radiopharmaceuticals.	N/A		5.7
142.04	An area that is used to store and elute non-direct infusion radionuclide generators (eg, Tc-99m) must meet ISO Class 8 total airborne particle-count specifications.	N/A		5.7

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
149.00	Airflow testing is performed to determine acceptability of the air velocity, the air exchange rate, and area pressure cascade to ensure that air consistently flows from most to least clean areas, and that the appropriate quality of air is maintained under dynamic operating conditions.	Yes		5.7
150.00	HEPA filter integrity testing is performed (HEPA filters are leak tested after installation and as part of recertification).	Yes		5.7
151.00	Total Particle Counts testing is performed and conducted under dynamic operating conditions using calibrated electronic equipment.	Yes		5.7
152.00	Smoke Visualization Studies are performed under either simulated or dynamic operating conditions to demonstrate unidirectional airflow and sweeping action over and away from the preparation(s).	Yes		5.7
153.00	Are other equivalents for certifying the PEC performed and documented per facility SOPs, in cases where technologies exist for hot-cell and PEC configurations that are not consistent for certification by the current CETA standards?	N/A		5.7
154.00	In this case, the PEC maintains the environmental equivalent for total particle counts and the protection of the ISO Class 5 area from intrusions of lesser controlled air.	N/A		5.7
	Daily Monitoring of Environment:			5.7
155.00	The temperature and humidity is monitored in the SRPA or area containing a hot-cell, and if in a classified area the pressure is monitored, each day that radiopharmaceutical handling occurs, either manually or by a continuous recording device.	Yes	This is performed manually.	5.7
156.00	Does Monitoring include the following?	Yes		5.7
156.01	*Recommendation: Relative humidity is kept at 60% or lower*	Yes		5.7

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
156.02	Are temperature continuous readings confirmed daily to have remained within the acceptable range?	Yes		5.7
156.03	Are relative humidity continuous readings confirmed daily to have remained within the acceptable range?	Yes		5.7
156.04	Are excursion documented and, if applicable, appropriate corrective actions taken?	Yes		5.7
156.05	Are temperature monitoring devices verified for accuracy every 12 months or as required by the manufacturer?	Yes		5.7
156.06	Are monitoring of pressure differentials performed?	Yes		5.7
	Microbial Air and Surface Monitoring:			6
157.00	Has the pharmacy developed and implemented written air and surface monitoring procedures for all sterile radiopharmaceutical classified areas?	Yes		6
158.00	Are air and surface monitoring results and the corrective actions documented, and records readily retrievable as required by jurisdictional laws and regulations?	Yes		6
	General Monitoring Requirements:			6.1
159.00	Is the air and surface monitoring program clearly described in the established SOPs of the facility and include a diagram of the sampling locations, SOPs for collecting samples, frequency of sampling, size of samples (eg, surface area, volume of air), time of day of sampling in relation to activities in the classified areas, and action levels that will trigger corrective action?	Yes		6.1
159.01	Are samples obtained from locations that pose the highest possible contamination risk to the sterile radiopharmaceuticals involved with the operation's processes and are likely to be representative of the conditions throughout the area?	Yes		6.1

Verified Pharmacy Program® Inspection Form

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
160.00	Are personnel who operate the equipment trained in the proper operation of the air and surface sampling equipment to ensure accurate and reproducible sampling?	Yes		6.1
161.00	Are all air sampling devices serviced and calibrated as recommended by the manufacturer?	Yes		6.1
162.00	Does the microbiological air and surface monitoring program include viable impact volumetric airborne particulate sampling and surface sampling?	Yes		6.1
163.00	Are air and surface sampling performed initially for PECs & classified areas in a facility to establish a baseline level of environmental quality?	Yes		6.1
164.00	After initial sampling, are the PECs & classified area(s) monitored according to the minimum frequencies?	Yes		6.1
165.00	Are air and surface sampling conducted during actual or simulated dynamic operating conditions to confirm that the required environmental quality in classified areas is maintained?	Yes		6.1
166.00	Is sampling carried out at the conclusion of sterile radiopharmaceutical processing but prior to cleaning and disinfecting the surface area?	Yes		6.1
167.00	Is sampling performed in all of the following circumstances?	Yes		6.1
167.01	In conjunction with the certification of new facilities and equipment?	Yes		6.1
167.02	After any modification of facilities or equipment	Yes		6.1
167.03	In response to identified problems (eg, positive growth in sterility tests of compounded radiopharmaceuticals)?	Yes		6.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
167.04	In response to identified trends (eg, repeated positive gloved fingertip sampling results or failed media-fill testing involving more than one operator where a review of the operator technique shows no reasonable flaws in process; repeated observations of air or surface contamination)?	Yes		6.1
167.05	In response to changes that could impact the controlled area environments (eg, significant change in cleaning process or the agents involved)?	Yes		6.1
168.00	Is regular review of the sampling data performed to detect trends such as elevated levels of microbial bioburden, elevated levels of nonviable particulates, or other adverse changes within the environment?	Yes		6.1
169.00	Are results reviewed in conjunction with personnel data (ie, training records, visual observations, competency assessments) to assess the state of control and to identify potential risks of contamination?	Yes		6.1
170.00	Is Prompt corrective action in response to any adverse findings taken to maintain the necessary environmental quality for handling sterile radiopharmaceutical?	Yes		6.1
171.00	Is data also reviewed following corrective actions to confirm that the actions taken have been effective in achieving the required air and surface quality levels?	Yes		6.1
	Monitoring Air Quality for Viable Airborne Particles:			6.2
	Viable Air Sampling: Timing and Locations			6.2
172.00	Volumetric active air sampling of all classified areas (eg, ISO Class 5 PEC and ISO Class 7 and 8 areas) using an impaction device are conducted during dynamic operating or simulated operating conditions at least every 6 months.	Yes		6.2
173.00	Does viable air sampling include the following?	Yes		6.2

2166

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
173.01	Following the manufacturer's instructions for operation of the air sampling device, including placement of media?	Yes		6.2
173.02	Using the sampling device, test at least 1 cubic meter or 1000 liters of air from each location sampled?	Yes		6.2
173.03	At the end of the sampling, retrieve the media plates/devices and cover?	Yes		6.2
173.04	Inverting the media and incubate at 30°–35° C for no less than 48 hours. Examine for growth. Record the total number of discrete colonies of microorganisms on each plate as cfu/m3 of air on an environmental sampling form based on sample type (ie, viable air). Include sample location and date?	Yes		6.2
173.05	Incubates the inverted media at 20°–25° C for no less than 5 additional days? Examines the media plates for growth? Records the total number of discrete colonies of microorganisms on each plate as cfu/m3 of air on an environmental sampling form based on sample type (ie, viable air)? Includes sample location and date?	Yes		6.2
174.00	To shorten the overall incubation period, can two samples be collected for each sample location and incubated concurrently?	No	The two-sample procedure is not used.	6.2
175.00	Both samples could be TSA, or one sample could be TSA and the other fungal media [eg, malt extract agar (MEA) or sabouraud dextrose agar (SDA)]. Describe samples in notes.	N/A		6.2
176.00	Each sample is incubated in a separate incubator.	N/A		6.2
177.00	One sample is incubated at 30°–35°C for no less than 48 hours and the other sample is incubated at 20°–25° C for no less than 5 days.	N/A		6.2

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
178.00	Fungal media samples are incubated at 20°–25° C for no less than 5 days.	N/A		6.2
179.00	The count of the total number of discrete colonies of microorganisms are done on each sample and these results are recorded as cfu per sample.	N/A		6.2
180.00	Are the results of the sampling recorded on an environmental sampling form based on sample type (ie, viable air) and include the sample location, and sample date?	N/A		6.2
181.00	Are general microbiological growth medium that supports the growth of bacteria and fungi used (eg, TSA medium)?	Yes		6.2
182.00	Do CoA(s) from the manufacturer verify that the medium meets the expected growth promotion, pH, and sterilization requirements?	Yes		6.2
183.00	Are samples incubated in a temperature monitored incubator with a calibrated measuring device?	Yes		6.2
184.00	Is the incubator temperature monitored during incubation, either manually or by a continuous recording device, and the results reviewed and documented?	Yes	Monitoring is manual.	6.2
185.00	Are the incubators used for microbiological testing placed in a location outside of any classified area or SRPA and kept away from areas where compounding or sterile processing activities are carried out?	Yes		6.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Data Evaluation and Action Levels:			6.2
186.00	Air Sampling Action Levels (cfu/cubic meter (1000L) of air per plate) are within the appropriate range: *ISO Class 5 - >1* *ISO Class 7 - >10* *ISO Class 8 - >100*	Yes		6.2
187.00	Are cfu counts evaluated against the action levels and in relation to previous data to identify adverse results and/or trends?	Yes		6.2
187.01	If two pieces of media were collected at a single location, are all recovered growth documented and action levels are applied individually to each plate/device (ie, results from each cubic meter of air sampled are compared to the action level for that area)?	N/A		6.2
188.00	If levels measured during the viable air monitoring program exceed the action levels for the ISO classification levels of the area sampled, is the cause investigated, and corrective action is taken?	Yes		6.2
188.01	Is the corrective action plan dependent on the cfu count and the microorganism recovered?	Yes		6.2
188.02	If levels measured during viable air sampling exceed the levels, is an attempt made to identify any microorganism recovered to the genus level with the assistance of a qualified individual?	Yes		6.2
188.03	Is the corrective action plan documented?	Yes		6.2
188.04	*Recommendation: The extent of the investigation is consistent with the deviation and includes an evaluation of trends.*	Yes		6.2

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Monitoring Surfaces for Viable Particles:			6.3
189.00	Are all sampling sites and procedures described in the facility's SOP?	Yes		6.3
	Surface Sampling: Timing and Locations			6.3
190.00	Is surface sampling of all classified areas and all PECs conducted at least monthly for the detection of microbial contamination?	Yes		6.3
191.00	Is each classified area sampled?	Yes		6.3
192.00	Is the DPA of the PEC, and any equipment permanently contained in the PEC, sampled?	Yes		6.3
193.00	Are work surfaces in classified areas near the PEC, frequently touched surfaces in classified areas, and pass-through enclosure(s) for all classified areas evaluated to determine the locations that pose the greatest risk of harboring microbial contamination?	Yes		6.3
194.00	Is surface sampling performed at the end of the radiopharmaceutical aseptic activities or shift, but before the area has been cleaned and disinfected?	Yes		6.3
195.00	Do radiopharmaceutical personnel consider the appropriate exposure and contamination prevention measures prior to and while collecting samples?	Yes		6.3
196.00	If the worker assesses that the risk for exposure is not in conformance with ALARA safety standards, are measures taken to eliminate the risk (eg, implementation of appropriate shielding, performing the sampling at a later time or alternate day)?	Yes		6.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Sampling Procedures:			6.3
197.00	Are surface sampling devices (eg, plates, paddles, or slides) containing microbial growth media used for sampling flat surfaces?	Yes		6.3
198.00	Are CoAs from the manufacturer verified that the media meet the expected growth promotion, pH, and sterilization requirements?	Yes		6.3
199.00	Do surface sampling devices contain general microbial growth media (eg, TSA) supplemented with neutralizing additives (eg, lecithin and polysorbate 80) to neutralize the effects of any residual disinfecting agents?	Yes		6.3
200.00	If used, do contact plates have a raised convex surface?	Yes		6.3
201.00	Are sterile swabs wetted with sterile water or a sterile neutralizing buffer used when sampling irregular surfaces and difficult-to-reach locations, such as crevices, corners, and spaces between surfaces?	No		6.3
202.00	After sampling, is the sampled area thoroughly cleaned and disinfected?	Yes		6.3
203.00	Are the following procedures for surface sampling on flat surfaces used?	Yes		6.3
203.01	Remove the cover from the surface sampling device. Firmly press, using a rolling motion, if possible, the media surface onto the surface to be sampled. The surface sampling device will leave a residue of growth medium on the sample site. After sampling, use sterile 70% IPA to remove residue. Cover each surface sampling device.	Yes		6.3
203.02	If using plates, invert the plates.	Yes		6.3

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
203.03	Incubate the surface sampling devices at 30°–35° C for no less than 48 hours. Examine for growth. Record the total number of discrete colonies of microorganisms on each media device as cfu/sample on an environmental sampling form based on sample type (ie, surface). Include sample location and date.	Yes		6.3
203.04	Incubate the sampling device at 20°–25° C for no less than 5 additional days. Examine the media plates for growth. Record the total number of discrete colonies of microorganisms (cfu/sample) on the environmental sampling record based on sample type (ie, surface). Include sample location and date.	Yes		6.3
204.00	Does the facility use two samples for each sampling location?	No		6.3
204.01	Are both TSA?	N/A		6.3
204.02	Is one TSA and one Fungal?	N/A		6.3
204.03	Is each sample incubated in a separate incubator?	N/A		6.3
204.04	Is one sample media incubated at 30°–35° C for no less than 48 hours?	N/A		6.3
204.05	If fungal media are used as one of the samples, is it fungal media sample incubated the at 20°–25° C or no less than 5 days?	N/A		6.3
204.06	Are the total number of discrete colonies of microorganisms on each sample counted as cfu per sample?	N/A		6.3
204.07	Are the results of the sampling recorded?	N/A		6.3

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Cleaning and Disinfecting			7
208.00	Are all cleaning and disinfecting activities performed by trained and appropriately garbed personnel using facility approved agents and procedures described in written SOPs?	Yes		7
209.00	Is cleaning performed in the direction of most to least clean areas?	Yes		7
210.00	Are the frequency, method(s), and location(s) of cleaning, disinfecting, and sporicidal agent use established in written SOPs, in accordance with the manufacturer's instructions when available, or based on sound microbiological cleaning techniques when unavailable, and followed by all cleaning personnel?	Yes		7
210.01	Is the manufacturer's direction or published data for the minimum contact time followed for the cleaning, disinfecting, and sporicidal agents used?	Yes		7
210.02	When sterile 70% IPA is used, is it allowed to dry?	Yes		7
211.00	Are all cleaning, disinfecting, and application of sporicidal agents documented according to facility SOPs?	Yes		7
212.00	Are surfaces cleaned prior to being disinfected unless an Environmental Protection Agency (EPA)-registered (or equivalent) one-step disinfectant cleaner is used to accomplish both the cleaning and disinfection in one step?	Yes	One-step Envirocide Surface Disinfectant Cleaner is used.	7
212.01	After cleaning and disinfecting or the application of a one-step disinfectant cleaner in a PEC, is sterile 70% IPA applied to remove any residue?	Yes		7

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
213.00	Does cleaning and disinfecting surfaces occur at the minimum frequencies in Table 5 or if activities are not performed daily, cleaning and disinfecting completed before initiating activities?	Yes		7
214.00	Is the act of reducing or removing radioactivity (radioactive decontamination) from an object or surface balanced with the risk of spreading radioactive contamination?	Yes		7
214.01	*Recommendation: Areas shielded until radiation exposure levels lowered.*	Yes		7
214.02	Is this balance specified in SOPs (eg, trigger levels for safe cleaning)?	Yes		7
214.03	*Recommendation: The PEC is checked for radioactive contamination prior to cleaning and disinfecting to prevent spreading redioactive contamination in the PEC.*	Yes		7
	Minimum Frequency for Cleaning and Disinfecting Surfaces in Classified Areas and within the perimeter of the SRPA:			7
215.00	Does Cleaning of the PEC(s) and equipment inside the PEC(s) and/or PEC and the equipment inside the PEC(s) located in a hot-cell occurs in the following situations?	Yes		7
215.01	Prior to performing sterile processing of radiopharmaceuticals on each day that activities are carried out, are the walls, bars, torso shield and any exposed surface of equipment inside the PEC cleaned to the extent possible as specified by the equipment manufacturer or the assessment of a qualified individual (eg, microbiologist or industrial hygienist)?	Yes		7
215.02	Is radioactive contamination shielded with appropriate temporary material, providing the material is covered with low-lint absorbent pads or has equivalent low shedding properties?	Yes		7

218.01	Ceiling(s)	Yes		7
218.02	Wall(s), door(s), door frame(s), and other fixtures	Yes		7
218.03	Storage shelving and storage bins	Yes		7
219.00	Does Sporicidal application occurs **MONTHLY** for the following?	Yes		7
219.01	PEC(s) and equipment inside the PEC(s)	Yes		7
219.02	Surface of sink(s)	Yes		7
219.03	Hot-cells (all interior surfaces, dependent on design, equipment, and shielding present)	N/A		7
219.04	PEC and the equipment inside the PEC(s) located in a hot-cell	N/A		7
219.05	Work surface(s) outside the PEC	Yes		7
219.06	Ceiling(s)	Yes		7
219.07	Wall(s), door(s), door frame(s), and other fixtures	Yes		7
219.08	Floor(s)	Yes		7
219.09	Storage shelving and storage bins	Yes		7

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Cleaning, Disinfecting and Sporicidal Agents:		***Note to Inspector:*** *Some EPA-registered (or equivalent) one-step disinfectant cleaners may have sporicidal properties.*	7.1
220.00	Are cleaning and disinfecting agents selected and used with careful consideration of compatibilities, effectiveness, and user safety?	Yes	All agents used are determined by corporate.	7.1
221.00	Are considerations when selecting and using disinfectants include their anti-microbial activity, inactivation by organic matter, residue, shelf life, preparation requirements of the agent, and suitability for surfaces being disinfected?	Yes		7.1
221.01	After the disinfectant is applied on the surface to be disinfected, is the disinfectant allowed to dwell for the minimum contact time specified by the manufacturer, during which time the surface cannot be disturbed?	Yes		7.1
222.00	Is only sterile 70% IPA used in the ISO Class 5 PEC?	Yes		7.1
223.00	Are sporicidal agents used at least monthly on all surfaces in classified areas and SRPAs?	N/A	There is no SRPA.	7.1
	Cleaning Supplies:			7.2
224.00	Are all cleaning supplies (eg, wipers and mop heads), with the exception of tool handles and holders, low-lint?	Yes		7.2
225.00	*Recommendation: All cleaning supplies (eg, wipers and mop heads), with the exception of tool handles and holders are disposable.*	Yes		7.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
225.01	If disposable cleaning supplies are used, are they discarded after each cleaning activity?	Yes		7.2
226.00	Are reusable cleaning tools made of cleanable materials (eg, no wooden handles) and are cleaned and disinfected before and after each use?	Yes	All are stainless steel.	7.2
227.00	Are reusable cleaning tools dedicated for use in the classified areas or SRPAs and are not removed from these areas except for disposal?	yes		7.2
228.00	Are reusable cleaning tools discarded after an appropriate amount of time, to be determined based on the condition of the tools?	yes	Only handles and heads are reusable and are made of stainless steel.	7.2
229.00	*Recommendation: Cleaning supplies and solutions used in the classified areas and SRPAs are be monitored for radioactive contamination after use and prior to disposal, as per facility SOPs.*	Yes		7.2
230.00	Are cleaning supplies used in the classified areas and SRPAs disposed in a manner that minimizes the potential for dispersing particulates into the air (eg, with minimal agitation, away from work surfaces)?	Yes		7.2
	Cleaning and Disinfecting the PEC:			7.3
231.00	Is the PEC cleaned and disinfected at the minimum frequencies specified in Table 5?	Yes		7.3
232.00	If the PEC contains a removable work tray, are all sides of the work tray and the area underneath the work tray cleaned and disinfected at least monthly?	N/A	There is no removable work tray.	7.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
233.00	If necessary are all surfaces of the PEC surveyed for radioactive contamination and follow facility SOPs to decontaminate?	Yes		7.3
234.00	If necessary, any particles, debris, or residue removed with an appropriate solution (eg, Sterile Water for Injection or Sterile Water for Irrigation) using sterile, low-lint wipers?	Yes		7.3
235.00	Is a cleaning agent applied followed by a disinfecting agent or an EPA-registered (or equivalent) one-step disinfectant cleaner and ensure that the contact time specified per manufacturer instructions is achieved?	Yes		7.3
236.00	Is sterile 70% IPA applied?	Yes		7.3
237.00	Are the surfaces allowed to dry completely before beginning activities?	Yes		7.3
238.00	Is the PEC wiped with a sporicidal agent at least monthly?	Yes		7.3
	Disinfecting Supplies for Classified Areas and SRPAs:			7.4
239.00	Are shipping carton(s) or other corrugated or uncoated cardboard prohibited in the classified area (eg, clean side of ante-room) or within the perimeter of the SRPA?	Yes		7.4
240.00	Before items are introduced into a classified area or SRPA, are they wiped with a sporicidal agent, EPA-registered (or equivalent) one-step disinfectant cleaner, or sterile 70% IPA using low-lint wipers?	Yes	Oxivir 1, a disinfectant cleaner is used, followed by sterile 70% IPA.	7.4

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
241.00	After the sporicidal or sterile disinfectant is applied onto the surface, is the agent allowed to dwell on the surface for the minimum contact time specified by the manufacturer?	Yes		7.4
241.01	Is the agent used for disinfecting the packaging compatible with the packaging and not render the product label unreadable?	Yes		7.4
242.00	Are any items to be transferred into the PEC from the classified area or SRPA disinfected with a sterile disinfectant (eg, sterile 70% IPA)?	Yes		7.4
243.00	If radiopharmaceuticals are being processed by remote means in a hot-cell, the opening of sterile packages (eg, syringes, luer lock caps) may not be possible by remote means within the ISO Class 5 area.	[redacted]	N/A	7.4
243.01	In this case, are the syringes opened and appropriately labeled outside of the ISO Class 5 environment and placed in disinfected shielding, immediately prior to the forthcoming dispensing cycle?	N/A		7.4
	Disinfecting Critical Sites:			7.5
244.00	Are critical sites (eg, vial stoppers) wiped with sterile 70% IPA? Note: If the vial shield top is then closed, the septum is disinfected again with sterile 70% IPA prior to another needle puncture.	Yes		7.5
245.00	Is the critical site wiped ensuring that both chemical and mechanical actions are used to remove contaminants?	Yes		7.5
246.00	Is the sterile 70% IPA allowed to dry before piercing critical sites?	Yes		7.5
247.00	Is the septum wiped with sterile 70% IPA frequently whenever multiple punctures are occurring (eg, removing several individual doses from a multiple-dose container)?	Yes		7.5

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Cleaning and Disinfecting Items from Patient Care Area:			7.6
248.00	Is radiation shielding and equipment used in the classified area/SRPA or PEC that is exposed to patient care areas during the process of administration cleaned and disinfected before returning to any classified area (eg, buffer or ante-room) or SRPA in accordance with the Centers for Disease Control and Prevention Guidelines 1 classified as noncritical equipment requiring low-risk disinfection?	N/A	There is no patient care area.	7.6
249.00	Are syringes that have been used in a patient care area not brought back into the classified area (eg, buffer or ante-room) or SRPA for re-assaying or disposal unless the syringe is sealed inside an impervious container (eg, sealed plastic bag) that is disinfected prior to entry into the classified area or SRPA?	N/A		7.6
250.00	Is equipment that has been exposed to needles and syringes contaminated with blood-borne pathogens and RAMs considered mixed waste (eg, syringe shields and syringe carrying containers)?	N/A		7.6
250.01	Is this equipment cleaned and disinfected through actions regulated by the facility's SOPs?	N/A		7.6
250.02	Is equipment that contained or was in contact with mixed waste cleaned and disinfected with an appropriate agent(s) for blood?	N/A		7.6
	Assigning BUDs:			8
251.00	Does the pharmacy have policies and SOPs appropriate to the assignment of BUD and maintain documentation of applicable study results and calculations?	Yes	All BUDs are assigned by corporate.	8
252.00	*Recommendation: Studies of radiolabeling efficiency and radiochemical stability employ quality control (QC) testing methods described in the manufacturer's package insert, USP monographs and general chapters, or other equivalent testing methods and are sufficiently rigorous to allow statistical confidence in the results.*	Yes		8

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
253.00	Does the pharmacy have SOPs to collect and evaluate complaints associated with the use of radiopharmaceuticals having assigned BUDs?	Yes		8
254.00	*Recommendation: Policies and SOPs are also in place to reevaluate the assigned BUD based on complaints, which may include repeating studies and/or performing additional studies on radiolabeling efficiency and/or radiochemical stability.*	Yes		8
255.00	Does the individual responsible for the manipulation assign the BUD based on established testing data, either performed in-house or obtained from peer reviewed literature?	No	All BUDs are assigned by corporate.	8
256.00	Preparation Conditions for Sterile Radiopharmaceuticals: *Describe condition used at the pharmacy in notes section (Table 7).*	[redacted]	Dispensing, repackaging, preparation, preparation with minor deviations, and compounding using sterile components are completed in an ISO Class 5 PEC with an ISO Class 7 buffer room and anteroom. Radiolabeled blood components are manipulated in an ISO Class 5 BSC with an ISO Class 7 buffer room and anteroom.	8
257.00	For compounded preparations (sterile and nonsterile) plus preparations with minor deviations, is BUD dependent on maintenance of quality and purity including radiochemical purity, radionuclidic purity and other applicable parameters as specified in individual monographs or as clinically appropriate?	Yes		8
258.00	Assignment of BUD for a radiopharmaceutical considers several factors, as appropriate. Issues of concern include all but are not limited to the following:	Yes		8
259.00	*Recommendation: The assigned BUD does not exceed the sterility-related times listed in Table 7 unless a longer time is justified by Sterility tests per <71>.*	Yes		8
260.00	Radiochemical Purity - Is the assigned BUD based on stability studies in which these variables are controlled and are representative of the conditions of actual use?	Yes		8
261.00	*Recommendation: For factors that allow a range of values (eg, storage temperature, quantity of radioactivity, radioactivity concentration), studies are conducted at the extreme of the ranges.*	Yes		8

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
262.00	Radionuclidic purity - USP monographs for Tc-99m radiopharmaceuticals require that the radionuclidic impurity Mo-99 not exceed 0.15 µCi Mo-99 per mCi Tc-99m at the time of administration.	Yes		8
263.00	Are calculations of radionuclidic purity at future times necessary to ensure compliance throughout the assigned BUD?	Yes		8
264.00	Age of the generator eluate - Extension of the BUD for Tc-99m pertechnetate intended for radiolabeling of kits take into account the build-up of Tc-99 and peroxides over time.	Yes		8
265.00	Number of particles - For radiolabeled particulates, the number of particles per unit radioactivity increases over time as the radionuclide decays. Calculation of the number of MAA particles in the patient dose is conducted to ensure compliance with the prescribed particle range throughout the assigned BUD.	Yes		8
266.00	Specific Activity - For some receptor-based radiopharmaceuticals, the mass quantity may influence uptake. In such situations, the assigned BUD ensures that the patient dose contains no more than the specified mass.	Yes		8
267.00	Container Type – The assigned BUD is determined in the proper storage container.	Yes		8
268.00	*Cell Viability – Recommendation: The assigned BUD is as short as circumstances reasonably allow so as to maximize cell viability.*	yes		8
269.00	In the case of manufactured radiopharmaceuticals that are distributed to nuclear pharmacies or other healthcare facilities for terminal distribution/dispensing, the assigned BUD of the dispensed dose cannot exceed the expiration date/time of the manufactured radiopharmaceutical(s).	yes		8
270.00	In the case of radiopharmaceuticals prepared from kits, the BUD of a dispensed dose cannot exceed the assigned BUD of the finished kit preparation.	Yes		8
271.00	A radiopharmaceutical may not exceed the shortest BUD of any of its components.	Yes		8

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
Documentation:				9
272.00	Are applicable records (hard-copy or electronic), including policies and SOPs, maintained for all activities involved in repackaging, preparing, preparing with minor deviations, compounding, and dispensing radiopharmaceuticals?	Yes		9
273.00	Do such records include all but are not limited to the following?	Yes		9
273.01	Personnel training and testing including visual assessment of aseptic technique competency	Yes		9
273.02	Validation	Yes		9
273.03	Garbing	Yes		9
273.04	Hand hygiene	Yes		9
273.05	Equipment/environment cleaning and disinfecting	Yes		9
273.06	Gloved fingertip and thumb sampling	Yes		9
273.07	Media fill evaluation initially	Yes		9
273.08	Media fill follow up testing at specified intervals	Yes		9
273.09	Equipment maintenance and cleaning/disinfecting	Yes		9
273.10	End product radiochemical purity and other testing, as applicable, results of preparations, preparations with minor deviations, and compounded preparations	Yes		9
273.11	Master Formulation Record (MFR) for preparation with minor deviation(s) and compounding	Yes		9

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
276.02	Name or ID number, pharmacy, strength, purity, quality, and quantity of ingredients with validated documentation (eg, CoA)	Yes		9.1
276.03	Detailed procedure (eg, heating, components, incubation time)	Yes		9.1
276.04	Range of radioactivity	Yes		9.1
276.05	Range of volume	Yes		9.1
276.06	Equipment to be used	Yes		9.1
276.07	PEC and SEC to be used, if applicable	Yes		9.1
276.08	Quality control tests to be performed for final release of the radiopharmaceutical (eg, radiochemical purity, pH)	Yes		9.1
276.09	Procedures for depyrogenation and sterility procedures and validations, as applicable, including limits	N/A		9.1
276.10	Trained Personnel	Yes		9.1
276.11	Garbing procedure, if different than standard procedure	Yes		9.1
276.12	Container(s)	Yes		9.1
276.13	Reference source of the BUD assignment and storage conditions	Yes		9.1
	Records for Preparation with Minor Deviations/Compounding:			9.2
277.00	Does the record for preparation with minor deviation or compounding includes at a minimum, as applicable, the following?	Yes		9.2
277.01	Name of the radiopharmaceutical	Yes		9.2
277.02	Physical form (eg capsule or solution)	Yes		9.2

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
277.03	Name and quantity of ingredients including calibration time for radioactive ingredients (eg, 100 mCi Tc 99m sodium pertechnetate @ 1300)	Yes		9.2
277.04	Total volume	Yes		9.2
277.05	Reference to the MFR	Yes		9.2
277.06	Any deviation from the MFR, if applicable	Yes		9.2
277.07	Name of vendor or manufacturer, lot numbers, and expiration dates of all ingredients and components	Yes		9.2
277.08	Name of the person who prepared and name of the supervising personnel (eg, ANP)	Yes		9.2
277.09	Date and time of preparation	Yes		9.2
277.10	Assigned internal identification number (eg, lot number)	Yes		9.2
277.11	Unique reference [eg, prescription, order number(s)]	Yes		9.2
277.12	Assigned BUD and storage requirements	Yes		9.2
277.13	Documentation of QC results	Yes		9.2
	Preparation			10
278.00	The individual responsible for preparing the radiopharmaceutical(s) ensures that the final preparation complies with quality and purity specifications throughout the assigned BUD.	Yes		10
279.00	Do the quality and purity specifications include, as appropriate for the preparation, the following?	Yes		10
279.01	Radionuclidic purity	Yes		10

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
279.02	Radiochemical purity	Yes		10
279.03	Chemical purity	Yes		10
279.04	Physical and chemical properties	Yes		10
	Preparation Following Manufacturer Instructions			10.1
	Nonsterile Preparations			10.1
280.00	For nonsterile preparations, manufacturer preparation instructions are followed (eg, I-131 NaI capsules or solution), taking into account appropriate radiation safety considerations and environmental controls, if applicable (eg, negative air pressure area, chemical fume hood, activated charcoal filters when handling a potentially volatile radionuclide).	Yes		10.1
281.00	*Recommendation: The area is cleaned and uncluttered to ensure the overall integrity and quality of the prepared radiopharmaceutical(s).*	Yes		10.1
282.00	*Recommendation: There is a documented process for activities (eg, cleaning) between the preparation cycles of different nonsterile products, to decrease the likelihood of contamination from other prepared products.*	Yes		10.1
	Sterile Preparations			10.1
283.00	For sterile preparations (including intravascular devices), manufacturer preparation instructions are followed, taking into account appropriate radiation safety considerations, appropriate environmental controls, and aseptic handling practices to maintain sterility.	Yes		10.1
284.00	The minimum environmental standard for the preparation of sterile radiopharmaceuticals beyond immediate-use is within an ISO Classified area or device.	Yes		10.1

		Observations	Notes	USP Reference(s)
	Preparation with Minor Deviations			10.2
285.00	In some cases, radiopharmaceuticals are prepared with minor deviations from manufacturer instructions that are necessary to accommodate circumstances not contemplated in the FDA approved labeling.	Yes		10.2
285.01	Deviations from manufacturer preparation instructions for radiopharmaceuticals maintain the same ingredients but may differ in their proportions.	Yes		10.2
286.00	The minor deviations utilized require appropriate in-house QC testing, designed to validate the radiochemical purity of the product for the entirety of the BUD or are supported by appropriate peer-reviewed publications.	Yes		10.2
287.00	Do the pharmacy radiopharmaceutical preparations with minor deviations include all of the following when applicable?	Yes		10.2
287.01	Altering the quantity of radioactivity or volume added to the vial	Yes		10.2
287.02	Changes in step-by-step operations (eg, dilute Tc-99m sodium pertechnetate after rather than before addition to the vial)	Yes		10.2
287.03	Using alternative devices or equipment (eg, a heating block rather than a hot water bath, using a different sized needle, different shielding materials)	Yes		10.2
287.04	Using QC test methods other than those described in the product labeling (eg, radiochemical purity)	Yes		10.2
287.05	Filtering Tc-99m sulfur colloid	Yes		10.2
287.06	Other, (if so, describe in the notes)	No		10.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Preparation of Radiolabeled Blood Components		***Note to Inspector:** Handling blood and radiolabeling of blood components requires special attention to biological risks and need to be handled with standard precautions using aseptic technique to prevent the introduction of new microorganisms into the preparation that will be administered.*	10.3
288.00	The preparation BUD does not exceed 6 hours after the blood sample is obtained from the patient or blood bank.	Yes		10.3
289.00	Equipment and supplies are never shared with other activities unless they are first thoroughly cleaned and disinfected.	Yes	Equipment and supplies are never shared.	10.3
290.00	Do special precautions when radiolabeling of blood components for non-immediate use include the following?	Yes		10.3
290.01	There is complete physical separation (either fixed or non-fixed wall) of areas where blood products are handled from areas where non-blood products are handled. An ISO Class 5 BSC located in an ISO Class 7 buffer area is required for blood-labeling processes. If more than one ISO Class 5 PEC is located within the ISO Class 7 buffer area, policies and SOPs are in place to include certification that the SEC meets conditions of air quality at maximum occupancy under dynamic operating conditions.	Yes		10.3
290.02	One radiolabeling procedure per PEC at a time. Blood products from more than one patient are never manipulated at the same workstation at the same time. Each area has dedicated supplies, equipment, and waste disposal to eliminate sharing of these items or overlap in pathways.	Yes		10.3
290.03	Thorough cleaning and disinfection of the ISO Class 5 BSC and all reusable equipment within, occurs prior to starting another blood component radiolabeling procedure.	Yes		10.3
290.04	If a dedicated dose calibrator is not available, then a means of preventing the blood container(s) from contaminating the dose calibrator is used or the dose calibrator dipper and liner is cleaned and disinfected following the radioassay.	N/A	Dose calibrators are dedicated.	10.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
290.05	Centrifuge is located within the ISO Class 7 buffer area that is dedicated for blood component radiolabeling processes.	Yes		10.3
290.06	Dedicated (per each radiolabeling procedure) consumable products (eg, 0.9% sodium chloride injection, diluent, tubes, syringes, and other supplies) necessary for each individual patient radiolabeling procedure.	Yes		10.3
290.07	All tubes and syringes in contact with the patient's blood components are clearly labeled with the patient's name and at least one additional identifier (eg, date of birth, medical record number, barcode).	Yes	A patient barcode is used in addition to the name.	10.3
290.08	Dedicated syringe shields and vial shields.	Yes		10.3
290.09	Any garb that enters the ISO Class 5 BSC is removed and replaced before handling anything else not related to performing this procedure.	Yes		10.3
290.10	Removal of all disposable items from the ISO Class 5 BSC is utilized in each radiolabeling procedure.	Yes		10.3
290.11	Cleaning and disinfection of all reusable equipment and components (eg, BSC, centrifuge, dose calibrator, syringe shields, vial shields, syringe transport shields and delivery cases) is done after each radiolabeling procedure prior to any further use. Policies and SOPs address cleaning and disinfection processes including the use of an EPA-registered (or equivalent) one-step disinfectant cleaner with activity against blood-borne pathogens followed by sterile 70% IPA. Sterile 70% IPA alone is not sufficient.	Yes		10.3
290.12	After the completion of blood radiolabeling procedures, 4.5 Hand Hygiene and Garbing requirements for Buffer Areas and segregated Radiopharmaceutical Processing Area are followed.	Yes		10.3

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
Preparation of Radiolabeled Red Blood Cells for Immediate Use				10.4
291.00	Is In vitro red blood cell labeling prepared with the following conditions?	N/A	There are no immediate use radiolabeled red blood cells.	10.4
291.01	A dedicated space for blood handling is designated through the entirety of the blood radiolabeling process. This area is free from clutter and not used for any other radiopharmaceutical preparation or handling until the completion of cleaning and disinfection.	N/A		10.4
291.02	Only one radiolabeling procedure is performed at a time or there are documented processes that maintain the integrity of samples and environment.	N/A		10.4
291.03	Dedicated equipment is used for blood radiolabeling procedure (eg, L-block, syringe shield, vial shield, forceps, needle recapper).	N/A		10.4
291.04	If a dedicated dose calibrator is not available, then a means of preventing the blood container(s) from contaminating the dose calibrator or a cleaning and disinfecting procedure with an appropriate product is used to decontaminate the dipper and liner of the dose calibrator following the radioassay	N/A		10.4
291.05	A cleaning and disinfecting procedure with an appropriate agent(s) is used to decontaminate the area and equipment prior to and after the radiolabeling is complete and all disposable components have been discarded	N/A		10.4
291.06	All requirements in 4.4 Hand Hygiene and Garbing for Immediate Use Preparations are followed.	N/A		10.4
291.07	The start time of the preparation begins with the initial container puncture or the exposure of a critical site (eg, syringe tip, needle hub or needle) to ambient air, whichever is first.	N/A		10.4
291.08	The compounded product has a BUD of 1 hour	N/A		10.4

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Compounding		***Note to Inspector:*** *The combining, mixing, pooling, or otherwise altering (excluding preparation with minor deviations) of a conventionally manufactured radiopharmaceutical or synthesizing/formulating a radiopharmaceutical from bulk drug substances and radionuclides.*	11
292.00	Each compounding activity is based on a pre-established written procedure and includes maintenance of compounding records.	Yes		11
292.01	The compounding record provides traceability for components and person(s) involved.	Yes		11
293.00	All sterile compounding, using aseptic technique, is performed in an ISO 5 PEC. Compounding employees are using appropriate aseptic technique. May require inspector to garb and enter clean/buffer room. Pay attention to first air, entry and exit of materials in ISO Class 5 PEC, appropriate frequent sanitization of gloves, appropriate cleaning and cleanliness of the direct compounding area (DCA). ***When applicable, Compounding MUST be observed****, if compounding is not being performed at the time of survey mark item as "No".*	Yes		11
293.01	If compounding is not being performed at the time of survey, ask that a compounding pharmacist or technician prepare a compound for you to observe the compounding process. *If the pharmacy staff refuses or is unable to perform compounding for you to observe, document on the "**Denial of Authorization**" form. List individual who signs the Denial of Authorization.*	[redacted]	N/A	11
294.00	Compounding is not be performed for any radiopharmaceutical(s) that has been withdrawn from the market because of safety or lack of effectiveness, unless part of an institutional review board approved investigational study.	Yes		11
295.00	Radiopharmaceuticals that are essentially copies of marketed FDA-approved radiopharmaceuticals are not be compounded unless there is a change that produces a clinical difference for an identified individual patient, as determined by a prescriber.	Yes		11

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
Compounding Nonsterile Radiopharmaceuticals			***Note to Inspector:*** *Compounding nonsterile radiopharmaceuticals is the combining, mixing, diluting, pooling, reconstituting or otherwise altering a drug or bulk drug substance other than as provided by the manufacturer's package insert to create a nonsterile radiopharmaceutical.*	**11.1**
296.00	Areas designated for nonsterile compounding are cleaned, uncluttered and separated from areas designated for sterile radiopharmaceuticals.	Yes		**11.1**
297.00	*Recommendation: Compounding takes into account RAM licensing requirements for appropriate radiation safety considerations and utilize appropriate environmental controls, if applicable.*	Yes		**11.1**
298.00	The placement of equipment and materials are designed to prevent cross-contamination.	Yes		**11.1**
299.00	When feasible, disposable material is used to reduce the chance of cross-contamination.	Yes		**11.1**
300.00	Each compound has a unique MFR.	Yes		**11.1**
301.00	The preparation information is documented on a compounding record.	Yes		**11.1**
302.00	The MFR details the selection of all components.	Yes		**11.1**
303.00	**The ingredients obtained from sources in this preferential order:** FDA-approved product; FDA-registered facility; and lastly, if the ingredients for the compound are not available from either of these two sources, the MFR details the selection of a material that is suitable for the intended use.	Yes	Only FDA-approved products are used.	**11.1**
304.00	The MFR establishes the identity, strength, purity, and quality of the ingredients by validated means (eg, CoA).	Yes		**11.1**

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
305.00	Requirements for nonsterile oral meal components are limited to common food grade description and are not required to establish identity by validated means.	N/A	There are no meal components compounded.	11.1
306.00	A BUD for the compounded radiopharmaceutical is validated, taking into account the stability of the ingredients, any intermediate containers, the final container, and the storage conditions.	Yes		11.1
306.01	A BUD cannot be extended past the labeled expiration date of any component in the compound.	Yes		11.1
306.02	If the compounded radiopharmaceutical(s) includes components from other preparations or preparations with minor deviations, the BUD of the final compounded radiopharmaceutical does not exceed the shortest remaining BUD of any of those components.	N/A		11.1
	Sterile Compounding		***Note to Inspector:*** *Kit-splitting (also referred to as "fractionation") may be used to meet patient need.*	11.2
307.00	Do personnel responsible for compounding consider all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (eg, osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD?	Yes		11.2
308.00	Do the compounding activities involve the addition of a conventionally manufactured drug product (eg, Ascorbic Acid Injection, Lidocaine Hydrochloride Injection, Sodium Bicarbonate Injection) approved by the appropriate regulatory agency to a radiopharmaceutical?	Yes	Lidocaine HCl injection may be used.	11.2
309.00	Does the pharmacy split conventionally marketed kits?	No		11.2
310.00	Do personnel responsible consider all possible interactions of kit components with these other containers (eg, container walls, closures), as well as possible alterations in stability (eg, physical stability, chemical stability) that may affect radiolabeling yields or performance parameters, when determining an appropriate BUD?	Yes	Corporate assigns all BUDs.	11.2
310.01	Systematic QC testing is performed to validate the appropriateness of a particular BUD.	N/A		11.2

Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
Sterile Compounding Using Nonsterile Drug Substance or Components				**11.3**
311.00	Some sterile compounding activities involve the use of materials other than commercially marketed products, such as drug substances and/or radionuclides.	No	There is no nonsterile to sterile compounding performed.	**11.3**
311.01	If one or more materials or components are not certified to be sterile and pyrogen-free, a sterilization procedure (eg, filtration with bubble point testing) and testing described in <85> is performed. Record calibration date of the bubble test pressure gauge, as applicable.	N/A		**11.3**
312.00	The designated person for compounding is responsible for ensuring that the final preparation complies with pre-established standards or acceptance criteria for identity, quality, and purity.	N/A		**11.3**
313.00	The designated person considers all possible interactions between the components, such as altered chemical stability, radiochemical stability, solubility, or other parameters (eg, osmolality) related to changes in pH, excipients, or other factors, in determining an appropriate BUD.	N/A		**11.3**
313.01	Testing to validate the appropriateness of a particular BUD may be required.	N/A		**11.3**
314.00	If compounding involves a bulk drug substance, the radiopharmaceutical complies with standards of an applicable USP or NF monograph, if one exists, or be a component of an approved drug product.	N/A		**11.3**
314.01	A bulk drug substance includes a radionuclide, a ligand, or other substance, such as a precursor that becomes an active ingredient in the final radiopharmaceutical.	N/A		**11.3**
315.00	Each bulk drug substance is manufactured by drug establishments registered with FDA and be accompanied by a valid CoA or equivalent testing procedures.	N/A		**11.3**

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
316.00	If compounding involves excipients or other inactive ingredients, the excipients or other inactive ingredients comply with standards of an applicable USP or NF monograph, if one exists.	N/A		11.3
317.00	It is also acceptable that any excipients or other inactive ingredients be approved products, manufactured by a drug establishment registered with the FDA.	N/A		11.3
	Dispensing and Radioassay		*Note to Inspector: Dispensing refers to the manipulations necessary to transfer the prescribed or ordered amount of radiopharmaceutical into the final container (eg, syringe or vial).*	12.1
318.00	Labeling of the final patient-ready dose or ordered amount of a radiopharmaceutical is also a component of the dispensing process.	Yes		12.1
319.00	Except for an unopened manufacturer container, the final dose or ordered amount is radioassayed (ie, in a dose calibrator).	Yes		12.1
320.00	*Recommendation: The measured activity is mathematically corrected for radioactive decay to the time of scheduled administration (calibration time).*	Yes		12.1
321.00	The activity at calibration time is always be within federal, state, and local variance limits.	Yes		12.1
	Labeling			12.2
322.00	*Recommendation: All personnel distributing and/or dispensing radiopharmaceuticals verify that any labeling is in compliance with regulatory agencies.*	Yes		12.2
323.00	Is the inner container (eg syringe, vial) labeled with all of the following?	Yes		12.2
323.01	Standard radiation symbol	Yes		12.2
323.02	The words "Caution—Radioactive Material"	Yes		12.2

Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Direct Infusion Systems			12.3
325.00	Do the operations of the direct infusion systems follow the "Instructions for Use" in the device labeling?	N/A	There are no direct infusion systems.	12.3
326.00	Are each of the following parameters considered by the operator of the system?	N/A		12.3
326.01	Setup attachment or needle-puncture should be performed in a defined environment	N/A		12.3
326.02	Aseptic handling in ambient air with a maximum BUD of 10 hours is allowed for these direct infusion systems	N/A		12.3
326.03	The 0.9% sodium chloride bag attached to the device may only be punctured once and may be used for no more than 10 hours. The bag is labeled with the date and time of puncture and the BUD	N/A		12.3
326.04	Any nonsterile parts of the device that may encounter the septum of the radiopharmaceutical vial is disinfected with sterile 70% IPA prior to puncturing the vial with the needle	N/A		12.3
326.05	The septum of any vial and the ports of any diluent bag is wiped with sterile 70% IPA prior to puncturing	N/A		12.3
326.06	When puncturing the vial in ambient air, it is only punctured once	N/A		12.3
326.07	If there are problems with the infusion device, no sterile container(s) associated with the system is repunctured or transferred to a PEC for further manipulations and the container, with contents, is discarded	N/A		12.3

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Transporting Generators Between Facilities			12.4
327.00	Are the following standards followed if transporting generators between facilities?	N/A	There is no transportation of generators.	12.4
327.01	The generator needle and/or ports are capped in ISO Class 8 air or better with sterile protectors	N/A		12.4
327.02	The generator is packaged and transported in a manner to maintain the integrity and sterility of the generator system	N/A		12.4
	Repackaging			13
328.00	If the facility repackages, are the following applicable?	Yes		13
328.01	Removes conventionally manufactured radiopharmaceutical(s) from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the product.	No		13
328.02	Places the contents of multiple containers of the same finished drug product into one container, as long as the container does not include other ingredients	Yes		13
329.00	Does the facility repackage nonsterile radiopharmaceuticals (eg, I-131 sodium iodide oral capsules)?	Yes		13
330.00	Does the facility repackage sterile radiopharmaceuticals (eg, thallous chloride Tl 201 injection)?	Yes	Indium-111 DTPA may be repackaged.	13
331.00	Unopened manufacturer dosage units (eg, capsules, Xe-133 vials) are not radioassayed.	No		13

		Observations	Notes	USP Reference(s)
332.00	The repackaged radiopharmaceutical is radioassayed (ie, in a dose calibrator), if it is not an unopened manufacturer dosage unit.	Yes		13
333.00	*Recommendation: The inner container is labeled with all of the following:*	Yes		13
333.01	*Standard radiation symbol*	Yes		13
333.02	*The words "Caution—Radioactive Material"*	Yes		13
333.03	*The radionuclide and chemical form (generic name)*	Yes		13
333.04	*Radioactivity with units at time of calibration and the calibration time*	Yes		13
334.00	*Recommendation: The outer container is labeled with all of the following:*	Yes		13
334.01	*Standard radiation symbol*	Yes		13
334.02	*The words "Caution—Radioactive Material"*	Yes		13
334.03	*The radionuclide and chemical form (generic name)*	Yes		13
334.04	*Radioactivity with units at time of calibration and the calibration time*	Yes		13
334.05	*Volume, or number of units (eg, capsules), as applicable*	Yes		13
334.06	*Product expiration or BUD, as applicable*	Yes		13
334.07	*Special storage and handling instructions*	Yes		13

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Quality Assurance and Quality Control			14
335.00	QA and QC programs are formally established and documented in SOPs that ensure that all aspects of the handling of radiopharmaceuticals are conducted in accordance with this chapter and applicable federal, state, and local laws and regulations.	Yes		14
336.00	A designated person ensures that the facility has formal, written QA and QC programs. *List this person in the notes.*	Yes	Janice Swett, a staff pharmacist, is the lead person for QA and QC and reports to Otha Bright, the designated person and PIC.	14
337.00	Do QA and QC programs establish a system which include of all of the following?	Yes		14
337.01	Adherence to procedures	Yes		14
337.02	Prevention and detection of errors and other quality problems	Yes		14
337.03	Evaluation of complaints and adverse events	Yes		14
337.05	Appropriate investigations and corrective actions	Yes		14
338.00	The SOPs describe the roles, duties, and training of the personnel responsible for each aspect of the QA program.	Yes		14
339.00	The overall QA and QC program is reviewed at least once every 12 months by the designated person. *List last date of review in notes.*	No	The PIC stated he reviews the QA and QC program monthly but was not able to find the last review.	14
340.00	The results of the review are documented, and appropriate corrective action taken, if needed.	No	The PIC stated that the program is reviewed monthly but there has been no documentation of the review.	14

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Notification About and Recall of Out-of-Specification Dispensed Radiopharmaceuticals			14.1
341.00	If a radiopharmaceutical is dispensed or administered before the results of release testing are known, does the facility have all of the following SOPs in place?	N/A	Radionuclidic potency and purity testing are performed before release. There is no other testing required.	14.1
341.01	Immediately notify the prescriber of a failure of specifications with the potential to cause patient harm (eg, sterility, strength, purity, bacterial endotoxin, or other quality attributes)	N/A		14.1
341.02	Determine whether a recall is necessary	N/A		14.1
342.00	Does the SOP for recall of out-of-specification dispensed radiopharmaceuticals contain all of the following procedures?	Yes		14.1
342.01	Determine the severity of the problem and the urgency for the implementation and completion of the recall	Yes		14.1
342.02	Determine the distribution of any affected radiopharmaceutical, including the date and quantity	Yes		14.1
342.03	Identify patients who have received the radiopharmaceutical	Yes		14.1
342.04	Outline the disposition and reconciliation of the recalled radiopharmaceutical	Yes		14.1
343.00	Does the facility document the implementation of the recall procedures?	Yes		14.1
344.00	Is the recall is reported to appropriate regulatory bodies as required by laws and regulations of the applicable regulatory jurisdiction (eg, state board of pharmacy, state health department)?	Yes		14.1

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
	Complaint Handling			14.2
345.00	Has the nuclear pharmacy developed and implemented SOPs for handling complaints? Note: Complaints may include concerns or reports on the quality and container labeling of, or possible adverse reactions to, a specific radiopharmaceutical.	Yes		14.2
346.00	Does the designated person review all complaints to determine if they indicate potential quality problems with the radiopharmaceutical?	Yes		14.2
346.01	If a complaint indicates potential quality issues with radiopharmaceuticals, is an investigation into the potential cause of the issue completed?	Yes		14.2
346.02	Does the investigation consider whether the quality problem could extend to other radiopharmaceuticals?	Yes		14.2
346.03	Is corrective action, if necessary, implemented for all potentially affected radiopharmaceuticals?	Yes		14.2
346.04	Does the investigation consider whether to initiate a recall of potentially affected radiopharmaceuticals and whether to cease sterile compounding until all underlying problems have been identified and corrected?	Yes		14.2
347.00	Is a readily retrievable record (written or electronic) of each complaint kept by the facility, regardless of the source of the complaint (eg, e-mail, telephone, mail)?	Yes	Records of complaints are maintained electronically.	14.2
348.00	Does the record contain all of the following?	Yes		14.2
348.01	The name of the complainant	Yes		14.2
348.02	The date the complaint was received	Yes		14.2
348.03	The nature of the complaint	Yes		14.2
348.04	The response to the complaint	Yes		14.2

Nuclear Pharmacy Inspection

The information and comments obtained are based on USP General Chapter <825>
Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

Facility Name: RLS (USA) Inc.
e-Profile ID: 1803196
Inspection Date: 04/29/2024 & 05/02/2024

		Observations	Notes	USP Reference(s)
348.05	If known, the name and strength of the radiopharmaceutical and the assigned internal identification number (eg, prescription, order, or lot number).	Yes		14.2
349.00	Does the record also include the findings of any investigation and any follow-up?	Yes		14.2
350.00	Are records of complaints easily retrievable for review and evaluation for possible trends?	Yes		14.2
351.00	Are records retained in accordance with the record keeping requirements?	Yes		14.2
352.00	Is a radiopharmaceutical that is returned in connection with a complaint quarantined until it is destroyed after completion of the investigation and in accordance with applicable jurisdictional laws and regulations?	Yes		14.2
	Adverse Event Reporting			14.3
353.00	Are adverse events potentially associated with the quality of radiopharmaceuticals reported in accordance with the facility's SOPs and all applicable jurisdictional laws and regulations?	Yes		14.3
354.00	*Recommendation: Adverse events potentially associated with the quality of the radiopharmaceutical preparation are reported to the applicable jurisdictional regulatory body (eg, state boards of pharmacy, state health departments, FDA's MedWatch program for human drugs).*	Yes		14.3

The information and comments obtained are based on USP General Chapter <825> Nuclear/Radiopharmaceuticals Preparation, Compounding, Dispensing and Repackaging

An inspection against current Good Manufacturing Practices (cGMPs) was not conducted. There may be some overlap in concepts.

Acronym	Definition
ACPH	Air changes per hour
ALARA	As low as reasonably achievable
ANDA	Abbreviated new drug application
ANP	Authorized nuclear pharmacist
AU	Authorized user
BLA	Biologics license application
BSC	Biological safety cabinet
BUD	Beyond-use date
CETA	Controlled Environment Testing Association
cfu	Colony-forming unit
CoA	Certificate of analysis
DPA	Direct processing area
EPA	Environmental Protection Agency
FDA	Food and Drug Administration
FDCA	Food, Drug, and Cosmetic Act
HEPA	High-efficiency particulate air
HVAC	Heating, ventilation, and air conditioning
IND	Investigational new drug
IPA	Isopropyl alcohol
ISO	International Organization for Standardization
LAFW	Laminar airflow workbench
MAA	Macroaggregated albumin
MEA	Malt extract agar
MFR	Master Formulation Record
NDA	New drug application
NRC	Nuclear Regulatory Commission
PEC	Primary engineering control
PET	Positron emission tomography
RAM	Radioactive material
RDRC	Radioactive drug research committee
RH	Relative humidity
SDA	Sabouraud dextrose agar
SEC	Secondary engineering control
SOP	Standard operating procedure
SRPA	Segregated radiopharmaceutical processing area
TSA	Trypticase soy agar

Term	Definition
Dispense/dispensing	Pursuant to a patient specific prescription, labeled with patient name at the pharmacy
Distribute/distributing	Delivered/sent to a practitioner or health care facility for office use or further dispensing, no prescription, not labeled with a patient name at the pharmacy.
Type of Practice: Central Fill/Processing/ Shared Services	Where part of the prescription processing and dispensing process occurs at another location
Type of Practice: Closed Door	Such as a mail order facility, prescriptions cannot be picked up at the facility, all are sent
Type of Practice: HMO/PBM only	Limited to only the beneficiaries of the specific insurance program - no cash patients
Type of Practice: Institutional	Such as a hospital or jail
Type of Practice: Internet Pharmacy	Pharmacy advertises on the internet, patients fill/refill prescriptions and revise patient profile information on-line.

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Type of Practice: Investigational Drugs, Clinical Trials or Research	Approved to handle investigational drugs
Type of Practice: Long Term Care	Nursing Home pharmacy
Type of Practice: Manufacturer	Registered with the FDA as a manufacturer
Type of Practice: Open to the Public	Patients are able to come into the pharmacy to pick up filled prescriptions and interact with a pharmacist
Type of Practice: Outsourcing Facility	Registered with the FDA as an Outsourcing Facility
Type of Practice: Provides Office Use	Distributes prescription and/or compounded preparations to providers for administration or resale. No prescription, not labeled with a patient name by the pharmacy.
Type of Practice: Specialty Pharmacy	Business is primarily with specialty drugs and works with specific disease states
Type of Practice: Telepharmacy	Pharmacy oversees a remote location staffed by a technician supervised via audio/visual system by a pharmacist at this facility.
Type of Practice: Traditional retail	Also known as Community Pharmacy.
Type of Practice: Veterinary Pharmacy	Pharmacy business is primarily or exclusively for animals.
Type of Practice: Wholesale Distributor	Pharmacy is licensed or registered as a wholesale distributor

Glossary

Administration:	The direct and immediate application of a radiopharmaceutical to a patient by injecting, infusing, ingesting, or otherwise providing a radiopharmaceutical in its final form.
Airlock:	A space with interlocked doors, constructed to maintain air pressure control when items move between two adjoining areas.
Ante-room:	An ISO Class 8 or cleaner area with fixed walls and doors where personnel hand hygiene, garbing procedures, and other activities that generate high particulate levels are performed. The ante-room is the transition area between the unclassified area in a facility and the classified buffer area.
Aseptic processing or preparation:	A process by which separate, sterile components (eg, drugs, containers, or closures) are brought together under conditions that maintain their sterility.
Aseptic technique:	Methods utilized during the processing of radiopharmaceuticals to keep objects and areas free of microorganisms and thereby minimize infection risk to the patient. It is accomplished through practices that maintain the microbe count at a nearly irreducible number.
As low as (is) reasonably achievable (ALARA):	The effort to maintain exposures to ionizing radiation as far below the dose limits as practical. These efforts should be consistent with the purpose for which the licensed activity is undertaken, in relation to utilization of licensed materials in the public interest. Limiting exposure time, using adequate shielding, and maintaining the most distance possible from all radioactive sources (i.e., time, distance, shielding) are the basic principles for successfully following ALARA guidelines.
Authorized nuclear pharmacist (ANP):	A pharmacist recognized by the U.S. Nuclear Regulatory Commission or an Agreement State agency as having met training and experience requirements for the practice of nuclear pharmacy.
Authorized user (AU):	A physician recognized by the U.S. Nuclear Regulatory Commission or an Agreement State agency as meeting training and experience requirements for specified medical uses of radioactive material.
Beyond-use date (BUD):	The assigned date and time beyond which the radiopharmaceutical must not be administered.
Biological safety cabinet (BSC) Class II:	A ventilated cabinet with an open front and inward and downward unidirectional HEPA-filtered airflow and HEPA-filtered exhaust. The BSC is designed to provide worker protection from exposure to biohazardous material and to provide an ISO Class 5 or better environment for preparing sterile radiopharmaceuticals.
Blood components:	Any constituent of blood that is separated by physical or mechanical means (eg, red cells, white cells, platelets)
Buffer area:	An ISO Class 8 or cleaner area with fixed walls and doors where PEC(s) that generate and maintain an ISO Class 5 environment are physically located. The buffer area may only be accessed through the ante-room.
Chemical purity:	The fraction of the total chemical species present in the radiopharmaceutical as the specified chemical component(s). A chemical impurity is the presence of an unwanted non-radioactive chemical.
Classified area:	An area that maintains an air quality classification based on the ISO guidelines (i.e., ante-room, buffer area). See ISO class.
Cleaning agent:	A material for the removal of residues (eg, dirt, debris, microbes, and residual drugs or chemicals) from surfaces.
Compounding:	The combining, mixing, pooling, or otherwise altering (excluding preparation with minor deviations) of a conventionally manufactured radiopharmaceutical or synthesizing/formulating a radiopharmaceutical from bulk drug substances and radionuclides. See Preparation with minor deviations.
Container–closure system:	The packaging components that contain or come in contact with the radiopharmaceutical and maintain the integrity of the radiopharmaceutical contained within. Examples include (but are not limited to) vials, tubes and syringes.

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Critical site:	A location that includes any component or fluid pathway surface (eg, vial septa, injection ports) or openings (eg, needle hubs) that, when exposed is at risk for contamination by direct contact with air (eg, ambient area or HEPA-filtered), moisture (eg, oral and mucosal secretions), or touch.
Designated person:	One or more individuals assigned to be responsible and accountable for the performance and operation of the radiopharmaceutical processing facility and for personnel who prepare, compound, dispense, and repackage radiopharmaceuticals.
Direct infusion system:	An FDA-cleared medical device used to dispense and/or administer radiopharmaceuticals to multiple patients. The standards of this chapter pertain to devices with ambient air that lack and ISO Class 5 environment.
Direct processing area (DPA):	An area within the ISO Class 5 PEC where critical sites are exposed to unidirectional HEPA-filtered air, also known as first air.
Disinfectant:	A chemical or physical agent used on inanimate surfaces and objects to destroy microbiological contamination (eg, fungi, viruses, and bacteria) when used in the appropriate concentrations and for the appropriate contact times. Sporicidal disinfectant agents are considered a special class of disinfectants that also are effective against bacterial endospores and fungal spores.
Dispensing:	The manipulation or labeling of a radiopharmaceutical to render it in its final form for administration, typically obtained from a single-dose or multiple-dose container (eg, withdrawing a volume of finished product or preparation from a vial into a syringe). Dispensing is performed under the supervision of a physician or pharmacist and for radiopharmaceuticals includes dilution with an appropriate diluent or adjusting the activity in an individual dosage.
Dose pooling:	The combining of doses from two or more syringes to meet one patient's need, also see "repackaging".
Dose splitting:	The splitting of a patient-ready unit dose for use with more than one patient.
Dynamic operating conditions:	Conditions in the SRPA or classified area in which operating personnel are present and performing actual or simulated activities. The PEC should contain equipment and materials regularly used for radiopharmaceutical processing (eg, low-lint absorbent pads, dose calibrator, syringe shields).
Expiration date:	For conventionally manufactured radiopharmaceuticals, the specified date (and time) beyond which the product must not be administered. The expiration date is determined by the manufacturer.
First air:	The air exiting the HEPA filter in a unidirectional air stream.
Garb:	Gloves, gowns, shoe covers, head (covers ears and all hair) and facial hair covers, masks, and other items designed to reduce particle shedding from personnel and minimize the risk of microbiological contamination to radiopharmaceuticals.
High efficiency particulate air (HEPA) filtration:	Using a tested and certified air filter designed to remove 99.97% of airborne particles measuring 0.3-micron or greater in diameter from the air passing through it.
Hot-cell:	A device used for the shielding and containment of radioactive materials. The shielding material(s) (eg, lead) is generally incorporated into the structure of the unit itself. Radiopharmaceutical personnel carry out the majority of the tasks within the hot-cell from the exterior of the unit. This is accomplished by the use of remote manipulation systems (eg, manipulator arms, automated dispensing system) of various designs. Numerous air quality configurations of the hot-cell may exist, including integrated HEPA filtration systems to render all or a specified portion (DPA) of the device capable of certifying to a controlled ISO Class 5 environment. In other situations, the hot-cell offers only radiation protection and a laminar flow PEC, capable of achieving an ISO Class 5 environment, is placed within the enclosure to allow for safe aseptic manipulations. A hot-cell may also be referred to by other designations (eg, shielded isolator with laminar flow, PET dispensing station, manipulator hot-cell, shielded isolators for dispensing, radiopharmaceutical dispensing isolator).
Hot lab:	Unclassified radiopharmaceutical processing area located within a hospital or clinical site that is only appropriate for immediate use radiopharmaceuticals if there is not an ISO 5 PEC within SRPA located within the area.
Immediate use:	A preparation (including preparations with minor deviations) and/or dispensing of a sterile radiopharmaceutical that is limited for a single patient. Only sterile conventionally manufactured drug products (eg, NDA, ANDA) or drugs produced under an approved IND or RDRC protocol may be used. Administration must begin within 1 hour of the first container puncture or exposure of any critical site involved (eg, syringe tip, needle hub or needle) to ambient air, whichever is first.
Individual dose (unit dose):	A radiopharmaceutical in its final form ready for administration (eg, capsule, sterile solution in a syringe) consisting of the amount (dose) prescribed, ordered, or other intended for an individual patient or research subject.
Inverse square law:	The specified physical quantity or intensity of a radiation emission is inversely proportional to the square of the distance from the source of the emission.
ISO class:	A quality classification from the International Organization for Standardization based on quantity and size of particles per volume of air.
Kit:	Conventionally manufactured package containing all ingredients required to prepare a radiopharmaceutical with the exception of the radionuclide.

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Kit-splitting (fractionation):	The act of dividing the contents of a kit vial and transferring aliquots into other containers for storage and subsequent radiolabeling.
Ligand:	An ion or molecule that incorporates a metal atom to form a coordination complex.
Line of demarcation:	A visible line on the floor that separates the clean and less clean sides of the ante-room.
Low-lint wiper:	A wiper exhibiting few, if any, fibers or other particulates, visible without magnification, which are separate from, or easily removed from, the wiper material in a dry condition.
Master Formulation Record (MFR):	A document or set of documents specifying the starting materials with their quantities and the packaging materials, together with a description of the procedures and precautions required to produce a specified quantity of a finished preparations as well as the processing instructions, including the in-process controls.
Media-fill test:	A simulation used to qualify processes and personnel engaged in sterile radiopharmaceutical processing to ensure that the processes and personnel are able to prepare radiopharmaceuticals without microbiological contamination. Molar mass: The measured mass that is attained from a molar amount of a given substance (eg, element, compound).
Molar mass:	The measured mass that is attained from a molar amount of a given substance (eg, element, compound). It is generally expressed with units such as g/mol and kg/mol.
Multiple-dose container:	A container of a radiopharmaceutical for administration that is designed to contain more than one patient dose of the radiopharmaceutical.
Negative-pressure area:	An area that is maintained at lower pressure than the adjacent spaces, and therefore the net airflow is into the area. This area is appropriate for volatile or gaseous radionuclides and radiopharmaceuticals (eg, I-131 NaI, N-13 ammonia) and intended to lend a measure of protection for the radiation workers and the general public.
One-step disinfectant cleaner:	A product with an EPA-registered claim (or equivalent) that it can clean and disinfect a nonporous surface in the presence of light to moderate organic soiling without a separate cleaning step.
Pass-through:	An enclosure with sealed doors on both sides to ensure that both doors are not opened at the same time. The pass-through is positioned between two spaces creating an airlock for the purpose of minimizing particulate transfer while moving materials from one space to another.
Perimeter:	A visible demarcation on the floor that defines the boundaries of the SRPA.
Positive-pressure area:	An area that is maintained at higher pressure than the adjacent spaces, and therefore the net airflow is out of the area.
Preparation:	The act of combining a conventionally manufactured kit with a conventionally manufactured radionuclide following manufacturer's recommended instructions. Mixing, reconstituting, combining, diluting, or repackaging of a radiopharmaceutical, or other such acts, performed in accordance with directions contained in the FDA-approved labeling.
Preparation with minor deviations:	The act of preparing a conventionally manufactured kit with a conventionally manufactured radionuclide with volume, and/or radioactivity, and/or step-by-step deviations from the manufacturers recommended labeling while ensuring that the final preparation maintains appropriate radiochemical and radionuclidic purity for the entirety of the BUD. Examples of minor deviations include, but are not limited to, altering the amount of activity or volume added to the vial, changes in step-by-step operations (eg, dilute Tc-99m solution after, rather than before, addition to the vial, use of a venting needle or filter), using alternative devices or equipment (eg, a heating block rather than a hot water bath), and using alternative radiochemical purity testing methods.
Primary engineering control (PEC):	A device or zone that provides an ISO Class 5 air quality environment for sterile processing.
Pyrogen:	A substance that induces a febrile reaction in a patient.
Quality assurance (QA):	The system of procedures, activities, and oversight that ensures that radiopharmaceutical processing consistently meets quality standards.
Quality control (QC):	The sampling, testing, and documentation of results that, taken together, ensure that specifications have been met before release of the radiopharmaceutical.
Radioactive materials (RAM) license:	A document(s) issued by the US NRC or an Agreement State agency that authorizes various activities involving the use of radioactive materials. These uses can include possession, research and development, distribution, medical use, and other purposes not included in this list. Only those activities specifically authorized are allowed.
Radioassay:	Measurement of the quantity of radioactivity present in a container using a suitable and calibrated instrument, such as a well-type ionization chamber (i.e., dose calibrator).
Radiochemical purity:	The ratio, expressed as a percentage, of the radioactivity of the intended active radiopharmaceutical ingredient to the total radioactivity of all radioactive ingredients and impurities present in the radiopharmaceutical preparation (see Radioactivity <821>).
Radionuclidic purity:	The ratio, expressed as a percentage, of the radioactivity of the intended radionuclide to the total radioactivity of all radionuclides in the radiopharmaceutical preparation (see <821>).

Copyright © March 2024 National Association of Boards of Pharmacy® (NABP®). All rights reserved. NABP developed this inspection form for sole use by NABP, boards of pharmacy, government agencies that regulate drug distributors, and for internal use by the named facility participating in the VPP. Disclosure of this form to a third party or use of the form by a third party is strictly prohibited without NABP's prior written authorization.

Radiopharmaceutical (radiopharmaceutical preparation/radioactive drug):	(See <821>.) A finished dosage form that contains a radioactive substance in association with one or more other ingredients and that is intended to diagnose, stage a disease, monitor treatment, or provide therapy. A radiopharmaceutical includes any non-radioactive reagent kit or radionuclide generator that is intended to be used in the preparation of any such substance. The terms "radiopharmaceutical" and "radioactive drug" are commonly used interchangeably.
Repackaging:	The act of removing a conventionally manufactured radiopharmaceutical from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the product. Repackaging also includes the act of placing the contents of multiple containers (eg, vials) of the same finished drug product into one container, as long as the container does not include other ingredients. Radiopharmaceutical manipulation in any other way, including reconstitution, dilution, mixing, or combination with another ingredient, is not considered repackaging.
Restricted area:	Any area to which access is controlled for the protection of individuals from exposures to radiation and radioactive materials.
Secondary engineering control (SEC):	The area where the PEC is placed (eg, a classified area or an SRPA). It incorporates specific design and operational parameters required to minimize the risk of microbial contamination.
Segregated radiopharmaceutical processing area (SRPA):	A designated, unclassified space, area, or room with a defined (by facility procedures) perimeter that contains a PEC. An SRPA is only suitable for radiopharmaceutical preparation (with and without minor deviations), dispensing, and repackaging. If the SRPA is used to elute radionuclide generators it must have ISO Class 8 particle count non-viable particle count air quality.
Shielding:	Barriers of appropriate radiation attenuating material, used for radiopharmaceuticals, to protect the personnel. These barriers can be general in nature (eg, L-block, hot-cell), as to afford protection from a radiation field, or specific to a container used to hold a particular radiopharmaceutical (eg, syringe shield, vial shields, "pigs").
Single-dose container:	A container of a radiopharmaceutical for administration that is designed for use with a single patient as a single administration.
Specific activity:	The radioactivity of a radionuclide per unit mass of the compound involved with the radionuclide (see Radioactivity—Theory and Practice <821>). The units of specific activity involve those for the activity (eg, mCi, MBq, Ci, GBq)and those for the unit of mass (eg, µg, mmol)
Sporicidal agent:	A chemical or physical agent that destroys bacterial and fungal spores when used in sufficient concentration for a specified contact time. It is expected to kill all vegetative microorganisms.
Start of preparation:	Time at which a vial septum is punctured or a component container is opened (eg, removal of cap on a pre-filled syringe), whichever comes first.
Sterility:	The absence of viable microorganisms.
Strength:	The radioactivity concentration of the radiopharmaceutical at the calibration time (see <821>). Strength is expressed as the quantity of radioactivity on a volume basis (eg, mCi/mL or MBq/mL).
Unclassified space:	A space not required to meet any ISO air cleanliness classification.
Unrestricted area:	An area in which a person should not be exposed to radiation levels in excess of 2 millirems in any 1 h from external sources.
Use-by time:	For radiopharmaceuticals prepared from kits, the time period after preparation during which the radiopharmaceutical should be used or administered, as suggested or stated in the manufacturer's prescribing information.

Pharmacy Name:	RLS (USA) Inc.
Pharmacy Address:	945 N. Edgewood Ave., Suite A-1, Wood Dale IL 60191

Clarification or Further Explanation	30 of 96	59.01	RLS (USA) Inc. SOP 6.2.2 Aseptic Technique and Preparation requires disinfection of gloves by spraying with sterile 70% IPA prior to reentinering a PEC after touching non-sterile surfaces such as pens and paper. All pharmacists and technicians have been retrained on this procedure and training documentation is on file.	6/15/2024	Y	SOP 6.2.2 Aseptic Technique and Preparation
Clarification or Further Explanation	88 of 96	339.00	RLS (USA) Inc. SOP 4.4.4 Self-Inspections and Program Reviews requires site self-inspections and program reviews of the QA/QC, Radiation Safety, and Environmental Health and Safety programs on a routine basis. Completion of the QA Program review was last documented for this facility on 6/12/2023. However, site personnel were unable to locate the program review at the time of the inspection. A review of the location of the documentation associated with the site self-inspections and program reviews has been conducted to ensure all applicable staff are aware of the document location during an inspection. Documentation of this training is on file.	6/15/2024	Y	SOP 4.4.4 Self-Inspections and Program Reviews
Clarification or Further Explanation	88 of 96	340.00	RLS (USA) Inc. SOP 4.4.4 Self-Inspections and Program Reviews requires site self-inspections and program reviews of the QA/QC, Radiation Safety, and Environmental Health and Safety programs on a routine basis. This SOP also requries non-conformances are investigated, and CAPAs (if any are identified) are implen..nted to prevent reoccurance. Documentation of these inspections and program reviews including corrective actions taken to any identified non-conformances are maintained in the Joint Commission Tracers with AMP® tool. Completion of the QA Program review was last documented on 6/12/2023 and is readily available to all personnel. A review of the location of the documentation associated with the site self-inspections and program reviews shall be conducted to ensure all applicable staff are aware of the document location during an inspection. Documentation of this training is on file.	6/15/2024	Y	Joint Commission Resources Tracer Observation Detail Report

Tracer Observation Detail Report

Quality Lead- Quarterly QA Program Review

05/23/2024 12:51 PM

Site: 535863 RLS (USA) Inc.

Program: Home Care

*Compliance percentage and totals display data from all questions in the observation.

100.0%

Total Numerator : 53 **Total Denominator : 53** **Not Applicable Count : 0** **Total Question Count : 53**

Observation Header

Tracer Instructions: Review site quality program compliance on a quarterly basis. Reviews are due by the last day of each month following the calendar quarter. Corrective actions to non-compliant findings which do not require an investigation shall be documented by assigning as associated task in this tool. Findings requiring investigations to determine cause and implement effective corrective actions shall be entered into the SAP system for proper documentation and tracking to closure.	
Observation Title: Quality Lead- Quarterly QA Program Review - Janice, Swett - 06/12/2023 10:23.740 AM	
Observation Status: Complete	**Regions:** West
Observation Date: 05/31/2023	**Department:** Wood Dale, IL
Total Completed Observations: 1	**Staff Interviewed:**
Survey Team:	**Unique Identifier:**
Medical Staff:	**Equipment Observed:**
Location:	**Contracted Service:**
Note:	

Questions (* = Required)

Cleaning/Maintenance and Infection Control

1.* Monthly quality self-inspection results been reviewed, corrective actions taken if required and corrective actions are appropriate and effective. ☐ N/A

Instructions: Review the monthly quality self-inspections for your facility to confirm compliance.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

2.* If the facility uses a third party vendor for cleaning the clean room, have all scheduled cleanings been completed per SOP, within the required time frame and documentation is clearly written and complete? ☐ N/A

Instructions: Review third party vendor clean room cleaning records for period under review, sign and date when review is completed. Confirm that the vendor has completed all scheduled cleanings on time (monthly cleaning every 30 days), appropriate cleaning agents are used per SOP and all records are complete, accurate, clearly written, signed as required and good documentation practices are followed.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

3.* Have all Clean Room equipment and environment filters been replaced or inspected as required by SOP and is proper documentation maintained? ☐ N/A

Instructions: Review Form 111 Filter Maintenance Record for timely completion of tasks required and proper documentation. LFH pre-filters are to be changed bi-annually unless otherwise required by local regulations, cart pass-thru filters are changed quarterly, air return filters (low wall air returns in clean rooms) are deep cleaned bi-annually.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 1 - The organization performs routine and preventive maintenance on medical equipment used by staff in the provision of care, treatment, or services at defined intervals and according to the manufacturers' guidelines. The organization documents the performance of these checks. Note: If the manufacturer does not have guidelines for routine and/or preventive maintenance, the organization establishes such guidelines. For example, the organization may choose to have discussions with the manufacturer, observe its own failure rates for the equipment, examine maintenance schedules of like products, or use any other method that is effective.

4.* Has quarterly HVAC service been completed as required by SOP and is Form 112 Maintenance Checklist on file? ☐ N/A

Instructions: Review HVAC maintenance records on file. Confirm that service is completed during each quarter, annual maintenance service schedule is completed once per year and service provider is completing Form 112 for each service.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 1 - The organization performs routine and preventive maintenance on medical equipment used by staff in the provision of care, treatment, or services at defined intervals and according to the manufacturers' guidelines. The organization documents the performance of these checks. Note: If the manufacturer does not have guidelines for routine and/or preventive maintenance, the organization establishes such guidelines. For example, the organization may choose to have discussions with the manufacturer, observe its own failure rates for the equipment, examine maintenance schedules of like products, or use any other method that is effective.
EQ.02.01.01 EP 2 - The organization performs basic safety and operational checks on medical equipment used by staff in the provision of care, treatment, or services, according to organization policy and the manufacturers' guidelines. The organization documents the performance of these checks.

5.* Have all laminar flow hoods LFH and biological safety cabinet BSC disinfection procedures been properly completed as required and documented accordingly? ☐ N/A

Instructions: Review Form 25 LFH and BSC disinfection logs for period under review. Confirm that all units were cleaned each day of use and frequency is appropriate as required by SOP and local regulations. Confirm an "A" agent for used daily, all entries are clearly written and good documentation practices are followed. Confirm that deep clean is performed at required frequency.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

6.* Aseptic processing areas are clean and uncluttered. All clean rooms have been cleaned each day of use as required by SOP and documented properly on Form 76. Monthly cleaning tasks performed timely and documented properly. ☐ N/A

Instructions: Review cleaning logs for period under review, sign and date when review is completed. Confirm that rooms were cleaned each day of use and monthly cleaning is performed. Confirm all documentation entries are complete and clearly written. Good documentation practices are followed.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

EQ.02.01.01 EP 1 - The organization performs routine and preventive maintenance on medical equipment used by staff in the provision of care, treatment, or services at defined intervals and according to the manufacturers' guidelines. The organization documents the performance of these checks. Note: If the manufacturer does not have guidelines for routine and/or preventive maintenance, the organization establishes such guidelines. For example, the organization may choose to have discussions with the manufacturer, observe its own failure rates for the equipment, examine maintenance schedules of like products, or use any other method that is effective.
MM.05.01.07 EP 2 - Staff use clean or sterile techniques and maintain clean, uncluttered, and functionally separate areas for product preparation to avoid contamination of medications.

7.* Are ISO classified areas in good condition, no signs of wear, or deterioration? ☐ N/A

Instructions: Look through the clean room areas, looking for broken parts, breaks/tears/bubbling flooring, loss/deterioration of caulk, paint chips, buildup of cleaning agents, etc.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

8.* Has the restricted area been properly cleaned and maintained to aid in the control of the clean room environment? ☐ N/A

Instructions: Confirm maintenance is appropriate by observation of the restricted area for clutter and accumulation of dust/debris especially near the outer perimeter of the clean room. Documentation is not required.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

9.* Is storage of supplies in the clean room kept to a minimum, racks clean and neatly organized and opened syringes kept to 24 hour supply? ☐ N/A

Instructions: Visually observe the storage of supplies in the clean room. Confirm that supplies kept to a minimum and stored in containers that are easily cleanable when possible. No excessive supplies are stored in any area and the areas immediately surrounding the laminar flow hoods are clear of storage racks.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

10.* Hand hygiene practices follow the current World Health Organization (WHO) hand hygiene guidelines. (See also IC.01.04.01, EP 5) ☐ N/A

Instructions: Verify that a legible copy of the WHO hand hygiene poster is posted at the hand hygiene sink.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

NPSG.07.01.01 EP 1 - Implement a program that follows categories IA, IB, and IC of either the current Centers for Disease Control and Prevention (CDC) and/or the current World Health Organization (WHO) hand hygiene guidelines. (See also IC.01.04.01, EP 5)

11.* Verify hand hygiene compliance tracking has been completed each January and July using Form 141 and were compliance goals met during these observations? (See also IC.03.01.01, EP 3) ☐ N/A

Instructions: Minimum acceptable overall or individual compliance goal is 80%. If less than 80% compliance was observed was the individual or entire staff re-trained and re-observed? Were the most recent observation compliance rates compared with the previous tracker? Was an improvement goal of +2% or more observed for overall facility compliance from the previous tracker until ultimate goal of 100% compliance is achieved and maintained?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

NPSG.07.01.01 EP 2 - Set goals for improving compliance with hand hygiene guidelines. (See also IC.03.01.01, EP 3)
NPSG.07.01.01 EP 3 - Improve compliance with hand hygiene guidelines based on established goals.

12.* Are all deliveries being handled in a manner to reduce the possible spread of infections? (See also IC.02.02.01, EP 4) ☐ N/A

© 2024 Joint Commission Resources

Instructions: Confirm by observation and interview that distribution personnel understand and comply with segregation or covering of return packages from delivery packages, hand hygiene and equipment sanitization procedures.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.01.01.01 EP 9 - The organization delivers medical equipment and supplies that are sanitary, clean, and undamaged.

13.* Do site distribution personnel reduce possible cross contamination of delivery packages by using proper segregation and/or coverings on return delivery packages? ☐ N/A

Instructions: Confirm by observation and interviews that distribution personnel understand and comply with measures to reduce cross contamination during delivery procedures.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.01.01.01 EP 9 - The organization delivers medical equipment and supplies that are sanitary, clean, and undamaged.
IC.02.02.01 EP 1 - The organization implements infection prevention and control activities when doing the following: Cleaning and performing disinfection of medical supplies and devices. * Note: Disinfection is used for items such as stethoscopes and blood glucose meters. Additional cleaning and disinfecting is required for medical equipment, devices, and supplies used by patients who are isolated as part of implementing transmission-based precautions. Footnote *: For further information regarding cleaning and performing disinfection of medical equipment, devices, and supplies, refer to the website of the Centers for Disease Control and Prevention (CDC) at https://www.cdc.gov/infectioncontrol/guidelines/disinfection/#r3. (See also EQ.01.05.01, EPs 3, 4)
IC.02.02.01 EP 3 - The organization implements infection prevention and control activities when doing the following: Disposing of medical equipment, devices, and supplies in accordance with law and regulation.
IC.02.02.01 EP 4 - The organization implements infection prevention and control activities when doing the following: Storing medical equipment, devices, and supplies. (See also EQ.01.05.01, EPs 1, 2, 3, 4, 5)

14.* Are proper supplies available for clean room entry hand hygiene? ☐ N/A

Instructions: Nail pics, hand soap in non-refillable dispensing containers, and low lint towels must be used for clean room entry hand hygiene.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

Environmental Controls and Monitoring

15.* Have the clean room and primary engineering control certification reports been reviewed for compliance and timely completion? ☐ N/A

Instructions: Confirm that third party certification reports are reviewed and all primary and secondary engineering control tests have been completed according to SOP, USP<797> and State BOP requirements. Confirm that any failures or out of compliance results are investigated and remediation actions/corrective actions are taken.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 5 - The organization certifies laminar flow hoods and clean rooms every 12 months. The organization documents the performance of these checks. Note: There are many ways to document the certification, such as using bar coding equipment, check marks on a tag, or an inventory.

16.* Is equipment used in compounding and to ensure proper storage conditions in calibration if required? ☐ N/A

Instructions: Review all drug storage thermometers/hygrometers, cold drug storage (refrigerator) thermometers, heat block thermometers, centrifuges, velometer and tachometer to verify that equipment is in calibration. Calibration reports shall be signed and dated to document the initial site review. Verify that calibration certificates are maintained on file for equipment currently in use and prior certificates are maintained on file for a minimum of 5 years.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

EQ.02.01.01 EP 4 - The organization periodically inspects equipment used in compounding or preparing drugs for operational effectiveness and accuracy. The organization documents the performance of these checks.

17.* Have viable air samples been taken at the appropriate frequency, at all locations as required in SOP and confirmed to be within ISO classification limits? If samples exceeded action limits, was remediation conducted and properly documented with corrective actions? Was area retested to confirm state of control? ☐ N/A

Instructions: Review certification records for period under review to confirm that viable air samples have been completed as required and are within ISO classification requirements. Confirm Action limits are not exceeded. Confirm that any exceedences are reported, investigated and corrective actions if identified are implemented and communicated to applicable employees. Confirm that follow up activities to determine effectiveness of corrective actions taken are documented. If applicable, confirm that any reporting of excursions to State Board of Pharmacy was completed.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

18.* Has contact plate surface sampling been conducted at the required frequency and confirmed to be within ISO classification action limits? If exceedences are identified, was organism(s) ID'd, remediation conducted and properly documented? ☐ N/A

Instructions: Review records during period under review to confirm that contact plate tests for surface contamination have been completed as required and are within ISO classification requirements. Confirm that SOP action limits are not exceeded. Confirm that any exceedences are ID'd by a credentialed lab, reported, investigated and corrective actions if identified are documented and communicated to applicable employees. Confirm that follow ups activities to determine effectiveness of corrective actions taken are conducted and documented. If applicable, confirm that any required reporting of excursions to State Board of Pharmacy was conducted.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

EQ.02.01.01 EP 2 - The organization performs basic safety and operational checks on medical equipment used by staff in the provision of care, treatment, or services, according to organization policy and the manufacturers' guidelines. The organization documents the performance of these checks.

19.* Are temperature and humidity readings taken each day of operations in all drug and media storage locations and verified to be within required ranges? ☐ N/A

Instructions: Review temperature and humidity logs Form 28 for period under review. Confirm proper documentation each day of operations or as required by State regulations. Documentation is clearly written, and all temperatures and humidity readings are within appropriate ranges per SOP and State BOP guidance. If out of specification results are noted, were corrective actions needed to return the area to the proper range? Were corrective actions noted or documented?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.03.01.01 EP 2 - For organizations that store medications at their site(s): The organization stores medications according to the manufacturers' recommendations or, in the absence of such recommendations, according to a pharmacist's instructions. Note: This element of performance is also applicable to sample medications.
MM.03.01.01 EP 4 - For organizations that store medications at their site(s): The organization follows a written process addressing the control of the medication between receipt by the organization and delivery to or administration at the designated site. Note: This element of performance is also applicable to sample medications.

20.* Are pressure differentials recorded each day of operations and verified to be within required ranges? ☐ N/A

Instructions: Review Form 82 pressure differential logs for period under review. Confirm that pressure differentials are documented at minimum once each day of operations, documentation is clearly written, and all pressure differentials are within appropriate ranges per SOP guidance. If out of specification results are identified, were corrective actions taken to remediate and properly documented?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

EQ.02.01.01 EP 2 - The organization performs basic safety and operational checks on medical equipment used by staff in the provision of care, treatment, or services, according to organization policy and the manufacturers' guidelines. The organization documents the performance of these checks.

21.* Verify environmental monitoring results have been trended on the EM trending spreadsheet and evaluated for negative trends. Negative trends if any, have been identified and actions taken as needed. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

22.* Are all drugs, components, drug kits, and environmental monitoring media stored correctly and are storage areas monitored using calibrated thermometers/hygrometers? ☐ N/A

Instructions: Perform a review of the room drug storage area and drug product storage areas to ensure label storage conditions are met. If any of these products require refrigerator, freezer, or low humidity storage, these areas must be monitored using a calibrated monitoring device (thermometers and/or hygrometers). Ensure products are not stored outside of monitored areas.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

Employee Competencies and Process Validations

23.* Have employees and third party vendors who perform duties in the clean room been visually observed for the duties they perform: initially and at frequencies as required by aseptic training policy? ☐ N/A

Instructions: Review observational assessment Forms 114-118 on file. Confirm that initial and subsequent observational assessments have been completed on each site employee and third party vendors for all duties performed in the clean room in a timely manner. Confirm that no observational assessments are past due.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

24.* Have all employees who perform compounding and drawing activities performed the applicable media fill validations initially prior to performing duties and been re-evaluated at the appropriate intervals in accordance with SOP? ☐ N/A

Instructions: Review media fill records for the period under review for compliance to SOP. If a media fill failure is noted, have investigation procedures and re-evaluation as outlined been completed, documented and reported?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

25.* Have all employees who perform WBC labels performed a WBC media fill validation initially prior to performing duties and been re-evaluated at the appropriate intervals in accordance with SOP? ☐ N/A

Instructions: Review WBC media fill records for the period under review for compliance to SOP. If a media fill failure is noted, have investigation procedures and re-evaluation been completed, documented and reported?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

26.* Have all employees who perform aseptic compounding or dose drawing performed gloved fingertip sampling as required by SOP? Initial GFT sampling must be completed on 3 separate and full garbing procedures. Re-evaluation GFTs are conducted as part of the media-fill process. ☐ N/A

Instructions: Review gloved fingertip sampling records. Confirm that all applicable employees have completed initial triplicate fingertip sampling to verify proper garbing technique and fingertip samples during media fills to confirm aseptic technique prior to performing aseptic operations. Confirm that employees are sampled at appropriate frequency in compliance with SOP during a media fill operation. If action limits are exceeded, are investigations into the possible cause conducted, employees re-instructed, re-evaluated and properly documented in the reporting tool?

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

27.* Has product sterility testing been completed annually as required by SOP or more frequently if required by local BOP rules? ☐ N/A

Instructions: Review Form 119 to confirm that sterility testing has been completed as required by SOP at minimum annually or as required by local BOP rules. If a positive sterility test was observed, was failure properly reported, investigated, corrective action if identified are implemented and communicated to applicable employees? Confirm that follow up activities to determine effectiveness of corrective actions taken are documented in the reporting tool.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

28.* Are all the staff's required licenses, certifications, or registrations, posted in the facility and not expired? Is Form 42 completed, and up-to-date? *If any licenses are due to expire within the upcoming calendar quarter, assign a TASK for that employee using this tracer, requiring them to provide proof of renewal prior to the expiration date. ☐ N/A

Instructions: Staff licenses, certifications, registrations required by the company, BOP or a State agency must be verified through the issuing agency website upon hire, and prior to each expiration. If you use floaters, their license must be checked prior to performing duties at your site, if the license has not been verified by their primary worksite site since the last renewal date. If your state requires the company maintains record of CE required for license/certification renewal, documentation must be presented to the PIC at the time of renewal and maintained on file.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

HR.01.01.01 EP 2 - The organization verifies and documents the following: - Credentials of staff using the primary source when licensure, certification, or registration is required by law and regulation to practice their profession. This is done at the time of hire and at the time credentials are renewed. - Credentials of staff (primary source not required) when licensure, certification, or registration is not required by law and regulation. This is done at the time of hire and at the time credentials are renewed. For home health agencies that elect to use The Joint Commission deemed status option: The organization maintains current licensure and qualifications in personnel records. Note 1: It is acceptable to verify current licensure, certification, or registration with the primary source via a secure electronic communication or by telephone, if this verification is documented. Note 2: A primary verification source may designate another agency to communicate credentials information. The designated agency can then be used as a primary source. Note 3: An external organization (for example, a credentials verification organization [CVO]) may be used to verify credentials information. A CVO must meet the CVO guidelines identified in the Glossary.

29.* Have the appropriate aseptic assessments been completed on any new hire or employees whos duties have changed to require entry ISO classified areas prior to entry? ☐ N/A

Instructions: All employees who enter an ISO classified area must be trained and then assessed on their aseptic techniques applicable to their assigned duties.
Entry requires: 1) Hand hygiene and garbing training and observational assessment
2) Initial Gloved fingertip tests on three separate hand hygiene and garbing entries
Cleaning/disinfecting requires: 1) Cleaning/disinfecting observational assessment for each area they are assigned duties
Product prep/dose drawing requires: 1) Aseptic technique assessment
2) Media fill/GFT testing for assigned duties

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

Training

30.* Have all employees completed the initial and annual USP training module in a timely manner? ☐ N/A

Instructions: Review training records to confirm that all new employees have completed the initial USP training module(s) appropriate to their job description and prior to performing clean room related tasks. Annual reviews are completed by all employees within the past year. No training is past due.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

31.* Are employee who perform WBC labeling and WBC Dual Verifications up to date on training required in SOP? ☐ N/A

© 2024 Joint Commission Resources

Instructions: Confirm by reviewing electronic and/or hard copy training records to confirm all employees who perform WBC labeling procedures and Dual Verifications are trained initially and annually thereafter as required by SOP.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

32.* Do all employees who perform Therapy Order Verifications have a Form 49 on file? ☐ N/A

Instructions: Confirm that all employees who perform therapy order verifications are initially trained (Form 49 on file).

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

33.* Are Management of Change MOC activities properly implemented and communicated to site employees? ☐ N/A

Instructions: Review site electronic and/or hard copy MOC documents including training records for the quarter under review. Confirm that employees have acknowledged training on Change packets or signed hard copy training records if changes were applicable to their job duties. Verify that MOC changes have been properly implemented and new forms and procedures are being utilized.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

34.* The PIC has reviewed SOPs associated with the overall QA/QC site program within the last 12 months against current employee practices and State BOP requirements. ☐ N/A

Instructions: This review is documented on Form 120. Corrective actions are taken to ensure SOPs reflect current practices and Fed/State regulatory requirements.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)

35. Confirm by review of change packet documentation that any program changes implemented during the quarter have been fully implemented and all applicable personnel have been trained on these program changes. ☐ N/A

Instructions: MOC training records are maintained on file either hard copy or electronically for all affected employees.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)

Compounding and Preparation

36.* Does the facility assign appropriate expiration dating to compounded drugs and drugs used in compounding procedures in compliance with policies and procedures? ☐ N/A

Instructions: Check pharmacy computer system for maximum activity and expiration times on all compounded drug products. Verify that the site has on file complete stability data by drug manufacturer for all drugs compounded beyond package insert activity and expiration time. Confirm that kit calibration times match actual compounding times within 15 minutes. Confirm that no new drugs or manufacturers were introduced during the period under review and if so, maximum activity and expiration times assigned are set to package insert or are supported by complete stability records on file. Confirm by observation and interviews that single use bag/vials of diluents used during compounding are labeled with open date/time if used during multiple runs or discarded at end of run. No single use vial or bag punctured inside an ISO 5 environment is used for more than 6 hours.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

37. Are medications and components stored in accordance with manufacturer's recommendations or, in the absence of such recommendations, in accordance with PIC's instructions? Are high alert medications, look-a-like/sound-a-like medications properly labeled, stored and handled as indicated in SOP 3.2.4? ☐ N/A

Instructions: Confirm compliance by inspecting drug storage areas. Observe procedures and review associated documentation for compliance (Y-90, Bexxar, therapy medication, WBC labeling, etc.). Confirm proper order processing and handling of look-a-like/sound-a-like drugs as described in SOP.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.01.01.03 EP 1 - The organization identifies, in writing, its high-alert and hazardous medications. * Note: This element of performance is also applicable to sample medications. Footnote *: For a list of high-alert medications, see https://www.ismp.org/recommendations. For a list of hazardous drugs, see https://www.cdc.gov/niosh/docs/2016-161/pdfs/2016-161.pdf. (See also EC.02.02.01, EP 1)
MM.01.01.03 EP 2 - The organization follows a process for managing high-alert and hazardous medications. Note: This element of performance is also applicable to sample medications. (See also EC.02.02.01, EP 2)
MM.01.02.01 EP 1 - The organization develops a list of look-alike/sound-alike medications it stores, dispenses, or administers. Note 1: One source of look-alike/sound-alike medication name pairs is the Institute for Safe Medication Practices (https://www.ismp.org/recommendations/confused-drug-names-list). Note 2: This element of performance is also applicable to sample medications.
MM.01.02.01 EP 2 - The organization takes action to prevent errors involving the interchange of the medications on its list of look-alike/sound-alike medications. Note: This element of performance is also applicable to sample medications.
MM.01.02.01 EP 3 - The organization annually reviews and, as necessary, revises its list of look-alike/sound-alike medications. Note: This element of performance is also applicable to sample medications.
MM.03.01.01 EP 2 - For organizations that store medications at their site(s): The organization stores medications according to the manufacturers' recommendations or, in the absence of such recommendations, according to a pharmacist's instructions. Note: This element of performance is also applicable to sample medications.

38.* Are large volume parenterals divided in compliance with SOP, properly stored and labeled? ☐ N/A

Instructions: Confirm by observation that large volume parenterals are divided and labeled in compliance with SOP and given proper expiration dating.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

39.* Are drugs which have expired, are damaged, contaminated or have been recalled properly handled and quarantined in a designated area away from active product prior to final disposal in compliance with SOP? ☐ N/A

Instructions: Confirm by review of computer inventory that expired and recalled drugs are not in active inventory. Inspect quarantined product storage area for proper segregation.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.03.01.01 EP 8 - All expired, damaged, and/or contaminated medications are removed from patient care areas and stored separately from medications available for administration. Note: This element of performance is also applicable to sample medications.
MM.05.01.17 EP 1 - The organization follows a written policy describing how it will retrieve and handle medications within the organization that are recalled or discontinued for safety reasons by the manufacturer or the US Food and Drug Administration (FDA). Note: This element of performance is also applicable to sample medications.
MM.05.01.17 EP 3 - For organizations that store or dispense medications: When a medication is recalled or discontinued for safety reasons by the manufacturer or the US Food and Drug Administration (FDA), the organization notifies the prescribers and those who dispense or administer the medication. Note: This element of performance is also applicable to sample medications.
MM.05.01.17 EP 4 - When required by law and regulation or organization policy, the organization informs patients that their medication has been recalled or discontinued for safety reasons by the manufacturer or the US Food and Drug Administration (FDA). Note: This element of performance is also applicable to sample medications.

© 2024 Joint Commission Resources

40. Confirm by review of local documents and observation that product information is properly confirmed at time of receipt and labeled with Auxiliary Control # labels and Auxiliary Barcode labels as required in SOP 3.2.2. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.02.01.01 EP 4 - The organization maintains a written list of medications, including strength and dosage, for dispensing and administering. The list of medications is readily available. Note: In some settings, the term "formulary" is used instead of "list of medications available for use." The terms are synonymous. (See also MM.03.01.01, EP 1)
MM.03.01.01 EP 1 - For organizations that store medications at their site(s): The organization stores only approved medications and medications selected by the organization. (See also MM.02.01.01, EP 4)
MM.03.01.01 EP 4 - For organizations that store medications at their site(s): The organization follows a written process addressing the control of the medication between receipt by the organization and delivery to or administration at the designated site. Note: This element of performance is also applicable to sample medications.

41.* Confirm by review of local documents and that a master formula is on file in hard copy or electronic copy for each product prepared with minor deviations or compounded as described in Policy 6.5. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

42.* Confirm by review of pharmacy computer system that all maximum activities and expiration times which exceed the manufacturers recommendations are supported by stability data required in SOP 6.5.2. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

43. Confirm by review of current inventory and inventory records that only appropriate, conventionally manufactured sterile products from FDA-registered facility are used in product preparation. ☐ N/A

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.02.01.01 EP 2 - The organization develops and approves criteria for selecting medications, which include the following: - Indications for use - Effectiveness - Drug interactions - Potential for errors and abuse - Adverse drug events - Sentinel event advisories - Other risks - Costs Note: This element of performance is also applicable to sample medications.
MM.02.01.01 EP 4 - The organization maintains a written list of medications, including strength and dosage, for dispensing and administering. The list of medications is readily available. Note: In some settings, the term "formulary" is used instead of "list of medications available for use." The terms are synonymous. (See also MM.03.01.01, EP 1)

44. All vial shields are properly labeled whenever radiopharmaceuticals are prepared. (See also MC.03.08.05, EP 1; MC.05.01.01, EPs 4 and 6; MM.06.01.01, EP 3) ☐ N/A

Instructions: Vial shield labels are undamaged, cleanable. Auxiliary control # labels are placed on shields prior to preparation.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.05.01.09 EP 1 - Medication containers are labeled whenever medications are prepared but not immediately administered. Note 1: This element of performance does not apply to segregated pill boxes that store medications by day and time of day. Note 2: An immediately administered medication is one that an authorized staff member prepares or obtains, takes directly to a patient, and administers to that patient without any break in the process. Note 3: This element of performance is also applicable to sample medications.

Quality Events/Performance Improvement

45.* Are all quality related events reported to the facility through customer or patient complaints such as the right dose, right drug, right patient/customer, right time, on time, and product safety events such as altered biodistribution, adverse events, patient complaints etc., being properly reported in the electronic database and being investigated for appropriate corrective actions? Are external reports being made as required by law or regulation? ☐ N/A

Instructions: Confirm by reviewing reported events for complete and clearly written documentation, references to all investigation activities, identification of corrective actions and follow up documentation showing effectiveness of corrective actions. Confirm external reports are timely if needed. Confirm that site personnel can retrieve supporting documents that are not supplied as attachments to the event.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

© 2024 Joint Commission Resources

LD.03.07.01 EP 2 - As part of performance improvement, leaders, or managers delegated by leaders, do the following: - Set priorities for data collection, performance improvement activities, and patient health outcomes - Give priority to high-volume, high-risk, or problem-prone processes for performance improvement activities Note: Examples of areas of risk include blood-borne infections, wound care, undetected urinary tract infections, oxygen-related fires, and patient handoff to or from the home care organization. - Identify the frequency of data collection for performance improvement activities - Reprioritize performance improvement activities in response to changes in the internal or external environment Note: For home health agencies and hospices that elect to use The Joint Commission deemed status option: The organization's governing body is ultimately accountable for making sure that the priorities that are selected address improvements to the safety and quality of patient care. (See also PI.01.01.01, EPs 2, 12, 13; PI.02.01.01, EP 1)
PI.01.01.01 EP 12 - The organization collects data on the following: Significant medication errors. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 13 - The organization collects data on the following: Significant adverse drug reactions. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 15 - The organization collects data on the following: - Patient satisfaction with and complaints about products and services - Timeliness of response to patient questions, problems, and concerns - Impact of the organization's business practices on the adequacy of patient access to equipment, items, services, and information - Adverse events involving patients due to inadequate or malfunctioning equipment, supplies, or services (for example, injuries, accidents, signs and symptoms of infection, and hospitalizations)
PI.01.01.01 EP 2 - The organization collects data on the following: Performance improvement priorities identified by leaders. (See also LD.03.07.01, EP 2)
PI.01.01.01 EP 41 - For specialty pharmacies: The organization collects data on medication errors including the following: - Incorrect drug - Incorrect recipient - Incorrect strength of medication - Incorrect dosage form - Incorrect instructions - Incorrect quantity - Near misses
PI.01.01.01 EP 42 - For specialty pharmacies: The organization collects data on the following: - Adherence rate - Turnaround time for patient delivery of medications and associated products supplied by the specialty pharmacy Note: The organization may choose to separate data for medications that require an intervention. - Billing and coding errors

46.* Are quality events and corrective actions being properly communicated to all affected employees and employee training completed? ☐ N/A

Instructions: Confirm that events are being properly communicated to affected employees by reviewing site communications documents such as monthly safety meeting minutes or completion of training record on Form 45.

Compliant?	◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

LD.03.07.01 EP 2 - As part of performance improvement, leaders, or managers delegated by leaders, do the following: - Set priorities for data collection, performance improvement activities, and patient health outcomes - Give priority to high-volume, high-risk, or problem-prone processes for performance improvement activities Note: Examples of areas of risk include blood-borne infections, wound care, undetected urinary tract infections, oxygen-related fires, and patient handoff to or from the home care organization. - Identify the frequency of data collection for performance improvement activities - Reprioritize performance improvement activities in response to changes in the internal or external environment Note: For home health agencies and hospices that elect to use The Joint Commission deemed status option: The organization's governing body is ultimately accountable for making sure that the priorities that are selected address improvements to the safety and quality of patient care. (See also PI.01.01.01, EPs 2, 12, 13; PI.02.01.01, EP 1)
PI.01.01.01 EP 12 - The organization collects data on the following: Significant medication errors. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 13 - The organization collects data on the following: Significant adverse drug reactions. (See also LD.03.07.01, EP 2; MM.08.01.01, EP 1)
PI.01.01.01 EP 15 - The organization collects data on the following: - Patient satisfaction with and complaints about products and services - Timeliness of response to patient questions, problems, and concerns - Impact of the organization's business practices on the adequacy of patient access to equipment, items, services, and information - Adverse events involving patients due to inadequate or malfunctioning equipment, supplies, or services (for example, injuries, accidents, signs and symptoms of infection, and hospitalizations)
PI.01.01.01 EP 2 - The organization collects data on the following: Performance improvement priorities identified by leaders. (See also LD.03.07.01, EP 2)

47.* Are corrective actions to quality events implemented and are follow ups conducted to confirm effectiveness? ☐ N/A

© 2024 Joint Commission Resources

Instructions: Confirm by reviewing events for identified corrective actions. Do documents and/or interviews with employees confirm that corrective actions have been implemented? Have re-occurrences of the event or similar events happened which may show lack of effectiveness?

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)
PI.04.01.01 EP 4 - The organization evaluates actions to confirm that they resulted in improvements. Note: For hospices that elect to use The Joint Commission deemed status option: The hospice's governing body is ultimately accountable for making sure that improvement actions are evaluated for effectiveness.
PI.04.01.01 EP 5 - The organization acts when it does not achieve or sustain planned improvements.

48.* Do site events show any re-occurrences or trends that have not been previously identified and that needs to be investigated for possible site or systemic corrective actions? Answer compliant if no re-occurrences or trends. ☐ N/A

Instructions: Confirm by review of site events for the period under review. Pay close attention to similar types events and look for trends that may show a breakdown of the quality system in place. If a trend is identified, an investigation into possible causes and corrective actions is to be initiated locally. If a systemic issue and corrective actions is identified a Management of Change shall be initiated.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

PI.03.01.01 EP 4 - The organization analyzes and compares internal data over time to identify levels of performance, patterns, trends, and variations.
PI.04.01.01 EP 5 - The organization acts when it does not achieve or sustain planned improvements.

49.* Have all product related complaints reported to or noted by pharmacy staff such as altered bio-distributions, adverse reactions and QC failures been reported to the drug manufacturer as required by SOP? ☐ N/A

Instructions: Review events entries for the period under review. Confirm that any product related complaints have been reported directly to the drug manufacturer.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

MM.07.01.03 EP 1 - The organization follows a written process to respond to actual or potential adverse drug events, significant adverse drug reactions, and medication errors. Note: This element of performance is also applicable to sample medications.
MM.07.01.03 EP 2 - The organization follows a written process addressing prescriber notification in the event of an adverse drug event, significant adverse drug reaction, or medication error. Note: This element of performance is also applicable to sample medications.
MM.07.01.03 EP 3 - The organization complies with internal and external reporting requirements for actual or potential adverse drug events, significant adverse drug reactions, and medication errors. Note: This element of performance is also applicable to sample medications.

50.* Has the site posted updated local communicable disease information for employees to review? ☐ N/A

Instructions: Confirm by observation that the local communicable disease postings are updated quarterly. The posting shall include influenza rates during the flu season. If an updated posting is not available, the current posting should be signed and dated as updated.

Compliant? ◉Yes ○No	Num: 1	Den: 1	Comp%: 100.00

IC.01.03.01 EP 1 - The organization identifies infection risks based on the following: - Its geographic location, community, and population served - The care, treatment, or services it provides - The analysis of its surveillance activities and other infection control data Note 1: Surveillance activities may address processes and/or outcomes. Note 2: For organizations that provide personal care and support services: Surveillance activities may include verification of infection control education for all employees and supervisor observations of employees' hand-washing techniques.
IC.01.03.01 EP 3 - The organization prioritizes the identified risks for acquiring and spreading infections. These prioritized risks are documented.

© 2024 Joint Commission Resources

51.* Has the facility completed the hand hygiene compliance tracker as required and does the facility meet company goals for hand hygiene compliance? ☐ N/A

Instructions: Confirm by reviewing local documents. If hand hygiene compliance did not meet goals, were corrective actions taken to promote compliance and were follow up observations made to confirm effectiveness of corrective actions? Current frequency is biannual (January/July of each year).

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

NPSG.07.01.01 EP 1 - Implement a program that follows categories IA, IB, and IC of either the current Centers for Disease Control and Prevention (CDC) and/or the current World Health Organization (WHO) hand hygiene guidelines. (See also IC.01.04.01, EP 5)
NPSG.07.01.01 EP 2 - Set goals for improving compliance with hand hygiene guidelines. (See also IC.03.01.01, EP 3)
NPSG.07.01.01 EP 3 - Improve compliance with hand hygiene guidelines based on established goals.

52.* Confirm the current year Organizational Goals are posted and all employees are aware/understand these goals. Do employees know how we improve our performance to our goals through Continuous Quality Improvement (CQI)? ☐ N/A

Instructions: When interviewed, can staff name a goal or a quality improvement change that was implemented within the last year, i.e., an SOP change, or local change made in response to site event trending or customer complaint?

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

LD.02.01.01 EP 1 - Leaders work together to create the organization's mission, vision, and goals, which guide the leaders' actions and are communicated to staff and the population(s) the organization serves.
PI.04.01.01 EP 2 - The organization acts on improvement priorities. (See also MM.08.01.01, EP 6)

53.* Are employees following Policy 4.3 and SOP 4.3.2 to respond to actual or potential adverse drug events, significant adverse drug reactions and medication errors? Staff Pharmacists follow procedures to notify affected prescribers. (See also MC.02.01.13, EP 2) ☐ N/A

Instructions: Verify by reviewing events and/or employee interviews.

Compliant?	Num: 1	Den: 1	Comp%: 100.00
◉Yes ○No			

MM.07.01.03 EP 1 - The organization follows a written process to respond to actual or potential adverse drug events, significant adverse drug reactions, and medication errors. Note: This element of performance is also applicable to sample medications.

© 2024 Joint Commission Resources

SOP 4.4.4 Quality and Safety Self-Inspections and Program Reviews

I. Purpose

To describe quality and safety compliance self-inspections and program reviews.

II. Scope

This applies to all Nuclear Pharmacy sites.

III. Responsibility

It is the responsibility of the Pharmacy Manager or designee to oversee policy compliance for personnel under his/her supervision.

IV. Definitions

PIC- Pharmacist in Charge

V. Related Forms

Form 120 Quality Policy and Procedures Review Log

VI. Equipment and Materials:

All equipment and materials used in aseptic processing

VII. Procedure

A. Site Self-Inspections

1. Periodic self-inspections shall be conducted by each facility to ensure ongoing program and regulatory compliance.
2. Tracers with AMP® shall be used to record and maintain documentation of self-inspections either electronically or by printing a hard copy.
3. Content and minimum frequency of the self-inspections shall be determined by the QA/RA, EHS departments.
4. Tracer names and minimum required frequencies are listed in Table 1.
5. Issues identified during the self-inspections shall be documented to include the following:
    a. Description of issue identified
    b. Investigation details including root cause(s) if identified
    c. Corrective action and preventative actions (CAPAs) taken to prevent reoccurrence
    d. CAPA effectiveness evaluation if deemed necessary

B. Site Ops Metrics and Quality Program Reviews

1. Each site PIC/Manager or designee will report all Ops Metrics data by using the Ops Metrics reporting tool link on the E-Reporting and Requesting document found on Teams: https://forms.monday.com/forms/62687754c09f36ac1fa30af545d54340?r=use1

a. Ops Metrics data should be reported by the 15th of each month for the previous month.

2. Quality policies and procedures shall be reviewed annually by the PIC and documented on Form 120 for site compliance and applicability.
    a. This review will include but is not limited to the following:
    - Policy 2.2 Dose Calibrator and all associated SOPs

- Policy 2.3 Radiation Detection Equipment and all associated SOPs
- Section 3: Medication Management
- Policy 4.3 Patient Safety Events & Product Complaints and associated SOPs
- Policy 4.4 Pharmacy Regulatory Events and Inspections and associated SOPs
- Section 6: Quality Assurance- Medication Compounding
- Section 7: Blood Procedures and Controls
- Section 9: Pharmacy Wholesale Distribution

b. Any discrepancies between written procedures and state regulations shall be identified by submitting a management of change request.

3. The site PIC or designee shall review all new or revised policies and procedures and develop a local implementation plan. Hard copy Form 45 or electronic training records of implementation shall be maintained.

Table 1:

Tracer Name	Minimum Frequency	Suggested Responsibility
Monthly Vehicle Safety Check	Monthly on each company vehicle	Courier/Driver
Monthly EHS Safety Self-Inspection	Monthly	Any trained staff member
Monthly Quality Self-Inspection	Monthly	Any trained staff member
RSO- Monthly Rad Safety Inspection	Monthly	RSO
Quality Lead- Quarterly QA Program Review	Each calendar quarter	Quality Lead or Manager/PIC
EHS Lead- Quarterly Program Review	Each calendar quarter	EHS Lead or Manager/PIC
Quarterly Radioactive Medical Waste (RMW) Self-Inspections- State specific checklists for California, Florida, and New York	Each calendar quarter for sites in specified States	RSO
Biannual Hazardous Material (HMT) Self-Inspection	Biannual	EHS Lead or Manager/PIC
Biannual Form 141 Hand Hygiene Tracer Results	Every January and July	Quality Lead or Manager/PIC
Biannual Emergency Drill Confirmation	Biannual	EHS Lead or Manager/PIC
Medication Management Compliance	Annually	Manager/PIC
Annual OSHA Work Related I&I Reporting/Posting	Each year by February 1st thru April 30th	Manager/PIC
Contract Courier Observational Assessment	Optional or as needed for finding corrective actions	Any trained staff member
Packing and Shipping RAM Observational Assessment	Optional or as needed for finding corrective actions	Any trained staff member

VIII. Training

Employees performing these duties shall be trained on the procedure and the documentation tools.

LIST OF ATTACHMENTS

None

Document History		
Version	Date	Brief Description of Change
1	1 June 2020	New Document
2	1 Dec 2020	Updating SOP to remove quality audit which are now covered in SOP 4.4.3, identify required periodic self-inspections, and include form 140 on self-inspections and moved SOP # from 6.1.1 to 4.4.4.
2.1	1 Nov 2021	Administrative
2.2	1 Jul 2022	Updated for self-inspections to be recorded in Tracers with AMP tool, remove reference to Form 140.
2.3	1 Nov 2022	JC Finding- Update to identify required self-inspections by name, location, and frequency. Update to include location and required completion of Ops Metrics.

SOP 6.2.2 Aseptic Techniques & Preparation

I. Purpose:
To describe the aseptic technique used while compounding and dispensing sterile radiopharmaceuticals and pharmaceuticals.

II. Scope:
This applies to all Nuclear Pharmacy sites. Aseptic technique procedures will be employed when preparing for, and during all sterile product processing.

III. Responsibility:
It is the responsibility of the Business Unit Manager or designee to oversee policy compliance for personnel under his/her supervision. All pharmacists and supervised pharmacy support staff who prepare sterile products will adhere to these procedures.

IV. Definitions:

A. **Air curtain** – is the air boundary at the face of a LFH and BSC
B. **ALARA** – As Low as Reasonably Achievable
C. **Beyond Use Date (BUD)**- The date or time after which a compounded product or component used in compounding shall not be used.
D. **Buffer Area** – The area where the primary engineering control that generates and maintains an ISO Class 5 environment is physically located.
E. **CR** – Clean Room, which refers to all ISO classified areas
F. **Critical Sites** – Locations that include any component or fluid pathway such as vial septa, injection ports, open ampules, syringe tips, needles and needle hubs that are exposed and at risk of direct contact with air or touch contamination
G. **Critical Work Area** – Central area within the laminar air flow hood
H. **CSP** – Compounded Sterile Preparation
I. **Direct Compounding Area (DCA)** – A critical area within the ISO Class 5 primary engineering control where critical sites are exposed to unidirectional HEPA filtered air (first air)
J. **First Air** – The unidirectional air exiting the HEPA filter that is essentially particle free
K. **Multiple-Dose Containers**- A multiple-dose container for articles or preparations intended for parenteral administration only and usually containing antimicrobial preservatives.
L. **Primary Engineering Control (PEC)** –Laminar flow hood (LFH) and Biological Safety Cabinet (BSC) which provide an ISO Class 5 environment for the exposure of critical sites
M. **Secondary Engineering Control (SEC)** – Clean Room ISO Class 8 ante and ISO Class 7 buffer areas which serve as a core for the location of the PEC
N. **Single-Dose Containers** - Single-dose containers are single-unit containers for articles or preparations intended for parenteral administration only.
O. **Restricted Area** – Radiation Restricted Area as defined for each individual facility

V. Related Documents:
None

VI. Equipment and Materials:
None

VII. Procedure:
A. All employees entering the clean room shall:

1. Maintain good personal hygiene
2. Perform thorough hand cleaning
3. Select and properly don appropriate garb
4. Clean and maintain the environment in accordance with the ISO classification of each area
5. Protect personnel and compounding environments from contamination
6. Offer guidance when observing incorrect procedures and report malfunctioning equipment.

B. All employees performing aseptic operations shall:
   1. Accurately and aseptically compound and dispense sterile products
   2. Properly label all CSP
   3. Inspect all CSP prior to release

C. To aid in maintenance of ISO classified air quality and first air:
   1. Only personnel directly involved in compounding or dispensing should be in the buffer rooms while aseptic processes are in progress.
   2. Dynamic occupancy rates tested during the current certification test should not be exceeded during aseptic operations.
   3. Verify LFH has proper air velocity prior to use by visual inspection of the airflow monitor or magnahelic gauge.
      a. If the LFH airflow monitor indicates the velocity is below the manufacturer's acceptable level for operation, the pre-filters shall be replaced. If the air velocity remains below the acceptable level after changing the pre-filters, the unit shall not be used.
   3. Verify BSC has proper air velocity prior to use each day by visual inspection of the magnahelic gauge and record the reading on Form 25.
      a. A significant change in the magnahelic gauge reading the time of calibration will indicate cause for concern and the unit shall not be used until service personnel can evaluate proper function.
   4. All personnel while working in the CR shall avoid excessive and fast movement that may compromise the air quality inside the ISO Class 5 PEC. This includes:
      a. Flapping of hands to dry gloves
      b. Quick movements near a PEC or through the air curtain at the face of the PEC
      c. Placement, pulling or swinging of the dose calibrator well dipper pulley in such a way that the pulley moves in and out of the ISO Class 5 air during aseptic operations
   5. Only essential personnel and items shall be in the immediate area of an ISO Class 5 PEC during aseptic processing. The immediate area shall be a minimum of 3 feet in front of any ISO Class 5 PEC.
   6. Talking shall be kept to a minimum and directed away from the PEC during aseptic processing.
   7. Operators shall not interfere with the first air flowing directly from the PEC HEPA filter to critical sites during manipulations.
      a. Radiation safety practices must be balanced with aseptic handling practices when handling radioactive materials. The use of flanged syringe shields and recessed vial shielding may disrupt direct first air contact with the vial septum during certain handling conditions.
      b. The operators' hands or any equipment shall not be allowed to block or interrupt HEPA filtered air to critical sites e.g., unsheathed needle, open centrifuge tube, exposed barrel tip and punctured vial septum when radiation safety practices are not a factor, e.g., drawing saline into a syringe.
   8. Only supplies critical to aseptic operations may be introduced into the PEC.
      a. Items placed in the PEC shall be disinfected using a sterile wiper and sterile 70% IPA.
      b. Unit dose pigs shall be cleaned and disinfected within 24 hours prior to the production run.
      c. Equipment and absorbent material shall not obstruct airflow return grates at the front and back of the work surface.

9. Saline bags and other products or devices shall be hung in the PEC to avoid obstructing first air to the DCA and to ensure critical sites are accessed at least 6 inches from the front edge and either side wall of the PEC.
10. A minimal number of absorbent pads may be used in the PEC for ALARA purposes and shall not block airflow grates at the front or back of the PEC.
11. Only supplies immediately necessary to kit compounding and dose dispensing activities shall be in the DCA.
12. Under normal operations, PECs should never be turned off. In the event of a power failure or shut down for maintenance or service, the unit must be:
    a. Turned on and allowed to run for a minimum of 30 minutes to allow purging of contaminated air and full circulation of first air.
    b. Cleaned with a List A agent and disinfected with sterile 70% IPA prior to use.

D. General Principles of Aseptic Technique
1. Aseptic principles are used during preparation of CSPs to ensure they are free of microorganisms, pyrogens, and particulate matter. It involves the manipulation of products, vials, syringes and the shielding necessary to reduce radiation exposure with consideration to airflow to produce a sterile final product.
2. All aseptic manipulations shall be conducted in a properly prepared ISO Class 5 PEC while wearing appropriate garb.
3. Compounding, dose dispensing, removing, changing, or adding a needle, and vial or bag punctures or any action that involves exposing a critical site to potential contamination shall be considered an aseptic manipulation.
4. Vial septa and bag injection ports shall be disinfected before puncturing, after being exposed to less than ISO 5 air, and if touch contamination is known or suspected. Disinfection shall be performed:
    a. inside the PEC prior to initial puncture
    b. using a new sterile 70% IPA swab
    c. by wiping three times in the direction of the operator
    d. prior to another needle puncture if vial shield top is closed or product is removed from the ISO 5 environment
    e. frequently whenever multiple punctures are occurring
5. Critical sites such as the needle shaft and tip, the syringe plunger ribs, and barrel tip cannot be disinfected and must be discarded if touch contamination is known or suspected.
6. Care must be taken to avoid touching the plunger ribs when drawing sterile products into syringes. If plunger ribs have been or are suspected to have touch contamination:
    a. You may continue with the action of pulling product into the syringe.
    b. You may eject one time as needed e.g., during kit preparation.
    c. You may NOT move the plunger back and forth to adjust activity/volume because the product may become contaminated.
7. Needles shall be used immediately upon removing the cap and promptly recapped or discarded after use.
8. Syringes containing diluents or sterile products for future use may not have the needles removed unless replaced with a sterile cap.
9. Syringes and needles must be discarded if needles are uncapped or removed from syringes in an environment other than ISO Class 5 air quality.
10. Operators shall disinfect their gloves by spraying all surfaces with Sterile 70% IPA:
    a. Immediately after donning sterile gloves.
    b. Prior to cleaning the PEC.

c. Immediately prior to each kit preparation after all disinfected components for compounding have been properly introduced into the PEC.
d. Immediately prior to each dose drawing activity after proper line clearance has been completed and the kit has been properly introduced into the PEC.
e. Immediately prior to initiating each WBC processing action conducted inside the BSC.
f. Prior to re-entering the PEC after touching non-sterile surfaces such as phones, barcode scanners, pens, paper, carts, generators, heat block containment box, tables, etc.
g. Periodically throughout prolonged sessions of compounding or dose drawing or when suspected or known contaminant has occurred.

D. Assignment of BUDs
1. Sterile and Non-sterile prepared products:
a. Shall not exceed the manufacturer's expiration date or time of the component(s) used in compounding.
b. Non-sterile shall be compliant with current USP<795> guidelines.
c. Sterile radiopharmaceutical shall be compliant with current USP<825> guidelines.
d. Sterile radiopharmaceuticals prepared from cold kits shall be compliant with SOP 6.5.2/CASOP 6.5.2 Stability Testing when applicable.
2. Single dose containers:
a. Must be punctured within an ISO Class 5 environment with proper aseptic technique.
b. Must be properly labeled with the BUD date and time.
(a) Single-dose containers used during a single production run not exceeding 6 hours and remaining under the control of a single operator, need not be labeled but must be discarded at the end of the single production run.
c. Maximum BUD is 6 hours and must be discarded 6 hours after the initial needle puncture.
3. Multiple dose containers:
a. Must be punctured within an ISO Class 5 environment with proper aseptic technique.
b. Must be properly labeled with initial puncture date and discard date.
c. Maximum BUD is 28 days after initial needle puncture unless otherwise specified by the manufacturer.
d. BUD shall not exceed the manufacturer's expiration date.

VIII. Training

All employees who perform aseptic operations shall be trained on this procedure.

SAVEWAY
COMPOUNDING
PHARMACY, LLC

Explanation to Section 3: History of Company – Question #3

In January 2023, the Myonex Facility Manager on file with the Alaska Board of Pharmacy unexpectedly submitted her resignation, effective January 13, 2023. Myonex quickly began taking steps to identify and install an appropriate replacement prior to its outgoing Facility Manager's effective resignation date so as to ensure uninterrupted continuity of operations. Myonex notified the Alaska Board of Pharmacy of the change in designated representative by email on February 2, 2023. Myonex submitted the formal notification to Alaska Board of Pharmacy on February 15, 2023. At the time that it submitted its formal notification on February 15, Myonex also had a name change application pending before the Alaska Board of Pharmacy (Myonex underwent a legal entity conversion from Myonex, Inc. to Myonex, LLC effective as of December 31, 2022), which was approved on March 23, 2023 and issued under a new license number. In April 2023, Myonex was advised by the Alaska Board of Pharmacy that it had to submit a new application for the change in Facility Manager under the new name and license number, which Myonex submitted on April 20, 2023.

Myonex, LLC received notice from the Board that it was placing the matter under investigation. On May 9, 2024, the Board issued to Myonex a Non-Disciplinary Letter of Advisement.

This is in response to Question # 6 . Provide all the following *where applicable*:

Date of Event/Arrest	Disposition Date	State	City	County
5/9/2024	5/9/2024	AK	Anchorage	
Case #		**Governing, licensing, Arresting Presiding Body/Agency/Court**		
2023-000345		State of Alaska Board of Pharmacy		
Reason/Charge				
Non-Disciplinary Letter of Advisement				
Plaintiff/Defendant/Claimant/Respondent			**Lawsuit/Arbitration/Bankruptcy**	
State of Alaska Board of Pharmacy			Non-Disciplinary Letter of Advisement	
Name of Business/Industry/Entity				
Myonex, LLC				

Provide explanation below:

In January 2023, the Myonex Facility Manager on file with the Alaska Board of Pharmacy unexpectedly submitted her resignation, effective January 13, 2023. Myonex quickly began taking steps to identify and install an appropriate replacement prior to its outgoing Facility Manager's effective resignation date so as to ensure uninterrupted continuity of operations. Myonex notified the Alaska Board of Pharmacy of the change in designated representative by email on February 2, 2023. Myonex submitted the formal notification to Alaska Board of Pharmacy on February 15, 2023. At the time that it submitted its formal notification on February 15, Myonex also had a name change application pending before the Alaska Board of Pharmacy (Myonex underwent a legal entity conversion from Myonex, Inc. to Myonex, LLC effective as of December 31, 2022), which was approved on March 23, 2023 and issued under a new license number. In April 2023, Myonex was advised by the Alaska Board of Pharmacy that it had to submit a new application for the change in Facility Manager under the new name and license number, which Myonex submitted on April 20, 2023.

Myonex, LLC received notice from the Board that it was placing the matter under investigation. On May 9, 2024, the Board issued to Myonex a Non-Disciplinary Letter of Advisement.

James Lovett is an officer of Myonex, LLC.

Re: State of Alaska Board of Pharmacy- Case No.: 2023-000345

NON-DISCIPLINARY LETTER OF ADVISEMENT

Dear Ms. Tuttle,

This letter is to advise Myonex, LLC that the State of Alaska, Division of Corporations, Business and Professional Licensing (Division) and the Alaska Board of Pharmacy (Board) have completed the investigation of the licensing allegations filed against Myonex, LLC.

After a thorough review by a licensed Board Member, it was determined Myonex, LLC submitted a change of Facility Manager form on April 20, 2023, for a change that occurred on January 16, 2023, which was past the 10-day reporting requirement, Myonex LLC was in violation of the following Alaska regulation: 12 AAC 52.635(a).

The Board Member determined a violation was present, and as a result, the Board placed this matter under investigation; however, it was their opinion that Myonex, LLC's actions did not rise to the level requiring formal disciplinary action against their license, and the appropriate disposition for this matter is to issue Myonex, LLC this **Non-Disciplinary Letter of Advisement.**

This letter advises Myonex, LLC to **be aware of all Alaska Board of Pharmacy statutory and regulatory requirements to practice in the state of Alaska and to disclose all future changes in facility managers/designated representatives within the now 30 day requirement after the change occurs.**

This letter will be retained in our files and is evidence of the Board's concern and the fact Myonex, LLC has been notified of the requirement under Alaska Statute 08.80 and Regulation 12 AAC 52 to abide by all laws governing their license.

This investigation is now closed. This letter is non-disciplinary and, therefore, cannot be appealed. This document will not be posted on the public website, however, it is a public document and may be released to an inquirer through an Alaska Public Records Request. Because Myonex, LLC was under official investigation, they, the Board, or the Division may be required to report that information on future license applications, including their Alaska renewal.

Thank you for your cooperation in this matter. Please feel free to contact me directly via email holly.handley@alaska.gov or telephone (907) 269-0356.

Respectfully,

Holly Handley, Investigator
State of Alaska, Board of Pharmacy

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

State of Alaska Board of Pharmacy			Non-Disciplinary Letter of Advisement	
Name of Business/Industry/Entity				
Myonex, LLC				

Provide explanation below:

In January 2023, the Myonex Facility Manager on file with the Alaska Board of Pharmacy unexpectedly submitted her resignation, effective January 13, 2023. Myonex quickly began taking steps to identify and install an appropriate replacement prior to its outgoing Facility Manager's effective resignation date so as to ensure uninterrupted continuity of operations. Myonex notified the Alaska Board of Pharmacy of the change in designated representative by email on February 2, 2023. Myonex submitted the formal notification to Alaska Board of Pharmacy on February 15, 2023. At the time that it submitted its formal notification on February 15, Myonex also had a name change application pending before the Alaska Board of Pharmacy (Myonex underwent a legal entity conversion from Myonex, Inc. to Myonex, LLC effective as of December 31, 2022), which was approved on March 23, 2023 and issued under a new license number. In April 2023, Myonex was advised by the Alaska Board of Pharmacy that it had to submit a new application for the change in Facility Manager under the new name and license number, which Myonex submitted on April 20, 2023.

Myonex, LLC received notice from the Board that it was placing the matter under investigation. On May 9, 2024, the Board issued to Myonex a Non-Disciplinary Letter of Advisement.

Robert Cohen is an owner and officer of Myonex, LLC.

Re: State of Alaska Board of Pharmacy- Case No.: 2023-000345

NON-DISCIPLINARY LETTER OF ADVISEMENT

Dear Ms. Tuttle,

This letter is to advise Myonex, LLC that the State of Alaska, Division of Corporations, Business and Professional Licensing (Division) and the Alaska Board of Pharmacy (Board) have completed the investigation of the licensing allegations filed against Myonex, LLC.

After a thorough review by a licensed Board Member, it was determined Myonex, LLC submitted a change of Facility Manager form on April 20, 2023, for a change that occurred on January 16, 2023, which was past the 10-day reporting requirement, Myonex LLC was in violation of the following Alaska regulation: 12 AAC 52.635(a).

The Board Member determined a violation was present, and as a result, the Board placed this matter under investigation; however, it was their opinion that Myonex, LLC's actions did not rise to the level requiring formal disciplinary action against their license, and the appropriate disposition for this matter is to issue Myonex, LLC this **Non-Disciplinary Letter of Advisement.**

This letter advises Myonex, LLC to **be aware of all Alaska Board of Pharmacy statutory and regulatory requirements to practice in the state of Alaska and to disclose all future changes in facility managers/designated representatives within the now 30 day requirement after the change occurs.**

This letter will be retained in our files and is evidence of the Board's concern and the fact Myonex, LLC has been notified of the requirement under Alaska Statute 08.80 and Regulation 12 AAC 52 to abide by all laws governing their license.

This investigation is now closed. This letter is non-disciplinary and, therefore, cannot be appealed. This document will not be posted on the public website, however, it is a public document and may be released to an inquirer through an Alaska Public Records Request. Because Myonex, LLC was under official investigation, they, the Board, or the Division may be required to report that information on future license applications, including their Alaska renewal.

Thank you for your cooperation in this matter. Please feel free to contact me directly via email holly.handley@alaska.gov or telephone (907) 269-0356.

Respectfully,

Holly Handley, Investigator
State of Alaska, Board of Pharmacy

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. Re: State of Alaska Board of Pharmacy- Case No.: 2023-000345

NON-DISCIPLINARY LETTER OF ADVISEMENT

Dear Ms. Tuttle,

This letter is to advise Myonex, LLC that the State of Alaska, Division of Corporations, Business and Professional Licensing (Division) and the Alaska Board of Pharmacy (Board) have completed the investigation of the licensing allegations filed against Myonex, LLC.

After a thorough review by a licensed Board Member, it was determined Myonex, LLC submitted a change of Facility Manager form on April 20, 2023, for a change that occurred on January 16, 2023, which was past the 10-day reporting requirement, Myonex LLC was in violation of the following Alaska regulation: 12 AAC 52.635(a).

The Board Member determined a violation was present, and as a result, the Board placed this matter under investigation; however, it was their opinion that Myonex, LLC's actions did not rise to the level requiring formal disciplinary action against their license, and the appropriate disposition for this matter is to issue Myonex, LLC this **Non-Disciplinary Letter of Advisement.**

This letter advises Myonex, LLC to **be aware of all Alaska Board of Pharmacy statutory and regulatory requirements to practice in the state of Alaska and to disclose all future changes in facility managers/designated representatives within the now 30 day requirement after the change occurs.**

This letter will be retained in our files and is evidence of the Board's concern and the fact Myonex, LLC has been notified of the requirement under Alaska Statute 08.80 and Regulation 12 AAC 52 to abide by all laws governing their license.

This investigation is now closed. This letter is non-disciplinary and, therefore, cannot be appealed. This document will not be posted on the public website, however, it is a public document and may be released to an inquirer through an Alaska Public Records Request. Because Myonex, LLC was under official investigation, they, the Board, or the Division may be required to report that information on future license applications, including their Alaska renewal.

Thank you for your cooperation in this matter. Please feel free to contact me directly via email holly.handley@alaska.gov or telephone (907) 269-0356.

Respectfully,

Holly Handley, Investigator
State of Alaska, Board of Pharmacy

Section 8: Arrests, Detentions, Litigations, Arbitrations.	Yes	No
1. Have you ever been convicted of, or entered, a plea of guilty, guilty by mentally ill or nolo contendere to any criminal offense or civil violation, federal or state, for any reason whatsoever, regardless of the disposition of the event? (Except minor traffic citations.)		✓
2. If you answered "yes" to question 1, was the offense or violation related to drugs, including prescription drugs and/or controlled substances, the manufacturer or distribution of drugs or the practice of pharmacy?		
3. Have you ever had a civil or criminal record expunged or sealed by a court order?		✓
4. Have you, as an individual, member or a company, partner, or owner, director or officer of a corporation, ever been a party to a lawsuit as either a plaintiff or defendant (including any administrative proceedings before a licensing board) or of an arbitration as either a claimant or respondent? (Other than divorces.)		✓
5. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) been a party to a lawsuit (including any administrative proceedings before a licensing board), arbitration or bankruptcy?	✓	
6. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer or director) ever appeared before any licensing agency or similar authority in or outside the State of Nevada for any reason whatsoever (including any disciplinary or board citation)?	✓	
7. Have you ever been denied a personal license, permit, certificate or registration for a privileged, occupational or professional activity?		✓
8. Has any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner member, officer or director) ever been refused a business license.		✓
9. Have you or any general or limited partnership, company or limited liability company, business venture, sole proprietorship or closely held corporation, corporation (while you were associated with it as an owner, partner, member, officer, or director) ever surrendered a license, permit, certificate or registration relating to the pharmaceutical industry voluntarily or otherwise (other than upon voluntary closure of a manufacturer).		✓
10. Have you been diagnosed or treated for any mental illness, including alcohol or substance abuse, or physical condition that would impair your ability to perform the essential functions of your license?		✓

Please use and make copies of this page (if necessary) to provide information regarding any questions, 1-10, you have marked "YES" to in section 8 of the application. A signed statement of explanation for each event and a copy of all documents that identify the circumstance or contain an order, agreement or other disposition for the event must be provided.

This is in response to Question # 5 . **Provide all the following *where applicable*:**

This is in response to Question # 6. **Provide all the following *where applicable*:**

Date of Event/Arrest	Disposition Date	State	City	County
5/9/2024	5/9/2024	AK	Anchorage	
Case #		**Governing, licensing, Arresting Presiding Body/Agency/Court**		
2023-000345		State of Alaska Board of Pharmacy		
Reason/Charge				
Non-Disciplinary Letter of Advisement				
Plaintiff/Defendant/Claimant/Respondent		**Lawsuit/Arbitration/Bankruptcy**		
State of Alaska Board of Pharmacy		Non-Disciplinary Letter of Advisement		
Name of Business/Industry/Entity				
Myonex, LLC				

Provide explanation below:

In January 2023, the Myonex Facility Manager on file with the Alaska Board of Pharmacy unexpectedly submitted her resignation, effective January 13, 2023. Myonex quickly began taking steps to identify and install an appropriate replacement prior to its outgoing Facility Manager's effective resignation date so as to ensure uninterrupted continuity of operations. Myonex notified the Alaska Board of Pharmacy of the change in designated representative by email on February 2, 2023. Myonex submitted the formal notification to Alaska Board of Pharmacy on February 15, 2023. At the time that it submitted its formal notification on February 15, Myonex also had a name change application pending before the Alaska Board of Pharmacy (Myonex underwent a legal entity conversion from Myonex, Inc. to Myonex, LLC effective as of December 31, 2022), which was approved on March 23, 2023 and issued under a new license number. In April 2023, Myonex was advised by the Alaska Board of Pharmacy that it had to submit a new application for the change in Facility Manager under the new name and license number, which Myonex submitted on April 20, 2023.

Myonex, LLC received notice from the Board that it was placing the matter under investigation. On May 9, 2024, the Board issued to Myonex a Non-Disciplinary Letter of Advisement.

Greg Lavin is an officer of Myonex, LLC.

Re: State of Alaska Board of Pharmacy- Case No.: 2023-000345

NON-DISCIPLINARY LETTER OF ADVISEMENT

Dear Ms. Tuttle,

This letter is to advise Myonex, LLC that the State of Alaska, Division of Corporations, Business and Professional Licensing (Division) and the Alaska Board of Pharmacy (Board) have completed the investigation of the licensing allegations filed against Myonex, LLC.

After a thorough review by a licensed Board Member, it was determined Myonex, LLC submitted a change of Facility Manager form on April 20, 2023, for a change that occurred on January 16, 2023, which was past the 10-day reporting requirement, Myonex LLC was in violation of the following Alaska regulation: 12 AAC 52.635(a).

The Board Member determined a violation was present, and as a result, the Board placed this matter under investigation; however, it was their opinion that Myonex, LLC's actions did not rise to the level requiring formal disciplinary action against their license, and the appropriate disposition for this matter is to issue Myonex, LLC this **Non-Disciplinary Letter of Advisement.**

This letter advises Myonex, LLC to **be aware of all Alaska Board of Pharmacy statutory and regulatory requirements to practice in the state of Alaska and to disclose all future changes in facility managers/designated representatives within the now 30 day requirement after the change occurs.**

This letter will be retained in our files and is evidence of the Board's concern and the fact Myonex, LLC has been notified of the requirement under Alaska Statute 08.80 and Regulation 12 AAC 52 to abide by all laws governing their license.

This investigation is now closed. This letter is non-disciplinary and, therefore, cannot be appealed. This document will not be posted on the public website, however, it is a public document and may be released to an inquirer through an Alaska Public Records Request. Because Myonex, LLC was under official investigation, they, the Board, or the Division may be required to report that information on future license applications, including their Alaska renewal.

Thank you for your cooperation in this matter. Please feel free to contact me directly via email holly.handley@alaska.gov or telephone (907) 269-0356.

Respectfully,

Holly Handley, Investigator
State of Alaska, Board of Pharmacy

I certify under penalty of perjury that the information contained in this application is accurate, true and complete in all material respects. I understand that making any false representation in this application is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire application and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event this application is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.

Sterile Compounding Questionnaire

Rev (08/02/2022)

This application cannot be returned by fax or email.
We must have an original signature to process.

Approval of this completed questionnaire is required for an existing pharmacy, new pharmacy and/or out-sourcing facility applicant who wish to engage in preparing, compounding, dispensing, and furnishing sterile compounded products to Nevada patients or consumers.

Please provide a thorough response to the questions below and provide any necessary supporting documents.
-For a new pharmacy or out-sourcing facility applicant, submit this completed form with your application.
-For an existing pharmacy, send the completed form to the address indicated above.

Section 1: General Information

Pharmacy Name: Saveway Compounding Pharmacy, LLC

NV Pharmacy or Outsourcing facility license # (if applicable): _____

Physical Address: 31 Albe Drive

City: Newark State: DE Zip: 19702

Mailing Address (if different from physical address): _____

City: _____ State: _____ Zip: _____

Telephone: 3023695520 Toll Free # (NAC 639.708, NRS 639.23286): 8772858143

Fax: 3023695853 Contact Email: license@savewaypharmacy.com

Website: www.savewaypharmacy.com

Nevada Business License # (if applicable) _____

Supervising/Managing Pharmacist Name (NRS 639.220): Pradeep Chilakapati

Supervising/Managing Pharmacist NV Pharmacist Registration #: 22784

Name of Person with direct knowledge of compounding procedures: Pradeep Chilakapati

Email of Person with direct knowledge of compounding procedures: license@savewaypharmacy.com

Telephone of Person with direct knowledge of compounding procedures: 3023695520

Section 2: Sterile Compounding Questions (Use a separate piece of paper if additional space is needed.)

1. What risk level sterile compounding will your facility be performing (check all that apply)? ☒ Low ☒ Medium ☒ High
If you marked "High", you must also complete section 4.

2. Will you be performing sterile hazardous drug compounding? ☒ Yes ☐ No
If you marked "Yes", you must also complete section 3.

3. List the sterile compounded products that you will be compounding for Nevada patients or consumers:
WE WILL SHIP COMPOUNDED MEDICATIONS INTO NEVADA BASED ON REQUEST. SINCE THIS IS NEW LICENSURE, WE DO NOT HAVE A HISTORY OF PREPARATIONS SPECIFIC TO NEVADA. WE CAN SUPPLY A LIST OF OUR TOP 100 COMPOUNDED PREPARATIONS IF THAT WOULD BE HELPFUL.

4. Will you be utilizing beyond use dates in excess of USP-797? ☐ Yes ☒ No

5. If yes, describe the additional testing performed on your products to validate the extended BUD:
N/A

6. What laboratory performs this additional testing?
Name: N/A
Address: _____
City: _____ State: _____ Zip: _____
Telephone: _____

7. What is your procedure for visual inspection of compounded sterile products?
SEE ATTACHED SOP 4.016 FINAL CHECK--SECTION 9.5.3.6.7 VISUAL INSPECTION

8. How often do you perform glove fingertip and medial fill testing?

3 GFTs INITIALLY AND THEN 1 GFT QUARTERLY FOR GOWNING QUALIFICAITON AND QTRLY MEDIA FILL FOR PERSONNEL MONITORING. 1 GFT AND SURFACE SAMPLE PER COMPOUNDER PER DAY OF ACTIVITY

9. What is your policy if an employee fails a glove fingertip or media-fill test?

COMPLETE RETRAINING OF FAILED PERSONNEL. PERSONNEL MAY NOT COMPOUND INDEPENDENTLY UNTIL RETESTED WITH PASSING RESULTS.

10. Describe your initial and annual training program for all personnel performing sterile compounding:

READING OF SOPs SPECIFIC TO THEIR EXPECTED DUTIES, ASSIGNED LEARNING FROM CRITICAL POINT, ASEPTIC TECHNIQUE AND CLEAN ROOM BEHAVIOR IS TAUGHT AND THEN DEMONSTRATED, WRITTEN TESTING, SHADOW SENIOR PERSONNEL. TASKS ARE DEMONSTRATED TO NEW HIRE, THEN NEW HIRE PERFORMS TASK UNDER DIRECT SUPERVISION BEFORE PERFORMING INDEPENDENTLY.
ANNUAL TRAINING INCLUDES WRITTEN TESTS, VISUAL OBSERVATION AND DOCUMENTATION OF TASKS, HD TRAINING, SAFETY TRAINING, EVALUATION OF CORE COMPETENCIES, ASSIGNED CRITICAL POINT LEARNING.

11. Describe the cleaning procedure for your primary and secondary engineering controls, including the frequency of cleaning and the names of cleaning, disinfectant, sporicidal, and/or deactivation and decontamination agents used:

PECs ARE CLEANED FROM TOP TO BOTTOM BACK TO FROM STARTING WITH THE CLEANEST AREA AND WORKING FORWARD DAILY. STERILE ISOPROPYL ALCOHOL 70% IS USED TO CLEAN THE PEC IMMEDIATLEY PRIOR TO USE AND BETWEEN EACH CSP. PREEMPT IS USED AT THE END OF EVERY DAY.
WEEKLY CLEANING OF PECs AND SECs IS PERFORMED WITH PERIDOX RTU FOLLOWED BY STERILE IPA70% TO REMOVE RESIDUE AND INCLUDES ALL HORIZONTAL WORK SURFACES, HIGH TOUCH AREAS, EQUIPMENT, CART TOPS, TABLES, ETC.
FLOORS OF ENTIRE COMPOUNDING SUITE ARE CLEANED DAILY WITH HYPOCHLOR 0.525% AND WITH PERIDOX FOLLOWED BY STERILE WATER FOR IRRIGATION TO RINSE MONTHLY.
THE ENTIRE SUITE OF ROOMS, INCLUDING ALL SHELVES AND BINS, WORK AREAS, TABLES, CARTS,AND PECs, ETC ARE EMPTIED AND CLEANED WITH PERIDOX FOLLOWED BY IPA.

12. Who performs the sterile compounding process at your facility?

EXPERTLY TRAINED CERTIFIED PHARMACY TECHNICIANS AND PHARMACIST

13. Who is responsible and accountable for the sterile compounding process at your facility?

BRENDA POLAND IS THE SENIOR QUALITY MANAGER
CAITLIN KOMM, PHARMD IS THE STAFF PHARMACIST AND DEPARTMENT MANAGER ASSIGNED TO THE STERILE DEPARTMENT

14. If products are shipped/mailed, what shipping conditions are used to ensure product safety/efficacy?

IT DEPENDS ON THE PREPARATION BUT ALL COMPOUNDED MEDICATIONS ARE SHIPPED USING PACKAGING MATERIALS TO MAINTAIN THE INTEGRITY, STERILITY, STABILITY AND OVERALL QUALITY OF THE PREPARATION.
SEE ATTACHED SOP 4.024 SHIPPING AND VALIDATION OF COMPOUNDED PREPARATIONS

Section 3: Sterile Hazardous Compounding Questions (Complete this section ONLY if you be performing Sterile Hazardous Compounding.)

1. What type of primary engineering controls will you be using in your facility?

WE HAVE A CLASS II A2 BIOLOGICAL SAFETY CABINET LOCATED IN A NEGATIVE PRESSURE ISO 7 BUFFER ROOM.

2. Is your BSC or CACI vented 100% to the outside?	☑ Yes	☐ No
3. Do you have a negative pressure buffer room at your facility?	☑ Yes	☐ No
4. Will you be compounding with antineoplastic HDs or HD API?	☑ Yes	☐ No
5. If yes, are the drugs stored in an externally ventilated, negative pressure room?	☑ Yes	☐ No
6. Will you be utilizing a closed system transfer device?	☑ Yes	☐ No

7. If yes, list the name of the device:

WHEN NEEDED WE USE ONGUARD CSTD BY BRAUN

8. What information is provided to the patient or consumer on the proper handling and disposal of hazardous drugs products/containers?

ALL HAZARDOUS DRUG SUBSTANCES ARE CLEARLY LABELED AS SUCH AND PACKAGED SECURELY IN IDENTIFYING PACKAGING. PATIENTS ARE OFFERED COUNSELING ON THE SAFE USE OF, RISK ASSOCIATED, AND PROPER DISPOSAL OF HDs.

9. Describe your initial process for training new employees prior to compounding sterile hazardous drugs?

READING OF SOPs SPECIFIC TO THEIR EXPECTED DUTIES AND THE HANDLING OF HDs, ASSIGNED LEARNING FROM CRITICAL POINT, ASEPTIC TECHNIQUE AND CLEAN ROOM BEHAVIOR IS TAUGHT AND THEN DEMONSTRATED, WRITTEN TESTING, SHADOW SENIOR PERSONNEL. TASKS ARE DEMONSTRATED TO NEW HIRE, THEN NEW HIRE PERFORMS TASK UNDER DIRECT SUPERVISION BEFORE PERFORMING INDEPENDENTLY.

ANNUAL TRAINING INCLUDES WRITTEN TESTS, VISUAL OBSERVATION AND DOCUMENTATION OF TASKS, HD TRAINING, SAFETY TRAINING, EVALUATION OF CORE COMPETENCIES, ASSIGNED CRITICAL POINT LEARNING.

Section 4: Sterile High Risk Compounding Questions (Complete this section ONLY if you will be performing High Risk Compounding.)

1. List the specific high risk sterile products that your facility compounds:

SEE ATTACHED LIST OF STERILE COMPOUNDS MADE IN 30 DAYS

2. What sterilization methods are utilized at your facility?

ASEPTIC FILTRATION
TERMINAL STERILIZATION VIA AUTOCLAVE OR DRY HEAT OVEN

3. Does your facility utilize biological indicators? ☑ Yes ☐ No

4. If yes, describe how they are utilized:

BIs ARE PLACED IN EVERY AUTOCLAVE OR DRY HEAT CYCLE CONTAINING A CSP FOR TERMINAL STERILIZATION. THE BI IS THEN TRANSFERRED TO THE CLEANROOM AND ASEPTICALLY PLACED INTO A STERILE VIAL OF GROWTH MEDIA AND THEN INCUBATED AND MONITORED DAILY AND THE RESULTS RECORDED

I certify under penalty of perjury that the information contained in this form is accurate, true and complete in all material respects. I understand that making any false representation in this form is a crime under NRS 639.281. I understand that, pursuant to NRS 239.010, this entire form and any portion thereof is a public record unless otherwise declared confidential by law, and will be considered by the Nevada State Board of Pharmacy at a public meeting pursuant to NRS 241.020. In the event the form is approved I agree to comply with all applicable federal and state statutes and regulations governing this license or registration and understand that any violation may result in discipline.
