Nevada State Board of Pharmacy

RE: Explanation of Disciplinary History
Cardinal Health 200, LLC – Sacramento, CA

Dear Mr. Wuest:

This letter is provided in conjunction with our affirmative response to Question 3 on our application for Wholesale. We have a few matters to disclose based on our parent company, Cardinal Health, Inc. Please note that the facility that is the subject of this application does not have any disciplinary history to disclose.

On September 24, 2020, Cardinal Health finalized a settlement agreement with the Colorado Board of Pharmacy and paid a fine of $1,150. This settlement was regarding the failure of our Denver, Colorado distribution center to timely notify the Board of a change in that distribution center's designated representative.

Cardinal Health's pharmaceutical distribution center in Valencia, California entered into a settlement agreement with the California Board of Pharmacy in April 2019. As a condition of that settlement, the California Wholesale license for our Valencia distribution center was on probation from April 3, 2019, through April 2, 2021. This agreement resulted from the Valencia distribution center making sales to a customer between 2012 and 2014 and the failure to receive a pharmacist's signature on several deliveries in that same time frame.

Additionally, on March 11, 2019, Cardinal Health's Wheeling, West Virginia, distribution center entered into a settlement agreement with the Ohio Board of Pharmacy regarding the security and storage of drugs while those drugs were being distributed to the customer. This issue involved Ohio Board of Pharmacy inspectors manipulating our totes in such a way as to be able to retrieve a bottle out of a strapped/sealed tote. This occurred on several occasions all while the totes were in the custody of our delivery drivers or pharmacies. An inspector also witnessed a delivery vehicle door that was not locked and secured appropriately. Cardinal Health agreed to pay a monetary penalty of $5,000.

As previously reported, on May 15, 2012, Cardinal Health entered into a settlement agreement with the U.S. Drug Enforcement Administration ("DEA") regarding Cardinal Health's registration to distribute controlled substances from our Lakeland, Florida facility. On February 3, 2012, DEA served an Order to Show Cause and Immediate Suspension of Registration (the "Order") on Cardinal Health's Lakeland, Florida distribution center. In the Order, DEA alleged that the Lakeland facility "failed to maintain effective controls against the diversion of controlled substances" and "failed to detect and report suspicious orders of oxycodone by its pharmacy customers." In particular, DEA identified four retail pharmacies located in Florida that were serviced by the Lakeland facility and alleged that "[n]otwithstanding the large quantities of controlled substances ordered by Cardinal's top retail pharmacy customers Cardinal failed to conduct meaningful due diligence to ensure that the controlled substances were not diverted...." Importantly, these allegations did not involve any diversion of controlled substances from Cardinal's facility.

Under the settlement agreement, the Lakeland facility's DEA registration was suspended for two years from the date of the settlement agreement. On May 21, 2014, the suspension was lifted and the DEA reinstated Lakeland's registration. On December 23, 2016, Cardinal Health reached a nationwide settlement with the federal government, resolving the outstanding civil penalty portion of this May 15, 2012, administrative settlement with the DEA. Under this civil settlement, Cardinal Health has agreed to pay $44 million to the Department of Justice (DOJ) to resolve this matter. The DOJ, including the DEA and the United States Attorneys' Offices for the Middle District of Florida, the Southern District of New York, the District of Maryland, and the Western District of Washington and all other districts across the country have also agreed to take no further administrative or civil action on these and related matters. In addition, Cardinal Health has reached an agreement with the State of West Virginia regarding the company's distribution of controlled substances in that state between 2007 and 2012. While Cardinal Health denies the allegations, it agreed to pay West Virginia $20 million to resolve issues and release the company from further actions.

In 2014, the Boards of Pharmacy in both California and Georgia took derivative action based upon the DEA settlement. The Georgia Board fined the Lakeland facility $500 in administrative fees, and the California Board fined the facility $1,505 in investigative fees. Both fees were paid to the respective Boards.

In September 2013, Cardinal Health's distribution center located in Ontario, California, received a citation involving prescription device deliveries being made to an unauthorized customer; the facility paid the fine of $5,000.00 and the matter was closed. In July 2014, the State of Michigan Department of Licensing and Regulatory Affairs (LARA) took derivative action against the Ontario, CA, facility based upon the action described above. LARA issued a Consent Order and fined the Ontario facility $500. Cardinal Health paid the fine to LARA on July 9, 2014.

If you have any questions, Cory Kopitzke, Assistant General Counsel, Regulatory at Cory.Kopitzke01@cardinalhealth.com.

Sincerely,

Keegan Chamberlain
Director, Global Logistics Quality Management

IMPOSITION OF CIVIL FINE
Case # 2021-001195

I, Joshua Franklin, as an agent for Pharmacosmos Therapeutics Inc., admit and agree the Alaska Board of Pharmacy (Board) has jurisdiction over the subject matter of my Out-Of-State Wholesale Drug Distributer License No. 160916, and over this Imposition of Civil Fine.

1. On September 10, 2021, we appointed a new facility manager. On November 04, 2021, the Board received our Change of Facility Manager form with the new facility manager notification; 56 days after the facility manager change occurred. **This is a violation of 12 AAC 52.610(d)(1).**

We admit that as a result of these facts, grounds exist for possible denial of licensure or other disciplinary sanctions of my license pursuant to AS 08.01.75 and 12 AAC 52.610(d)(1). We are agreeing to this Imposition of a Civil Fine of three hundred dollars ($300) in cash, certified check, or money order payable to the **"State of Alaska"** within ninety (90) days after this Imposition of Civil Fine is accepted by the Board.

We have the right to consult with an attorney, and a right to an administrative hearing on the facts in this case. We understand and agree by voluntarily signing this Imposition of Civil Fine, we are waiving our rights to counsel and to a hearing on this matter.

SUMMARY ORDER

NOW, on this 3rd day of September, 2024, comes before the Kansas Board of Pharmacy (the "Board"), through its Executive Secretary, the matter of Pharmacosmos Therapeutics Inc. ("Respondent"), for late renewal of the non-resident manufacturer registration issued by the Board.

Pursuant to the authority granted to the Board by the Kansas Pharmacy Act, K.S.A. 65-1625, *et seq.*, and in accordance with the provisions of the Kansas Administrative Procedure Act, K.S.A. 77-501, *et seq.*, the Board enters this Summary Order in the above-captioned matter. After reviewing the application materials and being otherwise duly advised in the premises, the Board makes the following findings, conclusions, and order:

FINDINGS OF FACT

1. The Board has previously issued Respondent Registration No. 4-111418 which entitles Respondent to operate as a non-resident manufacturer in the State of Kansas ("Respondent's Registration").

2. On July 1, 2024, Respondent's Registration expired for nonrenewal.

3. On August 5, 2024, the Board received Respondent's application for late renewal registration as a non-resident manufacturer in the State of Kansas ("Respondent's Application").

4. In conjunction with Respondent's Application, Respondent provided requested copies of shipping records for products shipped into Kansas. Respondent reported shipping into

Kansas on 21 unique days during the period of expiration.

CONCLUSIONS OF LAW

1. Pursuant to K.S.A. 65-1658, the Board may assess a civil fine not to exceed $5,000, after notice and an opportunity to be heard, to any registrant for violation of the pharmacy act of the state of Kansas or any other rules or regulations of the state board of pharmacy.

2. Pursuant to K.S.A. 65-1627(f)(6), the Board may take action against the application of any manufacturer provider upon a finding that the applicant has violated the pharmacy act of the state of Kansas or any regulation adopted by the Board.

3. Pursuant to K.S.A. 65-1643(g), it shall be unlawful for any person to manufacture any drugs or devices without first obtaining a registration from the Board.

4. Respondent's act of shipping into Kansas with an expired registration and no current manufacturer registration is a violation of K.S.A. 65-1643(g) and is a basis to take action against Respondent's Application pursuant to K.S.A. 65-1627(f)(6).

ORDER

Based upon the foregoing findings of fact and conclusions of law, Respondent's Application is hereby GRANTED but Respondent is ordered to pay a fine to the Board in the amount of $1,920. Respondent has 30 days from the date of this order to pay the fine and the registration shall be issued upon receipt.

Transitioning to a new online licensing system | *Updated Jan. 5, 2024, 09:30 am*

Beginning on January 29, 2024, Dentistry MCSR and Physician MCSR licenses issued by Massachusetts Controlled Substance Registration system will transition to an online licensing system. Learn more... (/news/transitions-to-a-new-online-licensing-system)

Issuance of MCSR to health facilities

Regulations of the Department of Public Health at 105 CMR 700.003 permit the issuance of a Massachusetts Controlled Substances Registration (MSCR) to licensed health facilities as defined in 105 CMR 700.001. A health facility includes the following:

- A hospital, hospital pharmacy, long-term care facility or clinic licensed or maintained by the Department
- A public medical institution as defined in M.G.L. c. 118E § 8
- Any institution licensed or maintained by the Department of Mental Health
- Any hospital, long-term care facility or clinic maintained by the Commonwealth
- Any ambulance service licensed by the Department to provide Advanced Life Support services

Health facilities with an MCSR are advised that such registrations are not transferable. A new MCSR is required for a change in name, ownership or address. An MCSR is valid for one year and must be kept current.

For further information, please contact the Drug Control Program.

Requirements for individuals with limited medical licenses

Regulations of the Department of Public Health at 105 CMR 700.004 (B)(5) permit residents and clinical fellows who have limited medical licenses and wish to prescribe, dispense and administer controlled substances to utilize the registration of the hospital in which he/she is employed provided the following criteria are met:

- A person must be authorized to dispense controlled substances under M.G.L. c. 112, if applicable
- Such dispensing must be done in the usual course of business or professional practice
- The hospital by whom a person is employed must verify with the Board of Registration in Medicine that the individual is permitted to dispense controlled substances
- The person must only act within the scope of his/her employment at the hospital
- The hospital must authorize the person to dispense controlled substances under the registration number of the hospital and designate a specific suffix number to the hospital's registration number preceded by a hyphen for each person authorized
- The hospital must maintain a current list of internal codes and make these codes available at all times to other registrants, the Commissioner and authorized law enforcement agencies

It should be noted that individual hospitals determine whether or not they wish to permit persons with limited licenses to use the registration of the hospital. Should a hospital determine that they do not want individuals with limited licenses to utilize the hospital's registration, the physician must apply to the Department and, where applicable, the U.S. Drug Enforcement Administration (DEA), and receive Controlled Substances Registrations for the period of time for which their limited license is issued. Upon full licensure by the Board of Registration in Medicine, a physician must then reapply to the Department, and, where applicable, to the DEA for a new full registration(s). The appropriate fee must accompany the application to the Department. The newly issued registration will not be restricted to the period of time in which the limited license was valid.

Address for Individual Practitioner Massachusetts Controlled Substance Registration (MCSR) Applications and Renewals

This Circular Letter is issued by the Drug Control Program (DCP), which is part of the Bureau of Health Professions Licensure (BHPL), regarding the address to be provided in Massachusetts Controlled Substance Registration (MCSR) applications and renewals for practitioners listed in 105 CMR 700.004(A)(2).

A practitioner must have an MCSR for each location where they are responsible for the purchase and/or storage of controlled substances. The address provided for the application must be that of the location. For example, if a practitioner MCSR is used to purchase controlled substances and authorize storage at two separate practice offices, that practitioner must have two separate MCSRs, one for each such practice office. Each of the MCSR applications must list the physical address of the practice office to be covered by the MCSR.

If a practitioner is not responsible for the purchase and/or storage of controlled substances, they may use any address where DCP can direct program communications for the practitioner. For example, if a Practitioner only prescribes and administers controlled substances, they may use any address where the practitioner can be regularly reached, including the following:

- A post office box or other mail collection type location is permissible for this category of MCSR. The practitioner will be responsible for the prompt receipt and response to communications sent to such an address.
- A practitioner may also elect to use a home address, noting that all MCSR related addresses are considered public information, and will be provided in response to public records requests, unless the practitioner qualifies for a Public Records Law exemption and requests suppression of this personal information.

Massachusetts Controlled Substance Registrations (MCSRs) for Third Party Logistics Providers, Virtual Manufacturers and Virtual Distributors

This Circular Letter is issued by the Drug Control Program (DCP), which is part of the Bureau of Health Professions Licensure, regarding registration of Third Party Logistics Providers (3PLs), Virtual Manufacturers and Virtual Distributors. The purpose is to assist registrants who conduct these kinds of operations to understand which of the three MCSRs available for virtual activities best meets the needs of their business.

1. ***Selecting the Appropriate MCSR Category***

A **Virtual Manufacturer** is a person/entity with a principal place of business in the Commonwealth of Massachusetts but which never takes physical possession of controlled substances in the Commonwealth. [1] (/news/circular-letter-dcp-23-04-117#_ftn1) An example of a Virtual Manufacturer could be a person/entity with a principal office in Massachusetts, while its manufacturing operations are located in another state. Manufacturing operations are managed or directed in Massachusetts, but no controlled substances are manufactured or stored in Massachusetts. An MCSR for virtual manufacturing would also authorize the person/entity to conduct virtual distribution of its own controlled substance products.

A **Virtual Distributor** is a person/entity with a principal place of business in Massachusetts but which never take physical possession of controlled substances in Massachusetts.[2] (/news/circular-letter-dcp-23-04-117#_ftn2) An example of a Virtual Distributor could be a person/entity with a principal office in Massachusetts, while its distribution centers, warehouses, trucking operations, etc. are all located in other states. Distribution operations are managed or directed in the Massachusetts, but no controlled substances are received or stored in Massachusetts.

A **3PL** is an entity that provides or coordinates warehousing, or other logistics services, of a product in interstate commerce on behalf of a manufacturer, wholesale distributor, or dispenser of a product, but does not take ownership of the product, nor has responsibility to direct the sale or disposition of the product. 3PLs are federally regulated under 21 U.S.C. § 360eee-3. A 3PL may choose to conduct purely virtual activities in Massachusetts , where it directs or manages from Massachusetts but does not receive or store controlled substance here. However, under current federal law, a 3PL may also employ a business model where it takes custody of controlled substances as part of the logistical arrangements being made. An example of this might be that a 3PL chooses to store controlled substances in its warehouse or distribution center located in Massachusetts as part of its operations.

The primary difference between Virtual Manufacturers/Distributors and 3PLs is that Virtual Manufacturers and Distributors never take possession of any controlled substance in Massachusetts, while a 3PL may choose to do so.

2. ***Pre-Registration Inspections***

Virtual Manufacturers and Distributors register with the Commonwealth of Massachusetts primarily because regulators in other states require that they be registered in their "home" state to conduct operations in the other state. For these registrants, no physical inspection of their premises in Massachusetts will be conducted, unless requested. If, at any point, a Virtual Manufacturer or Distributor plans to have controlled substances on site, it must register with DCP for an appropriate MCSR (e.g. manufacturer or distributor) and complete an inspection.

Federal law requires that a 3PL be registered with any state where the 3PL distributes a controlled substance to or from such state.[3] (/news/circular-letter-dcp-23-04-117#_ftn3) Federal law also bars states from licensing/registering 3PLs as wholesale distributors.[4] (/news/circular-letter-dcp-23-04-117#_ftn4) Therefore, the Drug Control Program is making a 3PL MCSR available for this kind of business. To register, a 3PL will need to certify on its initial application and any subsequent renewal applications whether it will be taking custody of controlled substances in Massachusetts. If it is taking custody in Massachusetts, an inspection will be conducted of the necessary premises. If it is registering here for purely virtual activities, no inspection will be conducted, unless requested.

Please direct any questions or concerns to the Drug Control Program: **dcp.dph@mass.gov** (mailto:dcp.dph@mass.gov).

SUMMARY RISK FACTORS

Below is a summary of material factors that make an investment in our securities speculative or risky. Importantly, this summary does not address all of the risks and uncertainties that we face. Additional discussion of the risks and uncertainties summarized in this risk factor summary, as well as other risks and uncertainties that we face, can be found under the section titled "*Risk Factors*" in Item 1A of this Annual Report on Form 10-K. The below summary is qualified in its entirety by that more complete discussion of such risks and uncertainties. You should consider carefully the risks and uncertainties described in the section titled "*Risk Factors*" as part of your evaluation of an investment in our securities:

- We have a limited operating history and have incurred significant losses since inception and anticipate that we may continue to incur losses for the foreseeable future, and may never achieve or maintain profitability.
- We will need substantial funding to pursue our business objectives. If we are unable to raise capital when needed or on favorable terms, we could be forced to delay, reduce or terminate our product development, other operations or commercialization efforts. Additionally, raising additional capital may cause dilution to our stockholders, restrict our operations or require us to relinquish proprietary rights.
- If we do not obtain regulatory approval for and successfully commercialize our product candidates in one or more indications or we experience significant delays in doing so, we may never generate any revenue or become profitable.
- Our approach to the discovery and development of product candidates based on our Drug-Drug Conjugate platform is unproven and is based on novel technology, and we do not know whether we will be able to develop any products of commercial value, or if competing technological approaches will limit the commercial value of our product candidates or render our platform obsolete.
- Clinical trials are very expensive, time-consuming and difficult to design and implement, and involve uncertain outcomes. Furthermore, results of earlier preclinical studies and clinical trials may not be predictive of results of future preclinical studies or clinical trials.
- We may encounter substantial delays in our preclinical studies or clinical trials or we may fail to demonstrate safety and efficacy to the satisfaction of applicable regulatory authorities.

- If any of our product candidates receives marketing approval and we, or others, later discover that the drug is less effective than previously believed or causes undesirable side effects that were not previously identified, our ability to market the drug could be compromised.
- We may become exposed to costly and damaging liability claims, either when testing our product candidates in the clinic or at the commercial stage, and our product liability insurance may not cover all damages from such claims.
- We have never commercialized a product candidate and we may lack the necessary expertise, personnel and resources to successfully commercialize any of our products that receive regulatory approval on our own or together with collaborators.
- We face substantial competition, which may result in others discovering, developing or commercializing products before or more successfully than we do.
- Even if we obtain regulatory approval for our product candidates, they will remain subject to ongoing regulatory oversight.
- We rely on third parties to perform the chemistry work associated with our drug discovery and preclinical activities and to conduct our preclinical studies and future clinical trials, and our business could be substantially harmed if these third parties cease performing services or perform in an unsatisfactory manner.
- We do not have our own manufacturing capabilities and will rely on third parties to produce clinical and commercial supplies of NUV-868 and our other current and future product candidates.
- If we are not able to establish collaborations, we may have to alter some of our future development and commercialization plans.
- Our business operations and current and future relationships with investigators, healthcare professionals, consultants, third-party payors and customers will be subject, directly or indirectly, to federal and state healthcare fraud and abuse laws, false claims laws, transparency laws, health information privacy and security laws and other healthcare laws and regulations including equivalent foreign laws and regulations. If we are unable to comply, or have not fully complied, with such laws, we could face substantial penalties.
- If we are unable to obtain, maintain, protect and enforce sufficient patent and other intellectual property rights for our product candidates and technology, or if the scope of patent and other intellectual property rights obtained is not sufficiently broad, we may not be able to compete effectively in our market.
- Our reliance on third parties requires us to share our trade secrets, which increases the possibility that a competitor will discover them or that our trade secrets will be misappropriated or disclosed.
- We may become involved in lawsuits to protect or enforce our patents or other intellectual property, which could be expensive, time-consuming and unsuccessful, and issued patents covering our technology and product candidates could be found invalid or unenforceable if challenged.
- Third parties may initiate legal proceedings alleging that we are infringing, misappropriating or otherwise violating their intellectual property rights, the outcome of which would be uncertain and could negatively impact the success of our business.
- Intellectual property litigation could cause us to spend substantial resources and distract our personnel from their normal responsibilities.
- Our business, operations and clinical development plans and timelines and supply chain could be adversely affected by the effects of health epidemics, on the manufacturing, clinical trial and other business activities performed by us or by third parties with whom we conduct business, including our contract manufacturing organizations ("CMOs"), contract research organizations ("CROs"), shippers and others.
- Our future success depends on our ability to retain Dr. Hung and our other key employees, consultants and advisors and to attract, retain and motivate qualified personnel.

- The dual-class structure of our common stock has the effect of concentrating voting power with our Chief Executive Officer, which limits other stockholders' ability to influence the outcome of important transactions, including a change in control.

Business Overview

We are a clinical-stage biopharmaceutical company tackling some of the greatest unmet needs in oncology by developing differentiated and novel therapeutic candidates. We were founded in 2018 by our chief executive officer, David Hung, M.D., who founded Medivation, Inc. and led its successful development of oncology drugs Xtandi® and talazoparib (now marketed as Talzenna®), leading to its $14.3 billion sale to Pfizer Inc. ("Pfizer") in 2016.

We leverage our team's extensive expertise in medicinal chemistry, preclinical discovery, manufacturing, drug development and commercialization to bring forward novel small molecules that improve the activity and overcome the liabilities of currently marketed drugs to address major unmet needs in oncology.

The foundations of our approach include:

- ***The pursuit of validated targets***: We identify and pursue oncology targets validated by strong clinical or preclinical data that provide a high degree of confidence in generating clinically meaningful benefit. We focus on targets where there has been some progress by others in generating clinical candidates or FDA-approved drugs, and we then attempt to design novel therapeutic candidates to overcome the encountered safety liabilities or limitations in efficacy.
- ***Innovative medicinal chemistry expertise:*** We use our medicinal chemistry proficiency to generate differentiated therapeutic candidates, focused on improving their safety, anti-tumor activity and pharmacologic profiles over other standard of care ("SOC") therapies. We also use innovative medicinal chemistry approaches to generate novel classes of molecules such as our DDCs.
- ***Human capital management***: We believe our employees are our greatest assets, and we recognize that attracting, motivating and retaining talent at all levels is vital to our continued success. We are building a culture that fosters a productive, professional and inclusive work environment, where our employees can thrive, have fun, and be inspired to perform their best work.

The following table summarizes our product candidate pipeline:

Our most advanced clinical stage product candidate, NUV-868, is a BD2-selective oral small molecule BET inhibitor. NUV-868 inhibits the protein BRD4, a key member of the BET family that epigenetically regulates a number of important proteins that control tumor growth and differentiation, including oncogenes such as c-myc. Notably, BET proteins have critical biological functions and are found to be altered in many human cancers (Bechter and Schoffski, 2020). We have designed NUV-868 to potentially reduce the therapeutic limiting toxicities of BRD4 inhibitors currently in development by optimizing BD2 versus BD1 selectivity. NUV-868 is almost 1,500 times more selective for BD2 than BD1. Non-selective BD1/2-inhibitors in development have been associated with tolerability issues, potentially due to BD1 inhibition, especially in the gastrointestinal ("GI") tract and bone marrow (Faivre et al 2020). NUV-868 in combination with PARP inhibitors may have synergistic activity to increase efficacy across multiple solid tumors. In addition, NUV-868 in combination with androgen receptor-directed therapies may help to overcome resistance in prostate cancer. In January 2022, the FDA cleared an IND application for NUV-868 for the treatment of patients with advanced solid tumors and we initiated a Phase 1 monotherapy dose escalation study for this indication in March 2022 to determine a maximum tolerated dose ("MTD"). In December 2022, we initiated a Phase 1b dose escalation study of NUV-868 in combination with olaparib in patients with ovarian cancer, pancreatic cancer, metastatic castration-resistant prostate cancer ("mCRPC"), triple negative breast cancer ("TNBC"), and other solid tumors, and in combination with enzalutamide in patients with mCRPC. We have completed the Phase 1 monotherapy study and determined the maximum tolerated dose. The combination studies are ongoing.

Our DDC platform is a novel therapeutic approach within the drug-conjugate class of anti-cancer therapies with parallels to Antibody-Drug Conjugates ("ADCs"). ADCs have been effective treatments in oncology, with at least eleven drugs approved by the FDA and an estimated $11.0 billion in worldwide sales expected in 2023. We believe our DDC candidates could expand the therapeutic potential for the drug-conjugate class due to inherently differentiated properties versus ADCs, including a potentially simpler manufacturing process, the potential to cross the cell membrane and recognize intracellular targets, and the potential for oral or intravenous ("IV") dosing. We are designing DDCs to selectively deliver potent anti-cancer therapeutics to cancer cells to exert greater toxicity against these target tumor cells than against healthy non-target tissues. Utilizing this platform, we are able to conjugate tissue-selective targeted small molecules with anti-tumor agents to create unique therapeutic candidates. We have demonstrated this by synthetically fusing a proven anti-cancer small molecule drug to a second small molecule that selectively binds distinct receptors that are preferentially expressed in cancer cells. These tissue-specific receptors create a "sink" that not only may concentrate the targeted drug in cancer cells but may also magnify the effects of the drug in those cells, while preventing similar effects in cells that do not express the targeted receptor. We believe this would allow our DDC candidates to limit some of the adverse effects commonly seen with many cancer drugs, such as bone marrow suppression and GI toxicity. Because this program at its core fuses the active sites of two or more small molecules to each other to generate a new small molecule with improved activity and targeted specificity, they are called DDCs. In January 2024, we announced that the FDA cleared an IND application for NUV-1511, the first clinical candidate from our DDC platform.

Strategy

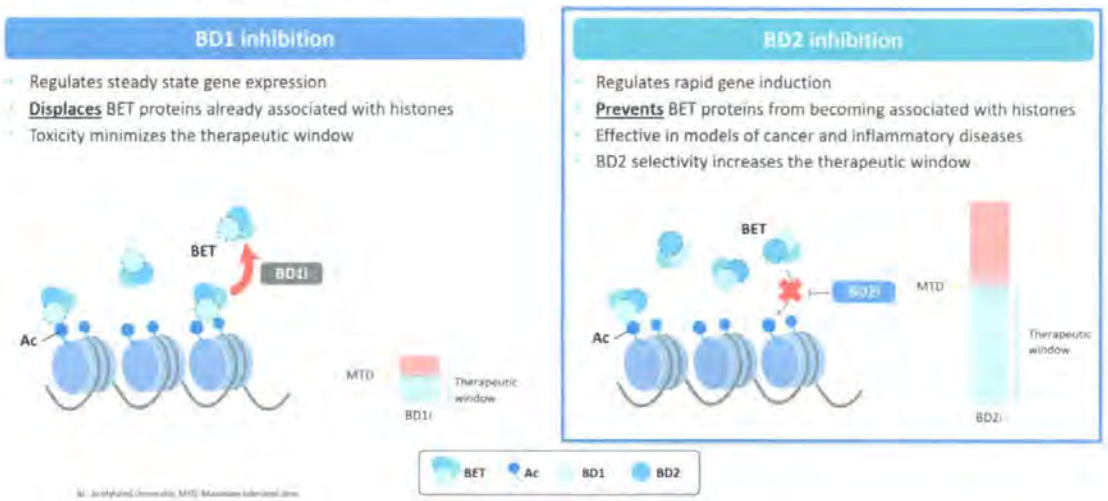
We strive to deliver meaningful benefit to patients with serious unmet medical needs in oncology by developing novel and differentiated therapies. The core elements of our strategy include:

- ***Rapidly advance the development of our clinical stage product candidate, NUV-868, a BD2-selective oral small molecule BET inhibitor, toward regulatory approval for the treatment of various cancers.*** We have advanced NUV-868 through preclinical studies that have informed a robust clinical development plan. We plan to explore NUV-868 in combination with SOC or other agents in multiple tumor types. We initiated a Phase 1 monotherapy dose escalation study of NUV-868 in March 2022 and a Phase 1b dose escalation study of NUV-868 in combination with olaparib or enzalutamide in December 2022. We intend to initiate a Phase 2 study to further explore safety and efficacy across multiple tumor types once the recommended Phase 2 dose is determined.
- ***Advance candidates from our DDC platform to expand our oncology-focused pipeline.*** We are developing a pipeline of potent oncology-focused chimeric small molecules which combine tumor-targeting specificity with the anti-cancer activity of known oncology agents. In January 2024, we announced that the FDA cleared an IND for NUV-1511, the first clinical candidate from our DDC platform. In the first half of 2024, we intend on initiating a Phase 1/2 dose study of NUV-1511 that will initially evaluate safety and tolerability, and explore the potential clinical efficacy, in patients with advanced solid tumors who previously received and progressed on or after treatment with Enhertu® and/or Trodelvy® per approved FDA labeling, human epidermal growth factor receptor 2-negative ("HER2-") metastatic breast cancer, mCRPC, pancreatic cancer, and platinum-resistant ovarian cancer ("PROC").
- ***Continue to leverage our deep insights in medicinal chemistry to pursue innovative clinical candidates.*** We have established medicinal chemistry expertise that has enabled us to rapidly pursue our current pipeline and platform. We intend to leverage these capabilities to pursue both new and validated targets in patients with serious unmet medical needs.
- ***Evaluate strategic opportunities to accelerate development timelines and maximize value of our product candidate pipeline.*** We currently own the exclusive worldwide development and commercial rights to each of our product candidates. We intend to evaluate collaborations that could maximize the value of our product candidate pipeline, either through the evaluation of our product candidates in combination with compounds owned by third parties or through geographic collaborations outside of the U.S. that allow us to leverage the existing infrastructure of other companies.
- ***Build a fully integrated global oncology company.*** We intend to continue building a fully integrated research, development and commercialization focused company. Our team's track record of success underscores their proven expertise in discovering, developing and delivering innovative medicines to patients. If our therapeutic candidates are approved, we intend to establish a focused commercial infrastructure and selectively expand our global commercial capabilities.

Programs

Overview of NUV-868: BET Inhibitor Program

NUV-868, a BD2-selective oral small molecule BET inhibitor, inhibits BRD4, a key member of the BET family that epigenetically regulates proteins that control tumor growth and differentiation. BETs consist of two sub-domains: BD1, the inhibition of which is known to contribute to toxicity, and BD2, the inhibition of which is expected to be important for efficacy. BET inhibitors have historically targeted both BD1 and BD2 less selectively, causing gastrointestinal toxicity and bone marrow suppressive effects like thrombocytopenia. NUV-868 is almost 1,500 times more selective for BD2 than BD1 and is designed to alleviate the therapeutic limiting toxicities observed by other non-BD2 selective BET inhibitors. NUV-868 in combination with androgen receptor-directed therapies may help to overcome resistance in prostate cancer. In addition, NUV-868 in combination with PARP inhibitors may have synergistic activity to increase efficacy across multiple solid tumors.



BET Inhibition in Advanced Solid Tumors

The BET family of proteins have critical biological functions and are found to be altered in many human cancers (Bechter and Schoffski, 2020). Genetic screening and nonclinical studies have implicated BET proteins in both hematologic malignancies and in solid tumors. BET proteins have been shown to drive transcription of a variety of oncogenes (reviewed in Taniguchi, 2016). For example, BRD4 was found to be enriched at super-enhancer regions of genes that play a major role in oncogenesis (Loven et al, 2013). Inhibition of BRD4 led to defects in transcription along with decreased mRNA of super-enhancer driven genes, including the Myc oncogene (Loven et al, 2013). Besides genetic alterations, overexpression and perturbation of physiological BET function have been described. Chromosomal translocations involving BRD4 and BRD3 have been identified in particularly aggressive forms of nuclear protein in testis (NUT) carcinomas (NC) (French et al, 2010; French et al, 2008). Overexpression of both BRD2 and BRD4 have been observed in glioblastoma cell lines and stem cells (Pastori et al, 2014). Furthermore, gene amplification and overexpression of BRD4 have been observed in patients with some ovarian cancers (Goundiam et al, 2015). Together, these observations suggest that the BET protein family plays multiple roles in oncogenesis.

BET proteins are epigenetic readers that turn on specific genes by binding unique regions of the genome through their ability to read specific chemical tags on chromatin. In some instances, BET proteins turn on oncogenes that are abnormally expressed in a variety of human cancers, such as c-myc. C-myc is believed to play a role in promoting the growth of up to 70% of all cancers. BET inhibitors have the potential to downregulate the expression of such driver oncogenes. These observations have resulted in the generation and clinical investigation of BET inhibitors in several cancer subtypes.

Emerging evidence suggests distinct roles for the BD1 and BD2 domains of BET proteins (Gilan et al 2020). As described in the figure below, inhibition of BD1 may play a predominant role in regulating steady state gene expression through the displacement of BET proteins already associated with histones. Inhibition of BD1 has also been associated with toxicity (including bone marrow suppression and gastrointestinal effects), which together may limit the therapeutic window for agents which potently inhibit BD1. In contrast, inhibition of the BD2 domain may play a predominant role in regulating rapid gene induction by preventing BET proteins from associating with histones. BD2 selective agents have demonstrated efficacy in both cancer and inflammatory models, while having more limited effects on bone marrow and gastrointestinal cells, and may therefore have a wider therapeutic window than non-BD2 selective BET inhibitors.

BD2 MAY SELECTIVELY BLOCK THE ABILITY OF CANCER CELLS TO INDUCE RESISTANCE PATHWAYS, AND BY AVOIDING BD1 INHIBITION, MAY INCREASE TOLERABILTY

Our Potential Solution –NUV-868

NUV-868 is a small molecule BD2-selective BETi for the treatment of solid tumors that is almost 1,500 times more selective for BD2 than BD1, which may potentially enable this molecule to reduce the toxicities associated with other non-BD2 selective inhibitors. Given BET's potential as an oncology target, there are several BET inhibitors in development for several cancers. Other BET inhibitors that are not as selective for BD2, have been associated with toxicities including bone marrow, gastrointestinal and thrombocytopenia. The selectivity of several BET inhibitors that are currently in development is shown in the table below.

NUV-868's BD2 selectivity may also limit gut toxicity observed with other non-selective BD1/BD2 BET inhibitors. In tissue samples from a rat small intestine treated with vehicle and non-selective BET inhibitor, ABBV-075, treatment with ABBV-075 led to a marked reduction in healthy goblet cells, which are central in protecting the mucous membrane in the GI tract (Faivre et al 2020). By comparison, a notably higher dose (30 mg/kg) of NUV-868 showed no apparent evidence of goblet cell loss in mice. These results are shown in the images below. We believe this data supports the potential for NUV-868 to limit the gastrointestinal toxicities that are associated with other BET inhibitors.

NUV-868: REDUCED GUT TOXICITY COMPARED WITH NON-SELECTIVE BET INHIBITORS IN ANIMAL MODELS

The other main toxicity associated with BET inhibitors is thrombocytopenia. While most non-selective BET inhibitors lower platelet levels and cause thrombocytopenia, NUV-868 has demonstrated higher platelet levels as a function of reversing platelet suppression associated with untreated tumor burden and a lack of bone marrow-suppressive side effects in xenograft studies. In the table below, platelet counts are measured in a MV4-11 AML xenograft hematology panel 24 hours post the final dose of NUV-868 on day 21 across three dose levels. As compared to treatment with vehicle, platelet counts are higher for the NUV-868 cohorts across the low (5 mg/kg), medium (10 mg/kg) and high (20 mg/kg) doses. Additionally, as shown in the table below, daily dosing of NUV-868 at 20 mg/kg to either male or female non-tumor bearing rats did not decrease platelet counts.

Preclinical Data

In two AML xenograft models, including a Kasumi-1 and an MV-4-11 model, NUV-868 demonstrated anti-tumor activity as compared to vehicle following oral dosing with NUV-868 at 20 mg/kg twice daily (BID) out to 21 days, as shown in the figure below.

The pharmacodynamic effects of NUV-868 were evaluated in a systemic MV-4-11 model. NUV-868 was evaluated at a dose of 20 mg/kg BID. mRNA was isolated from control-treated and NUV-868 treated animals after 5 days of treatment. As demonstrated in the figure below, NUV-868 treatment reduced expression of tumor-promoting genes, c-Myc and BCL-2, and upregulated the tumor suppressor gene, Hexim-1, which is indicative of BET inhibition.

Our Current Opportunities for NUV-868

Overview of Prostate Cancer

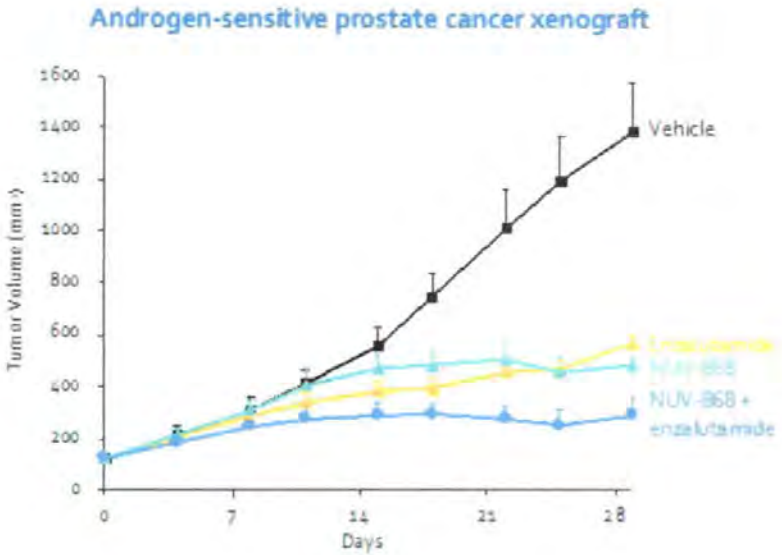
Prostate cancer is reported as the second and third leading cause of cancer death for men in the U.S. and in Europe, respectively. SEER cancer statistics estimated that approximately 175,000 men in the U.S. and 450,000 men in the EU5 would be diagnosed with prostate cancer in 2020, potentially resulting in a $15 billion market opportunity given the costs of treatment.

For early-stage prostate cancer, the SOC is a radical prostatectomy, the removal of the prostate via surgery, or radiation therapy. While potentially curative, prostatectomy and/or radiation can result in serious side effects, including urinary and fecal incontinence and erectile dysfunction, as a result of damage to surrounding vital structures, blood vessels and nerves. Given the invasive nature of the procedure, prostatectomy surgery also brings the risk of complications with anesthesia, bleeding, and infection.

mCRPC is the most advanced form of the disease, and there are approximately 35,000 to 45,000 new incidences of mCRPC each year. Men with mCRPC have a poor prognosis and a predicted survival time of less than three years from the initial time of progression.

Current SOC for men with mCRPC provides that patients should initially receive a combination of androgen deprivation therapy ("ADT") and either abiraterone, which works by decreasing androgen levels, or enzalutamide, which works by blocking androgen binding to AR. If the disease progresses despite these second-generation hormonal therapies, chemotherapy is considered the next treatment option. Treatment with chemotherapy is generally postponed for as long as possible due to its effect on patient's quality of life and the potential for severe side effects including

neuropathies, nausea, diarrhea, decreased mental capacity and increased risk of infections.

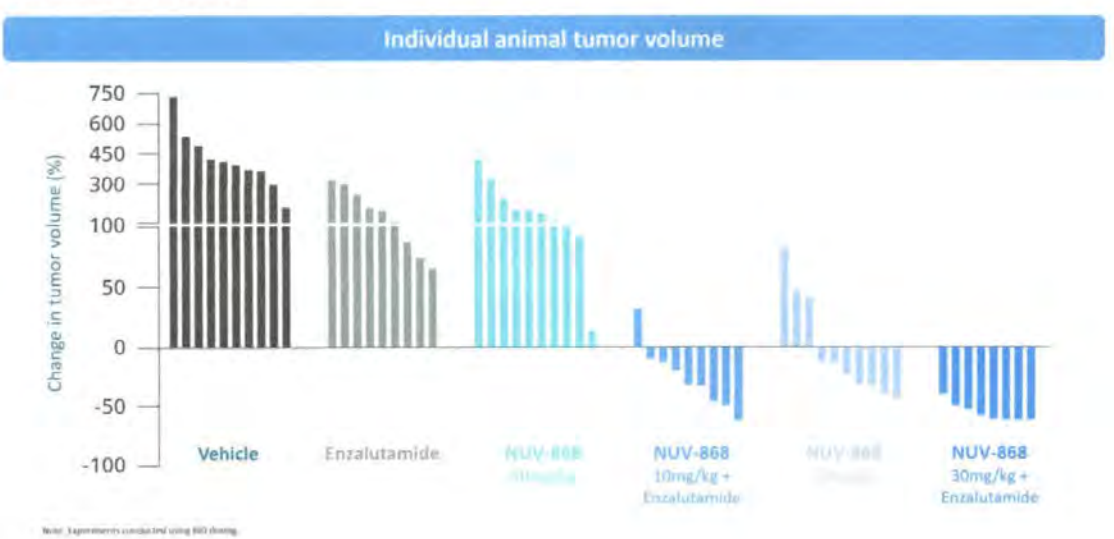


Clinical Rationale for Combining BET Inhibition with Anti-Androgen Therapy in mCRPC

The androgen receptor (AR) plays a pivotal role in castration-resistant prostate cancer, and androgen deprivation therapy is an effective strategy for suppressing the progression of most prostate cancers (Fujita and Nonomura, 2019). Enzalutamide is a nonsteroidal antiandrogen approved for the treatment of castration-resistant and metastatic castration-sensitive prostate cancer. The drug has been studied extensively in the clinic and, along with available real-world data since its approval, shows strong evidence of its efficacy and tolerability (Scott, 2018). Many patients with castration-resistant prostate cancer eventually develop resistance to antiandrogens, including enzalutamide, through a variety of mechanisms related to the AR, including mutation and overexpression (Fujita and Nonomura, 2019). A potential therapeutic strategy to overcome antiandrogen resistance is through BET inhibition, specifically inhibition of BRD4, which has been shown to drive transcription of the AR (Faivre et al, 2017). Data from a nonclinical study showed that a dual AR and BET inhibitor reduced transactivation of the AR mutant that mediates enzalutamide resistance, inhibited proliferation of AR-positive prostate cancer cells, and suppressed growth of prostate cancer xenografts in vivo (Yu et al, 2020). Additional nonclinical data provide evidence that combining BET inhibitors with AR antagonists, such as enzalutamide, could prevent resistance to these antagonists (Asangani et al, 2016). Published results from a Phase 1b/2a study of ZEN-3694 in combination with enzalutamide in patients with mCRPC showed promising preliminary efficacy results (radiographic progression-free survival [rPFS] of 9 months, with a rPFS of 10 months in patients with prior progression on enzalutamide monotherapy) (Aggarwal et al, 2020).

Preclinical Data

The in vivo antitumor activity of NUV-868 alone and in combination with enzalutamide was evaluated in an androgen-sensitive cell line-derived xenograft model, implanted subcutaneously in the flank of immunocompromised mice. NUV-868 was administered orally BID at 20 mg/kg. Treatment with NUV-868 alone, and in combination with enzalutamide, resulted in reduced tumor volume ($p<0.001$) compared to the vehicle-treated group. The combination resulted in significant growth inhibition than enzalutamide ($p<0.01$) or NUV-868 alone ($p<0.05$).



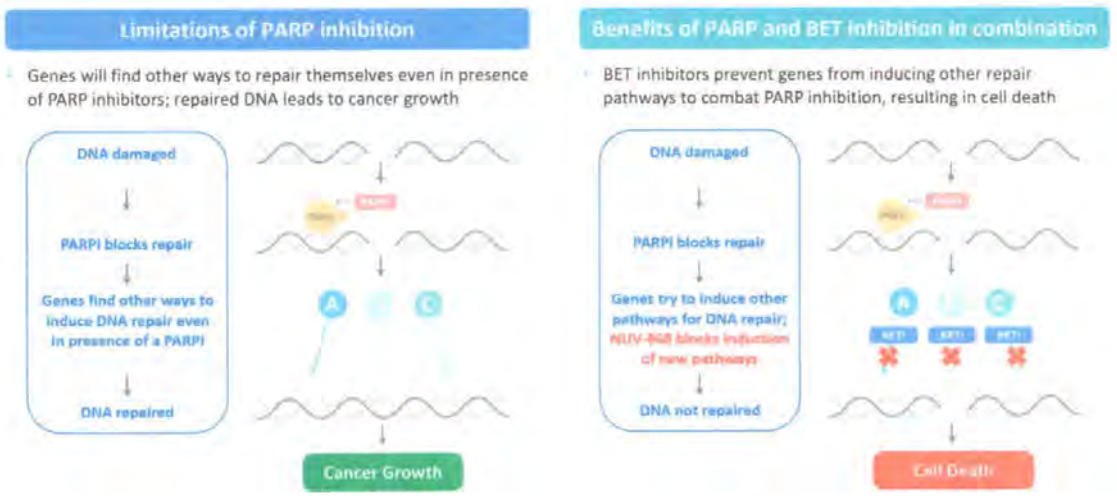
NUV-868 IN COMBINATION WITH ENZALUTAMIDE SIGNIFICANTLY INHIBITS GROWTH OF ANDROGEN-SENSITIVE PROSTATE CANCER XENOGRAFTS

NUV-868 in combination with AR directed therapies may help to overcome resistance in prostate cancer. Inhibition of BRD4 has been shown to drive transcription of the AR (Faivre et al, 2017). BET inhibitors given with AR antagonists, such as enzalutamide, may prevent resistance to these antagonists (Asangani et al, 2016).

NUV-868 as a single agent caused tumor reductions in an enzalutamide-resistant patient-derived prostate cancer xenograft model as noted in the graph below. Additionally, NUV-868 appears to have re-sensitized such tumors back to enzalutamide as the combination caused deep tumor reductions in this model.

NUV-868 TREATMENT CONVERTS ENZALUTAMIDE-RESISTANT PATIENT DERIVED PROSTATE CANCER XENOGRAFTS TO AGAIN BE ENZALUTAMIDE-SENSITIVE

Overview of PARP Inhibitors in various Advanced Solid Cancers



Poly (ADP-ribose) polymerase (PARP) inhibitors block DNA repair and replication in cancer cells. Originally, PARP inhibitors were shown to target cells deficient in breast cancer gene 1 or breast cancer gene 2 (BRCA)-dependent homologous recombination pathways (Farmer et al, 2005); however, nonclinical and clinical evidence suggests that PARP inhibitors may also be effective in cancers lacking BRCA 1/2 mutations through alternative mechanisms (Keung et al, 2020; Kim et al, 2019; Ledermann et al, 2014; Mirza et al, 2016), expanding the potential population who might benefit from PARP inhibition. Several PARP inhibitors have now been approved for solid organ cancers, including ovarian, breast, prostate, and pancreatic cancers; however, their long-term use may be limited due to the development of resistance (reviewed in Kim et al, 2021).

Clinical Rationale for Combining BET Inhibitors with PARP Inhibitors in various Advanced Solid Cancers

Combination therapies that include drugs with other mechanisms of action are being investigated to potentially overcome common mechanisms of resistance to PARP inhibitors. Several nonclinical studies have provided evidence that BET inhibitors in combination with PARP inhibitors may provide synergistic activity against ovarian, breast, prostate, pancreatic, and small cell lung cancers and in cholangiocarcinoma (Fehling et al, 2020; Fiorentino et al, 2020; Karakashev et al, 2017; Liu et al, 2020; Miller et al, 2019; Mio et al, 2019; Pawar et al, 2018; Wilson et al, 2018; Yang et al, 2017). Two clinical studies are currently ongoing to test combination treatment using investigational BET inhibitors alongside approved PARP inhibitors: a Phase 2 study of ZEN-3694 + talazoparib in patients with metastatic or recurrent TNBC (NCT03901469) and a Phase 1/2 study of PLX2853 + olaparib in patients with mCRPC (NCT04556617).

Use of BET inhibitors in combination with PARP inhibitors may also have synergistic activity to increase efficacy across multiple solid tumors, as shown in the figure below. Several nonclinical studies have provided evidence that BETi in combination with PARPi may provide synergistic activity against ovarian, breast, prostate, pancreatic, and small cell lung cancers (Fehling et al, 2020; Fiorentino et al, 2020; Karakashev et al, 2017; Lui et al, 2020; Miller et al, 2019; Mio et al, 2019; Pawar et al, 2018; Wilson et al, 2018; Yang et al, 2017).

Regarding the Company Reorganization

Bausch & Lomb Incorporated (B&L) notifies the Board of an organizational structure change in its holding company from Bausch Health Americas, Inc. to Bausch+Lomb Netherlands B.V., a Netherlands entity, another indirect subsidiary of Bausch Health Companies Inc. Despite this change, please note that Bausch Health Companies Inc. (BHC Inc.) remains the ultimate corporate parent of B&L. Bausch Health Americas, Inc. remains an indirect subsidiary of BHC Inc. BHC Inc. remains the owner, accounting of approximately 88% of the equity interest of Bausch + Lomb Corporation.

This change results from a corporate restructure that only affects the immediate parent company of B&L while maintaining ultimate control and ownership with BHC Inc. **B&L remains a separate legal entity, with no changes in personnel or FEIN # as a result of this change.** Enclosed please find an organizational chart listing both immediate and ultimate parent and percentages of ownership/equity.

Regarding the Company Reorganization

Bausch & Lomb Incorporated (B&L) notifies the Board of an organizational structure change in its holding company from Bausch Health Americas, Inc. to Bausch+Lomb Netherlands B.V., a Netherlands entity, another indirect subsidiary of Bausch Health Companies Inc. Despite this change, please note that Bausch Health Companies Inc. (BHC Inc.) remains the ultimate corporate parent of B&L. Bausch Health Americas, Inc. remains an indirect subsidiary of BHC Inc. BHC Inc. remains the owner, accounting of approximately 88% of the equity interest of Bausch + Lomb Corporation.

This change results from a corporate restructure that only affects the immediate parent company of B&L while maintaining ultimate control and ownership with BHC Inc. **B&L remains a separate legal entity, with no changes in personnel or FEIN # as a result of this change.** Enclosed please find an organizational chart listing both immediate and ultimate parent and percentages of ownership/equity.

Regarding: DiaSorin Inc. 1951 Northwestern Ave. Stillwater, MN 55082. The entity is seeking a license in your jurisdiction

To whom it may concern:

At this time the State of Minnesota does not regulate medical device companies (manufacturers or distributors) through either the Board of Pharmacy or any other health board or division. As there is no statutory or rules reference to this, we offer the related FAQ information from our official website:

https://mn.gov/boards/pharmacy/resourcesfaqs/faqs/generalfaqs.jsp

Does your Board of Pharmacy license or register medical device or medical supply manufacturers, wholesale distributors, supplies or retailers?
The Board does not license or register companies that exclusively manufacture, distribute, supply or sell medical devices or supplies. If a company that handles medical devices or supplies also manufactures or distributes drugs, it must be licensed as a drug manufacturer or drug wholesaler. Exception if the drug is coated on or embedded in the device (e.g. drug-coated stents) and the resultant product is approved by the FDA as a device, the company does not have to be licensed as a manufacturer or wholesale distributor.

DiaSorin is a medical diagnostics company which exclusively manufactures, distributes, supplies, or sells medical devices and/or supplies but not drugs. The establishment is registered as a device manufacturer with the FDA as registration number 2182595. The FDA registration site offers additional information on the items registered.

If you have any questions you may reach out to me at the MN Board of Pharmacy any time.

Thank you,

Regarding the Ownership Restructuring

Please note that LEO Pharma Inc. has undergone an internal re-organization. The LEO family of companies created a US holding company and transferred the stock of LEO Pharma Inc. to the new holding company. **In this scenario, a holding company was created on the parent level, and the initial parent company became the grandparent company. As such, there has not been a change in ultimate control. Please also note that the FEIN # of the licensed entity has not changed.** Below please find current and previous ownership organizational charts.

(c) The names and addresses of the intial board of directors (the "**Board of Directors**") are attached in **Exhibit A**.

(d) Hereafter, any change to the number of directors which shall constitute the Board of Directors shall be fixed exclusively by resolutions adopted by a majority of the authorized number of directors constituting the Board of Directors.

11. The Corporation shall have the right, subject to any express provisions or restrictions contained in this Certificate of Incorporation of the Corporation (the "**Certificate of Incorporation**") or the By-Laws, from time to time, to amend, alter, or repeal any provision of the Certificate of Incorporation in any manner now or hereafter provided by law, and all rights and powers of any kind conferred upon a director or stockholder of the Corporation by the Certificate of Incorporation or any amendment thereof are conferred subject to such right.

13. Unless the Corporation consents in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have subject matter jurisdiction, the federal district court for the State of Delaware) shall, to the fullest extent permitted by law, be the sole and exclusive forum for: (i) any derivative action or proceeding brought on behalf of the Corporation, (ii) any action asserting a claim for breach of a fiduciary duty owed by any director, officer, employee, or stockholder of the Corporation to the Corporation or the Corporation's stockholders, (iii) any action asserting a claim arising pursuant to any provision of the DGCL, the Certificate of Incorporation, or the By-Laws (as either may be amended or restated) or as to which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware, or (iv) any action asserting a claim governed by the internal affairs doctrine. 14. Notwithstanding any other provisions of this Certificate of Incorporation or any provision of applicable law which might otherwise permit a lesser vote or no vote, but in

Docusign Envelope ID: A5BB7AB1-7633-4DCF-97F9-C3E209B55330

Registration No. 5-110669	)	

SUMMARY ORDER

NOW, on this 1st day of November 2019, comes before the Kansas Board of Pharmacy (the "Board"), through its Executive Director, the matter of Novadoz Pharmaceuticals, LLC ("Respondent").

Pursuant to the authority granted to the Board by the Kansas Pharmacy Act, K.S.A. 65-1625, *et seq.*, and in accordance with the Kansas Administrative Procedure Act, K.S.A. 77-501, *et seq.*, the Board's Executive Secretary enters this Summary Order in the above-captioned matter. After reviewing the investigation materials and being otherwise duly advised in the premises, makes the following findings, conclusions and order:

FINDINGS OF FACT

1. The Board has previously issued Respondent Registration No. 5-106949 which entitled Respondent to operate as a wholesale distributor in the State of Kansas ("Respondent's Registration").

2. On June 3, 2019, Respondent submitted to the Board application for renewal of their Registration ("Respondent's Renewal"), which was due to expire on June 30, 2019.

3. On June 3, 2019, the Board approved Respondent's Renewal, effective July 1, 2019.

4. On July 3, 2019, two days after Respondent's Renewal became effective, Respondent experienced a change in ownership.

5. On October 8, 2019, the Board received from Respondent a Form BA-05 Distributor Registration Application ("Respondent's Application"), notifying of the July 3rd change in ownership, and applying for new distributor registration under the new ownership.

6. On October 14, 2019, the Board approved Respondent's Application effective immediately, issuing Respondent the new Registration No. 5-110669.

CONCLUSIONS OF LAW

1. Pursuant to K.S.A. 65-1658, the Board may assess a civil fine not to exceed $5,000, after notice and an opportunity to be heard, to any registrant for violation of the pharmacy act of the state of Kansas or any other rules or regulations of the state board of pharmacy.

2. Pursuant to K.S.A. 65-1643(c), it shall be unlawful for any person to distribute at wholesale any drugs without first obtaining a registration as a wholesale distributor form the Board.

3. Respondent's Application indicated that Respondent continued to function as a wholesale distributor in the state of Kansas after the July 3, 2019 ownership change rendered their license invalid, and prior to obtaining new valid registration on October 14, 2019.

4. By continuing to operate as a wholesale distributor under an invalid license, Respondent violated K.S.A. 65-1643(c).

ORDER

The Board finds and concludes that Respondent's conduct, as described above, violates the Act and such conduct warrants the imposition of a fine pursuant to K.S.A. 65-1658, in the amount of $500.00. Respondent has 30 days from the date of this order to pay the full $500.00.

NOTICES

The Respondent is hereby notified as follows:

1. The Respondent may request a hearing pursuant to the Kansas Administrative Procedure Act by filing a written request with the Kansas Board of Pharmacy, 800 SW Jackson, Suite 1414, Topeka, KS 66612-1231 within fifteen (15) days after service of this order.

2. If a hearing is not requested as described above, the Order shall become a final order of the Board, effective upon the expiration of the time to request a hearing.

3. Within fifteen (15) days after entry of a final agency order, either party may file a petition for reconsideration pursuant to K.S.A. 77-529.

Dear Maria,

I'd like to clarify the relationship between Intuvie LLC, Zyno Medical LLC and InfuTronix LLC.
The applicant, Intuvie LLC is shipping Zyno Medical's products exclusively to all of clinics including distributors with no restriction.
The manufacturer of the products, Zyno Medical LLC only ships the products to Intuvie LLC. Intuvie LLC does not distribute any products from InfuTronix any longer.

Intuvie LLC, Zyno Medical LLC and InfuTronix LLC are affiliates under the same ownership.

To further clarify, Intuvie LLC is NOT only shipping products to Zyno Medical and InfuTronix.

Hope I answered your question.

Looking forward to hearing from you soon.

Best,
Steve Kim

Pharmaceutical Trade Services Inc. Statement regarding Question 3 on PTSI Application.

Pharmaceutical Trade Services, Inc. DBA Durbin USA Mississippi Facility in 2021 reached a Civil settlement with the US DEA resulting in paying a fine of $175,000.00 and entering into a 3 (three) year MOA, copy of which is attached. This 2021 Agreement was neither an admission of liability by PTSI nor a concession by the United States that its claims are not well founded and was regarded record keeping issues concerning Controlled Substance distribution. After the inspection which brought these issues to light and lead to this settlement, PTSI MS Facility conducted extensive review and implemented new processes. PTSI MS Facility was again audited by the DEA in March 2023 with no deficiencies noted and by MS Board of Pharmacy in September 2023 without any findings against their MS CS licenses (see attached copy MS Inspection Form).

While this Civil Settlement *does not apply to* the same Facility that is the subject of this application, PTSI wanted to be forthcoming regarding this settlement and the proactive steps taken to correct the issues involved.

PTSI North Carolina Facility (the Facility subject of this application) intends to apply for Controlled Substance licenses and DEA Certification in Q4 2024 and will be implementing such policies and procedures, along with conducting employee training, to meet all DEA and State requirements so as to conduct CS distribution with exemplary high standards.

SETTLEMENT AGREEMENT

This Settlement Agreement ("Agreement") is entered into among the United States of America, acting through the U.S. Department of Justice and on behalf of the U.S. Drug Enforcement Administration (collectively "the United States") and Pharmaceutical Trade Services, Inc. d/b/a Durbin USA ("Durbin") (collectively referred to hereinafter as "the Parties"), through their authorized representatives.

1. The United States has informed Durbin that from facts now available to the U.S. Department of Justice, Durbin's conduct during the period from August 7, 2013, through August 7, 2020, may give rise to civil liability under certain laws and regulations of the United States, including the Comprehensive Drug Abuse Prevention and Control Act of 1970, 21 U.S.C. § 801 *et seq.* and its associated regulations and common law.

2. The United States has determined that it has good cause to initiate a civil action alleging certain claims and causes of action against Durbin based on the Comprehensive Drug Abuse and Control Act of 1970, for monetary penalties as a result of violations of, *inter alia*, 21 U.S.C. §§ 827(a), 828(a), 842(a), and 843(a) and 21 C.F.R. §§ 1304.11, 1304.21, 1304.22, 1305.03, and 1305.12. This Agreement is neither an admission of liability or fact by Durbin, nor an admission of agreement as to the United States' alleged cause, nor a concession by the United States that its claims are not well founded.

3. To avoid the delay, uncertainty, inconvenience, and expense of protracted litigation of the above claims, and in accordance with the mutual covenants and agreements made herein, the Parties, with full authority to enter into this Agreement and to be bound thereby, agree that, on or before November 30, 2021,

Durbin shall pay to the United States the sum total of $175,000.00 (hereinafter "debt"). No interest shall be incurred from the date of the Agreement through November 30, 2021.

a. Such debt shall be paid in the form of a certified or cashier's check or via Fedwire. If payment is made via Fedwire, it shall be in accordance with the instructions provided by the United States. If payment is made via certified or cashier's check, it shall be payable to the United States Department of Justice, shall include "Pharmaceutical Trade Services, Inc. d/b/a Durbin USA case number ___"[1] in the memo line of the check, and shall be delivered to

U.S. Department of Justice
Nationwide Central Intake Facility
P.O. Box 790363
St. Louis, MO 63179-0363

b. Upon execution of this Agreement, the total debt will be placed on the Treasury Offset Program ("TOP"), and Durbin agrees to the offset and application of any tax refunds or other payments from the U.S. Treasury to which Durbin may be entitled until the debt is paid in full. Once the debt is paid in full, the United States will promptly remove the debt from the TOP and no offset shall be made.

4. Durbin agrees to enter into a Memorandum of Agreement with the U.S. Drug Enforcement Administration. The Memorandum of Agreement is attached to this Agreement and made a part hereof.

5. In consideration of the full and timely payment of the sum agreed upon in

[1] The "case number" will be provided by the United States to Durbin in a separate communication.

Paragraph 3 of this Agreement and execution of the Memorandum of Agreement described in Paragraph 4 of this Agreement, the United States waives and releases Durbin, its parent entities, subsidiaries, affiliates, successors, and assigns, and promises to refrain from instituting any criminal, civil, or administrative claim, action, charge, suit, or proceeding by or on behalf of the Drug Enforcement Administration arising from the specific matters set forth in this Agreement against Durbin, its parent entities, subsidiaries, affiliates, successors, and assigns.

6. Notwithstanding the release given in paragraph 5 of this Agreement, or any other term of this Agreement, the following claims of the United States are specifically reserved and not released:

    a. any liability arising under Title 26 of the United States Code (Internal Revenue Code) and/or

    b. any liability based upon obligations created by this Agreement.

7. Each party and signatory to this Agreement represents that it freely and voluntarily enters into this Agreement without compulsion. Each party is represented by counsel.

8. This Agreement is governed by the laws of the United States. The exclusive jurisdiction and venue for any dispute relating to this Agreement is the United States District Court for the Southern District of Mississippi. For purposes of construing this Agreement, the Agreement shall be deemed to have been drafted by all Parties to this Agreement and therefore shall not be construed against any Party for that reason in any subsequent dispute.

9. Should Durbin subsequently be determined to have violated the terms and conditions of this Agreement, Durbin shall be liable to the United States for any

costs and attorneys' fees incurred by the United States in any action for noncompliance with this Agreement.

10. This Agreement constitutes the full and complete Agreement between the Parties, with respect to the matters covered herein, and no modification shall be effective unless in writing and signed by the Party against whom it is sought to be enforced.

11. This is a publicly available document, and Durbin waives any claim that this document along with any information contained herein is subject to the Privacy Act of 1974, 5 U.S.C. § 552a.
